Democratic Watchman.

Bellefonte, Pa., June 9, 1893.

Farm Notes.

It is said that pyrethrum powder will destroy the green cabbage worm. Mix a tablespoonful to a gallon of water and try the solution.

Ordinarily the man with a small farm makes just as good a living as the man with several times as many acres, and with much less worry.

The general average condition of wheat in the United States, May 1, was 75.3. This is the lowest general average since 1888. The condition is lowest in the great winter wheat belt.

If the early beets are too thick in the rows thin out the plants, leaving only one plant to six inches of space. The plants that are pulled up may be transplanted elsewhere if desired.

All farmers consider the pasture an essential feature of their farms, yet if the land devoted to pasture was cultivated to crops it would permit of keeping more cattle by the soiling system.

Don't forget that if you plant a tree! for shade you will have the disadvant-ages of shade. The lawns, flower beds and gardens may suffer therefrom unless ample open space is reserved for them.

The simple operation o throwing out grain to a flock of poultry may be done in a wrong manner. The whole flock should be given "tair play" by scattering the grain widely and on clean ground.

Although irrigation is but seldom practiced in this section, yet there are farms that could be easily irrigated at a small cost, and the result would be very satisfactory. It is worthy of the consideration of farmers.

If your plants in the garden appear unthrifty, apply a small quantity of saltpetre (nitrate of soda) on each side of the rows, close to the plants, and just before a rain. In a few days they will take on a green tinge and grow rapidly.

To prevent insects from ascending trees from the ground, and prevent rats mice and rabbits from attacking the trees, mix two parts of chloride of lime with one part of lard, and smear the mixture iu a narrow band around each tree.

Large size is not necessarily of great importance in the profitable production of beef, although quick growth is. This, added to early maturity, is what gives the profit. It is, perhaps, not necessary to add that good blood con-duces to these ends, but it is just as well to keep the fact in mind.

Crops which can be used for late pasturing in the interval between grass and hay should be grown wherever stock is kept. Millet and late sweet corn serve this purpose very well. If you have some vacant patches late in

an early age she shall become familiar with the Bible; so that when she was obliged to leave home to be gone for five moaths she old Ruth she would bring her home a muff if she would say a Bible verse every night before she went to bed. Ruth promised that she would. Mamma came home at the end of five months. Before presenting the muff she said : "How about the verses, Ruth?" "I said one every night mamma." "That's mamma's nice girl. You must have learned a good many in five months, dear ?" "Why, I always said the very same one." "What was that?" "Jesus wept !" said Ruth. -From friend to friend goes the story of the excellence of Hood's Sarsaparilla and what it has accomplished, and this is the strongest advertising

-Little Ruth can read very nice-

ly, and her mother is anxious that at

which is done on behalf of this medicine. We endeavor to tell honestly what Hood's Sarsaparilla is and what it will do, but what it has done is far more important and far more potent. Its unequalled record of cures is sure to convince those who have never tried Hood's Sarsaparilla that is an excellent medicine.

-Even in its incomplete state during the opening month of May the World's Fair, according to the report of its managers, yielded a surplusage of receipts over expenses amounting to \$250,000. This is a showing as gratifying as it is unexampled in the records of former international exhibitions.

-A few of the summer girls who have made a somewhat premature appearance look a little like butterflies, with their winged gowns, and a little like partially inflated balloons. Something depends on the point of view.

-Frederick Mertz, a farmer living at Quarryville, was swindled out of \$100

by a buncosteerer while on his way from Philadelphia to his home.

-Rice paper is not made from either rice paper or rice straw, but from a pithy plant called tuag tsua, found in China, Corea and Japan.

Common table salt is not a salt, and has long since been excluded from the class of bodies denominated "salts."

The year 1893 began on a Sunday and it will finish on a Sunday, so that it will contain fifty-three Sundays.

The largest piece of copper ever taken out of the Michigan upper peninsula weighed about nine tons.

-Too many men try to pull them seves out of trouble with a corkscrew.

A man with a million can't very well help being a capital fellow.

38-19-3m About 138.000,000 envelopes are used

in this country annually.

Business Notices. Children Cry for Pitcher's Ca toria

SCHOFIELD'S NEW HARNESS HOUSE. Selfefonte, Pa. Ju We extend a most cordial invitation to uso patrons and the public, in general, to witness one of the GRANDEST DISPLAY OF

Saddlery.

Light and Heavy Harness

ever put on the Bellefonte market, which will be made in the large room, formerly occupied by Harper Bros., on Spring street. It has been added to my factory and will be used exclu-sively for the sale of harness, being the first exclusive salesroom ever used in this town, as heretofore the custom has been to sell goods in the room in which they were made. This elegant room has been refitted and furnished with glass cases in which the harness can be nicely displayed and still kept away from heat and dust, the enemies of long wear in learner. Our factory now occupies a room 16x74 ieet and the store 20x60 added makes it the largest establishment of its kind outside of Philadelphia and Pittsburg.

of Philadelphia and Pittsburg. We are prepared to offer better bargains in the future than we have done in the past and we want everyone to see our goods and get prices for when you do this, out of self defense you will buy. Our profits are not large, but by selling lots of goods we can afford to live in Bellefonte. We are not indulging in idle philanthropy. It is purely business. We are not making much, but trade is growing and that is what we are interested in now. Profits will take care of themselves. When other houses discharged their work-men during the winter they were all put to work in my factory, nevertheless the big (f) houses of this city and county would smille if we compared ourselves to them, but we do not mean to be so odious, except to venture the as-section that none of them can say, as we can say "NO ONE OWES US A CENT THAT WE CAN'T GET." This is the whole story. The following are kept constantly on hand.

The following are kept constantly on hand.
50 SETS OF LIGHT HARNESS, prices from \$8.00 to \$15.00 and upwards, LARGE STOCK OF HEAVY HARNESS per set\$25.00 and upwards, 600 HORSE COLLARS from \$1,50 to \$5,00 each, over \$100.00 worth of HARNESS OILS and AXLE GREASE,
\$400 worth of Fly Nets sold chesp \$150 worth of whips from 15c to \$3.00 each, Horse Brushes, Cury Combs Sponges, Chamois, RIDING SADDLES, LADY SIDE SADDLES Horse Brushes, Cury Combe Sponges, Chamois, RIDING SADDLES, LADY SIDESADDLES Harness Soap, Knee Dusters, at low prices, Saddlery-hardware always on hand for sale, Harness Leather as low as 25c per pound. We keep everything to be found in a FIRST CLASS HARNESS STORE—no chang-ing, over 20 years in the same room. No two shops in the same town to catch trade—NO SELLING OUT for the want of trade or prices Four harness-makers at steady work this win-ter, This is our idea of protection to labor, when other houses discharged their hands, they soon found work with us. JAS. SCHOFIELD, 33 37 Suring street, Bellefonte, Pa.

Illuminating Oil.

CROWN ACME. THE BEST BURNING OIL THAT CAN BE MADE FROM PETROLEUM,

the season sow them with these, and the crops will not come amiss.

If it is desired to preserve eggs, for higher prices later on, the first thing to do is to remove all the males from the hens, as eggs from hens not with males will keep three times as long as eggs that are fertile, while the hens

composition from that in the horse stalls it will be proper to mix them in one heap, with some absorbent material. The urine is more valuable than the solid matter, and it should be added to the manure heap also. It will be an advantage to use Kainit with the manure in the heap in order to prevent the volatile matter.

afflicte

a Soap.

Gas Fitting.

It is easy enough to keep stock in good condition while they. have abundant pasture, but as soon as the grass begins to fail it requires some management to do it without undue cost. To provide against this contingency it is a good plan to have a field sown espec ially for late pasture with sweet corn, millet or something that will keep green after the natural pastures are exhausted.

To renew a strawberry patch work well between the rows as soon as the crop is picked, and then clean the rows by leaving one plant in the space of one foot in the row, which will permit of killing the weeds in the rows, the runners filling up the spaces later in the season. This will not give as good a bed as the setting out of new plants (now too late to do so), but it will put an old bed to use for another year.

Rats on the farm do great damage, and consume a great share of grain. To attempt to destroy them demands more labor than can well be bestowed. The only sateguard is to have no har boring places for them. Buildings that are liable to oe invaded by rats should be so arranged that the cats can follow the rats to any point. Poi-sons are unsafe to use in the destruc-tion of rats, as valuable animals may also be destroyed by it. Rotate with clover, and the land will be improved. An excellent rotation is corn, potatoes, wheat and clover. If corn and potatoes occupy the ground set of the ground be the struc-tion of nats, as well and the land will be improved.
