

Bellefonte, Pa., April 5, 1895.

Farm Notes.

THE FARM HOTBED .-- The ordinary hotbed sash is 6 by 3 feet, a convenient size, though any old sash will answer the purpose. Construct the frame as wide as the sash is long and as long as it is desired to make the bed. Have 12 inches high at the tront and 18 at the back. Make a bed at least 12 feet thick and extending a couple of feet beyond the frame all around of horse manure which has begun to heat violently. Tread this bed down firmly, for manure thrown loosely together will heat rapidly for a short time and then become cold, but when it is made comparatively firm it will weeks. When the bed has been prepared, place the frame upon it and bank it up well to the top with manure. It is now ready for the soil. Use light garden loam which has been prepared the fall before. Place five or six inches of earth on the manure, leveling and fining with an iron toothed rake. Then put on the sash and leave the bed alone for a few days before planting the seeds. If the seeds are put in at once, the manure may become so hot that the tender germs will be destroyed. About the third or fourth day the heat will usually subside to about 80 degrees; then it will be safe to sow, according to American Agriculturist, authority for the follow-ing directions: Mark off in rows about four inches apart, scatter the seed thinly in the drills, cover with half an inch of soil and pat the bed down over the rows with a board or the back of

-Radishes and onions do not need transplanting, but transplant tomatoes and cabbage once or twice before setting in the open ground, giving them more room each time; also transplant lettuce when it gets its second or third pair of leaves. Set three inches apart each way, and it will soon become large enough for use. Always keep the bed full. As soon as one crop i

taken out put in something else.

Open the bed and let in fresh air when the weather will permit. As it becomes warmer the sash may be removed altogether during the middle of the day, but must always be replaced when it turns cool toward evening. When the water begins to gather on the inside of the glass, it shows that the air is getting damp and heavy, and if not changed the plants will smother or the temperature will get too high, but always avoid letting in a cold draft directly on to the plants. Water sparingly in cold weather and never when the sun is very bright, for the drops of water on the leaves under the glass act as a lens and burn the leaves so that they will turn brown. For this reason in bright weather the watering should be done either in the morning and then give it a thorough soaking. On cold nights or in stormy weather the glass should be covered with matting or boards' or even hay or straw, to keep the temperature from falling too low. A well managed hot-bed will more than pay any family for the trouble.

-In the potato fields of the Vermont station both the early blight and the late blight occurred. The most serious loss experienced was from the rot which followed the late blight with unusual violence, destroying over half our crop of late potatoes where they were not sprayed. A comparative test was made of 22 fungicides to determine their relative merits for use in combating these potato diseases. In the annual report of the director, J. L. Hills, only two are recommended tor general use in Vermont. These are bordeaux mixture and modified eau celeste. He says:

Several strengths of bordeaux mix-tures were tested. Of these the strongest gave the best results. For practical purposes, however, one containing about a pound of blue vitriol to ten gallons of water was found best. The modified eau celeste was not equal to bordeaux, but is more convenient to prepare and apply. The addition of soap to these fungicides increases their value on early potatoes, but seemed to detract from it on the later ones. We do not recommend it for general use.

These fungicides, especially the bordeaux and soap mixtures, serve also to keep the small insects known as flea beetles from eating the potato leaves. This is an important thing, since these insects often do very great damage to the potato crop by puncturing the leaves with small holes. The actual gain from spraying out earliest potatoes three times with bordeaux mixture was 84 bushels per acre, or 50 per cent. This was chiefly due to checking the early blight. The gains from spraying the later potatoes averaged over 180 bushels per acre, or about 120 per cent. This latter gain was largely due to checking the late blight and rot. These results lead us to advise the use of bordeaux mixture upon all potatoes in Vermont. For applying these mixtures on small fields we have nothing so good as a knapsack sprayer. For larger fields the best apparatus is a barrel force pump mounted on a two wheeled

The date of spraying is very important if the best results are to be secur-From our experience we recommend as follows : Early potatoes planted April to May 5, spray about July 1, 15, Aug. 1 and again if needed; me dium potatoes planted May 5 to May 15, spray about July 15, Aug. 1, Aug. 15 and again if needed; late potatoes planted May 15, or later, spray about Aug. 1, Aug. 14, Aug. 28 and again if

To Make Idiots Sane.

Portions of the Skull of two Imbecile Children Removed to Allow the Brain to Develope-Much Interest in the Result of Dr. Powell's

NEW YORK, March 31 .- At a recent meeting of the County Medical society Dr. S. B. Powell read a paper describing operations on the cranium for the ation consists in taking out a piece of the skull from the top of the head, af-fording the cramped brain an opportunity to grow and develop in cases where its growth has been obstructed by the premature closing of certain soft bones in the head.

A large number of surgeons afterward witnessed Dr. Powell perform the operation at the New York Post Graduate hospital on two children, each 2 years who have been idiots since birth. The head of the first child having been shaved, it was put under the influence of give forth a gentle heat for six or eight | ether. Dr. Powell then made a long cut down the center of the head, beginning at the forehead and ending in the crown.
The scalp was then laid back, and four trephined openings made in the skull and the bone between the openings removed by an electric saw, leaving the brain exposed. The flaps of scalp were drawn back and stitched, and bandages applied. The operation lasted 25 minutes. The second operation was performed in a similar manner.

Both children are doing well. The

ultimate result of the operations will be watched with much interest.

Hot Water.

A prominent physician of New York recently declared that hot water is woman's best friend. It will cure dyspepsia, if taken before breakfast, and will ward off chills when she comes in from the cold. It will stop a cold if taken early in the stage. It will relieve a nervous headache, and give instant relief to tired and inflamed eyes.

Our better halves say they could It is most efficacious for sprains and bruises, and will frequently stop the flow of blood from a wound. It is a sovereign remedy for sleeplessness, and, in conclusion, the doctor asserts, wrinkles flee from it, and blackheads vanish before its constant use.

In Scotland.

Eugene Field tells that when James Whitcomb Riley gave some readings on shipboard, while returning from Europe not long ago, he had two enthusiastic Scots among his auditors.

"Is it no wonderfu', Donal," remarked one of them, "that a tradesman suld be sic a bonnie poet?" "And is he indeed a tradesman," ask

A Hot Wave in March.

The Thermometer Takes a Climb Upwards Out West.

KANSAS CITY, March 30 .- The mercury climbed up to the 86 mark yesterday, breaking all previous records in this city so far as the United States Signal Office is concerned. The hot wave covered part of Nebraska and Iowa and the whole of Kansas and Western Missouri.

The hottest place in the country was Wichita, Kan., with the thermometer at 90.

-The genuine merit of Hood's Sarsaparilla wins friends wherever it is fairly and honestly tried. To have perfect health, you must have pure blood, and the best way to have pure blood, is to take Hood's Sarsaparilla, the best blood purifier and strength builder. It expels all taint of scrofula, salt rheum and all other humors, and at the same time builds up the whole system.

Hood's Pills are prompted and effi-

Nothing Like It.

Dr. Kennedy's Favorite Remedy Makes Another Remarkable Cure.

Four years ago, Mrs. Markham, who resides on First Street, corner of North Swan, noticed a sensitive spot on her left limb. It was apparently nothing serious, but soon develoyed into a sore ing operations on the cranium for the development of the brain of idiots, so that they may become sane. The operation consists in taking out a piece of the skull from the top of the head, affording the cramped brain an opportuniwhich had eaten their way to the bone

A little less than a year ago, an acquaintance told her about Dr. David Kennedy's Favorite Remedy, and that he believed she would find relief in using it. Mrs. Markham's four years of suffering had made her skeptical, the more so, as she had obtained no relief from any of the physicians who had attended

The friend offered to send her a bottle of Dr. Kennedy's Favorite Remedy if she would try it. He did so, and there was such a decided improvement that she concluded to give the remedy a fair test. To-day, not quite a year after taking the first dose, the ulcers have disappeared, all that is left to show what she has suffered, is a swelling on the ankle of the left limb, which is fast disappearing.

Mrs. Markham is naturally strong in her praises of Dr. David Kennedy's Favorite Remedy, and feels that but for it she would now be a helpless cripple, if not a corpse.

Such a straight forward endorsement needs no comment, Dr. Kennedy's Favorite Remedy cures diseases when taken according to directions, it acts lively upon the kidneys, liver and blood. In cases of nervousness, dyspepsia. rheu-matism, ulcurs, old sores, blood poison-ing, and Bright's disease, it has made

-Our better halves say they could not keep house without Chamberlain's Cough Remedy. It is used in more than half the homes in Leeds. Sims Bros., Leeds, lowa. This shows the esteem in which that remedy is held where it has been sold for years and is well known. Mothers have learned that there is nothing so good for colds, croup and whooping cough, that it cures these ailments quickly and permanently, and that it is pleasant and safe for child-ren to take. 25 and 60 cent bottles for sale by F. P. Green.

The vitality of nerves differs in different individuals. I asked the dentist be-fore I came away how long it took a nerve to die. He said from 24 hours to 10 day; the average was about 48 hours. He had a case once in which it had taken six months. Every weapon known to dental warfare was employed against this nerve, but it fought with the desperation of a member of the Old Guard of Waterloo. Finally even the dental heart was touched by such heroism and he commuted the sentence to imprisonment for life. The cavity was filled with cement and the nerve, after some months of this enforced confine-

road is well managed.

Little Robert Remembered.

"When the snow and ice have gone," said the Sunday school teacher, beaming upon the boys," and nature awakens from her long sleep, the tiny buds begin to appear, and then what do we have? You may answer, Robert."

"Sulphur and molasses, replied Roberts worth."

SCHOFIELD'S NEW

HARNESS HOUSE

We extend a most cordial invitation to our patrons and the public, in general, to witness one of the

GRANDEST DISPLAY OF Light and Heavy Harness

ever put on the Bellefonte market, which will be made in the large room, formerly occupied by Harper Bros., on Spring street. It has been added to my factory and will be used exclusively fof the sale of harness, being the first exclusive salesroom ever used in this town, as heretofore the custom has been to sell goods in the room in which they were made. This elegant room has been refitted and furnished with glass cases in which the harness can be nicely displayed and still kept away from heat and dust, the enemies of long wear in leather. Our factory now occupies a room 16x74 feet and the store 20x60 added makes it the largest establishment of its kind outside of Philadelphia and Pittsburg.

We are prepared to offer better bargains in

We are prepared to offer better bargains in the future than we have done in the past and we want everyone to see our goods and get prices for when you do this, out of self defense you will buy. Our profits are not large, but by selling lots of goods we can afford to live in Bellefonte. We are not indulging in idle philanthropy. It is purely business. We are not making much, but trade is growing and that is what we are interested in now. Profits will take care of themselves.

When other houses discharged their workmen during the winter they were all put to work in my factory, nevertheless the big (?) houses of this city and county would smile if we compared ourselves to them, but we do not mean to be so odious, except to venture the assection that none of them can say as we can say "NO ONE OWES US A CENT THAT WE CAN'T GET." This is the whole story.

spice, Nutmeg, Mace, Ginger, Cayenne Pepper, Mustard all strictly pure goods. IN COFFEES AND CHOCCLATE, Mocha-genuine, Java-Old Government, Rio-Finest Brazilian. All excellent quality and always fresh roasted.

CAN'T GET." This is the whole story.

The following are kept constantly on hand.
50 SETS OF LIGHT HARNESS, prices from
\$8.00 to \$15.00 and upwards, LARGE
STOCK OF HEAVY HARNESS per
set\$25.00 and upwards, 500 HORSE
