The Baltic and North Sea Canal.

Another great waterway will soon be thrown open to commerce. The practical completion of the Baltic and North Sea Canal was celebrated on Saturday last, nearly a year in advance of the time set for its opening. The German Government steamer Berlin sailed through the new waterway, amid the boom of artillery and a profuse display Book free pills 25c. At drugstores, or of bunting. The canal, which is 61 miles long, 200 feet wide at the surface and 85 feet wide at the bottom, and has a depth of 28 feet, will prove of infinite Lubeck, Stettin and Dantzig. A Child's Day's Journey.

Little Feet Which All Day Long Mark the Pass ing Moments.

How many miles a day the little feet of young children will travel is often a source of wonderment to parents who lovingly watch them. This restless activity was never better illustrated than by a very old story, which may interest readers of this column.

A grandfather who had little to de except to watch the curious antics of his grandchildren as they played around the house resolved that for one day he would follow one little fellow who seemed especially restless, prying into everything from morning till night.

It proved much more of a job than he had expected. Noon came, and if the child was not wearied the man was, but he had set out to go wherever the child led, and be persevered. Toward night there came a sudden end to the experiment, when the child crept through between the rounds of a chair nothing. where space was entirely too narrow for a grown man to follow. He had to acknowledge himself beaten at last.

Whether the baby turned back and winked one eye at its grandfather the story does not tell. No doubt, however the baby's mother thought he did .-Boston Budget.

The Czar's Illness.

The precarious health of an absolute sovereign over many millions of subjects in Europe and Asia is a circumstance of momentous importance in current history. Alexander III has been neither an enlightened ruler nor a popular monarch, and he has no claims to distinction except his vast resources of autocratic power; but devoid as he is of original genius and individual force of character, he is the master of all the Russias, and his caprices, prejudices, and sympathies have weighed heavily in the scale of human destiny. Russia is a country more distinctively Asiatic than European, reactionary in the tendencies of government, and under the bondage of race traditions. In one a slave to traditions, he is also an autogoverning cabals in St. Petersburg, but powerful as they may become, they are dependent upon his sovereign will.
The career of Alexander III has been

a melancholy illustration of the irony of the Czarewitch, a popular and accom-plished Prince, left him at twenty heir to the throne and to the responsibilities to the state which were profoundly distasteful to him. His early manhood was embittered by the knowledge that he had ficent natural waterway to the high seas taken the place of one endeared to the have been treated. The ultimate effects cannot be forecast, for the world does not yet knew what manner of man the Czarewitch is. If he be, like his father, a dull, indolent and apathetic ruler, there will be neither war in Europe nor political progress in Russia. His prejudices and prepos-sessions will be determining influences precisely as his father's preferences for improved relations with Great Britain have tended to prolong the truce between the two great rivals for dominion in Asia; but unless he is a man of original force of mind, he cannot emancipate himself from the race instincts and dynastic traditions which predetermine the reign of a Czar and impart to it a reactionary, Asiatic trend .-- New York Tribune.
