## Paints.

DAINT CRACKS .- It often costs more to prepare a house for repainting that has been painted in the first place with cheap ready-mixed paints, than it would to have painted it twice with strictly pure white lead, ground in pure linseed oil.

STRICTLY PURE

WHITE LEAD

forms a permanent base for repainting and never has to be burned or scraped off on account of scaling or cracking. It is always smooth and clean. To be sure of getting strictly pure white lead, purchase any of the following brands:

"ARMSTRONG & McKELVY,"
"BEYMER-BAUMAN,"
"DAVIS CHAMBERS,"
"FAHNESTOCK."

For Colors.—Mational Lead Co.'s Pure White Lead Tinting Celors, a one-pound can to a 25-pound keg of Lead and mix your own paints. Saves time and annoyance in matching shades, and insures the best paint that it is possible to put on wood.

on wood.

Send us a pestal card and get our book on paints and color-card, free; it will probably save you a good many dollars. NATIONAL LEAD CO., New York.

An Awful Ride.

Embarrassing Experience of Two Fashionable

Two very pretty and fashionable young women set out from Montclair to Bloomfield, N. J., one day last week on foot, and as they were going to a lun-cheon had on most "fetching" toilets. The road was hot and dusty, and after give her bother so that' the walk ahead grew to assume fairly insurmountable proportions. Just as she limped and hobbled at her worst along came a great high wagon with a wide driver's seat

over the top. The whistling driver's cheery consent to their request for a ride solved their difficulty. He chuckled a bit as was mighty genial about it, and they felt no other sensation than that of relief, with an idea that they were perhaps conspicuously high.

As they rode along everybody stared at them. Some folk actually stopped by the roadside and shielded their eyes with their rural palms to watch the young women. By and by the gazing grew embarassing, and as they neared the town they felt that surely something strange must be the matter with either up where women are not wont to

They pulled down their skirts and drew in their feet, adjusted their hats, assured each other that they looked all right and did everything else that nervous young women may do. As they entered town things assumed awful pro portions. Everybody stood and stared. Shopkeepers ran to the doors, heads were thrust out of windows, there was whispering and pointing and following until the young women in grim agony held down their parasols and felt creeping upon them an incipient paralysis which would prevent their ever being able to step down from this dreadful

At last the driver began to see it. "Guss," he said, "they think it sort o queer me carryin' a load like this. Never seen one like it before on this wagon, sure 'nough but they don't need to be such durn idiots makin' such fuss about

it. It's only the prison wagon."
And straight in the face of the crowd those young women stepped down. A few feet more and they might have been landed in front of the prison and they would show the public, whatever it cost, that they were completely free women. But they were shaken women, and never will they take a free ride again without an advance account of the nature of the wagon.

## How We Walk.

The Muscles Used and the Mechanical Work That They Do.

The chief muscles concerned in walking are those in the calf and back of leg, which, by pulling up the heel, also pull up the bones of the foot connected with it, and then the whole body, the weight of which is passed on through the bones of the leg. When walking, the trunk is thrown forward so that it would fall down prostrate were not the right foot planted in time to support it. The calf muscles are helped in this action by those on the front of the trunk and legs, which contract and pull the body forward, and the trunk, slanting forward when the heel is raised by the calf muscles, the whole body will be raised and pushed forward and upward. This advancement of each leg is effected partly by muscular action, the muscles used being (1) those on the front of the thigh, bending it forward on the pelvis; (2) the hamstring muscles, which slightly bend the leg on the thigh; (3) the muscles on the front of the leg, which raise the front of the foot and toes, preventing the latter, in swinging forward, from hitching in the ground.

When one foot has reached ground, the action of the other has not eased. There is another point in walking. The body is constantly supported and balanced on each leg alternately and therefore on only one at once. Hence there must be some means for throwing the centre of gravity over the line of support formed by the bones of each leg as it supports the weight of the body This is done in various ways, and hence the difference in the walk of different people. There may be slight rotation at the hip joint, bringing the center of gravity of the body over the foot of this side. This "rocking" motion of the trunk and thigh is accompanied by a over the foot planted on the ground and is accompanied by a is accompanied by a compensating outward movement at the kip. The body rises and swings alternately from one side to the other as its center of gravity comes alternately over one or the other leg, and the curvature of the spinal bones is altered with the varying position of the weight. - London Hospital.

# Why a Nettle Stings.

The leaf and stem of a nettle are literally clothed with erect hollow hairs. If one of these hairs is viewed under a miscroscope, it will be seen that its fine end, after tapering to a very fine degree of slimness, finishes at a little knob, while in the other direction, after gradually becoming more robust, it suddenly expands into a large bulb corresponding with the poison gland of the adder. The point of the hair is very near the Passenger Station. Telephone 1312. brittle, and contact with the hand causes the end to snap off, leaving a hollow needle point which readily pierces the skin, and, pressing upon the bulb at the other end the poison is forced through the centre channel and inflames the blood. Therefore, as the Detroit Free Press explains it, the tender handed who stroke the nettle are stung for their pains, because their gentleness has only served to break the brittle points and render them fit for piercing, but the rough handed break the hairs at their thickest parts, where they are too

A Talk with Mrs. Peary. She Expects to go Back to Greenland for Her

Mrs. Peary, the plucky wife of the Arctic explorer, who arrived in Wash-

ington recently and is now at her mother's home, corrected some impressions about the Peary expedition to-day.
"I am at a loss to understand the stories that are printed about the scarcity of food," she said. "There was plenty of provisions, and only once, in last May, when the weather was too bad for the hunters to go out after deer for two or three days, did the supply of deer meet run out. Then we had seal a little one young woman's Louis meat. No, it is not so bad when prop-Quinze heel and Piccadilly toe began to erly cooked, but I shouldn't like it as a steady diet. The sealers consider it excellent, however. We had an abundance of vegetable and farinaceous food and plenty of tea and coffee, and really I cannot overcome my surprise at the

ridiculous stories about the shortage. "I left Lieut. Peary with a plentiful supply of everything. Together we went over the food and made an inven-Together we he handed them up besides him, but he tory of everything, and if anything had been needed it would have been furnished from the ship's stores before the Falcon left. I did not want to come back. I regretted leaving very much. "What kind of a winter did you

"It was terrific. The storms were indescribable. The loss of a portion of our oil supply made our experience harder than it would otherwise have been. We lost half our oil supply and were compelled to put up with short one beyond the fact of being a modish rations of fuel. This made every one young woman taking a free ride away more or less miserable, and in such a state of nervousness, you know, a person is liable to make mountains out of little things that would not be noticed if good spirits prevailed.

"It is a mistake," Mrs. Peary went on "to allude to my husband as a seeker for the North Pole. His object has been, and still is, to delineate the north coast of Greenland.

"Will you return to your husband next year?"

"That depends upon the American people," responded the energetic woman with a cheery smile. "My husband and I have about reached the end of our resources in outfitting expeditions, and have expended something over \$50-000. I have made no plans yet. If it is possible I shall fit out a ship next summer and return to Greenland."

"The baby," she added with a bright motherly glance in her eyes when the reporter inquired about Miss Marie was never sick a day in her life until we reached St. John's, and some of the party jokingly said that civilization did not agree with her. I am inclined to think it was stale condensed milk and the change of water and the warm weather. She is getting along very

Mr. Herbert L. Bridgeman of Brooklyn, who was a member of the Peary Auxiliary Expedition, has a leading article in the Standard Union on anonymous statements purporting to be made by some members of the Peary party. These statements are to the effect that the party suffered considerably from the insufficiency of food and fuel. Mr.

Bridgeman says: "The story about the short supply at the end of the march, 125 miles, and or fat. could have been recovered at any time, had there been any real necessity to go after them, and by the further fact that in another cache near the headquarters, 2,600 pounds of untouched provisions were stored. Many men in Brooklyn, who only get fresh meat at one meal a day, do not feel called upon to complain of hardship or of short rations. The glass roof of Anniversary Lodge and the coal oil did not prove the success which was death. Stay the cough, or look out for expected. But the results scarcely rise a coffin. Dr. Pierce's Golden Medical above the importance of minor annoy-

The truth of the matter seems to be that until the return of the party, baffled and disappointed from the inland ice, everything went well, and enthusiasm and courage were at high tide. Subsequent to that event, when it became obvious that the hopes of the expedition for a brilliant success were, to a degree, frustrated, repining and dissatisfaction took the not unnatural form of complaint and criticism toward the leader. Lieut. Peary's own record is the best answer to all objections. He has asked none of his men to go where he has not led; has shared their rations from first to last; has returned every man who wished to come in good health and good order to his home, and has remained at his post to make another, and doubtless successful, attempt upon the inland ice.

## He Meant Business.

The Emperor of China laid down the morning paper and swore a few bars. He had been reading about a squad of Japs walking all over four or five million of his best men, Stepping briskly to the telephone he told central to give him Li Hung Chang, and to be toler 75,000 per day, while many ably quick about it. Following is a verbatim copy of the dialogue that ensued, taken from the notes of a stenographer concealed in an adjoining

you ?' Emperor-"Did you act on the suggestion I made in our interview yester-

day?" Li Hung Chang-"Yes Empy, have just signed by wire an American to take charge of our forces."

Emperor-"What is his name?" Li Hung Chang—"Debs."
Emperor—"Look here, Li, you don't seem to understand that this is not a game of bluff." - Detroit Journal.

-Reporter-"Did you say your daughter's wedding dress was trimmed with duchess lace ?" Mrs. McFudd--"Not by a long shot!
It was trimmed wid the foinest quality Irish point. There wasn't wan Dutch article in her whole thruesaw!

The German empire has no prison of its own. Offenses against the imperial government are enforced by

Texas as a Cotton Manufacturer

For the last year or two almost every issue of almost every journal devoted to the textile industries has devoted more or less space to the discussion of the relative advantages of the North and South for manufacturing cotton goods. So far the cotton manufacturers of the South have been of coarser grades, and the production of these has increased so rapidly that some authorities claim there is not room for much more expansion in that line, and that further growth must be in the manufacture of print cloths, ginghams, canton flannels and other fine grades. The development of cotton manufacturing in the South has been based on its superalative advantages, which have been abundantly proven during the last few years of depressed conditions; the Southern mills running on full time and paying satisfactory dividends, while the contra ry conditions prevailed in the North. The advantages of manufacturing at the base of supplies and saving freight on raw material is obvious; while mild climate, productive soil, superior capacity of the South to support large industrial population at the lowest cost, and the reliable class of labor at moderate wage rates, are all in favor of the Southern factories. In the manufacture of coarse grades of cotton the fact has been established that the North can offer no competition, and the erection of Southern mills goes merrily on. Why, then should not southwest Texas manufacture cotton of all grades, having the most reliable and diversified supplies of raw material of any section of this or other countries? - San Antonio Ex-

Sam Randall on Alabama Iron. The Alice furnace will soon blow in and that means the re-opening of the Morris mines, near Oxmoor. These mines are among the richest ore mines in the mineral district, and have made the fortunes of several families. The ore is very rich and very accessible, lying close to the surface. When Samuel J! Randall visited the Birmingham district he was much impressed with these mines. "Why," said he, "you have iron ore here lying on the surface, and can blast it out and roll it down in the cars. In Pennsylvania we dig out our ore from a great depth and haul it some distance. Here you have the furnace at hand, the lime rock on one side and coal on the other."—Birmingham Age.

OYSTER CROQUETTES .- Twenty- five oysters, one gill of oyster liquor, one gill of cream, one tablespoonful of butter, two tablespoonfuls of flour, one tablespoonful of chopped parsley, yolks of two eggs, one quarter of a nutmeg, grated salt and cayenne to taste. Put the oysters on to boil in their own liquor boil and stir constantly for five minutes Take from the fire and drain. Chop the oysters very fine. Now take into a saucepan one gill of this liquor and the cream. Rub together the butter and flour; add this and the oysters to the boiling liquor and cream, and stir it until it boils and thickens; now add the yolks of the eggs; stir over the fire one minute; take it off, add parsley, salt, cavenne and nutmeg, mix well, and food is materially affected by the fact turn out to cool. When cold form into that six months' provisions for the in-land ice party of eight men were cached in bread crumbs, and fry in boiling oil

ALL FOR BARLEY CORN .-- LaFontaine, in one of his fables, tells of a barnyard fowl that scratched up a gem while scratching for corn. Not knowing its value, he gave it to a stone-cutter for a barley corn. Thus do many persons throw away the priceless pearl of health. A "trifling" cough is neglected, then comes Consumption, then Discovery will cure catarrh in the head, bronchial or throat affections, or lungscrofula (commonly known as the consumption of the lungs). If taken in time, and given a fair trial, it will cure, or the money paid for it will be re-funded. It is the only guaranteed cure.

-The Chinese are known to have built several fine suspension bridges before the opening of the Christian Era. One in the province of Iunna, built in the year 69 A. D.' is still in excellent condition.

RESTLESSNESS OVERCOME. -- "My wife and myself have been taking Hood's Sarsaparilla and Hood's Vegetable Pills for a long time. Hoods Sarsaparilla has entirely cured me of a bad headache to which I was subject. My wife was for sometime restless and could not sleep nights, but after taking a few bottles of Hood's Sarsaparilla this trouble was overcome." Charles H. Peterson, 2512, Jefferson St., Philadelphia, P.

Hood's Pills cure sick headaches

-Three canneries at Milford, Del. are packing 80,000 cans of tomatoes per day, and three at Frederica are packing smaller canneries all over the State and the peninsula are busy with tomatoes. Meanwhile a farmer in Kent county, Md., received recently, for 100 baskets of tomatoes shipped to Baltimore, \$4.43. Emperor-"Hey, there, Li, is this The baskets alone cost him 4 cents each

-There are fewer savings banks the imperial attorney, who calls into ——There are fewer savings banks service the state's attorneys of the feder- in New York city now than there were twenty years ago.

A WISE YOUNG WOMAN .-

Toung Adolphus Fitzwilliams he loved a fair maid, But to ask her to marry him, he was afraid, Because of catarrh, which she had very bad; So much so that often the youth was quite

glad
To omit, at the parting, the kiss of the lover.
The reason of this she set out to discover.
"Catarrh makes me loathsome. It's fatal to O, darling Adolphus, by all that's above, I vow I'll not lose thee if something the

To drive out catarrh and to sweeten a kiss. So this wise young woman began searching for a cure, and good luck at-tended her. She found Dr. Sage's Catarrh Remedy, at the drug store, and felt convinced that a preparation which the proprietors had such confidence in that they were willing to offer to pay \$500 for a case they cannot cure must be worth trying. She bought it. She tried it. It cured her. And when Adolphus kissed her at the altar last week, her kiss was as sweet and pure as

Girls, a word of advice; If you want a lover to stay a lover, you must get rid of catarrh. Do as this sensible girl did, and get the only sure remedy for this disgusting and dangerous disease-Dr. Sage's Catarrh Remedy.

-Farmers should not forget the meeting of the state board of agriculture at the State College on the 17th and 18th of October. These meetings bring together representative farmers from all parts of the commonwealth and topics of direct practical interest are discussed by successful, practical men. In addi-tion, the present meeting affords an opportunity to learn by personal observa tion what the State college and experiment station are doing to advance the agricultural interests of the state. day or two given to attendance upon this meeting can hardly fail to be time well spent.

Every mother should know that croup can be prevented. The first symptom of true croup is hoarseness. This is followed by a peculiar rough cough. If Chamberlain's Cough Remedy is given freely as soon as the child becomes hoarse or even after the cough has developed it will prevent the attack. 25 and 50 cent bottles for sale by F. P. Green.

"Your money or your life!" "Be gobbs, all ther money about me is spint, an' me loife is in ther hands ov ther loife insurance, so shoot away and good luck to yez."

-If your child is puny, fretful, troubled with glandular swellings, inflamed eyes, or sores on the head, face or body, a course of Ayer's Sarsaparilla is needed to expel the scrofulous humors from the blood. The sooner you begin to give this medicine the better.

## Medical.

RALL MEDICINE

is fully as important as Spring medicine, because the body needs to be fortified against the approach of colder weather chilling winds, changing tem perature and the malarial germs contained in falling leaves and decaying vegitation. The best fall medicine is

HOOD'S

SARSAPARILLA Because it builds up the system and enables it to withstand the attacks of

disease. Hood's Sarsaparilla purifies

the blood, creates an appetite and gives

healthy action to every organ of the body. Be sure to get Hood's because
