Bellefonte, Pa., April 19, 1895.

Farm Notes.

Beans are more highly esteemed in the North than in the South, yet the latter section grows the greater portion of the crop in this country.

-Potato scab can be largely prevented by treating the seed planted for three hours in a solution of two ounces of corrosive sublimate in sixteen gallons of water.

-Cold, dry weather, provided there are no cracks to cause draughts of air, will not cause sickness in fowls, but damp quarters will cause roup even in moderate weather.

-Perches should not be used for chicks of heavier breeds, as there is a tendency to deformity if the chicks roost on the perches while the breast bone is still in an almost cartilaginous

-When the horse balks it may be because the collar hurts him, and does not fit. There are many reasons for balky horses, and the horse is in the right sometimes, especially when he is

-Muddy roads are impediments to education. Hundreds of children are unable to reach the schoolhouses if the roads are not good. This objection alone is sufficient to induce the construction of better roads.

The main crop of turnips is not seeded in until summer, but for early turnips, for use on the table, the seed may be put in now, as the plants are hardy, and grow rapidly after they appear above ground.

-With the increase of railway facilities the South is being brought into closer touch with the more populous North, and will doubtless have much effect on the business of truck gardeners near Northern cities.

-According to the Maryland experiment station, the greater the quality of seed potatoes planted, the greater will be the yield up to a certain limit, and large pieces of seed tuber are fav-orable to a large yield and early ma-

-As soon as the ground is dry enough, run over your wheat field with a slant tooth harrow; never mind if a few plants are pulled out by the roots; it will but give room for the rest to stool out and make a more vigorous growth.

-Good bedding that is clean and free from the odor of ammonia gives the horse an opportunity to rest, and, consequently, enables him to do more work. The habit of using old bedding over and over again breeds disease and causes annoyance to stock.

consisting of two pounds of blue vitriol, thirteeen pounds of lime, and 50 gallons of water, sprayed on the tree four times, gave excellent results.

-Orchard grass is excellent for permanent pasture; timothy lasts but a few years, and clover less. A good mixture is five pounds red clover, four pounds timothy, fourteen pounds Kentucky blue grass and five pounds orchard grass. The first two make the good pasture in the start.

-An Ohio Farmer says that his one hundred stands of bees pay him more than all the rest of his 60-acre farm, and do not require half so much labor. Wherever alfalfa is grown bees should follow; and even for the sake of bees it may pay to raise alfalfa, if it will grow in your latitude.

-Trees cannot usurp the place of a broader agriculture, but can often be is amusing to coquette with an ocho worked in conjunction with it. That a little while, but one soon tires of it. farmer is but "casting an anchor to windward" who plants an orchard, a vineyard, a nut grove, or a tract of timber. If he cannot live to enjoy it to the full, his children may.

-Grow a large crop of potatoes. This country buyes large quantities of potatoes from Scotland. Do not be afraid of low prices. If potatoes cannot be sold at a profit they can be utilized at home for stock. Considering the large possible yield from potatoes they should always prove profitable.

-- Concentrate the manure. A ton of manure spread over one acre may have but little effect on the crop and entail a greater expense in applying it than if spread over one tenth that area. It does not pay to cultivate two acres of land to derive the same amount of crop that could be grown on one acre.

-A dairyman may consider himself capable, and possessing a thorough knowledge of dairing, but ask him to describe the several breeds of cattle and he may not know how to do so. Yet if a dairyman considers himself a master of his business he should understand the point and characteristics of every breed.

-The recent hard winter will be found to have injured all seed corn that was not thoroughly dry and kept in a dry place. Test the seed corn by planting some of the grains in a box of earth and note the precentage of grains which fail to germinate. Take no risk on seed corn. A few weeks' lost time by the seed not germinating means quite a large loss in the crop.

-If a lawn becomes run out and a stand of grass is difficult to obtain. plow the ground now, apply 30 bushels of lime per acre, and let it remain until August, then apply 200 pounds of muriate of potash, 200 pounds bone meal and 100 pounds nitrate of soda, first plowing and harrowing the ground and seeding it after harrowing with a li beral amount of lawn grass seed.

Oil Still Booming.

PITTSBURG, Pa., April 10 .- Oil is still on the boom. The Standard raised their purchasing price for Pennsylvania oil to-day from \$1.27 to \$1.35. This is an advance of 25 cents a barrel in the last week. In the speculative market sales were made on the oil exchange at Oil City to-day at \$1.50.

The cause of the excitement is generally admitted to be sheer exhaustion of the known fields for what is called Pennsylvania oil, The price is expected to keep steadily rising during the summer, and some producers are sanguine enough to believe that 1895 will will see \$3 oil. The price must stay up now until the production exceeds the consumption, and, unless some at present unknown field is struck, that cannot be. The opening of new wells and the developing of old ones will have a slight effect on the production and even if a new well is struck it will be months before the supply can be tapped and put on the market in quantities sufficient to affect prices much.

The Pennsylvania oil, over which this excitement has been created, has a paraffine base and that property in it is as much responsible for the advance as anything. Oils produced in other parts of this country and abroad have a black asphalt base, and of that kind there is enough. The paraffine properties make the Pennsylvania oil distinctive. Other oils produced outside of Pennsylvania are not fit for illuminating purposes, and this also makes the Pennsylvania article more valuable. Lima oil is being refined for illuminating purposes, but it is believed the Pennsylvania crude is mixed in it before it can be used.

-It is pretty well established now that water, so far from generating malaria, may prevent its polluting the atmosphere. The germ may grow in soils even slightly moist, but a thin layer of water evenly distributed over such soil may prevent the escape of the germ into the atmosphere. In the same way a thick growth of grass with matted roots may be impervious to the germ and keep it beneath the surface where it can do no harm.

Under McKinleyism Ohio had no such iron and steel plant as ex-Congressman Tom Johnson set a going at Lorain the other day. It is the fruitage of what promises to be a consistent tariff policy in the future, that looks to the extension of our foreign trade. In the face of the Lorain mills, in McKinley's own state, it is no wonder he has lately dropped his calamity howls and begins to note "visible signs of improvement"—and all under the Wilson tariff.

—Bismark is an older man at 80 than Gladstone at 85, and is no more intellectually alert than Pope Leo, whose 85th anniversary came this month. The tellectually alert than Pope Leo, whose 85th anniversary came this month. The Experiments show that the apple scab can be prevented by the use of the Bordeaux mixture. A weak solution, consisting of two pounds of blue with the stable physically. Gladstone is strong in mind and body and can swing his ax or tackle a stiff bit of Creek or the consisting of two pounds of blue with the strong in mind and body and can swing his ax or tackle a stiff bit of Creek or tackle a stiff bit or tackle a stiff bit of Greek or Latin. or write a theological treatise with as much vigor as he could a decade ago.

Rev. I. W. Hill.

An Advance of 25 Cents on the Barrel in the | Pastor Methodist Church, Accord, N. Y., Says Cancerous Diseases Can be Cured.

> ACCORD, N. Y.—Under the old school method it was believed that any disease of cancerous growth could never be cured. The surgeons knife was resorted to, but the old trouble was sure to break out again.

Since the discovery of Dr. Kennedy's Favorite Remedy, all this has been changed—the action of Favorite Remedy upon the system leaves no trace of poison in the blood, the seeds of disease are expelled and lost health restor-A notable case of the efficacy of Dr. David Kennedy's Favorite Remedy is that of the Rev. I. W. Hill of this town. Some years ago he was suffering with a cancer of long standing on his lip, and finally concluded to have it removed. In speaking of his case Pas-tor Hill said: "About three weeks previous to having the operation performed, I purchased Dr. Kennedy's Favorite Remedy and continued taking it for some time after the cancer was removed. Ten long years have passed since then and no trace of the ugly thing has returned. I speak with knowledge in the highest terms of Dr. Kennedy's Favorite Remedy as being able to cure the troubles for which it is prepared."

One of our local physicians said, in explaining the demand for Dr. Kennedy's Favorite Remedy: "It acts as a nerve and blood food, and to my knowledge it has made many permanent cures of Nervous Debility, Sleeplessness. Dyspepsia, Rheumatism and of the sickness peculiar to women, where other treat-ments have failed. For headaches, constipation and the run down condition, one often suffers with, there is nothing else so good.

-It will be an agreeable surprise to persons subject to attacks of bilious colic to learn that prompt relief may be had by taking Chamberlain's Colic Cholera and Diarrhoe Remedy. In many instances the attack may be prevented by taking this remedy as soon as the first symptoms of the disease appear. 25 and 50 cent bot-tles for sale by F. P. Green.

Got a wooden core. Come from Connecticut, don't they?"

-"Have tried others, but like Ayer's best'is the statement made over again by those who testify to the benefit derived from the use of Ayer's Sarsa-parilla. Disease never had a greater enemy than this powerful blood purifier. It makes the weak strong.

AYER'S SARSAPARILLA

"Several years ago, my blood was in bad condition, my system all run down, and my general health very much impaired. My hands were covered with large sores, discharging all the time. I had no strength nor energy and my feelings were miserable in the extreme. At last, I commenced taking Ayer's Sarsaparilla and soon noticed a change for the better. My appetite returned and with it, renewed strength. Encouraged by these results, I kept on taking the Sarsaparilla, till I had used six bottles, and my health was restored."—A. A. Towns, prop. Given Eye Sight and Relieved of Pain After 20 Years Suffering by Dr. Salm.

Years Suffering by Dr. Salm.

For over twenty years my eye-lashes have been turning in, and consequently they rubbed on the eye-ball, keeping the same always inflamed and very painful. In order to have a little relief, I had to have the eye lashes pulled out every few days. As the result of all this, my left eye went totally blind, and the right one was going the same way very rapidly, I put myself under the care of Dr. Salm, and to-day I am happy to state that I am not troubled any more with the lashes, as they grow in their normal direction, and the sight of the right eye has improved to a great extent, I am wonderfully cured.

After Having Tried Five Different Doctors and

After Having Tried Five Different Doctors and a Wagon-Load of Different Patent Medicines I Grew Worse and Worse, and was at Last Cured by Dr. Salm.

Cured by Dr. Salm.

For more than 8 years I was troubled with Dyspepsia and Intestinal indigestion, I suffered untold agonies; only ate enough to keep me alive, and toward the last I could not keep on my feet any more, During all this time I must have taken a wagon-load of different patent medicines and tried 5 of our different doctors in the county, but grew worse and worse. None of them made the correct disgnosis, until I went to Dr. Salm at Tyrone. He told me at once what ailed me, and he was correct, for to-day I feel like a new woman Sandy Ridge, Centre Co. Pa.

SCHOFIELD'S NEW

HARNESS HOUSE

We extend a most cordial invitation to our patrons and the public, in general, to witness one of the

GRANDEST DISPLAY OF Light and Heavy Harness

ever put on the Bellefonte market, which will be made in the large room, formerly occupied by Harper Bros., on Spring street. It has been added to my factory and will be used exclusively for the sale of harners, being the first exclusive salesroom ever used in this town, as heretofore the custom has been to sell goods in the room in which they were made. This elegant room has been refitted and furnished with glass cases in which the harness can be nicely displayed and still kept away from heat and dust, the enemies of long wear in leather. Our factory now occupies a room 16x74 feet and the store 20x60 added makes it the largest establishment of its kind outside of Philadelphia and Pittsburg.

We are prepared to offer better bargains in

We are prepared to offer better bargains in the future than we have done in the past and we want everyone to see our goods and get prices for when you do this, out of self defense you will buy. Our profits are not large, but by selling lots of goods we can afford to live in Bellefonte. We are not indulging in idle philanthropy. It is purely business. We are not making much, but trade is growing and that is what we are interested in now. Profits will take care of themselves.

When other houses discharged their workmen during the winter they were all put to work in my factory, nevertheless the big (?) houses of this city and county would smile if we compared ourselves to them, but we do not mean to be so odious, except to venture the assection that none of them can say, as we can say "NO ONE OWES US A CENT THAT WE CAN'T GET." This is the whole story.

CAN'T GET." This is the whole story.

The following are kept constantly on hand.
50 SETS OF LIGHT HARNESS, prices from \$8.00 to \$15.00 and upwards, LARGE STOCK OF HEAVY HARNESS per set \$25.00 and upwards, 500 HORSE COLLARS from \$1.50 to \$5.00 each, over \$100.00 worth of HARNESS OILS and AXLE GREASE,
\$400 worth of Fly Nets sold cheap \$150 worth of whips from 15c to \$3.00 each, Horse Brushes, Cury Combs Sponges, Chamois, RIDING SADDLES, LADY SIDESADDLES Harness Soap, Knee Dusters, at low prices, Saddlery-hardware always on hand for sale, Harness Leather as low as 25c per pound. We keep everything to be found in a FIRST CLASS HARNESS STORE—no changing, over 20 years in the same room. No two shops in the same town to catch trade—NO SELLING OUT for the want of trade or prices. Four harness—makers at steady work this winter, This is our idea of protection to labor, when other houses discharged their hands they soon found work with us.
