

Farm Notes.

Green manurial crops make the cheapest foods for poor soils that require a year or two for their restoration to fertility...

EARLY GREEN CROPS.

The best manurial crop, early in the year, is to sow oats and peas together, harrowed in, and the ground rolled. This is turned under as soon as the seed pods begin to form...

LATER CROPS.

Once the early crop is secured the later crops are easy to select and grow. Anything may be said to answer, such as corn, sorghum, millet, Hungarian grass, buckwheat, and late in the season rye may be seeded for the next spring's plowing...

USE LIME ALSO.

After plowing under each crop apply lime, broad casted over the surface if only but five bushels per acre, but more will be better. It not only aids in quickly decomposing the green matter turned under but assists in making the crops better while they are growing...

A new fodder plant, known as "Serradella," is being introduced from Germany. It thrives well on poor, sandy soils, makes good pasture and hay, and is highly relished by cattle.

What is fed to swine in Europe, and it may pay to use wheat as food for swine in this country. Experiments made with the use of wheat by Professor Robinson demonstrated that frozen wheat, which had been soaked 12 hours, gave an increase of 14 pounds live weight for each bushel of the wheat allowed.

Professor Plumb says that the cows in Indiana do not average 90 pounds of butter each in one year, and this also, no doubt, applies to other States. When it is considered that a few superior cows have produced over 1000 pounds of butter in one year, the loss to farmers from keeping poor cows must be enormous.

A resident of New Jersey, who has only one acre of ground, buys 400 pounds of fertilizer every year, at a cost of about \$10. He uses wheel hoes does the work during extra times, and raises all kinds of vegetables and fruit for his family, the value of which, if he had to purchase them, being \$200.

A shovelful of fine tobacco powder, placed around each plant, and around the hills, has been found to be the best preventive of the attacks of the striped beetle on cucumber, melon and squash vines.

Sow the seeds of tomatoes in hot-beds or boxes. Early Ruby, Acme, Gemma and Perfection are excellent varieties. Quite a large number of plants can be grown in a soap box.

One of the best materials for protecting the trunks of trees against borers and other insects is ordinary wire mosquito netting, which can easily be wrapped around the trunk.

Use plenty of seed for grass. One peck of timothy seed per acre will give better results than to economize in that respect.

"The blood is the life," runs the old saying, and everything that ever makes part of any organ of the body must reach its place therein through the blood. Therefore, if the blood is purified and kept in good condition by the use of Hood's Sarsaparilla, it necessarily follows that the benefit of the medicine is imparted to every organ of the body. Can anything be simpler than the method by which this excellent medicine gives good health to all who will try it fairly and patiently?

Saddlery.

SCHOFIELD'S NEW HARNESS HOUSE. We extend a most cordial invitation to our patrons and the public, in general, to witness one of the

GRANDEST DISPLAY OF Light and Heavy Harness ever put on the Bellefonte market, which will be made in the large room, formerly occupied by Harper Bros., on Spring street. It has been added to my factory and will be used exclusively for the sale of harness, being the first exclusive salesroom ever used in this town, as heretofore the custom has been to sell goods in the room in which they were made. This elegant room has been refitted and furnished with glass cases in which the harness can be nicely displayed and still kept away from heat and dust, the enemies of long wear in leather. Our factory now occupies a room 16x7 feet and the store 6x60 added makes it the largest establishment of its kind outside of Philadelphia and Pittsburg.

We are prepared to offer better bargains in the future than we have done in the past, and we want everyone to see our goods and get prices for when you do this, out of self defense you will buy. Our profits are not large, but by selling lots of goods we can afford to live in Bellefonte. We are not indulging in idle philanthropy. It is a pure business. We see that not making much, but trade is growing and that is what we are interested in now. Profits will take care of themselves. When other houses discharged their workmen during the winter they were all put to work in my factory, nevertheless the work of houses of this city and county would amply if we compared ourselves to them, but we do not mean to be so odious as to venture our assertion that none of them can say, as we can say "NO ONE OWES US A CENT THAT WE CAN'T GET." This is the whole story.

The following are kept constantly on hand. 50 SETS OF LIGHT HARNESS, prices from \$8.00 to \$15.00 and upwards. LARGE STOCK OF HEAVY HARNESS price per set \$25.00 and upwards. 500 HORSE COLLARS from \$1.50 to \$5.00 each, over \$10.00 worth of HARNESS OILS and AXLE GREASE, \$400 worth of Fly Nets sold cheap \$100 worth of whips from 1c to \$1.00 each, Horse Brushes, Curry Combs, Sponges, Chamios, RING SADDLES, LADY SADDLES, Harness Soap, Knee Dusters, at low prices. Saddlery-hardware always on hand for sale. Harness Leather as low as 50c per pound. We keep everything to be found in a FIRST CLASS HARNESS STORE—no change in stock for 20 years in the same room. No shops in the same town to catch trade—NO SELLING OUT for the want of trade or prices. Four harness-makers at steady work with us. This is our idea of protection to labor, when other houses discharged their hands, they soon found work with us. JAS. SCHOFIELD, Spring street, Bellefonte, Pa. 33 37
