

Bellefonte, Pa., Feb. I, 1895.

Farm Notes.

-Now that the tools must be kept in order the grindstone will be found of valuable service. A grindstone pays for itself every year.

The first thing to do in the spring is to apply a liberal allowance of soluble fertilizer on the asparagus bed, as asparagus comes early in the spring.

-Do you raise calves from your best

-When the cow is dry and is ex-pected to come in fresh, do not feed her too heavily. It is of no advantage to have her in a fat condition, as milk fever may result.

-The feeding and milking of the butter cow operates just as the training and racing of the horse. It tends to fix the performing habit-and heredity tends powerfully to transmit all fixed habits.

-For tree wounds various things are used. Perhaps the best material is tar, long used by Prof. Sargent, with excellent results. At the Kew Gardens, coal tar and carbolic acid is used with entire success.

-The Robertson cow ration, including a mixture of sunflower seed, gave an increase over older methods of feeding but not enough to pay for the extra trouble and cost, said the Vermont station director.

-Every farmer is, or ought to be, interested in protecting his own products, and every pound of butter properly made and sold at a fair valuation is a paying factor in the interest of every other butter maker.

-The most successful poultry breeders separate pullets and cockerels as soon as they are half grown. They develop better, and in all respects do better. A few quarrelsome cockerels disturb the peace of a whole yard of fowls.

-Don't try to winter your fowls by feeding in troughs or throwing their grain feed on the bare floor where they can readily pick it up. Have a heavy litter of straw for them to scratch in that office to succeed himself. and let them hunt for the wheat and

cient for another.

ways a fair proportion of nitrogen.

- 'As a renovator and enricher of the soil" alfalfa is said to be equal, if not superior, to red clover, but is hard to plow up and very difficult to eradicate. Attention is called to the fact for the improvement. that the finest and most perfect of the famous Colorado potatees are grown after alfalfa, and rotation including it is being rapidly adopted in that pota-

made alternately hard and soft by freezing and thawing, farmers are nearly blockaded in some sections. It is a good time to study the problem of good roads, and make resolutions regarding them another winter, but in the summer the question of taxation will take the preference. Now is the time to estimate how much you are will take the preference. Now is the time to estimate how much you are losing from bad roads. The tax is a losing from bad roads. The tax is a God!" This was too much for the small sum compared with the advan-brethren, and they tried to lead her out;

farm has an orchard, but when the carried by an ass, I am carried by two. trees were planted proper attention was not given the varieties of apples. This applies mostly to old orchards. If apples are properly treated as a crop, rather than to partly occupy the ground while some other crop is and storing the fruit are practiced.

-As much as 500 pounds of sulphate or muriate of potash may be applied to an acre of ground, and while it is best to do so in the fall, on very heavy soils, yet early in the spring is an excellent period for applying. If good wood ashes can be obtained gold secreted in the jaws of dead ancestors, when the companies will be organized to mine the cemeteries and recover the gold secreted in the jaws of dead ancestors." New York Whites cheaply they are better than salts, but tors."—New York Tribune. some kinds being low in potash, while the customer who purchases a large quantity will incur the risk of procuring ashes that have been leached.

-The establishment of creameries has done much to enlighten the farm- himself on the step with great deliberaers. They have been compelled to tion, "the only disease I am afraid of give some consideration to the breeds is appendicitis. I shall be obliged to of cattle, to use better implements in ask you, madam," he added, with dig-the dairy, and to produce better butter nity, "not to give me any cherry pie." in order to compete for the highest prices. Those who patronize the creameries have lessened their labor, and combined several other pursuits with the keeping of good cows. On farms where formerly only milk and butter were sold there is now a diversity of crops, and varied products are shipped to market.

Successful Railroaders Start at the Bottom.

That there is a chance to rise in the railroad vocation is evidenced by some interesting figures. Somebody has taken the pains to look up the records of 128 general managers, taken at random from the country at large, and it has been discovered that no less than 105 worked their way from the bottom to the top rounds of success. They commenced, as clerks, operators, rodmen, brakemen, etc. Only 53 began anywhere near the top of the ladder.

There is a good deal of a moral in this It shows how the railway service has progressed of late years, and that, generally speaking, the way to get to the cows only. If your best cows make top is not by favoritism or influence, \$10 a year more than your poorest cows this is five per cent. interest on \$200. cases that cry aloud to heaven the unfitness of the occupant of some position, placed where he is by family or plutocratic influence, but such only go to prove that the standard is personal fitness for the position. The fact is, it is becoming more and more necessary every year in railroad work that every man must stand on his own merits, or, to borrow that homely proverb, every tub must stand on its own bottom. The exigencies of competition demand this. Nowhere is the business race keener than in the railroad world, and the official who doesn't know his business, or who doesn't look alive, so to speak, will be distanced by his rivals and soon found out. It is imperatively necessary that he be abreast of the times, or he will get left.

Debs and Associates Admitted to Bail.

Washington, Jan. 21.—The supreme court to-day made an order in the case of Eugene V. Debs and the other American Railway union officials now serving a sentence for contempt of court, admitting the petitioners to bail and fixing the 25th of March as the date for hearing argument on the rule to show cause why a writ of habeas corpus should not be issued.

Proposed Amendment to the National Constitution,

WASHINGTON, Jan 23-The house committee on the election of President and vice president to day ordered Mr. Donovan to make favorable report on Mr. Bryan's joint resolution to amend the constitution so that "After January, 1898, no person once elected to the presidency shall be eligible to election to

——Midway Plaisance, which all visitors to the Fair remember so well, Each one must receive what it may will soon be transformed into one of require, and this can be only known Chicago's most interesting park-ways. by observation. Animals differ, and the quantity of food that may satisfy the demands of one may be insuffined by rows of stately shade trees and fragrant flowers, will form a border for a series of sloping lawns that will stretch their velvety surfaces over the -Sow the pansy seed now in a mile that was once trampled by millions small box, so as to have large and of feet. Scarcely four weeks' work rethrifty plants for transplanting when the spring opens. They are very is finished, and so is the rest of the heavy the spring opens. They are very hardy, and when once they get started will be able to grow right on. When they begin to bloom keep the flowers plucked off so as not to allow the plants to seed.

—A heavy application of ground-bone will produce excellent results for several years, for the reason that the bone gives off its particles slowly, and is not dissolved for several seasons.

They are very hardy, and so is the rest of the heavy work. The excavations were completed several months ago, as far as was practicable, in accordance with the design for converting the Midway into a canal at some future period. About four blocks of driveway await paving and a mile of sidewalk is yet to be built. When all this is done, and the laborers shall have scattered a dressing of black dirt over fifteen or twenty acres of the lawns the Park Commissioners will be ready to is not dissolved for several seasons. Park Commissioners will be ready to For immediate results acidulated rock or bone superphosphate should be used. In the latter form there is al ways a fair proportion of nitrogen.

Park Commissioners will be open the grand avenue between Jackson and Washington Parks to the public. At present there is little or no work being done because of the weather. Early in the Spring, however, operations will be resumed, and May 1, 1895, will wit-ness the final touches to the big undertaking, and, incidentally, it might be said, the expenditure of nearly \$180,000

-A good old Methodist lady atter alfalfa, and rotation including is being rapidly adopted in that potation country.

—At this season, when the roads are ejaculated: "Glory!" She was admonstrated in the country of the word, and ejaculated: "Glory!" She was admonstrated in the country of the word, and ejaculated: "Glory!" Proved to Be a Woman

A Forger Who Masqueraded Sixteen Years as a Man

SAN JOSE, Cal., Jan. 27.—A sensation has been created in the county jail by the discovery that the prisoner booked as Milton B. Matson was a woman. She was arrested at Los Gatos on a charge of issuing bogus checks. about two years she conducted a hotel at Ben Lomad, and owed many debts there. The discovery was made through a remittance from Englewood to Louisa Matson, on the Bank of British North America, while Matson was in jail here. These remittances have heretofore been paid to a bogus man on her indorsement The woman says she has masqueraded as a man for 16 years, but has committed no erime.

The Johnson Rail Mill Shuts Down.

Johnstown, Pa., January 27.-The Johnson company's steel rail mill shut down in this city to night, and to-morrow a large force of men will be put to work tearing out the machinery and loading it on cars for shipment to Lorain, O., where the company is building a great steel rail plant. The vacated building will be used for other purposes at an early date. The switch works, which are the most extensive of the Johnson company plant here, will not be removed, but in all probability considerably enlarged. The officials of the company say that Johnstown's loss of the rail mill will not be felt, as the company will employ as many, if not more men in the future in the other branches of its industry.

Just for a Smile.

A gentleman riding with an Irishman came within sight of an old gallows, and to display his wit said: "Pat do you see that?" "To be sure Oi do," replied Pat. "And where would you be to-day if the gallows had its dues?"

"Oi'd be rididg alone," replied Pat. never been able to procure any medicine for rheumatism that relieves the pain so quickly and effectually as Chamberlain's Pain Balm, and that she has also used it for lame back with great

Saddlery.

CHOFIELD'S NEW

HARNESS HOUSE.

We extend a most cordial invitation to our patrons and the public, in general, to witness one of the

GRANDEST DISPLAY OF

Light and Heavy Harness

ever put on the Bellefonte market, which will be made in the large room, formerly occupied by Harper Bros., on Spring street. It has been added to my factory and will be used exclusively for the sale of harness, being the first exclusive salesroom ever used in this town, as heretofore the custom has been to sell goods in the room in which they were made. This elegant room has been refitted and furnished with glass cases in which the harness can be nicely displayed and still kept away from heat and dust, the enemies of long wear in leafner. Our factory now occupies a room 16x74 teet and the store 29x60 added makes it the largest establishment of its kind outside of Philadelphia and Pittsburg.

of Philadelphia and Pittsburg.

We are prepared to offer better bargains in the future than we have done in the past and we want everyone to see our goods and get prices for when you do this, out of self defense you will buy. Our profits are not large, but by selling lots of goods we can afford to live in Bellefonte. We are not indulging in idle philanthropy. It is purely business. We are not making much, but trade is growing and that is what we are interested in now. Profits will take care of themselves.

When other houses discharged their workmen during the winter they were all put to work in my factory, nevertheless the big (?) houses of this city and county would smile; if we compared ourselves to them, but we do not mean to be so odious, except to venture the assection that none of them can say, as we can say "NO ONE OWES US A CENT THAT WE CAN'T GET." This is the whole story.

The following are kept constantly on hand.
50 SETS OF LIGHT HARNESS, prices from
\$8.00 to \$15.00 and upwards, LARGE
STOCK OF HEAVY HARNESS per

\$8.00 to \$15.00 and upwards, LARGE
