

Democratic Watchman

Bellefonte, Pa., August 4, 1893.

REST.
Letter rest. The weary night
Never brought her dreams like this.
Let her sleep. The morning light,
Shall not wake her from her bliss.
Glad was she to end the fight.
Death hath conquered with a kiss.

Tired eyes need watch no more.
Flashing feet, the race is done.
Hands that heavy burdens bore,
Set them down; the day is done.
Heart, be still—through anguish sore,
Everlasting peace is won.
Mary Mactee in Chamber's Journal.

The Irish Village and Donegal Castle in the Midway Plaisance of the World's Fair.

From the Chicago Herald.

The Irish Village and Donegal Castle stand next to the Libbey Glass Works in the Midway Plaisance. The village was designed and erected by Mrs. Ernest Hart, the president of the Donegal Industrial Fund, a philanthropic organization founded ten years ago, to develop handwork and home industries in Ireland. The village contains a representative exhibit of Irish Art, Industry, History and Antiquity, and should by no means be missed by any visitor at the fair. For here he can not only study Irish art from its first dawn in the days of the druids to its latest achievement in painting and sculpture; but he can stand on real Irish soil, can sit in the Wishing Chair, can look on the face of Ireland's present-day liberator, Gladstone, as chiseled by the Irish sculptor, Bruce Joy; can occupy for a moment the chair used by the great O'Connell, and can hear the liquid Gaelic tongue spoken by Irish colleens at work spinning and lacemaking in the cottages scattered round the village green. In the words of Ireland's poet, Goldsmith, this Irish village is indeed "sweet Auburn of the plain," and it is difficult to exhaust its interests. It is representative of Ireland at her best and happiest. The village is approached by the St. Lawrence gateway at Drogheda exactly reproduced. Once beyond the stately pile of Donegal Castle, reproduced one-half the size of the original. In the great banqueting hall is gathered together a fine collection of Irish art and industry. At the head of the hall stands the Colossal Statue of Gladstone by Bruce Joy, which is acknowledged to be not only a remarkable work of art, but the best portrait of the great statesman. The walls are hung with portraits of famous Irishmen and draped with splendid pieces of embroidery; paintings by Irish artists and of Irish scenery are displayed on screens, and on the walls are quantities of Irish lace, Irish wood carvings and Irish home-spuns made by the workers trained by the Donegal Industrial Fund in various parts of Ireland. A court train which took Irish girls 800 hours to embroider in gold occupies a glass case; in the concert-room are unique replicas of the Celtic illuminations of the seventh and eighth centuries, and engravings of old Irish crosses. Irish Melodies on the harp played by the accomplished harpist, Fabiani, Irish songs sung by Miss O'Sullivan, of Cahirciveen, Irish music on the violin are heard all day long, and from time to time Mrs. Ernest Hart give an account of the village and what it teaches. Beyond the ruined Keep of Donegal Castle rises to the height of a hundred feet the tall, white form of the Round Tower. In the tower garden the weary may rest under the shade of the trees and enjoy the hospitality of the Restaurant. Irish music is heard while tea is sipped or lunch partaken in the pleasant garden. Close by is the Wishing Chair of the Giant's Causeway standing on Real Irish Soil, on which no Irishman should fail to stand and breathe a prayer for Ireland. The success of this Irish village means light and learning and prosperity to some of the poorest parts of Ireland, and both because of its aim and its worth it appeals to every Irish heart.

The Biggest Wheel.

The Ferris wheel is a big thing. It is 250 feet in diameter and weighs when loaded upward of 1,200 tons. But as an engineering achievement it is a good deal bigger than its diameter and its weight. General Miles, who may be suspected of knowing something of such matters, says it dwarfs the seven wonders of the ancient world, and engineers who have studied both structures declare that it outranks the great Eiffel tower of the Paris exposition. It is the largest piece of movable machinery ever constructed, and the axle on which it turns is the largest single piece of steel ever forged, being 32 inches thick and 45 feet long.

The principle of the wheel is by no means a new one. It is but an enlargement of a sort of merry-go-round that has afforded amusement to thousands since its unknown inventor constructed the first one at a time and place whereof history has made no record, but it presented engineering problems that had never been formulated before and whose successful solution has placed the name of George Washington Gale Ferris well up toward the top of the list of the world's mechanical engineers.

There are 36 cars on the wheel, each of them seating 40 people, so that the carrying capacity of the wheel is 1,440 persons. The axle rests on two pyramidal towers 140 feet high and 40 by 50 feet each at the base. The motive power is furnished by a 1,000-horse-power reversible engine, which will turn the wheel quite as fast as most people care to go, though the two revolutions that constitute the trip are ordinarily made in 30 minutes. There is a large Westinghouse airbrake by which the speed can be regulated and the machinery stopped entirely at a second's notice,

and every possible precaution has been taken to guard against accident.

The sensations of a first ride on the great wheel are novel and delightful. Scarcely any motion is perceptible to those within the cars. The earth seems gradually to recede and then as gradually to approach again, as though it were undulated by a tremendous earthquake, and the blue waters of the lake seem to be moving in a mighty tidal wave. The cloud of smoke that usually covers Chicago, pierced by an occasional spire or lowering skyscraper, stretches away to the north, west and south, and just below the wheel the White City glitters in the sunshine with a beauty all its own. A trip on the wheel is instructive as well as amusing.

The Size of the Oceans.

Some Figures Showing the Relative Proportions of Seas.—From the Earth to the Sun—A Column Two Miles and a Half in Diameter.

From an Exchange.

One gallon of water weighs ten pounds, so the number of gallons in the Pacific is over two hundred trillions, an amount which would take more than a million years to pass over the falls of Niagara. Yet, put into a sphere, the whole of the Pacific would only measure 726 miles across.

The Atlantic could be contained bodily in the Pacific nearly three times. The number of cubic feet is 117 followed by seventeen ciphers; a number that would be ticked off by one million clocks in 370,000 years. Its weight is 325,000 billion tons, and the number of gallons in it seventy-three trillions. A sphere to hold the Atlantic would have to be 533 1/2 miles in diameter.

If it were made to fill a circular pipe reaching from the earth to the sun, a distance of 390,000 miles, the diameter of the pipe would be 1,837 yards, or rather over a mile; while a pipe of similar length to contain the Pacific would be over a mile and three-quarters across. Yet the distance to the sun is so great that, as has been pointed out, if a child were born with an arm long enough to reach to the sun it would not live long enough to know that it had touched it, for sensation passes along our nerves at the rate of 100 feet a second, and travel from the sun to the earth at that rate would take a century and a half, and such an abnormal infant is an unlikely centenary.

The rest of the sea includes the Indian ocean, the Arctic and Antarctic seas, and various smaller masses of water; it covers an area of 42,000,000 square miles, and would form a circle of 7,300 miles in diameter. The average depth may be put at 2,000 fathoms (12,000 feet) and the contents at 95,000,000 cubic miles. It weighs 300,000 billion tons, and contains eighty-seven and a half trillion gallons; while it would form a column reaching to the sun of 2,000 yards in diameter.

If we now combine into one vast whole these various figures, we arrive at some stupendous results in answer to the question, "How big is the sea?" Its area of 140,000,000 square miles could be confined by a circle 13,350 miles across. The relative size of the areas of the whole surface of the earth, of the whole sea, the Pacific and Atlantic, are represented by circles the diameters of which are in the proportions to one another of 158, 133, 93 and 72 respectively; or by a crown for the surface of the earth, a half crown for the surface of the Pacific, a three-penny piece for the surface of the Atlantic.

Supposing the seas to be formed into a round column reaching to the sun, the diameter of the column would be nearly two and a half miles of its total length of 390,000 miles, and the Atlantic 18,000,000.

Purchased 50,000 Ounces of Silver.

WASHINGTON, July 24.—Acting Mint Director Preston this afternoon in response to his counter offer purchased 50,000 ounces of silver at \$0.9690 per ounce. There is no expectation of purchasing the full quota of 4,500,000 ounces of silver per month. Mr. Preston states that the department, if it fails to purchase the full quota this month it will not make up the deficiency next month. Each month's purchase will stand by itself. This is the construction placed upon the Sherman law as to the requirements of silver purchases by Secretary Carlisle. As a consequence of such purchases, the amount of coin or Sherman notes issued against the silver bullion purchased under the law, will of course be correspondingly less.

A Storm of Indignation.

MEMPHIS, Tenn., July 24.—There is a storm of indignation against Sheriff McLendon for his exhibition of weakness Saturday night in turning Lee Walker over to a drunken mob of hoodlums, railroad switchmen and boys. It is claimed that half a dozen men could have defended the jail. This morning Judge Scruggs suspended McLendon, pending an investigation, and placing the coroner in charge of his office. The grand jury will be called to-morrow, and it looks as if McLendon will be indicted. The judge strongly condemns lynching and says he will bring all the parties to justice. Harry Frayser, one of the mob leaders, was arrested to-day. Other arrests will follow.

Judge—"Was there no policeman about when your fruit-stand was robbed?" Antonio—"Oh, ya, plenty policeman; but dey rob not so much as this man."

Fire is a good servant, and, like other servants, its goodness depends on its keeping its place.

Ceylon has cinnamon plantations covering 36 acres.

Pleading the Sunday Law.

"So you deny that you ever asked my consent to marry her or that you promised to marry her?" queried the attorney for the plaintiff in the breach of promise case, with a comprehensive gesture and an air of surprised incredulity. "No, I admit it," responded the defendant promptly.

Commercial Travelers Parade.

CHICAGO, July 25.—Despite the excessively warm weather the parade of the commercial travelers to day was a magnificent success. Over 12,000 men were in line and no less than forty-four states and six foreign countries were represented.

—Miss Molly—"I suppose, Colonel, you were glad of any sort of a job when you first went West?" Colonel Straightflush—"Yes, indeed, Miss Molly. Why, seriously, the first \$100 I made out there I got by picking up chips!"

—Ruth Brown Thompson, eldest daughter of Ossawatimie John Brown, of Harper's Ferry fame, is now living on a ranch near Pasadena, California. She is a woman under medium height, perhaps seventy years of age or more, but looks younger.

—Lessons in Politeness.—Mrs. Wickwire—"Don't you think you might take off your hat when you are addressing a lady?" Hungry Higgins—"Don't you think, mum, when a gent calls on you that you might invite him in and offer him a cheer?"

—Sections of a cable laid twenty-one years ago were dug up at Key West the other day. The copper wire was ununited.

—"Why do you call your servant Misery?" "Because she is so fond of company."

—There's a married man's scheme to abolish seal fishing altogether. No seals, no saques.

—Silence is golden, but you never realize how golden until you have to buy it.

Democratic Rules.

The following are the rules governing the election of delegates and the County Convention.

1. The Democratic County Convention of Centre county shall be composed of one delegate for every fifty Democratic votes polled at the Presidential or gubernatorial election next preceding the convention. The allotment of delegates to the several election districts in the county shall be in proportion to the number of votes polled at the election in each district.

2. The election for delegates to represent the several districts in the annual Democratic County Convention shall be held at the usual place of holding the general election for each district on the Saturday preceding the second Tuesday of August in each and every year, beginning at two o'clock p. m., on said day and continuing until six o'clock p. m.

3. The said delegate election shall be held by an election board, to consist of the member of county committee for each district and two Democratic voters of that district, who shall be appointed or designated by the County committee. In case any of the persons so constituted are unable to attend, they may be held in their stead by a substitute elected by the voters of the district for a quarter of an hour after the time appointed by Rule Second for the opening of the polls, and by their places or proxies shall be filled by an election, to be conducted viva voce, by the Democratic voters present at that time.

4. Every voter of the district, who at the late general election voted the Democratic ticket, shall be entitled to a vote at the delegate election; any qualified elector of the district who did not vote at the general election, but who is entitled to vote at the delegate election, shall be permitted to vote at the delegate election.

5. The voting at all delegate elections shall be by ballot, upon which names shall be written or printed the name or names of the delegates voted for together with any instructions which the voter may desire to give the delegate or delegates.

6. Each election board shall keep an accurate list of the names of all persons voting at such elections, when the list of voters together with a full and complete return of such election, containing an accurate statement of the names of the delegates and the instructions voted, shall be certified by said board to the county convention upon printed blanks to be furnished by the county convention.

7. Whenever from any district qualified Democratic voters, in numbers equal to five times the delegates which such district has in the county convention, shall complain in writing of an undue election, of false returns of delegates or of instruction, in which complaint the alleged facts shall be specifically set forth and verified by the affidavit of one or more persons, such complaints shall have the right to come to the attention of the county convention, which said committee shall proceed in accordance with the instructions contained in the complaint, and the delegates or delegates so complained of shall be forthwith expelled from the convention, and shall not be eligible to any office or place of trust in the party for a period of two years.

8. In the convention a majority of all voters shall be necessary to a nomination, and no person's name shall be excluded from the list

of candidates until after the third ballot or vote when the person receiving the least number of votes, shall be omitted and struck from the roll, and so on at each successive vote until a nomination be made.

12. If any person who is a candidate for any nomination before a county convention shall be proven to have offered or paid any money or other valuable thing or made any promises of a consideration or reward to any delegate for his vote, or to any person with a view of inducing or securing the votes of delegates, or if the same shall be done by any other person with the knowledge and consent of such candidate, the name of such candidate shall be immediately stricken from the list of candidates; or if such facts be ascertained after his nomination, he shall be struck from the ticket and the vacancy supplied by a new nomination, and in either case such person shall be ineligible to any nomination by the convention or to an election as a delegate thereafter. And in case it shall be alleged after the adjournment of the convention that any candidate put in nomination has been guilty of such acts or of any other fraudulent practice to obtain such nomination, the charges shall be investigated by the county committee, and such steps taken as the good of the party may require.

13. If any delegate shall receive any money or other valuable thing, or accept the promise of any consideration or reward to be paid, delivered or secured in fact or to any person for such candidate, as an inducement for his vote upon proof of the fact to the satisfaction of the convention such delegates will be forthwith expelled, and shall not be eligible to any office or place of trust in the party, and shall be ineligible to any party nomination.

14. Cases arising under the Eighth, Twelfth and Thirteenth Rules shall have precedence over all other business in convention until determined.

15. That the term of the chairman of the county committee shall begin on the first day of January of each and every year.

16. That the delegates from the several boroughs and townships be authorized, in conjunction with the chairman of the county committee, to appoint the members of the committee for the various boroughs and townships.

BUCKLEN'S ARNICA SALVE.—The best salve in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblain, Corns, and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction, or money refunded. Price 25 cents per box. For sale by C. M. Parrish.

—It is stated that women hold 156,081 shares in Philadelphia building and loan associations.

WELL KNOWN IN TEXAS.—Mr. J. C. Boswell, one of the best known and most respected citizens of Brownwood, Texas, suffered with diarrhea for a long time and tried many different remedies without benefit, until Chamberlain's Colic, Cholera and Diarrhoea Remedy was used; that relieved him at once. F. Potts Green.

Not What She Expected.

Miss Antique (school teacher). "What does w-h-i-t-e spell?"
Class. No answer.
Miss Antique. "What is the color of my skin?"
Class (in chorus). "Yellow."

A GREAT SURPRISE.—Is in store for all who use Kemp's Balsam for the Throat and Lungs, the great guaranteed remedy. You will see the excellent effect after taking the first dose. Get a bottle to-day and keep it in your house or room for immediate or future use. It never fails to cure acute or chronic coughs. All druggists sell Kemp's Balsam. Large bottles 50c and \$1.

Tourists.

"More Facts."
The Chicago Milwaukee & St. Paul Railway Company has just issued another fifty page, handsomely illustrated pamphlet, giving "More Facts" about South Dakota, regarding agriculture, sheep raising, climate, soil, and its other resources. It also contains a correct county map of North, as well as South Dakota. It will send free in any address, upon application to John R. Pott, District Passenger Agent, Williamsport, Pa. Write for one of them.

A Visit to the World's Fair.
At Chicago will be incomplete without "cooling-off" somewhere in the lake regions of Wisconsin, Northern Michigan and Minnesota. All of the best summer resorts in the Northwest can be reached in a few hours' ride from Chicago via the Chicago, Milwaukee & St. Paul Railway and the Milwaukee & Northern Railroad.

For a complete list of summer homes and "How to Visit the World's Fair," send a two cent stamp, specifying your desires, to John R. Pott, District Passenger Agent, Williamsport, Pa., or 42 South Third Street, Philadelphia, Pa.
