

Bellefonte, Pa., Nov. 30, 1894.

Farm Notes

-Clean off the clusters of eggs on the limbs of the apple trees and there London Lancet hold that there is no will be fewer caterpillars to destroy next spring.

-Dig up the canna roots, separate them, and wrap in brown paper. Good insulator, but the shoe presents to the ground a large metallic contract, place, but not where they will become frozen.

-A writer says that it is hardly possible to over-feed a hog with corn if he has first had a liberal feed of pump- The contact with earth is further imkine. We never knew one to eat too many pumpkins.

-Experience favors the continuance of sods in orchards during the winter. While fall plowing is an advantage in many cases the sod of an orchard should not be turned under until

earth, so as to protect them from frosts in the winter, and insects in early spring. By banking up the trees they will also be less hable to injury by high winds.

-Potatoes and apples should be handled carefully, and not rolled down nail, to see that it does not penetrate to through the cellar through chutes, or | the "quick." dumped out of wagons, as injury is liable, and decomposition begins sooner than would otherwise happen.

-No kind of fruit need be lost. If there is no market within convenient distance the fruit may be evaporated. It is not difficult to dispose of the fruit in some form and the farm that has a of being expelled from the A. P. A., good orchard will be increased in val-

-In selecting varieties of fruit do not be induced to purchase by the claims made in the catalogues, as it is A. P. A. principles. He in its that impossible to secure a variety that is suitable to all climates. The value of a plant depends largely upon the conditions to which it will be subjected.

-For poultry the use of wheat bran and skim milk is excellent, but it should be given with other ground food, in the shape of a stiff dougn. Fresh meat and green food of some kind should be also allowed. On cold days a full ration of corn will be of ad-

vantage. -Grain is an important article of food after severe cold weather sets in. It produces more warmth than any other food, and is in a more concentrated form, as well as being more easily

as tertilizers. It they can be cut up of the Mikado have been constantly and placed in the centre of the manure receiving accurate information from the heap they will be decomposed and the front, Japanese armies and fleets have gases absorbed. It death is caused by some contagious disease, however, all lands and seas under the diminion of ly buried.

-Before putting away the potted enemies. plants for the winter, change the earth in the pots. Do not use pots that are too large, and avoid watering them in water and the same quantity of phosthat can be applied.

land last year, of the ox heart variety. This is an enermous yield, being at the rate of 1400 bushels per acre, and is not easily exceeded. It demonstrates what may be done, however, with such a crop, and with a yield of only one-third that amount on an acre of carrots should prove profitable, as they are superior to all other root crops as

-To get early onions the seed may be sown thickly in cold trames, wellprotected, but it should be done before the warm weather gives place to snow and ice, in order that the seed may germinate. By spring there will be a plentitul of onion "sets" which may then be transplanted in the usual manner, or in trames for an early crop. Onions can endure quite a degree of cold without injury, and advantage may be taken of their hardiness at this

-Swill is readily eaten by swine, even when it is so fermented as to be sour, but hogs will keep in better condition on more wholesome food. Wheat, corn, and oats ground togeth of pain. It affords prompt and permaer, scalded with clover hay, cut fine, nent relief and if used in time will often the whole made into a somewhat slop py mess, will be just as cheap as swill and far more wholesome. Hog cure for a lame back. For sale by F. cholera and other diseases may sometimes be traced to the filthy food which the hogs are compelled to eat, because they cannot procure anything better.

-- The corn crop is one upon which many farmers depend entirely. They are also sometimes disappointed in their expectations by being subjected to unfavorable seasons. It is because corn produces both grain and fodder that it is valued so highly, but it is a mistake to depend solely upon one crop. Fruit, grass, turnips, potatoes, and vegetables should be grown in order to have a variety to sell or to use for the family and the stock. One crop only sooner or later exhausts the

- Peas and beans are two neglected crops, as they are not grown on many tarms where they could be made profitable. It is possible to grow two crops -early peas, and beans later-on the saine ground. Beans are always salable at good prices, and the straw of peas and beans may be utilized as bedding, or for sheep to pick over. The best early peas are grown on land When she had Children, she gave them that is heavily manured in the fall or Castoria. in winter, so as to turn it under during any warm spell when the frost is out of the ground.

Horses and Electricity

Why the Animals are Easily Killed by a Current The horse is easily killed by electricity says the Boston Transcript. It is popularly supposed that the current, on entering the body, meets with some physiological susceptibility that makes this animal more vuinerable than others to the action of such a current. The ground for this assumption. The explanation lies elsewhere. The hoof, and more particularly its crust and sole, is a and this contract is in connection with metallic conductors in the shape of nails, which pierce the strongest part of the insulation and afford an easy electrical path into the body. proved by the great superincumbent weight of the animal, and it may often happen that in passing over wet ground the external surface of the hoof and the wet fetlock, especially in the case of untrimmed horses, may become sufficiently wet to form a good surface conductor, and so carry a current directly from Bank up all fall planted trees with the earth to the upper part of the body.

In this way the safety of the natural "resistance" of the hoofs is neutralized A horse, too, covers more ground than a man and runs greater risk from being in contact with points of ground further apart. Farriers ought to consider the above well, so as to induce them to bestow extra care upon the driving of the

> Forty A. P. A. Congressmen. This is the Claim Made by Grand Lecturer Wal-

BAY CITY, Mich., Nov. 18 .- In deny ng the statement that he is in danger Grand Lecturer Walter Sims, now vis iting here, said incidentally that the order will have forty members of the House of Representatives pledged to the Republican party leaders are at heart as much opposed to the A. P. A. as are the Democrats.

Remember the Poor.

"Yes, we should all think of the poor on Thanksgiving. "So we should. Did you give anything this year ?"

"Oh, yes." "What ?" "Thanks." - Texas Siftings.

— Japan's system of telegraphs covers nearly 30,000 miles and includes several submarine cables, one of which connects Korea with Nipon, the largest digested than bulky substances. It should never be omitted from the winter ration. - Dead animals are valuable for use clining to adopt the methods of West-ern civilization. While the Generals dead animals should be burnt or deeply huried.

Run down with DYSPEPSIA

STOMACH LIVER AND HEART

Almost in Despair but Finally cured

by Taking.

"For fifteen years, I was a great sufferer from indigestion in its worst forms. I tested the skill of many doctors, but grew worse and worse, until I became so weak I could not walk fifty yards without having to sit down and rest. My stomach, liver, and heart became affected, and I thought I would surely die. I tried Ayer's Pills and they helped me right away. I continued their use and am now entirely well. I don't know of any. thing that will so quickly relieve and cure the terrible suffering of dyspepsia as Ayer's Pills,"-John C. PRITCHARD, Brodie, Warren Co.,

SCHOFIELD'S NEW

HARNESS HOSUE

We extend a most cordial invitation to our patrons and the public, in general, to witness one of the

GRANDEST DISPLAY OF

Light and Heavy Harness

ever put on the Bellefonte market, which will be made in the large room, formerly occupied by Harper Bros., on Spring street. It has been added to my factory and will be used exclusively for the sale of harness, being the first exclusive salesroom ever used in this town, as heretofore the custom has been to sell goods in the room in which they were made. This elegant room has been refitted and furnished with glass cases in which the harness can be nicely displayed and still kept away from heat and dust, the enemies of long wear in lestner. Our factory now occupies a room 16x74 feet and the store 20x60 added makes it the largest establishment of its kind outside of Philadelphia and Pittsburg.

of Philadelphia and Pittsburg.

We are prepared to offer better bargains in the future than we have done in the past and we want everyone to see our goods and get prices for when you do this, out of self defense you will buy. Our profits are not large, but by selling lots of goods we can afford to live in Bellefonte. We are not indulging in idle philanthropy. It is purely business. We are not making much, but trade is growing and that is what we are intrested in now. Profits will take care of themselves.

When other houses discharged their workmen during the winter they were all put to work in my factory, nevertheless the big (?) houses of this city and county would smile if we compared ourselves to them, but we do not mean to be so odious, except to venture the assection that none of them can say, as we can say "NO ONE OWES US A CENT THAT WE CAN'T GET." This is the whole story.

CAN'T GET." This is the whole story.

The following are kept constantly on hand.
50 SETS OF LIGHT HARNESS, prices from
\$8.00 to \$15.00 and upwards, LARGE
STOCK OF HEAVY HARNESS per
set\$25.00 and upwards, 500 HORSE
COLLARS from \$1.50 to \$5.00
each, over \$100.00 worth of
HARNESS OILS and
AXLE GREASE,
\$400 worth of Fly Nets sold cheap
\$150 worth of whips
from 15c to \$3.00 each,
Horse Brushes, Cury Combs
Sponges, Chamois, RIDING
SADDLES, LADY SIDESADDLES
Harness Soap, Knee Dusters, at low
prices, Saddlery-hardware always on hand
for sale, Harness Leather as low as 250 per
pound. We keep everything to be found in a
FIRST CLASS HARNESS STORE—no changing, over 20 years in the same room. No two
shops in the same town to catch trade—NO
SELLING OUT for the want of trade or pricesFour harness—makers at steady work this winter, This is our idea of protection to labor,
when other houses discharged their hands,
they soon found work with us.
