Saddlery. SCHOFIELD'S NEW HARNESS HOUSE. Bellefonte, Pa., April 14, 189

We extend a most cordial invitation to our patrons and the public, in general, to witness one of the

GRANDEST DISPLAY OF

Light and Heavy Harness

ever put on the Bellefonte market, which will be made in the large room, formerly occupied by Harper Bros., on Spring street. It has been added to my factory and will be used exclu-sively for the sale of harness, being the first exclusive salesroom ever used in this town, an heretofore the custom has been to sell goods in the room in which they were made. Thi, elegant room has been refitted and furnished with glass cases in which the harness can be nicely displayed and still kept away from heat and dust, the enemies of long wear in learner. Our factory now occupies a room 16x74 ieet and the store 20x60 added makes if the largest establishment of its kind outside of Philadelphia and Pittsburg. We are prepared to offer better bareains in

of Philadelphia and Pittsburg. We are prepared to offer better bargains in the future than we have done in the past and we want, everyone to see our goods and get prices for when you do this, out of self defense you will buy. Our profits are not large, but by selling lots of goods we can afford to live in Bellefonte. We are not indulging in idle philanthropy. It is purely business. We are not making much, but trade is growing and that is what we are intrasted in now. Profits will take care of themselves. When other houses discharged their work-men during the winter they were all put to work in my factory, nevertheless the big (f) houses of this city and county would smile ff we compared ourselves to them, but we do not mean to be so odious, except to venture the as-section that none of them can say, as we can say "NO ONE OWES US A CENT THAT WE CAN'T GET." This is the whole story.

Charl GEL. This is the whole story.
The following are kept constantly on hand.
50 SETS OF LIGHT HARNESS, prices from
\$8,00 to \$15,00 and upwards, LARGE
STOCK OF HEAVY HARNESS per
'set\$25,00 and upwards, to 0 HORSE
COLLARS from \$1,50 to \$5,00
each, over \$100,00 worth of

-Bad complexion indicates an unhealthy state of the system. DeWitt's Little Farly Risers are pills that will correct this condition. They act on the liver, they act on the stom-ach, they act on the bowels.—For sale at C. M. Parrish's Drug Store.

When Ooctors All Agree.

It is a fact well established, that February and March are the most trying months to aged or enfeebled persons. Pneumonia, influenza and kindred chest afflictions, are most liable to get in their deadly work. There is but one thing to do, build up and and fortify the system with a pure stimulant. Medical men sll over the country agree that Klein's "Silver Age" at \$1.50 per quart, and "Duquesne" at \$1.25 per quart, stand without a peer. If y want fine six year old Guckenheimer, Find Gibson, Overholt, or Bear Creek, you can ha hem at \$1.00 per quart or six qu rts for \$5

### Farm Notes

Seed may be tested by putting them on a flannel cloth, covering them with another cloth and keeping them moist. A New York man says that blackberries should yield 50 bushels per acre the second year and 300 bushels the

third year. Soot from the chimney is an excelleut fertilizer for pot plants. Mix it with water and apply it around the roots.

North Carolina inflicts a penalty of \$50 on all seedsmen who fail to put date of growing on each package of seeds they sell.

Before you plant an orchard, and select the varieties desired, first endeavor to learn which of the varieties are best adopted to your section.

Sheep give three profits in one yearwool, lamb and mutton. It may be added that the manure is also nearly as valuable as the wool on poor farms.

Do not allow pools of water around young trees. Bank up the earth around each tree, or make a drain. Water keeps the ground cool and retards growth.

Grow a crop of carrots for your hors-es and cows. Carrots will give a golden color to the butter; and are highly relished by the cows, while horses are very partial to them, considering them a delicacy.

The breaking of a young horse is comparatively easy if we change the most regular pattern you ever saw. I word "break" to "teach," and begin to | traded it for a fifty-acre lot." teach as soon as the pupil is old enough to understand, which will be a very short time after birth.

Small farms being nearer neighbors closer schools, better roads and wider experience. The most successful farmers are those who have educational advantages and enjoy facilities that cannot be obtained where the population is sparse.

For young chicks to thrive in a the day until eight weeks old ; then turn them in the fattening department, feeding soft, sweet tood for two weeks and they are ready for market.

Onions, peas, early cabhage, kale, raddish, beets, carrots, parsnips, salsity and lettuce may be planted now. String beans, lima beans, squash, cucumbers, melons and tomatoes will not stand the cold nights, and cannot go into the open ground until danger of frost is over.

Nothing should be wasted on the farm. It is an advantage to keep at least one or two pigs where the refuse can be given them. Such useless articles as apple parings, leaves and tops

druggist. He used it to shoot holes in porous plasters fifty at a clip. And then nothing could be heard except the scratching of the other man's pen as he wrote out his resignation. -----The confidence that people have in Ayer's Sarsaparilla as a blood medi--

cine is the legitimate and natural brooder they must be kept warm at growth of many years. It has been night, and given plenty exercise during banded down from parent to child, and is the favorite family medicine in thousands of households.

of vegetables, weeds and whey are all of vegetables, weeds and whey are all readily accepted by pigs, and are more suitable for them at this season than HAIR AND EYFBROWS FELL OFF. DOC suitable for them at this season than grain.

A half acre devoted to a garden will convince the farmer that he can make at least a good living on a small farm.

convince the farmer that he can make at least a good living on a small farm. The value of a garden crop should not be estimated by the prices which the articles will bring it sold, but by what they would cost the farmer if he did not have them and had to buy them. Removing ticks from lambs without dipping the lambs is laborious work, but it is claimed that if a teaspoontul of sulphur is allowed each lamb, in the ground food, once a day, in dry weath-er only, the ticks will be destroyed. In using sulphur for stock, however, it may be mentioned that there is risk of rheumatism, as the effect of allowing it during damp weather. The farmer who grows a little of everything may not succeed with some crops, but it overtaken by a season of drought he will not be so liable to loss

drought he will not be so liable to loss as the farmer who makes a specialty of only one or two crops. He will al so have a greater variety of farm pro-duce for his own use, and will enjoy The new Blood and Skin Purifier, internally and Calicura, the great Skin Cure, and Culi-cura Soap, the exquisite Skin Beautifier, ex-ternally, instantly relieve and speedily cure every disease and humor of the skin, sealp, and blood, with loss of hair, from infancy to age, from the pimples to scrofula. life on the farm better than he who re stricts his operations to a single crop.

Dairying is considered a science in Europe. In Germany, a person must serve one year as an apprentice, attend a dairy school and then serve tour years in a creamery. It is a trade, and must be gained by both theory and practice. They are the persons who make the "gilt edge" butter, however, and their services are always in de mand at good wages.

There is no remedy for fowl cholera but good results have been obtained by adding a teaspoonful of liquid carbolic acid to each half gallon of the drinking water. Indigestion is often mistaken for cholera. One of the surest indications of cholera is intense thirst, and the disease runs its course in a few days destroying the majority of its victims within 24 hours after the attack.

When the results are reported of the operations of some successful dairyman it will be found that he used pure-bred or grade cows. The scrub has never figured in a record, nor has any farmer ever given to the agricultural press his results with such cows. Yet the majority of dairymen will go on the highways, or on the market, and buy their fresh cows without regard to their feeding or quality.

In raising sheep the specialties should be lamb and mutton, the wool being considered secondary. There are many farmers now raising sheep that weigh 150 pounds each, and which produce eight or ten pounds of wool. One reason for lack of success with some is that they keep small sheep and depend upon wool for their profit. Such a method may be the best where land is cheap, but on tarms that are valuable, sheep should be kept for the production of meat rather than for wool.
