Some Points of Danger Which Should Be Avoi-

If out of doors, trees should be avoided and if from the rapidity with which the explosion follows the flash, it should be evident that the electric clouds are near at hand, recumbent posture on the ground is the most secure. It is seldom dangerous to take shelter under sheds, carts or low buildings, or under the arch of a bridge. The distance of 20 or 30 feet from tall trees or house is rather an eligible situation; for should a discharge take place these elevated bodies are like-

## An Unreliable Female.

From Texas Siftings. "You say that you have been engaged to be married three times?" said young man to a Harlem belle.

"Well, then I don't think there will be any use of my making and engage ment to go to the theatre with you tomorrow night."

"Why not?" "Because you don't appear to keep your engagements."

Thus far the only woollen manufacfor free wool is one whose goods, when analyzed, were found to contain a filling made of 92½ per cent. of cotton and 7½ per cent. of shoddy. He may well feel alarmed. The power to force such clothing upon the American people will be lost when wool is free.
