ONE DOLLAR

o-EVERY HOUR-

is easily earned by any one of either sex in any part of the country, who is willing to work industriously at the employment which we furnish. The lator is light and pleasant, and you run no isk whatever. We fit you out complete, so that you can give the business a trial without expense to yourself. For these willing to do a little work, this is the grandest offer made. You can work all day, or in the evening only. If you are employed, and have a few spare hours at your disposal, utilize them, and add to your income,—our business will not interfere at all. You will be amazed on the start at the rapidity and ease by which you amass dollar upon dollar, day in and day out. Even beginners are successful from the first hour. Any one can run the business—none fail. You should try nothing else until you see for yourself what you can do at the business which we offer. No capital risked. Women are grand workers; nowadays they make as much as men. They should try this business, as it is so well adapted to them Write at once and see for yourself.

Read following testimonial of an eminent Centre county physician. GATESBURG, Centre County, Pa., Aug. 9, 1892

GENTLEMEN: —I had suffered with Rheumatism for many years, when, at the advanced age of seventy-seven years, your cure was recommended to me. I had tried up n myself everything known to me, (I am a doctor of fifter the seventy of t everything known to me, (I am a doctor of fity-one years experience) and had dispaired of ever being cured. Your remedy was taken according to directions, and after using the second package the disease left me entirely and no rheumatic pain or ache has troubled me since.

I can recommend it without hesitancy to all afflicted with the disease, and being familiar with the ingredients contained in the compound, can recommend them as being non-injurious to the constitution, and as being the most efficient blood remedy known.

Truly Yours,

DANIEL BATES, M. D. FOR SALE BY ALL DRUGGISTS.

The Waste at Panama

In confirmation of the private ac count of the deserted Panama Canal works, published the other a different correspondent sends the following in a private letter: "While in Colon last voyage I made a careful tour of the Panama bogie, and the stores, engine sheds, rolling and floating stock. Words cannot paint my astonishment at the sight, I never saw anything so sinful in my life as to see all that stuff going to rack and ruin. I went through one 'store'-of places-bigger than any shipyard on level. Clyde could boast; all the things just as they came from the makers. Files never unpacked; every engineer's tool you can think of-English, French, American, was there - Whitworth's stocks, dies and taps, about twenty cases complete, good as when they left the shop. I walked for a mile over the only roadway passable along the canal side, viz., the top of a train of eight-

undergrowth. "All around is swampy ground, and all these wagons are rotting beneath that blazing sun. Engine steam sheds, full of fine, powerful engines, the sheds overrun and inhabited now by snakes and their prey, the lizards, while the six foot is full of land crab holes. I saw eight fine, large marine boilers, just as they had been discharged from the R. M. cargo boat that brought them over, and the complete part of a set of a big compo marine engine, about 1,000 horse-power, lying on the shore; never been used; never fitted in I saw dry-docks, splendidly built and equipped with fine, expensive pumping plant. And why say more? Poor old DeLesseps' house on the point locks very melancholy.

wheel bogie freight wagons, all sinking

in, the wheels disappeared in tropical

Where Kauri Gum is Found.

Kauri gum is formed of the turpentine that has exuded from the kauri tree a species of pine which is the finest and for general purposes the most useful for-est tree in New Zealand. Thirty years ago the Maoris were the only people who employed themselves in searching for this gum, which at that time was to be found on or cropping out of the sur-face of the ground, where perhaps ages before forests of kauri had stood.

After a few years' exports the Laoris began to dig for the gum a few inches ness.—B. W. Sperry, Hartford, Conn. below the surface. As the uses for it increased, its market value rose, and and presently Europeans betook them-selves to digging for it, until at the present time there are probably 4,000 whites and 1.000 Maoris engaged in the work in the Auckland provincial dis-trict, where alone the gum is to be found. Hence the output has steadily increased during the last thirty years notwithstanding that the gum is not reproduced, except to a very inappreciable extent, in the existing forests, and these are being rapidly cut down ba-cause of the commercial value of the

Within a measurable period of time the production of the gum must cease. although it is expected that at the present rate it will take 50 years to exhaust the deposits in the Auckland district. In some places gum bearing land has been purchased from the crown for settlement purposes, and the gum unearthed in plowing it has been sold for enough to pay the purchase money of the land and for plowing, fencing and sowing it as well.—London Times.

Methodists May Not Exhibit. They are Angry Over the Small Space Compared to Catholics

It is probable that the Methodist Church will make no exhibits at the world's Fair. A few days ago several prominent elders called on Chiet Peabody, of the liberal arts Department of the World's Fair, with a view of getting more space for the Methodist exhibit. They were informed that the Roman Catholics were allotted 20,000 square feet, while the Methodists were given but 400.

"We got no satisfaction from the chief," said Rev. N. N. Axtel to-day, "and the probability is that we will make no exhibit. We were informed that the allotment of space to church societies was made December 22, 1892. and as our application was in long before we felt slighted. We are discussing the project of devoting the whole building of the Methodist Episcopal Book Concern, at 51 Washington street fully decided upon it.'

Telling a Cow's Age.

A cow's age is indicated by her horns. At the age of 2 a ring of thick material forms at the base of each horn, and one ring is added every year after this be-comes apparent. To find the age, therefore, count the rings and add two. In the case of a bull, however, the first ring does not appear until he is 5 years old, and one annual ring appears after that. kicking myself for marrying you." so to the number of rings on a bull's horns five must be added. The result attained is, however, only approximately correct, for not only is the time of appearance of the first ring uncertain, but occasionally two rings appear in one year, and then again sometimes a year is omitted, no ring being formed. A dishonest dealer can also change the apparent age of the animal by filing off some of the rings from her horns, so that complete reliance on this sign is some-

ome Facts Furnished by the Engineers of the

Some practical facts are furnished by it must be remembered that the climatic conditions are very differennt and more unfavorable in Peru than in Europe. Mr. E. Lane, the engineer-in-chief, finds that the workmen up to an altitude of 8,000 or 10,000 feet do about the same relative quantity of work as at sea level provided they have been inured to the height or brought up in the country. At 12,000 feet the amount of work and at 14,000 to 16,000 a full third has to be deducted from the amount that these there are six in all, at different the same man could perform at sea

Owing to the absence of malaria the percentage of efficient labor at the great-est elevation is a very high one. Men est elevation is a very high one. coming from the coast are not found capable of doing efficient work for about two weeks on an average when taken to high elevations. The capacity gradually increases and reaches its maximum in a few weeks or months, according to the constitution of the indi-vidual. The majority of the laborers are "Cholos," or Indians born in Sierra, They are found incapable of doing efficient work on the coast or in warm weather altitudes without a long course of acclimatization. It gangs of these "Cholos" have for special purposes been taken down suddenly from the Sierra to work at altitudes of from 2.000 to 5,000 feet, sickness and fever have resulted from the change.

Mules and horses are found to do about the same efficient work, proportionately as human beings up to about 17,000 feet in this district. Mules stand the climate best, but, again, require some weeks of acclimatization, and if urged to undue exertion at great altitudes they are liable to drop dead suddenly. It be remarked that the region of perpetual snow in the district begins at about 18,000 feet.—Nineteenth Century.

-I have been a great sufferer from catarrh for over ten years; had it very bad, could bardly breathe. nights I could not sleep and had to walk the floor. I purchased Ely's Cream Balm and am using it freely, it is working a cure surely. I have advised several friends to use it, and with happy results in every case. It is the medicine above all others for catarrh, and it is worth its weight in gold. I use with safety and that does all that is claimed for it. It is curing my deaf-

> -If fish is a brain food there ought to be a notable increase in mental activity during Lent.

People with delicate stomachs find Aver's Sarsaparilla agreeable to the taste, and, therefore, prefer it as a blood-purifier to any other. This is one reason for its great pop-ularity as a spring and family medicine. Safe, certain, and palatable

Medical.

DEATH WAS NEAR

AFTER THE GRIP-A CLOSE CALL FOR MR. EDDY.

SAVED BY HOOD'S SARSAPARILLA.

Mr. Henry Eddy is a watchman, and occupies a portion of Mr. Baker's drugstore, Norwich, N. Y. He is well known at his former home in North Harpersville and elsewhere about the State. He says:

"Last January I had the grip very severely. Shortly after my recovery I was taken with a terrible deathly sickness in my stomach and fearful cramps and spasms. It was entirely different from a case of colic. My limbs felt like ice. My forehead was 'covered with great beads of cold, clammy sweat. I surely thought and so did my friends, that

DEATH WAS VERY NEAR,

ves, even at the door. Thanks to promp medical attention, I got over it, but I had many similar spells later, not so severe, until they became regular, just before, and about one hour after meals. It was a terrible feeling and, failing to get relief, I did not care how soon the grim destroyer came to put an end to it. I had medical treatment from several physicians for many weeks, but I had not only got no better, but worse. One day my mother who had used

HOOD'S!

SARSAPARILLA CURES

Hood's Sarsaparilla, advised me to try it. I -Wife-"A man is a fool to have told her I knew it would do me no good, but anything to do with a lottery." Hus-band—"You hit it, then. I'm still ly began taking it. I had only taken a few doses when

I BEGAN TO FEEL BETTER. Its first effect was to draw out a thick rash on

my face, that soon disappeared. By the time that I had taken a bottle the trouble in my stomach had entirely left, and I am feeling in excellent health, have a good appetite, and can eat anything without suffering. I am ex ceedingly well pleased with tation. The land of the Great White HOOD'S SARSAPARILLA
