Bellefonte, Pa., Sep. 1, 1893.

The Cattle Show.

Will Now Add to the Varied Attractions at Jackson Park—Some Fine Canadian Breeds.

Down by the live stock pavilions all is merriment in the bustle of preparation for the great show is opened. The first three weeks will be given over mostly to cattle and draught horses; after that racing and riding horses; and dogs for the last two weeks. This part of the park is virtually in its pristine state, and if anyone wants to get an excellent object lesson in the value to the human race of engineering and landscape gardening he has only to go straight from the wooded island to the stock grounds and flounder in the sand and gravel among the 40 pavilions till he finds the one he wants. They have a capacity of about 4,000 head at a time. The pavilions are big wooden sheds, clean and well ventilated, of course, than the exhibit buildings. The stalls are all generous in size and are taking on mement decorations in the shape of banners of the countries they represent.

As yet most of the hundreds of stalls are empty, but some very valuable Canadian and French stock is already in place, about 19 carloads of Canadian and 12 of Minnesota (Indians showing up even better) having come in. About the most interesting sight down there just now is the unloading of the bossy beauties. The quiet satisfaction with which a great Polongus, with a big ivory ring in his nose, will lurch heavily down the gangway, contrasts curiously with the plunge and shake and neigh of a fine Percheron stallion as he gets out into free air and is, for a couple of minutes, in imminent danger of asserting his independence. Over 100 carloads came in to-day, and there will probably be a good show by Monday.

CANADA SHOWING THE FINEST.

The handsomest cattle in the stall yet are the black and red Galloway and Polongus. They are from around Quebec, and descend from the former breed with heads and manes like buffaloes. Among the red Galloway is the largest animal yet on the grounds, a steer of 3,500 pounds. The next is a Hereford male, Canadian, 3,000 pounds. There are over 150 head of these fine Canadian already in stall, some Ayrshire from Ontario included. A good bit of this Canadian stock was previously exported from Indiana, United States. It is all short-horn or dehorned, and of tremendous size. Indiana farms have some cattle in place though not so fine as the foreign. Of the Minnesota stock Aldernys, Guernseys and Jerseys prevail.

The Percheron breed of French draft horses is shown in large numbers by various owners, and resembles the comestoga once plentiful in Pennsylvania. The glossy coats, immense muscular development and great height of these animals make them attractive to anyone, and I saw several women schooling a brood of young World's Fair sightseer on the names and conditions of the big creatures, as far as the busy stableman could answer their questions. Among the domestic exhibitors who were pretty well fixed were Thomson and Bland, of Crawford, Ind. "We have 11 head of hackneys here," said Mr. Thomson, "and some are famous English stock. There is March Past, who won a great many hackney prizes in England, and whom we bought on purpose for the Fair; Lord of the Isles, also a great English prize winner, and Saunterer, a promising 2-year-old, the only horse that ever beat Bloodgood's celebrated Star of Maple Jr., which won every prize he ever showed for in America, including the open air and the Madison Square Garden horse shows. Then we have Comedy, who won seven prizes in England."

The giant of the collection is a Percheron French, 17 hands high, weight 2,000 pounds, a bay mare with 4-month-old colt—a screwy, "mischievous critter," as big as an average horse. The animals will be put on parade daily in the amphitheater now occupied by Tattersall's which closes tomorrow, and gives way to the regular Fair attraction.

THE WOMEN AND THE CHILDREN.

The incubator pavilion is highly interesting and a legitimate addendum to the Agricultural Building—at least the claim so. It is next as a big and every incubator is gotten up in characteristic fashion: one laid on the floor amid miniature barnyard, another up on a table with glass plates and a country mansion near, etc. Each machine, however has walls of glass so that you can watch the hatching process; and chickens peering out of their glass prison upon a cold unfeeling, incubator audience, and chickens going back into the shell and drawing it in after them to die in philosophic solitude, greet the eye at every turn. Incubators are used much more generally than is supposed, New Jersey and Delaware absorbing the larger percentage of those erected. One Delaware firm assured me they placed more than 3,000 yearly, and there is a large hatching factory—to go back to Anglo-Saxon, as one must get at the real gist of a term—in the Hyde Park district of Chicago. Though only a business of any proportions this last 15 years (in this country), incubation was practiced before the time of Christ in Egypt.

THE INCUBATOR PAST AND PRESENT.

The incubators, however, were great ovens where thousands were hatched at a time, the attendant living in the oven during the incubation period. It is still practiced in Egypt in the same primitive way, so utterly unlike the square boxes with drawers kept at 103° steadily. The brooder, into which the chicks are put a day or so after hatching, is a miniature barnyard, with a retreat at the back—a wee pavilion strewn with sand, walled by flannel curtains, and with a smokstack to freshen the hot air. The incubator discounts the hen on the ratio of healthy offspring, bringing out 85 per cent to the hen's 60, but has not yet lowered the time record of 21 days; ducks, geese and turkeys, 28 days.

"The most troublesome chicks I ever hatched," said Mr. Von Culin, of the

Delaware firm, "were two ostriches. I never could put my finger on the danged nondescript and say I had 'em. Oh, they came out all right, five weeks, I think; but when they got out they just knew it all. I couldn't learn them rid of them to the man that brought them to me to hatch. They're an expensive chance, too—\$3 an egg. Then we've hatched terrapin and quail, and all that sort of fowl. There's an electricity incubator over in Electricity building, but I don't think it's any good. We hatch by gas, and the chick I picked up is No. 1, the first Brahma born on these World's Fair grounds. He's two days old, and knows more than an ostrich."

Cancer is Now Curable.

Remarkable Discovery in the Treatment of a Dread Disease.

A patient in the New York cancer hospital accidentally became inoculated with the virus of erysipelas several weeks ago. As the disease progressed it was noticed that the patient's cancerous condition had improved. This fact suggested to Dr. William T. Bull the advisability of inoculating other patients with the poison of erysipelas. Accordingly several cases were set apart and experiments were begun and carried out by Dr. W. B. Coley under the direction of Dr. Bull. The inoculations were made not only on patients with carcinomas (commonly known as cancer), but also on others who were suffering from sarcoma, which is a much more malignant form of tumor than the ordinary cancer. The results in both forms were very satisfactory.

CHARACTER OF THE INJECTION. For inoculating purposes a pure culture of the streptococcus, the germ of erysipelas, was used. Of the cases of carcinoma about 25 per cent, were cured, while in the sarcomatous cases the results were even better, showing as many as 40 per cent of those experimented upon to have become well and free after the attacks of erysipelas.

The injections are, as a rule, made into the tumor itself, and were repeated every forty-eight hours. The reaction produced was almost identical with that produced by true erysipelas, though in most of the cases it was milder in degree, passing away within twenty-four to forty-eight hours. The dangers attending this form of treatment are insignificant, when one considers the usual outcome of a case of cancer or sarcoma, which is almost invariably fatal.

REMARKABLE RESULTS OF THE TREATMENT.

In the report written by Dr. Coley he concludes: First, that the curative effect of erysipelas upon malignant tumors is an established fact; second, the action upon the sarcoma is invariably more powerful than upon carcinoma in about the ratio of three to one; third, the treatment of inoperable malignant tumors by repeated inoculations of erysipelas is both practicable and not attended with great risk; fourth, the curative action is systematic and probably due chiefly to the toxic product which may be isolated and used without producing erysipelas; and fifth, that the method of inoculation should not be employed indiscriminately until further clinical experiments have proved its limitations.

Celebration of Pennsylvania Day at the World's Fair.

Inducements Offered by the Pennsylvania Railroad Company.

The World's Fair Commission having decided on Thursday, September 7th, as the day which they desire to have formally celebrated and designated as Pennsylvania Day, the Pennsylvania Railroad Company, in pursuance of its usual custom, takes pleasure in announcing that, for the benefit of those wishing to participate in or attend the ceremonies, the extremely low rate of one fare for the round trip will prevail from all points situated on that company's lines within the borders of the State.

Tickets for the occasion will be good only on the special train leaving Philadelphia at 11.30 a. m., September 5th, and reaching Lancaster at 1.15, Harrisburg 3.00, Lewistown Junction 4.30, Altoona 7.00, Pittsburg 10.25 p. m. Stops will be made at principal intermediate stations, and connections may be made from points on the branches of the main line. The composition of the train will be first-class standard coaches, and ample accommodation will be provided for all who will avail themselves of the opportunity showing their interest in an event so momentous as the commemoration of the Keystone State at the World's Columbian Exposition.

Chicago will be reached by the special train early in the afternoon of the next day, September 6th, and the return coupons will be good for passage on trains leaving Chicago at 3.15 and 11.30 p. m., on or before September 13th.

The inducements for their excursion and the facilities provided in the train service over the Pennsylvania system, will doubtless be taken advantage of by the many Pennsylvanians who are anxious to show the pride they have for their native State.

—There is a general idea that the president's salary of \$50,000 a year is all that he receives. This is a mistake. In addition to his salary, the president receives \$36,064 to pay the salary of his clerks and subordinates. His private secretary has \$2,250, his assistant secretary has \$2,250, the stenographer gets \$1,800, each of five messengers \$1,200, the steward \$1,800, each of the doorkeepers \$1,200, while other employees are paid in proportion, down to the man who takes care of the fires, who receives \$864. In addition \$8,000 is allowed for incidentals, such as stationery and carpets, \$12,500 for repairs and refurbishing, \$2,500 for fuel, \$4,000 for the green house, and \$15,000 for the stable, gas, and other incidentals.

The U. S. Army Full.

WASHINGTON, August 21.—An army officer, connected with the recruiting service, says that the prevailing hard times have driven a large number of men into the army as a means of livelihood. At present, he says, the army is nearer its maximum limit of 25,000 men than at any time since the war. There are rarely more than 22,000 men in the ranks, but now there are only about 154 vacancies in the whole army. Orders have been issued to recruiting officers at the various stations to restrict the number of recruits. The physical examinations are very severe, but in spite of this, the number of applications for the service has greatly increased.

—Flower growers should make their section of winter-blooming bulbs now. While the hyacinth is still the "standby" of many cultivators of house plants there are so many new and beautiful bulbous plants that one need not depend upon hyacinths alone.

The writer has found the freesia to be even more satisfactory than the hyacinth, because of the graceful beauty of its flowers and the sweetness and delicacy of its perfume. It is so easily grown, and the flower remains in bloom so long that no one who has once known the pleasure of a pot of blooming freesias will spend a winter without them. Send in your order now and start the bulbs early in the fall.

—A good many definitions of a newspaper have been given, but never a better one than that of the New York Sun: "A newspaper, at least a good newspaper, is more than a necessity. It brings into the narrowest lie some sense of the vast life of the world. It is full of tragedy and comedy, wit and passion, the heroic and the humble, the crime and the merriment of nations. It is a great realist history. It is a daily commentary upon human nature."

Water From the Jordan.

Stored in the cellars of the appraiser's warehouse are several barrels of water taken from the River Jordan in the Holy Land. They were shipped here by Dr. S. Merrill, United States consul at Jerusalem, and H. H. Goss, the consignee, will eventually distribute their contents free to all applicants. The water was taken out of the river at the spot where, according to local tradition, Christ was baptized.

—A man in Buffalo is going to build a liquor saloon to cost \$107,000 and will decorate the walls with \$10 and \$20 gold pieces. What a sight that will be for the widows and orphans of his victims. They can press their noses against the window pane on a cold winter day and fairly revel in the beautiful display of the coin of the realm.

LITTLE THINGS THAT TELL.—It is the little things that tell—little brothers for instance, who hide away in the parlor while sister entertains her beau, etc. Dr. Pierce's Pleasant Pellets are little things that tell. They tell on the liver and tone up the system. So small and yet so effectual, they are rapidly supplanting the old-style pill. An infallible remedy for Sick and Bilious Headaches, Biliousness, and Constipation. Put up in vials, convenient to carry. Their use attended with no discomfort.

—In one summer the descendants of a single fly will number 2,080,320.

BUCKLEY'S ARNICA SALVE.—The best salve in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblain, Corns, and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction, or money refunded. Price 25 cents per box. For sale by C. M. Parrish.

—The first railroad, three miles long, was opened in 1826 at Quincy, Mass.

—Hood's Sarsaparilla is an honest medicine, honestly advertised for those diseases which it honestly and absolutely cures.

Tourists.

Three Harvest Excursions. Via the Chicago, Milwaukee & St. Paul Railway to all of the best farming sections of the West and Northwest, will be run on August 22, September 12 and October 10, 1893. Return tickets good for 30 days. Low rates. Apply for further information to nearest ticket agent, or address Geo. H. Heaford, General Passenger Agent, Chicago, Ill., or John R. Post, District Agent, 456 Wabash street, Williamsport, Pa.

Cheap Excursions to the West.

An exceptionally favorable opportunity for visiting the richest and most productive sections of the west and northwest will be afforded by the series of low rate harvest excursions which have been arranged by the North-Western Line. Tickets for these excursions will be sold on August 22, September 12th and October 10th, 1893, to points in North-Western Iowa, Western Minnesota, North Dakota, South Dakota, Manitoba, Nebraska, Colorado, Wyoming and Utah, and will be good for return passage within twenty days from date of sale. Stop-over privileges will be allowed on going trips to territory to which the tickets are sold. For further information, call on or address Ticket Agents of connecting lines. Circulars giving rates and detailed information will be mailed, free, upon application to W. A. Thrall, General Passenger and Ticket Agent, Chicago & North-Western Railroad, Chicago.

Luxurious Traveling.

The climax of comfortable and luxurious traveling is apparently reached by the Chicago, Milwaukee and St. Paul Railway, Ease and comfort go with the traveler making a trip from Chicago to St. Paul, Minneapolis, Omaha

or Sioux City over this road. Their superb electric-lighted vestibuled trains leaving Chicago for these points early every evening are great favorites, nothing being left undone by the officials or employees to ensure a most enjoyable trip. Excellent dining service is maintained and buffet library cars are attached to the train, where current periodicals may be perused while smoking a cigar with all the pleasure of one's own "den" at home. Electric lights placed in every berth enable the traveler to spend his wakeful hours, after retiring over his favorite novel or other reading matter. Private compartments cars are run between Chicago, St. Paul and Minneapolis. In fact, everything that goes to ensure comfort and security is provided. The trip from Chicago to any of the above named cities requires but a night's run, bringing one at the destination ready for breakfast and business in the morning. All coupon ticket agents have tickets on sale via Chicago, Milwaukee and St. Paul Railway, or call on or address Geo. R. Post, district passenger agent, Williamsport, Pa.

Cottolene.

"NOW GOOD DIGESTION" wait on appetite And health on both."

Cottolene (Cottolene) Cottolene (Cottolene) Cottolene (Cottolene) Cottolene (Cottolene) Cottolene (Cottolene) Cottolene (Cottolene)

To assure both the above ends, good, wholesome, palatable food is demanded. It is next to impossible to present a sufficient variety of appetizing bills of fare for our meals without a liberal allowance of pastry and other food in which shortening is required. How to make crisp, healthy, digestible pastry has puzzled the cooks. A difficulty in all good cooking in the past has been hard, always fickle, never uniform, most unwholesome—lard has always been the basis of the cook and the obstacle to "good digestion."

COTTOLENE

comes now into popular favor as the new shortening—better than even the best of lard with none of its lard's objectionable qualities. And

COTTOLENE

Cottolene (Cottolene) Cottolene (Cottolene) Cottolene (Cottolene) Cottolene (Cottolene) Cottolene (Cottolene)

comes attended by both

"APPETITE AND HEALTH." Grocers sell it all about.

Send three cents in stamps to N. K. Fairbank & Co., Chicago, for handsome Cottolene Cook Book, containing six hundred receipts, prepared by nine eminent authorities on cooking.

Made only by N. K. FAIRBANK & CO. Chicago, Ill., and 138 N. Delaware Ave., Philadelphia.
