Farm Notes.

-Don't wait until you build the big barn before sheltering the cows. Build the shelter for them, and they will help you build the barn.

-Breed well, and when you have a heifer calt as the result of such breed- demanded \$20 for her own use. ing feed well and train properly, and you will have a good cow.

-There is no better crop for the winter teeding of sheep than oats and peas mixed. It is very nutritious, and is eaten with avidity by the sheep.

-The shrinkage of value of horses 000,000, and the total loss in falling off 000,000 since the commencement of the present depression of values.

-Wheat bran and middlings should never be omitted from the ground grain ration of cows, as both substances are rich in mineral matter, and are indispensable in some cases, especially where milk is daily sold off the farm.

-Where the hens are allowed to roam over the barnyards and fields they pick up many waste substances, even in winter, but in cold weather band's prosperity. It is satisfactory to they should have at least one pint of believe that such cases are in the hens.

-The Southern States produced nearly 50,000,000 more bushels of corn in 1893 than in 1894, the greatest increase being in the Gult States. It is proposed to send a carload of corn from Georgia to Nebraska to relieve those who lost their crops from drought.

-In feeding grain to sheep feed a the dry, and give them all the salt they want. This will have much to do with the prevention of scratches. The farmer who raises his own sheep will find it | twenty dollars. profitable to market them as soon as possible.

-The time has passed when fruit and vegetables can be sold by the appearance of the specimens on the top. Shippers may rely upon it that all barrels and boxes are inspected by the commission merchants and the customers. They have been taught by experience to be cautious.

-Professor Bailey, of Cornell Experiment Station, recommends from 500 mining throughout the country. In may desire to lean your head forward to 700 pounds of muriate of potash and 300 to 500 pounds of plain superphosphate per acre as annual top-dressing for mature orchards. Nitrogen is seldom needed, he says, and is too apt to force a growth of too much wood.

Neglected implements and dull tools add more expense and labor than may be necessary. To save time and labor is to save money. During the winter season all tools and implements should be put in complete order. When the work will be pressing and the tools will be used at a loss.

but let him stop and think it over. After a little reflection; and a few tosses of the head he will often start of his voliation. Talk to him kindly, pet him, loosen a strap or a buckle, and he may forget his obstinate spell. An apple or a bunch of grass from the roadside may win him.

-It usually pays best to kill pigs by the time they weigh 150 pounds, and from that up to 200. If allowed to grow much heavier than this the cost of food in proportion to gain is increased, except when the hogs become too sluggish and fat to take exercise, but after that the gain is at the expense of healthfulness of the meat when

-A large majority of the weeds that spring up are annuals, and come from a million and a half of people who deseeds, although there are others that grow from roots and are also produced from seeds. To get rid of weeds it is only necessary not to allow them to produce seed. If this is done every year they are sure to be exterminated, but it must be the object to destroy

-It is not safe to grow special crops only. Wet seasons or droughts may cause a total loss. Diversified farming does not entail a risk of loss of the entire year's work. Famine occurs more in those sections where dependence is placed almost exclusively upon a single crop. There are always some crops that can be secured, although all others may be a total loss.

-- A good dairy cow is one that has had excellent training. The disposition is very important, as the most profitable cow may be a source of annoyance if she is cross or unmanageable. The heifer is the future cow, and her training cannot begin too early. A kicking cow is always a menace, and there is liability of injury from her at any time, and when least expected.

-How much can be raised on one acre depends on how much work can be bestowed. It would not be an easy matter for one man to cultivate an acre with the view of having it produce to its utmost capacity. In fact, the possibilities of what an acre will do cannot be known. With labor unstinted and the free use of fertilizers the yield can be made enormous.

—There is good reason for the popularity of Chamberlain's Cough Remedy. Davis & Buzard, of West the yield can be made enormous.

-The foulest seed sold is that of red clover. All sorts of weed seeds may be found in it, and much of the seed it them to try a bottle of Chamberlain's self is not sound. It is not inferred that such seed is sold with the object of imposition, but as much of it comes that such seed is sold with the object of it comes to contain the sold in the sold of imposition, but as much of it comes from different sources it is difficult to secure clean seed. The clover seed is a very small bean, and is easily distinguished with a high magnifying power. It will pay to look the seed over before the busy season comes. It is cheaper to do so than to battle with weeds.

A Reasonable Demand

The sympathies and indorsement of the nation will go out to the wife of an Indiana farmer who has struck her husband for some money. For forty years she has worked with her husband to save money, make the farming a success and to buy more land. Finally the busband had a chance to sell his acres for which both had toiled equally. Then the wife made a strike. Before she signed the deed by which her husband was to get \$40,000, she If forty thousand for the old man.

had never had a cent that she could last year is estimated to be over \$25, call her own, and now that the holder of the purse had made a sale by which of prices will no doubt aggregate \$60,- he had got into easy financial circumstances she was determined to experience the wild delight of having twenty dollars to spend as she chose, or no sale. In view of the fact that the money could not be got without her signature, we take it for granted that she got the money and only wish that

she had struck for ten times as much.

The ridiculous disparity between her deserts and her demands has its pathetic side as an example of the wife's immolation on the altar of the husshelled corn twice a day for every 12 minority. The average American respects himself too much not to share his fortunes as well as his labors with his wife. But there are many cases of and play horse; instead of having one patient, hardworking women who have toiled through an uncomplaining rein, because it is fashionable. First life to augment the family prosperity, without ever having had the control of the slightest share of the savings. In nine cases out of ten the wife does as much to secure prosperity as the husband. When she gets a chance to gums and roof of the mouth precisely emall quantity often. Keep them in strike for a percentage on the funds, we glory in her spunk even if she de- but you are a horse now and have no mands a glorious and reckless dissipa- say in the matter. Now I will place tion in shopping to the amount of the rein over the top of your head and twenty dollars.

Commercial Gazette. Even in West- great nerve centre. ern Pennsylvania, the heart of the great bituminous coal region, it will surprise some persons to learn that not a single every step the same as it does a horse Castoria. manufacturing industry employs as when he walks, as you will notice by many persons as are engaged in coal the jerk on the rein at each step. You 1889, the last year for which we have when you go up a hill; this cannot be complete statistics, 399,559 persons allowed as you are a horse. You may other mining industry employed 100,-000. Iron ore production employed but held thus. You may turn your eye-38,706, not quite one eighth as many; about one sixth; lead not one tenth, and even the quarrying of all kinds of your patients and you have attended

stone only about one third. As to other branches of labor lumber mills gave work to 286,197 hands, which is second only to coal in point of tients. numbers of employes. The second manplowing season comes in the spring ufacturing industry in rank on the basis of employes is foundry and machine shops, the third clothing manufacting -If a horse balks, do not whip him, and the fourth cotton goods. Coal mining employs 100,000 more persons than boot and shoe making including factory and custom work and repairing 200,000 more than furniture making 150,000 rolling mills, 200,000 more than the manufacture of cigars and cigarettes 80,000 more than the manufacture of calico goods, 175,000 more than woolen and worsted mills and 250,000 more than the

manufacting of silk and silk goods. These facts show how vast the coal mining industry is in comparison with other businesses, and how very essential it is that it should be kept as free as possible from suspensions and other disturbances. The fuel of the people and the motive power which keeps other great industries in motion can only be obtained through the exertions of those who operate the mines. Then they are over pend on mining for a livelihood. Those engaged therein form a very large portion of the aggregate population.

The Short Days.

Since December 21, which was the shortest day, the time between sunrise and sunset has been increasing but very little. This almost imperceptible increase will last until about January 21, when the sun will come in view but one minute earlier, and sink beneath our sight 34 minutes later, making the difference only 35 minutes from the time of the shortest day. Then, however, daylight will rapidly lengthen.

--- "One of the most difficult habits to cure is that of drinking vinegar," said Dr. L. C. Aiken, at the Emery. "A good many woman drink vinegar for the complexion, and in some cases it creates a craving for it even more insatiable than that for liquor. As the habit grows the victim is no longer contented with the ordinary vinegar, but demands it stronger until he drinks acetic acid with very little dilution. It burns out the stomach within a very few years, and it is seldom that a vine. gar fiend lives even funtil middle age. It can be detected by the peculiar pallor of the countenance, but no antidote has ever been discovered by which the habit can be cared."

Monterey, Clarion Co., Pa., say: "It

—Wickwire—I tell you, old boy, there's nothing like a baby to brighten

Kindly allow me to address this open letter to a family physician concerning the treatment of his horse, the noblest animal God has giveth for the use of mankind. I hope this will induce others who are equally thoughtless to give the subject tollowing a proper consideration.

The horse I refer to is owned by a doctor who should be and I believe is thoroughly familiar with the anatomy of man and must naturally be more conversant with that of the lower animals. The subject I wish to talk about she could not get it the deed would not is the reins in use by heartless and go. No twenty dollars for her, no thoughtless persons. I have frequently seen horses having their heads tied up We glory in the old lady's spunk in the unnatural position these reins and only wish her more power to her put them, standing for hours tied to a strike for a percentage. She based it on the assertion that in forty years she had never had a cent that she could their breast to dislodge a fly, the rein pulling on the upper jaw, holding it firmly from going downward, the hitching strap drawing on the lower

jaw at every movement of the head.

How I wish I could place the inventor and maker of that rein and owner or driver of the horse in the same position. It would not be long until they would say "I never thought I was guilty of placing a horse in such misery."

Doctor, I see you have a new horse this morning a nice noble looking horse. He seems to be a little nervous. I think it is on account of being reined up too tight. He cannot place his head in a natural position.

"No, I think not, I am using the overhead rein. It is the kind used and seems to be fashionable."

Doctor, let us discuss this in a practical way. Let us be boys once more, we will put a belt around you with a hook to secure the end of the rein. Let me see your mouth. Yes, it just suits. You have two teeth out in the back part of your upper jaw. This will enable me to place the extra bit on the as used on a horse. It may be painful, head so you will look well. You may get tired holding your head in this posi-The character and extent of the coal mining industry are not generally known and appreciated, remarks the Commercial Gazette Even in West

The rein over the top of your head were employed in mining coal. No not be able to see where you are going balls in a way that may give you pain gold and silver production together but trying to see close to you, but you are a horse. Now doctor I have been one of my family. You will do so no more

Men and Women in New York.

The census reveals some curious facts about the distribution of New York's excess of women. New York city has 20,000 of them; Brooklyn 17,000; Albany, 5500; Troy 5000; Utica, 3000 Rochester, 4000; Syracuse 1100. They more than iron and steel furnaces and are all, practically, in the larger cities of the State, the one exception being Buffalo, which has 4000 more men than women. It would be interesting to know more about these 4000 superflu-ous Buffalo men, whether they are Polacks, Italians, lake sailors, canal-boatmen, or merely lively young bachelors from the country in the western part of the State who have gone to Buffalo to seek their fortunes. New York city's business opportunities which attract crowds of men, seem to attract quite as many women. Yet the excess of women in New York is comparatively small. The city has 45 women to every 44 men, while Brooklyn has 26 women to every 25 men, and Troy 11 women to every 10 men. Why should it happen that in the suburban counties nearest New York there should te more men than women? It would seem that of the population drawn by the metro-polis to this end of the State the unmarried men would nearly all live in the cities, and the dwellers in the suburbs would for the most part be people with families. Yet the suburban counties all show an excess of men-1300 in Westchester, 1700 in Richmond, and 2300 in Queens.

-One feature of the big contract obtain by the Bethlehem Iron Works for the two new Russian battle ships, as just disclosed by the return of Lieut. Meigs, is the time of delivering the armor. The entire 1,500 tons must be in St. Petersburg within one year from the receipt of the drawings, and 600 of it within the first seven months. It is true that the armor is not to be Harveyized, which will be a saving in time, but four fifths of it is very heavy, being 16 inches thick. When it is remembered what trouble used to vex our own shipbuilders from the delays in armor,

hem foundry.

Certainly it is a great triumph for an man, and one Russian in bidding for the armor of Russian vessels, considering that there is all the difference, to its disadvantage, of the ocean to cross with its heavy products. But it is worth The first of American Newspapers while for Congress, before our armormaking works become fully engaged on foreign tasks, to enlist their services for our own needs. Within a few months both the Bethlehem and the Carnegie tracts for our navy, and one, two, or three new battle ships should be laid Daily and Sunday, by mail, --- \$8 a year down at the earliest practicable date.

-The world-wide reputation of Ayer's Hair Vigor, is due to its healthy action on the hair and scalp. This inthere's nothing like a baby to brighten up a man's home.

Yaysly—Yes, I've noticed that the gas seems to be at full height in your house almost any hour of the night.

action on the hair and scalp. This incomparable preparation restores the original color to gray and faded hair, and imparts the gloss and freshness so much desired by all classes of people.

39-47-34 Address THE SUN, New York.

Ex-Sheriff of Ulster County.

Hon. Davis Winne Owes His Health to Dr. Da vid Kennedy's Favorite Remedy.

SHANDAKEN, N. Y .- One of the most prominent men in Ulster county is the Hon. Davis Winne, of this town. His reputation is not confined alone to this county, where he held the office of Sheriff for three years, he was also this districts representative in the New York State Legislature. For years Mr. Winne has been suffering from a complicated case of kidney and bladder trouble and congestion of the liver. Upon the advice of friends he decided to try Dr. Kennedy's Favorite Remedy. He was not disappointed, for in a short while after he began its use, he was in better health than he had been in years

In speaking of Favorite Remedy, Mr. Winne said: "It has done more for me than all the physicians I ever employed and I most unhesitatingly recommend it to any one suffering from kidney, liver or urinary troubles, for it will cure them. Dr. Kennedy's Favorite Remedy is the acknowledged specific for all dis-eases arising from acidity of the blood, and will cure dyspepsia, rheumatism, scrofula, eczema, kiduey, liver and

urinary troubles. You can not afford to trifle with health and life. Putting off treatment when dangerous symptoms exist is only slow suicide. Accept the aid of Dr. Kennedy's Favorite Remedy; it has restored thousands to health and strength.

-State Treasurer Taylor of South Dakota affords the latest illustration of practical Populism. He seizes and carries off \$250,000, or thereabouts, of the money raised by taxing other citizens of South Dakota. This is, on the whole, a simpler method of rearranging the impact of taxation than the Income Tax plan.

-Positive economy, peculiar merit and wonderful medicinal power are all combined in Hood's Sarsaparilla. Try

SECHLER & CO. BELLEFONTE, PA. Saddlery.

SCHOFIELD'S NEW

HARNESS HOUSE,

We extend a most cordial invitation to our patrons and the public, in general, to witness one of the

GRANDEST DISPLAY OF

Light and Heavy Harness

ever put on the Bellefonte market, which will be made in the large room, formerly occupies by Harper Bros., on Spring street. It has been added to my factory and will be used exclusively for the sale of harness, being the first exclusive salesroom ever used in this town, as heretofore the custom has been to sell goods in the room in which they were made. This elegant room has been refitted and furnished with glass cases in which the harness can be nicely aisplayed and still kept away from heat and dust, the enemies of long wear in leafner. Our factory now occupies a room 16x74 teet and the store 20x60 added makes it the largest establishment of its kind outside of Philadelphia and Pittsburg.

of Philadelphia and Pitt-burg.

We are prepared to offer better bargains in the future than we have done in the past and we want everyone to see our goods and get prices for when you do this, out of self defense you will buy. Our profits are not large, but by selling lots of goods we can afford to live in Bellefonte. We are not indulging in idle philanthropy. It is purely business. We are not making much, but trade is growing and that is what we are interested in now. Profits will take care of themselves.

When other houses discharged their workmen during the winter they were all put to work in my factory, nevertheless the big (?) houses of this city and county would smile if we compared ourselves to them, but we do not mean to be so odious, except to venture the assection that none of them can say, as we can say "NO ONE OWES US A CENT THAT WE CAN'T GET." This is the whole story.

The following are kent constantly, on hand
