**Paints.**

**THE BEST INVESTMENT**—in real estate is to keep buildings well painted. Paint protects the house and saves a good house has remained unsold for want of paint. The rule should be, though, "the best paint or none." That means

**STRICTLY PURE . . . WHITE LEAD**

You cannot afford to use cheap paint. To be sure of getting strictly pure white lead look at the brand; any of these are safe:

"ARMSTRONG & McKELVY,"  
"BEYMER-BAUMAN,"  
"DAVIS-CHAMBERS,"  
"FAHNESTOCK."

Fog Colors.—National Lead Co.'s Pure White Lead Tinting Colors.

These colors are sold in one-pound cans, each can being sufficient to tint 25 pounds of strictly pure white lead. The desired shade; they are in no sense ready-mixed paints, but a combination of perfectly pure colors in the hands of the painter.

A good many thousands of dollars have been saved by property-owners by having our book on painting and colors at hand. Send us a postal card and get both free.

**Democratic Watchman.**

Bellefonte, Pa., July 27, 1894.

**Drive Out the Anarchists!**

Some time ago a cable despatch announced that Charles Wilfred Mowbray one of the rankest Anarchists of his time was on his way to this country for the avowed purpose of disseminating his destructive doctrines. But neither the Federal nor the State authorities paid the slightest attention to the report and Mowbray came over on the steamer Paris without making any attempt to hide his identity.

Since his arrival in this country he has been associating with Anarchists in Newark and New York, and has made his headquarters in Justus Schwab's saloon in First street in the latter city. He was run down by a reporter of the New York Herald, to whom he described his plans in visiting the United States, in a spirit of candor which indicates that he regards the United States as an admirable field for the display of his peculiar talents. In fact Mr. Mowbray seems to be of the opinion that the people of this country are waiting impatiently for a chance to tear down everything and then rip up the ruins so that chaos will be promulgated. He has heard it true, that there is some objection to Anarchist meetings, but he insists that this is unjust and that such objection should not be considered for a moment.

He declares with great pride that he has been an Anarchist since 1880 and that he has been arrested many times in England. Whether that is the reason he transported himself to these shores does not appear, but here he is and here he proposes to do his work. In conjunction with his colleagues he says, "I am here to urge Anarchism pure and simple." He declares that he did not come here to incite riot, although he says, "I believe that the purposes I have in view cannot be attained in a manner entirely devoid of violence." But there is one thing of which he is certain, which is that a general strike of workmen is the crying need of the time. Here is what he says:—

"Productive co-operation and the strike—general strike—by the federation unions of labor are what will accomplish the end. I am distinctly in favor of every Union man laying down his tools and refusing to work. The capitalists, and the industrialists, though, will cause it all. They will incite the people to resist our endeavors, by false promises, and by bloodshed. But Mr. Mowbray does not shrink from bloodshed, so long as there is no danger that any of his own will be shed. He welcomes it. Let the blood of the workmen be shed; let the capital of the country be scattered; let there be paralysis of all industries; let confusion reign and hold sway. This, according to Mr. Mowbray, will make existence ideal.

The doctrine which he teaches, had as it will find believers in this country, and in its way will produce a most pernicious effect. This enforces a serious lesson on the American people, who are considering ways and means for expelling from their shores all elements and influences which militate against the well being of the Republic. The Chinaman is barred and various efforts have been made to protect Americans from adverse foreign influence. Should not Anarchists be treated in a similar way? Why should dangerous agitators like Mowbray be allowed to come into the country to preach disorder and lawlessness?—*Albany Journal*

**Ingenuous Meanness.**

A Brother in Piety Plays the Fly-Paper Game on His Church.

A good story comes from a neighboring village, and a report of the ingenuity of man's acquisitiveness may be a pointer for some of those not averse to turning an honest penny by their way, says the Fargo (N. D.) Forum. A certain brother in the fold, who takes an active part in church work, and in whom implicit confidence has been placed by his associates, has been detected of having a piece of sticky fly-paper in his hat when he went to take up the collection at the church.

All the coins that dropped upon the fly-paper stayed there, and it was amazing how the big pieces crowded the little ones off.

When the audience had been solicited, this smooth individual would advance and turn his hat upside down over that of another who had been soliciting the audience on the other side of the house. All the coin that dropped belonged to the church, and all that remained in the hat was to remunerate him for the work he had done, so to speak.

**A Bull Butts the Engine.**

COLORADO SPRINGS, Col., July 22.—The passengers on Colorado Midland train No. 602 had a narrow escape from death yesterday. The train left Denver at 8:34, and was due here at 11:10. Upon reaching a point eight miles north of here, and while running about twenty miles an hour, a big bull, which was in a herd of cattle, turned and charged the engine. The animal's head was cut completely off, and the engine left the track, running on ties about seventy yards, dashed into the eastern side of the cut while the tender was swung across the track and the baggage car plowed in the west bank. The day coach also left the track, but the chair car and Pullman remained on the rails. The engine crew saved themselves by jumping.

The death of Harriet Sackett, who lived near Smith's mills, Clearfield county, ended a strange life. Thirty years ago, she and her sister Alice, although suffering in no way, went to bed and refused to rise again. They were then young, and no amount of coaxing could induce them to leave their bed. The mother cared for them, but she died. Afterward other members of the family carried food to them. In time Harriet became a hopeless paralytic. About four years ago, Julia one day astonished her friends by getting up, and she has since acted as other persons. Harriet was always cold, no matter how hot the weather, and usually slept under a mass of dressed sheepskins. They never gave a reason for their odd conduct.

**The Newest Stories.**

The Pullman Porter and the Missing Package of Money.

After Mr. Scadds left the station he experienced a severe shock upon discovering that a packet of banknotes which he was taking to the city was nowhere about his person.

He must have left it in the Pullman car.

"I'll go to the superintendent's office and make my loss known," he thought; and he did. "I left a package containing \$5000 in bank notes in a Pullman car not half an hour ago," said Mr. Scadds to the official.

"Which train?"

"The one which arrived at 9.15."

"Have you your Pullman check?"

Fortunately he had, and this enabled the superintendent to send for the conductor.

He soon arrived, for he had not yet finished the report of his trip, and was still in the building.

"Conductor," said the superintendent, "did you see anything of a package left in your car?"

"No, sir."

"Porter didn't turn anything over to you?"

"No, sir."

"Bring the porter here."

"He was brought."

"Did you see anything of a small packet after the passengers left your cars?"

"Yes, sah."

"You haven't turned it in?"

"Why, no, sah. It was a lot of money, sah."

"Precisely. Where is it now?"

"Here sah."

It was produced from an inside pocket.

Mr. Scadds' eyes brightened when he saw the roll. "That's it," he exclaimed. He counted the money, and it was all there, the entire \$5000.

"Look here, porter," said the superintendent, severely, "I want to know why you did not bring that package to me the moment you got your fingers on it."

"Why, sah," replied the man, with an injured air, "I s'posed de gemman had left it for a tip, sah. That's why, sah."

**Coloring of Fruits.**

Peculiar Tricks Practiced by the Fruit Dealers of France.

The Bulletin d'Arboriculture, of Belgium, points out the following sophistications to which fruits are at present submitted in Europe.

Acetate and sulphate of copper have for a long time been employed for coloring plums that are too green. The color of lemons is "improved" with citronine and naphrol yellow, and the green spots are imitated by means of diamond green.

A pleasing color is given to strawberries by sprinkling them with sulphofuchsine or rhodamine, or else a mixture of rhodamine and azo-red is used.

Nothing is easier than to give peaches a beautiful color. To this end there is employed a mixture of rhodamine, azo-red and citronine, which is applied by means of a brush and a perforated plate of zinc.

The melon itself is not spared. Atropine or azo-orange is introduced into the interior by means of a tube, and care is taken to add a little essence of melon.

Apples and pears come in their turn and pretty varieties of them are obtained by means of aniline colors, which attack the flesh as well as the epidermis.

At a recent dinner Dr. Villon offered his guests some pears whose exterior seemed to be intact, but which internally exhibited the colors of the French flag. The blue was obtained with Victoria blue and the red with a mixture of rhodamine and azo-red.

In Loudoun county, Va., is one of the largest fruit farms in the country. It contains 60,000 vines, 45,000 peach trees, 5000 quince and pear trees, and several hundred English walnut and Italian chestnut trees. The enterprise began as the experiment of two brothers who believed that the Northern Virginia country was admirably suited to the growing of fruits. They first bought 500 acres of land on Loudoun Heights and the first season planted a peach orchard. This was in 1887. Since that time they have increased their holdings steadily, and their fruit farm promises to rival the largest ranches on the Pacific Coast.

**Aggravated Insult.**

Young wife (at telephone)—Is that the office of the telephone company? I want to talk with Cyrus Winterbottom. I'm his wife, and—  
Telephone Girl—Number?  
Young Wife—Number? I'm his first and only, you insulting creature!

**An Unkind Afterthought.**

"Dickey is studying medicine."  
"What for?"  
"He says he wants to be a philanthropist and help people."  
"Into the next world?"

The normal temperature of man is about 98.6 degrees; of the snail, 70 degrees; oyster, 82 degrees; porpoise, 100 degrees; rat, cat or ox, 102 degrees; sheep, 104 degrees; hog, 105 degrees; chickens, 111 degrees.

The Mercy and Help department of the Methodist Episcopal church at Punxsutawney has resolved to take charge of babes whose mothers wish to attend church on Sunday.

With China and Japan at loggerheads it will not be polite to ask for a second cup of tea until times get better.

**A Whaling Adventure.**

A most disastrous accident occurred to the whale-ship *Essex*, belonging to Nantucket, and commanded by Captain Ronald Pollard. While cruising in the South Pacific the ships discovered a school of large sperm whales, and all the boats were at once lowered to assail them. The mate and Captain succeeded in fastening at about the same time. The former lanced his victim, and while engaged in tying his fins together preparatory to securing him alongside the ship, which was about a mile away, but bearing down in response to the mate's signal, the Captain was placed in danger by the whale which he had struck making for his boat after rising. Great dexterity on the part of the rowers and steerer swept the boat out of the path of the infuriated fish which kept on in a direct line, dragging the whale-boat after him with such velocity that the parted waters stood a foot above the gunwale, but were prevented from falling into the boat owing to the great speed maintained. It was quickly seen that the ship was in the path of the fleeing whale, and the Captain hailed to the men on board to alter the course of the vessel, and it was evident that the danger was appreciated by the helmsman of the *Essex*, for the head of the ship was observed to fall off; but ere she could be swept out of the track the whale struck her with such frightful force that the bows were crushed in, and all three masts were carried away. The vessel immediately filled with water, but remained floating, with her upper deck even with the water, owing to the number of empty barrels in her 'tween decks.

Fortunately quite a number of provisions were in the galley when the accident took place, and a barrel of salt pork and one of beef were recovered from the hold a day or two later. For over a week the crew lived on the deck of the ship, hoping to sight a sail; but none appearing, and realizing that they were in an unfrequented part of the Pacific, they took to the boats, with the idea of reaching Valparaiso, the nearest port. A few days following they sighted Ducie's Island, an almost barren land situated in the latitude of 14° 40' south, and the longitude 124° 40' west. In a cave close to the beach the men found eight skeletons, and a board in which had been cut with a sailor's knife the words, "Ship Elizabeth of London."

Three of the crew, however, preferred remaining on this sterile island rather than venture three thousand miles in an open boat; so leaving them a small stock of provisions and some fishing lines, the remainder of the men headed to the eastward.

For several days the boats kept together; then they became separated, never to meet again. Six weeks later a battered whale boat drifted into the harbor of Valparaiso just as the sun was sinking across the wide reach of crimson tinted waters. The glory of the sunset bathed the stained and tattered sail until it looked to be woven in threads of gold. Even the gaunt faces of the crew caressed by the tender touches of the mystic glow, became fair to look upon, and their ragged vestments seemed to wrap them about with the raiment of a king.

Upon learning the story of the shipwreck, an American man-of-war then at anchor in the harbor was despatched to Ducie's Island, where the three men were rescued.—*Harper's Young People.*

**Little Salary—Big Bond.**

PHILADELPHIA, July 18.—President Cleveland's appointee to the position of sub-treasurer, ex-Governor Bigler's son, is reported to be not quite so enthusiastic over the position as might be expected. Mr. Bigler is said not to have been over desirous for the place, but when he came down to the city a short time ago and ascertained that on a moderate salary a bond of \$220,000, with bondsmen qualified in double that amount, was required, he was naturally surprised. The bond is the heaviest required of any government official in the city, yet the salary attached to the office is smaller than that of a number of federal places, notwithstanding the responsibilities.

Some day, some time, some where, there you will probably know what it is to have sick-head-ache. Do not go to the drug store and take a powerful liver pill, for there is something better to be had at no extra cost. Ask C. M. Parrish, for a box of Ramon's Tonic Liver Pills (and Peppets) Simple but always effective; two separate medicines, one to cleanse the liver and the other to purify the blood, and build up the strength and the appetite. Ask your druggist about it and get a free trial dose of the pills.

The rate of wind varies from five miles an hour—a light breeze—to eighty or a hundred miles an hour—a hurricane. From twenty or forty miles an hour is reckoned a high wind or a gale; at fifty miles an hour it is called a storm.

What do you take medicine for? Because you are sick and you want to get well, or because you wish to prevent illness. Then remember that Hood's Sarsaparilla Cures all diseases caused by impure blood and debility of the system. It is not what its proprietors say but what Hood's Sarsaparilla does, that tells the story of its merit. Be sure to get Hood's and only Hood's. Purely vegetable—Hood's Pills—25c.

Down in Arkansas a leading minister undertook to decide a question of veracity between himself and a layman by the shotgun method. The only thing definitely settled was that the layman was the best shot and the minister, it is to be hoped, is now playing a heavenly lyre instead of fighting with an earthly one.

He—"If I should propose to you, what would be the outcome?" She—"It would depend entirely on the income."

Because a boy is referred to as a calf it does not follow that he will grow up to be a coward.

Oh, woman, despairing and wretched,  
Dreading, yet longing to die,  
Hear the glad chorus that rises,  
Filling the dome of the sky;

"Sisters, be glad there's help to be had; No longer be miserable, gloomy and sad; Lost health reclaimed," rings out the refrain, "Poor creatures, be healthy and happy again."

"How? By taking Dr. Pierce's Favorite Prescription, the world's greatest remedy for all kinds of diseases peculiar to women. It brings back tone and vigor to the system weakened by those distressing complaints known only to women, which make life such a burden. It restores relaxed organs to a normal condition. It fortifies the system often terminate in untold misery, if not in death—which is preferable to the pain and torment of living, in many instances. It is the great gift of scientific skill and research to women, and for it she cannot be too grateful. It cures her ills when nothing else can. It is guaranteed to give satisfaction or price (\$1.00) returned. Absolutely on trial!

—So great is the public terror in Delaware of the traction threshing engine, which travels by its own power along country roads from farm to farm, that a law is enforced requiring, under heavy penalties, that those in charge of the machine send a man 300 yards in advance to announce its approach to persons driving along the road, and to aid in leading horses past the object of terror.

Last June Dick Crawford brought his twelve-month-old child, suffering from infantile diarrhoea, to me. It had been wasted at four months old and had always been sickly. I gave it the usual treatment in such cases but without benefit. The child kept growing thinner until it weighed but little more than when born, or perhaps ten pounds. I then started the father to giving Chamberlain's Colic, Cholera and Diarrhoea Remedy. Before one bottle of the 25 cent size had been used a marked improvement was seen and its continued use cured the child. Its weakness and puny constitution disappeared and its father and myself believed the child's life was saved by this Remedy. J. T. Marlow, M. D., Tamaroa, Ill. For sale by F. P. Green.

A man named Button, of Fort Scott, Kan., has named his daughter Pearl, and a Mr. White, of the same State, has named his daughter Snow.

Weary wives, mothers, and daughters—tired nurses, watchers, and helpers—tired women of all classes should take Ayer's Sarsaparilla. It is the kind they need to give pure blood, firm nerves, buoyant spirits, and refreshing sleep. There is no tonic equal to Ayer's Sarsaparilla.

Medical.

IT IS NOT WHAT WE SAY BUT WHAT HOOD'S SARSAPARILLA DOES THAT TELLS THE STORY. ITS RECORD IS UNEQUALLED IN THE HISTORY OF MEDICINE. EVEN WHEN OTHER PREPARATIONS FAIL.

HOOD'S SARSAPARILLA CURES

"About three months ago I was overcome by that tired feeling. Felt dull and tired all the time. I caught a very bad cold in my head which caused me much pain and especially about my right eye. I seemed to lose the sense of smell and taste for three weeks and my appetite was entirely gone. I became so weak and faint I was not able to be up. My father bought me three bottles of Hood's Sarsaparilla and two boxes of Hood's Pills. I took these and am now strong, have a good appetite and sleep with solid comfort. I recommend Hood's Sarsaparilla and Pills to all my friends for it gave me strength and health. B. ANNOR, 2527 Hancock Street, Philadelphia, Pa.

HOOD'S PILLS cure liver ills, constipation, biliousness, jaundice, sick headache, indigestion. 39-27

**CASTORIA**

FOR INFANTS AND CHILDREN.

CASTORIA PROMOTES DIGESTION, and overcomes Flatulency, Constipation, Sour Stomach, Diarrhoea, and Feverishness. Thus the child is rendered healthy and its sleep natural. Castoria contains no Morphine or other narcotic property.

"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me." H. A. ARCHER, M. D., 111 South Oxford St., Brooklyn, N. Y.

"I used Castoria in my practice, and find it specially adapted to affections of children." ALEX. ROBERTSON, M. D., 1057 2d Ave., New York.

"From personal knowledge and observation I can say that Castoria is an excellent medicine for children, acting as a laxative and relieving the pent up bowels and general system very much. Many mothers have told me of its excellent effect upon their children." Dr. G. C. OSBOON, Lowell, Mass.

THE CENTAUR COMPANY,
