

Bellefonte, Pa., Dec. 14, 1894.

Farm Notes.

-During the year the Wisconsin experiment station fed cornstalks against hay, the proportions being 2374 pounds of cornstalks, 280 pounds of cornmeal and 392 pounds of bran, which produced 1120 pounds of milk and 57 pounds of butter, while 755 pounds of hay, with the same quantities of cornmeal and bran, gave 1063 pounds of milk and 56 pounds of butter. Although the experi-ment showed that one pound of hay was about equal to three pounds of corn fodder, yet it demonstrates that enough of the latter food will be eaten to more than equal the hay, but a large portion of the fodder was unconsumed. The next experiment was with cut fod-der, the result being that the fodder that 858 pounds produced the same amount of milk that was procured from 1343 pounds fed whole, or uncut, the difference between the cut and uncut varying from 12 to 60 per cent., according to the variety of corn.

At the New Hampshire College with fodder that had been shredded, and with crushed fodded at the Missouri station, the results were very satisfactory, the cattle eating it with but little waste, and it proved equal to hay. It must not be overlooked that the value of corn fodder depends upon its being of Alabama, Saturday, didn't do it. harvested at the proper stage of growth, fourths that of good hay when harvested and properly cured, and then cut up or shredded. The cost depends upon the labor of cutting or preparing it, but at the present day the fodder cutters perform such word quickly and perfectly, while the shredders permit of its being fed into the machine as rapidly as wheat can be passed through a thresher, from which it comes in a fine condition. With such food, and the use of ground grain and bran, the corn fodder crop is one of the most valuable on the farm if farmers will utilize it to Kolb succeeded in raising about \$50,-the best advantage. Kolb succeeded in raising about \$50,the best advantage.

-A farmer whose cows were dry sent to a large city for a tub of butter, and paid 25 cents a pound for choice. As he had never received over 20 cents a pound for that formerly sold by him he determined to give more attention to selling, and secured better prices. The lesson taught is that farmers do not give sufficient attention to selecting markets or seeking customers, which is a very important matter with other classes of business men.

-Manure-making in winter is one of him. the best operations on the farm at that season, because labor cannot be bestowed in other directions as well as on the manure heap. It is not difficult to have all of the manure well rotted by spring, and there is less loss when it is heaps should be handled several times, throwing the coarse materials in the centre, where they will be heated to the coarse materials in the centre, where they will be heated to the coarse materials in the centre, where they will be heated to the centre of the centre decompose.

-It should be with great care that seed potatoes for next year are procured. It is often the case that the rot is brought on the farm in the seed, and once the land is infected it will be difficult to eradicate the disease. Potatoes grown from seed coming from the North are claimed to have better keeping qualities than those grown from Southern seed. Seed should be procured only from reliable parties, and from sections where no disease exists, if possible

-Keeping the boy on the farm depends on what his impressions may be in his early days. A young colt or two every year, with the calves, lambs and pigs make the form ettractive to the boys. make the farm attractive to the boys, and if they can be given an interest in them so much the better. The happiest days of the young farmer are those spent with the baby animals, and he will watch their growth until they are matured.

scratch. Over-feeding is a drawback to egg production, and so is roosting on tree limbs, which allow exposure to cold rain storms, which brings on roun.

permanent cure. For sale by F. P. Green. cold rain storms, which brings on roup, a disease that sweeps the whole flock

the lawn by giving it an application of here? wood ashes, at the rate of half a ton an acre. In the spring an application of fifty pounds of nitrate of soda may then be applied. The frequent mowing of grass robs the soil of fertility.

-Every dog kept on a farm should be useful for some purpose. There are too many worthless night prowlers and curs. A collie can be made to bring up the cows and make himself serviceable. Any dog known to kill sheep should be destroyed at once.

-Onions are imported into this country every year. We do not grow enough of them for ordinary use, while the supply of small white onions for pickling is seldom up to the demand at any period of the growing season.

--- As soon as the ground is frozen cut away the old wood of the blackberries and raspberries. A good shovelful of manure around each bunch of canes will benefit them when they start to grow in the spring.

-It is said that there is not now a single merino sheep in England. The British farmers make a specialty of mutton in place of wool, and consider sheep very profitable stock.

-We buy over 30,000,000 pounds of currants from foreign countries, and yet it is a fruit that thrives in nearly all sections of the United States.

-Much of the farm help is incompetent, which accounts for the ever present demand for experienced men on the

-The American iron company, of Birmingham, Ala., that carried off the contract to supply Tokio, Japan, with cast iron pipe for water works, against English, French and Belgian competition, has secured a large contract for Honolulu. The Russian government has also recently contracted with an American firm for the construction of a number of steel clad corvettes. Under the Wilson law the American manufac-turer will enter the markets of the world as a formidable competitor. Our exports of coal to foreign countries is largely increasing, notwithstanding free coal was the demagogic cry that defeated Wm. L. Wilson. He will be vindicated, and his greatest triumphs is to come in the complete acceptance of his tariff principles by the Republican party, which has already deposited Mc-Kinleyism in its cold, cold grave, with no mourners in attendance. The Chicago Tribune is pretty good authority for the Republican party, and it says:

"When the Republican national convention most in June of 1896 to tell the

vention meet in June of 1896 to tell the voters what the Republican party will was nearly all eaten and it was found do if successful in the fall, neither Senator Cullom nor any other man will demand that the McKinley bill be made the issue of the campaign, and that the peo-ple be asked to vote, not against the Wilson-Gormon bill, but for the Mc-Kinley bill. Not one of them will dare to do it. He will remember 1890 and 1892 and will refuse to blunder a third

It Was a Bit of Bluff.

Ruben E. Kolb, the defeated Populist-Republican candidate for governor, The 60,000 Populist-Republicans, whom and that it must be properly cured. It is given a rank in value at about three-fourths that of good hav when harpresented themselves. However, they did not show the slightest disposition to engage in any such suicidal madness as attempting to resist the inauguration of Col. Oates, the lawfully elected execu-

Notwithstanding all his bluster, Kolb did not even step on the grass of the capitol grounds during the day. While his final course was a very wise one, it was widely at variance with the swagger and boasting he had been indulging in during the past two months, for campaign purposes in August last. It is suspected his recent theatrical play was for effect on his northern financial allies and in the hope of again "bleeding" them.

What He Would Do.

story of himself: He left London at midnight in a sleeping car for the North. In the morning when he was awakened he saw a stranger opposite

"Excuse me," said the stranger, may I ask if you are rich?"
Somewhat surprised, his lordship replied that he was tolerably well-to-

"May I ask," continued the stranger,

"Well," went on the stranger, "if I were as rich as you and snored as loud-ly as you I should take a whole car, so as not to interrupt the sleep of oth-

-Nathan Straus, who refused to become a victim of misplaced political confidence, is still a philanthropist. The Straus coal yards, which helped to make lighter the lots of many poor families last winter, were opened to-day. The good results of this practical charity have been such as to induce Mr. Straus to geater efforts this winter. By buying coal in 5,000 ton lots and selling 25 pounds for five cents he is keeping the difference out of his own pocket and is content with pocketing the prayers of his grateful consumers.

-For rheumatism I have found nothing equal to Chamberlain's Pain -Fowls need exercise and if they have a dry location they should have a lot of leaves or cut straw in which to scratch. Over-feeding is a drawback to cents. Its continued use will effect a

> SCHOFIELD'S NEW HARNESS HOSUE

> We extend a most cordial invitation to our patrons and the public, in general, to witness one of the

GRANDEST DISPLAY OF

Light and Heavy Harness

ever put on the Bellefonte market, which will be made in the large room, formerly occupied by Harper Bros., on Spring street. It has been added to my factory and will be used exclusively for the sale of harness, being the first exclusive salesroom ever used in this town, as heretofore the custom has been to sell goods in the room in which they were made. This elegant room has been refitted and furnished with glass cases in which the harness can be nicely displayed and still kept away from heat and dust, the enemies of long wear in leafner. Our factory now occupies a room 16x74 teet and the store 20x60 added makes it the largest establishment of its kind outside of Philadelphia and Pittsburg.

We are prepared to offer better bargains in

of Philadelphia and Pittsburg.

We are prepared to offer better bargains in the future than we have done in the past and we want everyone to see our goods and get prices for when you do this, out of self defense you will buy. Our profits are not large, but by selling lots of goods we can afford to live in Bellefonte. We are not indulging in idle philanthropy. It is purely business. We are not making much, but trade is growing and that is what we are interested in now. Profits will take care of themselves.

When other houses discharged their workmen during the winter they were all put to work in my factory, nevertheless the big (?) houses of this city and county would smile if we compared ourselves to them, but we do not mean to be so odious, except to venture the assection that none of them can say, as we can say "NO ONE OWES US A CENT THAT WE CAN'T GET." This is the whole story.

The following are kept constantly on hand.
50 SETS OF LIGHT HARNESS, prices from
\$8.00 to \$15.00 and upwards, LARGE
STOCK OF HEAVY HARNESS per
set \$25.00 and upwards, 500 HORSE
COLLARS from \$1.50 to \$5,00
each, over \$100.00 worth of
HARNESS OILS and
AXLE GREASE,
\$400 worth of Fly Nets sold cheap
\$150 worth of whips
from 15c to \$3.00 each,
Horse Brushes, Cury Combs
Sponges, Chamois, RIDING
