

Bellefonte, Pa., April 21, 1893.

Farm Notes.

For early peas use the dwarf varities. Manure should be applied broadcast on the ground, and well-worked into the soil.

Early melons may be had by planting the seeds this month, on sod, in cold frames, transplanting the sods to the open ground after the season be-

The Bartlett has a reddish blush on continued as to produce extreme irritathe side and the Clapp has a core. bility of the stomach, the remedy may Otherwise they are very similar, and be taken in small doses at first, diluted stand at the head of pears.

A Western exchange believes that for those who are situated so they can engage in both dairying and fruit growing, the combination will prove the easiest solution of the fertilizer problem.

Spinach may be sown, and a succession of crops can be grown by sowing seed at intervals of two or three weeks. The spinach is a hardy plant, and it is not too soon to sow the seed for the spring crop.

Over feeding is more general than feeding too little, especially in the summer. There is no necessity for giving an animal more than it requires. Pampered stock is more liable to disease than any others.

After a series of experiments in trap ping insects by lights, the entomological department of Cornell University has decided that the insecticidal value of the lantern is rendered too small to be practicable.

A speaker at a recent horticultural meeting reported by the "Nebraska Farmer," advised planting each variety of apples in the same row or rows "to facilitate spraying, as the different sorts do not blossom at the same time."

An exchange advises against pickiug out for a breeder a lazy, sleepylooking sow that keeps fat very easily; but select a hustler, with a strong constitution and good grazing qualities, and that is on time at every meal.

Experiments conducted in different States, and with co-operation, agree that spraying with the Bordeax mixture pays in the prevention of rot, if in nothing else. As a matter of fact, however, it pays in many other ways.

A quart of ground oats, mixed with two gallons of buttermilk, is an excel- the very same genus was known to my or enfeebled persons. Pneumonia, influenza lent food for young pigs, especially when weaning them. Green food should be given also, and as soon as it can be done they should be turned into I doubt not that the professional round. tem with a pure stimulant. Medical men all

There were armies were disbanded. loam root, pruning at the end of the first or second year after planting will been dandies, swells, fops, beaux and prove beneficial in checking strong exquisites scattered plentifully down growth, and tend to the maturation of

Shallow covering of seeds has been found more favorable to germination than covering deeply. The small seeds, such as lettuce, cabbage, turnips, parsnips and carrots, need only enough dirt on them to shut out the light, but the ground must be very fine and deep.

After the plants have been taken mer comes. Prevention is better than from the hot-bead do not permit the cure. hot bed to grow a crop of weeds, but use it as a cold frame. It is just the thing for lettuce, or the tender plants may be started in it on pieces of sod. Any use for it is better than that of weed growing.

More harm is done by those who act as agent for trees and fertilizers than can be remedied, as many of the agents know nothing of the goods they sell, especially if they take up the occupa-tion to make a lew extra dollars during winter. They induce their neighbors, through friendship, to patronize them, and thus cause loss.

Peach trees may be cut back at any time, and they seem to thrive well under severe pruning. When setting them out cut them down to a short stick, removing all branches. This will make them stocky, and cause them to grow low to the ground. After they have made a good start in growth give an application of wood ashes over the surface of the ground.

Radishes are hardy, and the seeds may be sown early. The ground should be very rich, so as to force them in growth, which causes them to be crisp. Radishes may be sown in the rows of vegetables that are slow in appearing above ground, so as to delineate the rows, the seeds of the radishgerminating very quickly, permitting the plants to grow and be pulled out of the way before the later kinds in the rows begin to occupy the ground.

One of the best modes of growing oats is to sow them and cut them when the heads are in the milky stage. As the natural juices of the plant are ar rested in the stalk, on its way to fill out the grain, the nutritious matter of of the straw is greater than when the seeds are permitted to fully mature and are threshed. The "green" oats, cured in the milky stage, are fed to horses, both the straw and the grain, by cutting the whole with a fodder cut ter, and the food is highly relished.

As much as 1000 pounds of artificial fertilizer has been applied to one acre of potatoes, which may appear as a very expensive application, but as the yield of tubers was over 1000 bushels the expense was but little compared with the gain. The result was due to an experiment made with the view of testing the value of fertilizer for the potato crop, and is of course a larger yield than may be expected, but it demonstrates the large yields can be secured by the liberal use of fertilizer for the purpose.

March, April and May.

Is the Time for Catarrhal Dyspepsia-The Blood Must be Cleansed.

The symptoms of catarrhal dyspepia are: Coated tongue, pain or heavy feeling in the stomach, sour stomach, belching of gas, dizzy head, sometimes headache, despondent feelings, loss of appetite, palpitation of heart and irregularity of the bowels.

For this condition Peru na is found to be an admirable remedy. In all cases it brings prompt relief to the painful symptoms, and in a large per cent. of cases it makes a permanent cure. Pe-ru-na soothes the inflamed mucous surface, and thus strikes at the root of the disease. In cases where the in-Bartlett and Clapp pears are rivals. flammation has been so severe and in water: but, as soon as the improvement is sufficient to permit the full dose to be taken undiluted, it is the better way, and the cure is much more rapid. Pe-ru-na is also a spring medicine which at once removes the cause of all affections peculiar to the spring season by purifying the blood of all concami nations, and invigorating the whole

system. Two valuable books, No. 2 setting forth in detail the treatment of catarrh, cough, colds, sore throat, bronchitis and consumption, in every phase of these diseases, and No. 3, on spring remedies and diseases, will be sent free to any address by The Peruna Drug Manufacturing Company of Columbus, Parrish's Drug Store.

Persistence of the Tramp.

The Only Thing New About Them is the Name

It is the fashion of "labor" orators to affirm that tramps are rapidly increasing in number under prevailing industrial conditions, and even such a writer as Henry George has estimated them at "millions" in this country alone. Of course no proof of the tremendous multiplication is offered, for tive geysers. there are so many tramps in proportion to our population as there were 50 years ago, and my doubt is founded onthe notorious facts that the workingman's wages have more than doubled in that time and the cost of almost everything that the workingman has to buy has been reduced nearly onehalf. In other words, an hour's labor will buy and actually does buy three times as much as it would buy 50 years ago. In regards to "tramps" only one thing is new-that is, the name. The very same genus was known to my mother, but she called them "codgers;" grandmother, but she called them shacks." What my great-grandmother called them I do not know, but ers were as common then as now.
There were no ".ramps" then, because

Age" at \$1.50 per quart, and "Duquesne" at With young vigorous trees growing the name was not invented till our sand without a peer. CRUSTS AND SCALES
HAIR AND EYEBROWS FELL OFF. DOC TOR AND MANY REMEDIES NO BEN-EFIT ENTIRELY CURED AND HAIR RESTORED BY CUTICURA.

My wife has been troubled for years with dry crusts and scales on her head and eyebrows. After seeming to lie dormant for years in her system, it broke over a year ago in all fury. Her hair came out in big patches, her eyebrows all fell off, and she presented a pitiable condition. We tried almost everything, but she continued to get worse. Then we tried one of our best physicians, but all to no purpose. Finally my wife believed that the Cuticura Remedies would cure her. After she had used nine boxes of Cuticura, and about a dozen cakes of Cuticura Soap, and four bottles of Cuticura Resolvent. She was cured entirely. Her hair came on again, and to-day she has as fine a head of black curly hair and as smooth as any lady in Allentown. Her eyebrows are heavier than they ever were, her scalp is free from dandruff, and her health is excellent. Now for the benefit of those suffering with same disease, or to those who may doubt the truthfulness of this statement, write me, inclosing a stamp, and I will cheerfully answer. I am sure that the Cuticura Remedies cured my wife, for she used nothing else during the four or five months she used them.

FREEMAN STOEKER, 225 Court Street, Allentown, Pa.

CUTICURA RESOLVENT

The new Blood and Skin Purifier, internally The new Blood and Skin Puriner, internally and Caticura, the great Skin Cure, and Cuticura Soap, the exquisite Skin Beautifier, externally, instantly relieve and speedily cure every disease and humor of the skin, scalp, and blood, with loss of hair, from infancy to age, from the pimples to serofula.

Range.

THE OME COMFORT RANGE

is made almost wholy of malleable iron and wrought steel. Over 239,860 now in actual use and sold exclusively by our agents direct from the factory. The fire box is so constructed that it gets cold air on one side of all the parts exposed to the fire, so it is impossible for it ever to give way or burn out. It don't require half the fuel the ordinary stove does.

WE GUARANTEE EACH RANGE TO

BE EXACTLY LIKE THE SAMPLE.

We make each one come up to the guarantee to the letter. We cannot afford to do a bogus business, as our firm has a \$500,000 paid up capital. Look at Bradstreet's or Dunn's report and see how they quote the WROUGHT IRON RANGE CO.,

St. Louis, Mo.

WROUGHT IRON RANGE COMPANY.

From Coudersport, Pa., Voice, February 9th.

Nearly three months ago it was our pleasure to make the acquaintance of Mr. T. A. Brashear, ene of the Superintendents of the Wrought Iron Range Co., of St. Louis, Mo., and his corps of salesmen. They established their headquarters in this place and since that time have sold 250 of their ranges, which, as far as we have any knowledge of, have given entire satisfaction coming up to the guarantee in every particular. We understand that the, Supt. does not allow any of his employes to use any intoxicating drink, and when any of said employes do so they are immediately discharged.

Wherever the Superintendent and his men may go for their next canvass the best wishes of the Voice and of those who have had dealings with these persons will go with them. WROUGHT IRON RANGE COMPANY.

-AT THE WATCHMAN OFFICE

SCHOFIELD'S NEW HARNESS HOUSE.

Bellefonte, Pa., April 21, 1893.

We extend a most cordial invitation to our patrons and the public, in general, to witness one of the

GRANDEST DISPLAY OF

Light and Heavy Harness ever put on the Bellefonte market, which will be made in the large room, formerly occupied by Harper Bros., on Spring street. It has been added to my factory and will be used exclusively for the sale of harness, being the first exclusive salesroom everused in this town, as heretofore the custom has been to sell goods in the room in which they were made. This elegant room has been refitted and furnished with glass cases in which the harness can be nicely displayed and still kept away from heat and dust, the enemies of long wear in legence. Our factory now occupies a room 16x74 teet and the store 20x60 added makes it the largest establishment of its kind outside of Philidelphia and Pittsburg.

We are prepared to offer better bargains in the future than we have done in the past and we want everyone to see our goods and get prices for when you do this, out of self defense you will buy. Our profits are not large, but by selling lots of goods we can afford to live in Bellefonte. We are not indulging in idle philanthropy. It is purely business. We are not making much, but trade is growing and that is what we are interested in now. Profits will take care of themselves.

When other houses discharged their workmen during the winter they were all put to work in my factory, nevertheless the big (?) houses of this city and county would smile if we compared ourselves to them, but we do not mean to be so edious, except to venture the assection that none of them can say, as we can say "NO ONE OWES US A CENT THAT WE CAN'T GET." This is the whole story.

The following are kept constantly on hand.
50 SETS OF LIGHT HARNESS, prices from
\$8.00 to \$15.00 and upwards, LARGE
STOCK OF HEAVY HARNESS per
set\$25.00 and upwards, b00 HORSE
COLLARS from \$1,50 to \$5,00
each, over \$100.00 worth of
