Paints.
DO NOT BE DECEIVED—The following brands of White Lead are still made by the "Old Dutch" process of slow corrosion. They are standard, and always
STRICTLY PURE
WHITE LEAD
The recommendation of
"ARMSTRONG & McRELVEY,"
"BEYMER-BALMAN,"
"DAVIS-CHAMBERS,"
"FAHNESTOCK,"
to you by your merchant is an evidence of his reliability, as he can sell you cheap red lead mixed paints and bogus White Lead and make a larger profit. Many short-sighted dealers do so.
For Colors.—National Lead Co's Pure White Lead Tinting Colors, a one-pound can to a 25-pound keg of Lead and mix your own paints. Saves time and annoyance in matching shades, and insures the paint that it is possible to put on wood.
Send us a postal card and get our book on paints and color-card, free; it will probably save you a good many dollars.
NATIONAL LEAD CO.

Democratic Watchman.
Bellefonte, Pa., June 29, 1894.
Be Sure of These Words.
"Reeking," "desiccated," and "lurid" may not mean what you think.
The old dictionary sell about "transpire" is still worked with so much assiduity as to lead one to suppose that there is none other to be had. But there are others quite as good. Take three words: "Reeking," "desiccated," and "lurid," and ask friends what they understand by them.
"Reeking?" one will say. "Why, reeking means dripping with moisture, 'soaked with wet.'"
Another will say that it means "slippery, slimy; as with filth." "Reeking with filth. Having a pungent, unpleasant odor."
If you can get a bet that the word does not mean anything of the kind, take it. It is sure money. If he won't bet you'll have almost as much pleasure in noting his surprise when you tell him that "reeking" means "smoking, steaming." A chimney can reek, or a new pipe can reek. When a horse reeks with moisture it is because its flanks smoke with steam. Jean Ingelwou writes:
No flame did flash or fair blue reek
Rose up to show me his place.
That is the surest catchword of the three. "Desiccated" is pretty good, though. Nine out of every ten will instantly say that the word means: "Chopped up in little bits. Smashed up in small pieces." In this word, as in "reeking," the process of change from the real meaning can be traced. Anything very wet would reek in frosty weather, so the wetness was assumed to be real characteristics of reek. Pretty much the only article in common use to which the adjective "desiccated" is applied is cocoon prepared for use in cakes and pies. It is chopped up that it may be thoroughly dried." is the only proper meaning.
"Lurid" is a word a little better known. Ask a man what color lurid is and he may answer correctly, but the chances are, or bright yellow." Of course, lurid means smoky or dull color. London fog is lurid; thick, suffocating smoke is lurid. Lurid and livid are almost synonymous. "Lurid flames," almost choked with smoke. A lurid sunset is not a brilliant one, but one dull, and gray and cheerless.

Use the Wrong Powder.
A young lady living on North Meriden street had an experience the other evening. She was up stairs and just turned out her light when she heard a caller ask for her. She made a dive for her powder-puff in the dark and dusted her face with powder. She went to the parlor and found a distinguished stranger, on whom she was anxious to make an impression.
He appeared rather non-plussed at her looks, but being a man of the world (which means a wise enough man), he told a woman her faults he said nothing. She sat and chatted gracefully and had a delightful evening. As soon as he had gone she rushed to the mirror, as every girl does when her beau leaves. She gave one scream and went off into hysterics, for in her haste and the dark she had dipped her powder-puff into a box of powdered charcoal, and she had the make-up of an amateur colored minstrel. The contrast to her dainty organdie gown and blonde hair was very funny, but she will never smile again.

A Wedding of the Future.
The bride looked very well in a traveling dress, but all eyes were centered on the groom. He wore a dark suit that fitted perfectly his manly form. A large bouquet decorated his coat lapel and in his daintily gloved hands he carried a bouquet of American Beauties. His hair was cut close, and a delicate odor of barber's oil floated down the aisle as he passed. The young people will raise him very much now that he is married. He is loved by all for his many accomplishments, his tender graces, and his winning ways. The bride commands a good salary as a bookkeeper in St. Joe, and the groom will miss none of the luxuries to which he has been accustomed. A crowd of pretty young men saw him off at the depot. (A sample of the wedding notice of ten years hence).—*Atchison Globe.*

Lemons In Summer.
In hot weather a lemon sherbet or water ice is refreshing and wholesome. The juice of an orange is a great addition to this, and the proportions may be varied. Four large juicy lemons make quite a quantity when an orange is used. Peel the yellow rind off the lemon very thin, and from the rind also, and put to boil in a porcelain saucepan, with 1 1/2 pounds of sugar and a quart of water. Boil five minutes and set away to cool. When cold, strain the whole into the freezer and freeze until stiff; then take out the beater and the whites of three eggs beaten to a stiff froth. Beat well together, cover closely or put into a mold, re-pack and set away to harden.

Immigration at a Standstill.
Dr. Senner was before the Congressional Committee which is investigating immigration, and made important statements with regard to the falling off of immigration, and showed that immigration had practically come to a standstill. He also demonstrated by facts and figures that just as many people left the United States in the steamer as have arrived during the last eleven months.

Utah's Resources.
Utah has 3,000,000 acres of arable lands, watered by 1,000 miles of canals. One canal, that of Bear river, cost \$2,000,000. The irrigated lands produce annually 7,000,000 bushels of grain. There are over 3,000,000 cattle and the miners in 20 years have produced \$150,000,000 in gold and silver.

—Because of its peculiar habits the locust, or cicada, has provoked much superstition. The ancient Hebrews and other Oriental nations called its bands the avenging armies of the deity, and the Arabs to-day find a statement to that effect written in the cross veins of the wings. The American farmer also finds the letter W on each wing and says it forewarns the coming of war, but as the agricultural reports say, "warm weather," is the best interpretation. There has been much argument among naturalists as to whether the cicada has the power of stinging generally attributed to it. The long bill through which it sucks the juices of trees contains no poisonous glands, so it is thought that most of the injury for which it is blamed is done by wasps, which prey upon it and which may often be seen holding fast to its body in flight. Professor Riley, curator of the department of insects in the National Museum, Washington, discourages the idea that the cicada is at all pugnacious. He says he has handled hundreds, both males and females, and has known children to play with them, without experiencing any unpleasant results. This same sentiment is also experienced with the cicada's bodies in oil after detaching the legs and wings, in vogue with the time honored custom of the East, where wild locusts and honey were considered fit for the gods. But the American broods are not found to be particularly reliable, as in Arabia the locust is considered the staff of life, being pounded into flour for making bread, while throughout the East the habit of eating them is carried so far as to warrant the merchants' selling them by measure.

Although the cicada punctures the roots of trees while deriving its nourishment during its underground stage, it rarely produces serious mischief, on account of its slow development and limited capacity for food. The female in full growth does all of the injury lamented by the farmer when she hacks the twigs and poisons the sap in laying her eggs. She plows the tender bark in long furrows, pecking it with four hooks, which she works like two pairs of nippers. From letters which farmers have sent to the Secretary of Agriculture in back years it appears that nothing has ever proven a remedy for the evil. Lye whitewash, sulphur, carbolic acid and a hundred other chemicals have all been tried in vain. The only remedy which is in the form of an ounce of preventive. The farmer should turn all of his hogs and poultry into his orchards that they will devour the young wingless insects as fast they come out of the ground. But one old farmer writes that even a hog was known to die from overeating them, there being hundreds coming out of the ground at a time. Chickens have also been known to poison their eggs by over-indulgence.

Incorrigible.
"Yes," said the young man with plaid trousers and a big watch chain. "I must confess that I am deficient in musical taste."
"Perhaps the modern music bores you," said the pleasant young woman. "It does many people you know."
"Yes, I don't care for modern music. There is one thing about the old songs that I like very much."
"What is that?"
"The fact that nobody sings them."
—*Washington Star.*

Raspberry Cream.—Half-box gelatine; half-cup cold water; half-cup boiling water; 1 cup sugar; 1 pint cream whipped; 1 pint raspberry juice. Sock the gelatine one hour in the cold water, then put it with the sugar and boiling water in a double boiler over the fire, and melt thoroughly dissolved. Add the raspberry juice; strain and set in a cool place. When it has begun to form stir in the whipped cream, turn into a mould, and set on the ice to harden.

—The Delaware and Maryland peninsula is making ready for a great tomato crop, grown not so much for immediate consumption as for canning. Last year was a bad tomato season, and it is expected that this is a good one. The area in tomato is larger from year to year, and the cost of production is lower. So, too, is the cost of canning, and the consumer gets at least part of the benefit of all this cheapening.

—Dreams depend entirely upon the particular way in which special parts of the brain are supplied with blood during sleep, and they have no more importance as prognostications for your life or happiness or any other fact of circulation or any other form of indigestion.

—The Colgo Free State is really a colony of Belgium, having a central government at Brussels, by which the affairs of the Free State are administered. Its area is estimated at 900,000 square miles, its population at 17,000,000.

—Sparker—Pardon me, miss, for seeming to stare at you; my only excuse is that I like your looks. Miss Sharpe—I am not responsible for that, but I will thank you not to look your likes quite so pointedly.

—We like women for much the same reason that we like the rich; both of them have something to give.

Turning the Highlands Into Bleak and Barren Wastes.
In an interesting article printed in the New York Journal of Commerce Dr. Prime writes sadly of the changes that are going on along the course of the Connecticut River. By substituting the word "Delaware" or "Susquehanna" for "Connecticut" what he says in the following paragraph is as pertinent to the rivers of Pennsylvania as to the New England stream:
The Connecticut River, given over to the timber drivers, has become a canal. Beefs are blasted out. Bulkheads are built to turn the current into the central channels. The melting snows, no longer held back in the spongy mosses of the forests, and the spring rains are hurried swiftly down in freshets, which destroy property in the lower country. The freshets are utilized to bring down every spring the timber from thousands of acres where no pine wood will ever grow again. The summer comes hot and dry, with low water in the rivers, which were formerly full all the summer from the slow drain out of the dark shades in the upper country. The natural reservoirs, which thus gave out their reserves of water, are gone and all the water comes down with a rush after every rain. Manufacturing companies everywhere have found it necessary to make artificial reservoirs to take the place of the lost natural reservoirs. Hills that were once forest covered are bleak masses of rock growing drier year by year. If there were ever an instance of killing the goose that lays golden eggs, it is in this method of treating our northern forests. In hundreds of valleys, where water was abundant in former years, the water line in the ground is now below the reach of ordinary wells. The tendency is toward that condition which in a century or two will compel a resort to irrigation for ordinary agricultural purposes.

Fish of Solid Gold.
G. A. Guiband of the Nadeau hotel was fishing at Santa Monica recently when he caught what at first sight appeared to be a solid lump of gold. When the prize was safely landed it proved to be a specimen of the Japanese fish known as the papraka and by experts here is said to be the first of its kind ever caught on this coast.
This fish is a beautiful creature, being exactly the color of burnished gold of graceful contour. It is about 9 inches in length, 5 inches in width and about 1 1/2 inches thick. The head is so short and the mouth is small, but full of rows of sharp frontal teeth. The dorsal fin is of short length, but is sharply serrated, and continues along the back, ending in a larger fin, which, in connection with a corresponding one underneath the body and tail, gives the specimen the appearance of a three-tailed fish.

A remarkable feature of this beautiful fish is that it is furnished with two distinct sets of gills. The eyes are prominent and bright yellow in color.—*San Francisco Examiner.*

Four Hundred Made Orphans.
Death Roll of the Silesian Mine Disaster Reached 504.
VIENNA, June 16.—A dispatch from Karwin, Silesia, where fire broke out in Count Larisch's coal mines Thursday night, says that when the miners pay-roll was called to-day 304 persons failed to answer to their names. Four hundred children are made orphans by the disaster.

—The biggest man in Jefferson county is Thomas Pfifer, of Henderson, says the Puxatawney Spirit. He weighs 363 pounds and measures twenty-four inches around the wrists and five feet and one-half around the abdomen. His health is good, and he would be able to work every day were it not for his excessive flesh. About the only exercise he takes is driving in a buggy. It takes four and one-half yards of cloth to make him a pair of pants.

—Living questions are most esteemed by every intelligent man and woman. Derangements of the liver, stomach and bowels speedily present to us the living question of obtaining relief. It is at once found in Dr. Pierce's Pleasant Pellets, which cure sick headache, bilious headache, constipation, indigestion, bilious attacks, etc. Purely vegetable and perfectly harmless, they are unequalled as a specific for the complaints named. One tiny sugar-coated Pellet a dose. In vials, 25 cents. Carry them in your vest-pocket.

—Under the will of the late Charles Crocker, the Southern and Pacific millionaire, his once somewhat dissipated son George has just come into a bequest of \$400,000. This was conditioned upon George's sobriety for five years prior to March last.

—Don't you know that to have perfect health you must have pure blood, and the best way to have pure blood is to take Hood's Sarsaparilla, the best blood purifier and strength builder. It expels all taint of scrofula, salt rheum and other humors, and at the same time builds up the whole system and gives nerve strength.
Hood's Pills may be had by mail for 25c. of C. I. Hood & Co., Lowell, Mass.

—Three years undisturbed possession of a setter dog will destroy the veracity of the best man in America.

THE MILK TURNED SOUR.—I will not tell you her name, but one of the neighbors says that during her brief visit the other day the milk turned sour. Her countenance looks a yard long. She sighs perpetually. The cloud of her brow is deep. If beaten out thin, I believe it would cover the sky. Her voice is doleful, and her eyes show no radiance. Her wrinkles are numberless. She is a sorry picture, and all believe she is the victim of one of those complaints common to women. Her system is deranged. She needs a course of self-treatment with Dr. Pierce's Favorite Prescription. This will eradicate thoroughly those excruciating periodical pains and functional weaknesses, incident to her sex, and at the same time build up and invigorate her whole system by its health-imparting influence. A trial bottle will convince.

—The Cambria Iron Company is preparing to build ovens and burn its own coke, and thus in the future be absolutely independent of strikes and strikers. Only non-union men are now employed at the big iron works. The coke ovens will be erected on the hillside above the mills. A new German process of burning coke will be introduced.

—My wife was confined to her bed for over two months with a very severe attack of rheumatism. We could get nothing that would afford her any relief, and as a last resort gave Chamberlain's pain balm a trial. To our great surprise she began to improve after the first application, and by using it regularly she was soon able to get up and attend to her house work. E. H. Johnson, of C. J. Knutson & Co., Kensington, Minn. 50 cent bottles for sale by F. Potts Green.

—It is easy to live in the world after the world's opinion. It is easy to live in solitude after our own. But the great man is he who in the midst of the crowd keeps with perfect sweetness the independence of his own character.

—With the blood full of humors, the heated term is all the more oppressive. Give the system a thorough cleansing with Ayer's Sarsaparilla and a dose or two of Ayer's Pills, and you will enjoy Summer as never before in your life. Just try this for once, and you'll not repent it.

—Fond Mamma (to clerk in china store).—"I see you have mugs marked Tom and Jerry; have you any with Willie and Charlie on them?"

Medical.
CATARRH OF THE STOMACH
A SERIOUS CONDITION—HOOD'S SARSAPARILLA SAVED HIS LIFE.
"I can honestly say, that I believe Hood's Sarsaparilla saved my life. I was in a serious condition with catarrh of the stomach, bowels and bladder. I watered intensely from dyspepsia, and was a miserable wreck. For two years I was in this terrible condition, and one time had three physicians attending me, and I not only grew no better, but seemed to go FROM BAD TO WORSE
all the time. I really wished I was dead. I had no rest day or night. I didn't know what to do. I had taken so much medicine of the wrong kind that it had poisoned me, and my finger nails began to turn black and come off. When I was in this condition, I sent for a bottle of Hood's Sarsaparilla. The first bottle had no surprising effect, but I had faith in the medicine, and continued using it until I had taken fourteen bottles. It did more for me HOOD'S SARSAPARILLA CURES
than all the medical attendance and prescriptions I ever had. I have gradually regained perfect health, am entirely free from the catarrh of the bowels, and do not suffer with the intense pain in my back as formerly. I am able to work hard, and tell everyone what good Hood's Sarsaparilla has done me." W. R. Young, Potter's Mills Pa.

CASTORIA
C C C C
C A S T O R I A
C A S T O R I A
C A S T O R I A
C C C C
FOR INFANTS AND CHILDREN.
CASTORIA PROMOTES DIGESTION, and overcomes Flatulency, Constipation, Sour Stomach, Diarrhoea, and Feverishness. Thus the child is rendered healthy and its sleep natural. Castoria contains no Morphine or other narcotic property.
"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me."
H. A. Archer, M. D.,
111 South Oxford St., Brooklyn, N. Y.
"I used Castoria in my practice, and find it specially adapted to affections of children."
Alex. Ross, M. D.,
1037 2d Ave., New York.

—From personal knowledge and observation I can say that Castoria is an excellent medicine for children, acting as a laxative and relieving the pent up bowels and general system very much. Many mothers have found me of its excellent effect upon their children."
Dr. G. C. Osmond,
Lowell, Mass.
