## Bellefonte, Pa., Dec. 7, 1894. HOW IT IS IN LIFE.

A rooster flies upon the fence, Just hear him crow!
His satisfactiou is immense,
His self-possession is intense.
His lusty lungs give evidence
That this is so.

Another rooster sees him there And hears him crow. With flapping wings he cleaves the air, And so they fight, and scratch, and tear, Till down they go

So'tis in life. When any man Gets in life. When any man Gets eminent Some jealous rival tries to plan Some way to down him if he can; And if he just upsets the pan, He feels content.

## Hunting the Seal.

The Eskimo Plays a Waiting Game and Gets the Quarry.

Although the little ringed seal, or Fiord seal, contemptuously called the floe rat by English sailors, is the smallest of all our species, it is also the most enterprising. In the cold waters of the North, it goes simply everywhere. Throughout tens of thousands of square miles of cold and stormy waters, broken and chaotic ice packs, and barren floeice seven feet thick, the jolly little "Netsick" is the principal inhabitant, ready to yield his chubby body to any hungry Eskimo who happens to need it.

Taken altogether, this animal is to the Eskimos generally the most valuable source of food and clothing of all the quadrupeds of the North. In ranging northward, all other seals stop about on the eighty-first parallel, but the ringed seal cries "Excelsior!" and presses right on. Regardless of cold and other drawbacks, he joyously paddles past Lady Franklin Bay, out through Robeson Channel, and into the Polar Sea itself, which is named after our greatest American, north of all land. It was observed by Gen. Greely's party in latitude 82 degrees 54 minutes -- only thirty miles outh of the farthest north ever reached by man. What is more, Gen. Greely says that they winter as far north as Robeson Channel, though he is puzzled to know how they maintain breathingholes where the ice is so thick. It seems to me, however, that with the tempera-ture down to 60 degrees below zero, one lungful of air ought to be quite sufficient to last any seal a entire winter.

The ringed seal is found in Bering Sea, and throughout the Arctic Ocean in both hemispheres. The largest individuals are only about four feet in length, and by reason of its size, this species is despised by the white sealers married with great pomp in St. Peters---a very fortunate thing for the Eski-mos. In color it is extremely variable. were cheered by the populace and bless-In a collection of fifteen fresh skins that ed by the clergy. Many foreign dignionce came into my hands from Point taries participated in the ceremonies and Barrow, there were three well defined the Czar was almost reckless in his distypes-one almost black, another dark, from which the species takes its popular

in which patience is his most weapon. He seeks over the solid ice-floe until he finds a little round hole running down through the ice quite to the water, be it two feet or six. That is the breathing-hole of a seal, which the creature has kept open with its warm breath ever since the ice began to form. Mr. Eskimo simply camps on the ice beside the hole, and shivers and waits, be it one hour or fifteen. He waits for Mr. Seal to come and stick his nose into the bottom of the hole, to give and take some air. When he does so, the Eskimo promptly jabs a spear down through the hole, into the head of the seal. If it catches the anifeet of solid ice and get it.

This seal is the first aquatic animal that Eskimo children are taught to kill, and when seven year-old Eskimo Johnnie kills his first seal, the proud lather hangs the teeth and front flippers around his neck as trophies of his skill. It is said, also, that in their eagerness to have ever seen in the south, in the shape of a their children "make a record," Eskimo mothers sometimes catch seals on the sly and allow their little children to kill them, to add to their individual scores.

## Davis Succeeds John Ward.

Davis as manager and captain for next the finest quality of cotton, and more of season. Both these announcements, in- it to the acre, than anywhere else on season. Both these announcements, interesting to every admirer of the game, were made officially by Edward Talcott, of the New York Club, It has been rumored off and and on for some time that the Giants' captain and manager had decided to play no more, and it was as often denied. That he has come to a final determination in evidenced by letter which he sent from North Carolina to Mr. Tolcott, received recently. In his letter Ward says in positive terms that he has appeared on the diamond in uniform for the last time, and that no argument can change his intention. He advised Talcott to sign George Davis as manager and captain for 1895. Mr. Talcottsays in signing Davis he was largely influenced by Ward's advice.

It to the acre, than anywhere else on earth."

—Mr. Ira. P. Wetmore, a promitivation and descriptive text of the highest order.

The manner in which, during 1894, it has treated the Chicago Railway Strikes and the Chicago Railway Str teresting to every admirer of the earth."

## Plucky as Ever.

A lady writes : "I saw a lithe-looking, gray headed man sitting on a sofa in Harper's office last summer, and little by little came to realize that it was Mark Twain up to date. He was busy writing a letter or making memoranda, or something on his knee, and simultaneously rolled and smoked a mammoth cigar between or rather amongst. his lips. His clothes were Bohemianish; his white necktie had a careless twist, and he seemed as unconcerned as if his publishing house had not just gone into smithereens. His eyes were as bright and his face looked as happy s in the days when he was making his thousands of dollars out of the 'Jumping Frog.' 'Colonel Sellers,' and all the rest of them. It is said he is intending to make another fortune on the lecture platrorm, after his return from Europe.

-The mean temperature of the whole earth is about 50° Fahrenheit.

## Blast Furnace Managers.

Their Life is Not a Bed of Roses by Any Means.

The direction of a blast furnace plant is not a bed of roses; it is a position of grave responsibility, and often of considerable personal risk, demanding constant and continuous oversight. While the manager's office hours may ostensibly correspond with the ordinary working day, he is, in reality, never off duty, and is as likely to have a night call as many physicians. In the office the manager has to attend to the necessary correspondence, which will insure obtaining supplies of ore, fuel and flux; ordering them in advance, watching their shipment, so that they may arrive in proper time to avoid unnecessary handling, and to maintain sufficient reserves of stock for emergencies, at the same time preventing such accumulation as would be disadvantageous.

Bills for lubricants, tools, supplies, raw materials, freights, and the pay rolls must be examined and audited, and the reports prepared daily, or, in many cases, twice a day, by those having special charge of details, must be analyzed and prepared for a general report. Consultation with assistants concerning various special features, and with the chemist as to the work of his laboratory, are parts of the daily routine, and it is seldom that a day passes but what a furnace manager must give some time to visitors or the ubiquitous drum-

To keep abreast of the times he must read the trade and technical publications, proceedings of engineering societies, etc. In some plants where the manager looks after the sale of the pig iron produced, his duties are augmented by the market and correspondence or interviews with or visits to his custom-

ers' demand. This refers to a blast furnace moving along regularly, but the multiplicity of parts about the plant, the close watchfulness of every detail demanded, to maintain continuous operation, and the widespread influence which some minor irregularity or defect may exert, are constant menaces against blast furnace management being considered a peace-

ful pursuit. A noted iron metallurgist, who lost his life while endeavoring to correct an irregularity in the working of one of the blast furnaces under his control, said to the writer while discussing the blast furnace; "My greatest anxiety and my constant effort is to maintain regularity of operation in all parts of the plant, for a slight detect may result in great expense, loss of product and physical ex- 39-47

-Czar Nicholas II, of Russia, and regard of the d anger which is always mottled with light, and a third almost supposed to lurk around the ruler of the yellow. All showed the curious brown- Russias. He signalized the event by ish-yellow rings with darker centres pardoning criminals, curtailing sentences and remitting taxes. The new Czar has made a good start, so far as he has gone. This is the seal which the Eskimo hunts by simply playing a waiting game, work of governing his vast empire.

-Occasionally it is possible to satisfy the souvenir seeker without doing any damage in particular. This is the case at the tomb of George Washington in Mt. Vernon. A lady had just picked up a pebble from the walk in front of the venerated spot to carry home with her, when a workman came up with a wheelbarrow load of gravel which he

dumped on the spot. "Have you have you fixed up the place that way recently ?" the lady ask-

ed in a slightly apprehensive tone.
"Bless you, Miss," was the reply; mal and holds him fast, all the native we has to do this about every two has to do is to chop through about five weeks so's the tourists can have something to carry away for momentums!"

"Cotton is still king in Texas," said W. W Seeley recently to a Washington Post reporter. "We are having the greatest exhibit of the fleecy stuff 'cotton palace,' in my own town of Waco, that is attracting thousands of people from all over the union. Hunfrom Chicago, St. Louis and other trade centres have visited the palace, and they have gone away delighted with the in-NEW YORK, Dec. 3.-John Ward genious and cleverly executed project, has given up baseball for good. The and in love with the magnificent stretch New York Club has signed George of fertile prairie lands, which produce

cup of coffee after it had been examined by only three expert chemists.

---For every variety and phase of the many diseases which attack the air passages of the head, throat, and lungs, Ayer's Cherry Pectoral will be found a specific. This preparation allays inflammation, controls the disposition to cough, and prevents consumption.

-Kate-I don't think men are as bad as some would have them. Ruth-I don't know about that. Some women would have them a deal worse than they are.

POTT, District Passenger Agent. Williamsport, Pa. Write for one of them.

# HARPER'S MAGAZINE

The Simpletons, a new novel by Thomas Hardy, will be begun in the December Number, 1894, and continued to November 1895. Wheever may be one's favorite among English novelists, it will be conceded by all critics that Thomas Hardy stands foremost as a master artist in fiction, and The Simpletons may be expected to arouse enthusiasm not inferior in degree to that which has marked Trilby—the most successful story of the year. Another leading feature will be the Personal Recollections of Joan of Arc, by the Sieur L uis de Conte, Her Page and Secretary, under which guise the most popular of living American magazine writers will present the story of the Maid of Orleans. In the January Number will appear a profusely i'lustrated paper on Charleston and the Carolinas, the first of a series of Southern Papers.

Northern Africa is attracting more attention than at any other time since it was the seat of empires. The next volume of Harper's Magazine will contain four illustrated articles on this region, and three of them will depict the present life there. Julian Ralph will prepare for the Magazine a series of eight stories, depicting typical phases of Chinese Life and Manners. Besides the long stories, there will begin in the January Number the first chapters of A Three-Part Novelette, by Richard Harding Davis—the longest work yet attempted by this writer. Complete short stories by popular writers will continue to be a feature of the Magazine

The Volumes of the Magazine begin with the Numbers for June and December of each year. When no time is mentioned, subscriptions will begin with the Number current at the time of receipt of order. Cloth cases, for binding, 50 cents each—by mail, postpaid. Title-Page and Index sent on application.

Remittances should be made by Post-office Money Order or Draft, to avoid chance of loss.

Newspapers are not to copy this advertisement without the express order of Harper & Brothers.

IN 1895.

Elegant and exclusive designs of Out door and In-door Toilettes, drawn from Worth models by Sandoz and Chapuis, are an important feature. These appear every week, accompanied by minute descriptions and details. Our Paris Letter, by Katharine de Forest, is a weekly transcript of the latest styles and caprices in the mode. Under the head of New York Fashions, plain directions and full particulars are given as to shapes, fabrics, trimmings, and accessories of the costumes of well-dressed women. Children's Clothing receives practical attention. A fortnight Pattern-sheet Supplement enables readers to cut and make their own gowns. The woman who takes Harper's Bazar is prepared for every occasior in life, ceremonious or informal, where beautiful dress is requisite.

An American Serial, Doctor Warrick's Daughten, by Rebecca Harding Davis, a strong novel of American life, partly laid in Pennsylvania and partly in the far South, will occupy the last half of the year.

nia and partis in the far South, will occupy the last half of the year. My Lady Nobody, an intensely exciting nov-el, by Maarten Maartens, author of "God's Fool," "The Greater Glory," etc., will begin

the year.

Essays and Social Chats. To this department Spectator will contribute her charming papers on "What We are Doing" in New York society.
