CCCC
FOR INFANTS AND CHILDREN.
CASTORIA PROMOTES DIGESTION, and overcomes Flatulency, Constipation, Sour Stomach, Diarrhoea, and Feverishness. Thus the child is rendered healthy and its sleep natural. Castoria contains no Morphine or other narcotic property.
"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me."
H. A. ARCHER, M. D.,
111 South Oxford St., Brooklyn, N. Y.
"I used Castoria in my practice, and find it specially adapted to affections of children."
ALEX. ROBERTSON, M. D.,
1037 2d Ave., New York.
"From personal knowledge and observation I can say that Castoria is an excellent medicine for children, acting as a laxative and relieving the pent up bowels and general system very much. Many mothers have told me of its excellent effect upon their children."
Dr. G. C. OSBORN,
Lowell, Mass.

Belleville, Pa., June 21, 1895.

The Poor Editor.
Some of His Trials and Tribulations Described by Himself.

The editor of the *Daily American*, of Mahanoy City, thus describes the trials and tribulations of "the poor editor":
"Editing a paper is about as pleasant as trying to sell all-wool overcoats in Africa. If the editor dresses his political columns in good shape his readers kick, claiming there's too much attention given to politics. If it contains too little they won't have it at all. If the type is large it does not contain enough reading matter, and if the type is too small they can't read it. If we put in a joke now and again they say we want to make the people think that we're smart.
"If we publish original matter, they condemn us for not giving selections; if we give them selections, people say we are lazy.
"If we give a man a complimentary notice, we are censured for being partial; if we do not, all hands say we are a bore.
"If we insert an article which pleases the ladies, men are jealous; if we do not cater to their wishes the paper is not fit to be seen in the house. If we attend church they say it is only for effect; if we do not, they denounce us as deceitful and desperately wicked.
"If we speak well of an act, folks say that we dare not do otherwise. If we censure, they call us traitors. If we protect the innocent from scandal-mongers, they say we are bought off; if we don't they claim we ought to be severely dealt with.
"If we remain in our office and attend to our business, folks say we are proud to mingle with our fellows; if we go out a bit, they say we had better stay at home and get on with our office work.
"If we cannot pay our debts promptly folks say we are not to be trusted; if we do pay them, they wonder where on earth we got the money.
"The troubles of a 'quire, whose commission is up; or the trials of a health board president are only trifles when compared with those of ye poor editor."
The Vegetable Eaters.
The Vegetarian Society of Chicago is at present conducting an aggressive campaign. It is about to open vegetarian restaurants in numerous parts of the city, and the unbelievers are to be shown by actual demonstration how much better a dinner of herbs is than a slice of meat, either rare or well done, from a stalled ox.
A few days ago a professor of the Chicago University read a paper in which he proved that the use of vegetables as food promotes higher thought, expands the intellect and enables the mind to grasp those ethereal ideas which elude the common beef eater. When somebody asked Mark Twain what fish he should eat to strengthen his brain, the humorist replied that he would need to consume a few whales. The Chicago professor did not explain what quantity of vegetables would be necessary to promote higher thought, but it is to be feared that in some cases the supply would not be equal to individual needs.
It is difficult to believe that man is an herbivorous and not a carnivorous animal, with fish, flesh and fowl piled on very side and attracting him by their flavor. It may be that in the hot weather-vegetables have their uses, and that men occasionally make themselves stupid with over-indulgence in meat. In such things there is room for missionary work, but in spite of learned disquisitions, men are likely to keep on preferring a cutlet of veal to a cutlet of cabbage.

The New Attorney General's Family.
Mrs. Judson Harmon, the new attorney general's wife, is a woman calculated to grace the position she will occupy in Washington society. She has a genial temper, which makes her many friends, a handsome face and figure, dresses superbly, and is the devoted mother of three lovely daughters, Mrs. Edward Wright, Jr., of Philadelphia, who is said to have been a schoolmate and friend of Mrs. Cleveland; Miss Elizabeth, a recognized society leader, who made her debut three years ago, and Miss Marjorie, who is 14. Miss Elizabeth, or Bessie, as her intimates know her, inherits the splendid physique of both parents, and will be a brilliant addition to the Cabinet circle of young women. She was educated at Mrs. Platt's famous school in Utica, and has been much admired, especially during her visit to Washington last year as the guest of Mrs. Maxwell, the wife of the Solicitor General.

A Physicians Last Resort.
"My doctor is a real joker," said a Lewistown lady. "I didn't know that my talking bothered him when he was writing prescriptions until yesterday. He never mentioned it, and I always asked him all sorts of questions while he was writing them out. Yesterday he examined me and sat down to write something. I kept talking. Suddenly he looked up and said: 'How has your system been? Hold out your tongue?' I put out that member and he began to write, and when he got through he said: 'That will do.' 'But,' said I, 'You haven't looked at it.' 'No,' said he, 'I didn't care to. I only wanted to keep it still while I wrote you the prescription.'"
—The Net Chain Works, at York, this State opened last week with every fire on full time, and other chain works in that section report the same gratifying activity. When the industrial system of the country was fast in the chains of McKinleyism it had little call for chains of any other sort. Things are very different now.

The Fall River mills, which recently advanced the wages of all the operatives, paid dividends during the past three months amounting to \$375,375 on a capital stock of \$22,080,000. This important fact has entirely escaped the attention of the organs. So large a sum of money earned and paid to stockholders right on top of a very material increase in wages, coupled with the trade announcement that "prospects are good for an increase of business," is worthy some notice, if in no other way than as news, but the organs are silent.
The better times, however, are here. The wire and nail mills of this State and Illinois, controlled by a syndicate, gave a ten per cent. advance in wages June 1; the Calumet and Hecla Mining Company, of Michigan, has restored the rate paid in October, 1893; the price of copper enables the operators to pay laborers in the mills as good wages as skilled miners make on ranges. These samples of the returning tide all are to the credit of the past week.
By and by the demagogues and the organs will recognize the truth of returning prosperity, and then the truth will be all the harder to tell.
—What hope existed for the establishment of State forest reservations on the commendable plan suggested by Dr. Rothrock, of the Pennsylvania Forestry Association, has fallen through as one of the neglects of the Legislature to take action on a very important movement.
The forest products of the State represent a revenue of \$37,000,000 annually and forest reservations, so vitally necessary, if anything shall be saved to the watershed systems in sections now suffering every year from drought, could be established at a cost of \$300,000. This sum would provide 120,000 acres of forest of constantly increasing value, and the \$300,000 required to secure this result covers but three days' earnings of the forests, and is likewise less than what seven counties paid out in flood damages in the past two years.
Forest protection and preservation must be recognized as factors in State government in some form and the need of that character of attention to a great industry is really imperative. In the past four years an even \$1,000,000 have been paid for roads and bridges damaged or destroyed by freshets, and this waste must not only continue but increase as the forests are further denuded and opportunities enlarged for the floods to play their part.
—The Cuban insurgents are constantly appearing at new parts of the revolutionary island. We have heard of them at many places between Guantanamo and Holguin. We have latterly heard of them as far to the westward as the providence of Puerto Principe, half way to Havana. We have reason for saying that between 8,000 and 10,000 of them are in the field. The Spanish reports tell of nothing but royal success always and everywhere; yet the liberators are on the advance, and have lost neither heart nor hope. They seem to be stronger, both in numbers and resources, than they have been at any other time within the past three months, during every week of which Gen. Martinez Campos has been calling upon the Madrid Government to send him more troops, to forward other regiments of infantry and cavalry, though his army is already five times greater than the insurrectionary forces.
The African, Philippine, and Spanish laurels of the foremost soldier of Spain are fading in Cuba.
—Archaeologists will doubtless be started to hear that away up in Montana a woman found under a tree a number of beads, which, according to the veracious chronicler, were pronounced ancient Egyptian, "of the days when Cleopatra ruled over the Nile."
A few more of such finds will, so to speak, knock the spots out of history, and make us credulous as to a great many things which we have hitherto firmly believed. Of course we are never likely to know how the Egyptians came to Montana, what they wanted and what they did during their stay. It may be, however, that they left a diary and put it in the hollow trunk of a tree (that is the traditional way), and that it will yet be discovered by some other inquisitive person.
Meanwhile the beads are in evidence; somebody must have brought them to Montana, and who else could it have been but the Egyptians? The matter is settled, and Columbus and all other legendary discoverers of this continent may as well take a back seat.
"I never use window screens," said a wise housekeeper, who did not like "sifted air." "I buy five cents' worth of oil of lavender at the drug store and mix it with the same quantity of water. Then I put it in a common glass atomizer and spray it around the rooms wherever flies are apt to congregate, especially in the dining room, where I sprinkle it plentifully over the table linen. The odor is especially disagreeable to flies, and they will never venture in its neighborhood, though it has a peculiarly fresh and grateful smell."
—In the face of such records of domestic happiness as the lives of Mary A. Livermore, Lucy Stone and Julia Ward Howe, how grotesquely absurd is the parrot cry that public life for woman endangers the home.
—The small waists of French women are believed by some scientists to be the result of heredity. Ages of tight lacing, they say, have produced a physical peculiarity in the nation.
—A discontented woman is never beautiful. It will be well to make the best of our present surroundings while reaching out and up for something better.
—If ink is spilled on woodwork, it may be taken out by scouring with sand and water and a little ammonia, and then rinsing with soda and water.
—The supreme problem is how to harmonize liberty with order.

KNOW THYSELF.—How important this injunction to every young man! How many ruin their health and future happiness through pernicious practices contracted in ignorance, and repent of when too late. Parents, guardians and humanitarians can do no better service to the rising generation than to place in their hands the information and warnings contained in a little book carefully prepared by an Association of medical gentlemen, who have had vast experience in dealing with the grave maladies here hinted at, and who feel that they owe it to humanity to warn the young of the land against certain destructive habits which are far more prevalent than any layman can possibly imagine, and which, if persisted in, gradually undermine the constitution and health and destroy the future happiness of the victim. Cut out this notice, and enclose it with ten cents in stamps (so pay postage) to World's Dispensary Medical Association, 663 Main St., Buffalo, N. Y., and the book will be sent, secure from observation in a plain sealed envelope.

—Judson Harmon, is now Attorney General of the United States, is said to be the tallest and the most athletic member of the Cabinet. What is more to the point is the fact that he is a big man intellectually as well as physically, according to high Republican authority. When Cincinnati Republicans freely concede his legal eminence there can be no question that the President has made one more happy choice in selecting Mr. Harmon as one of his official family.

"THERE IS DANGER IN DELAY."—Since 1861 I have been a great sufferer from catarrh. I tried Ely's Cream Balm and to all appearances am cured. Terrible headaches from which I had long suffered are gone.—W. J. Hitchcock, late Major U. S. Vol. and A. A. Gen., Buffalo, N. Y.
Ely's Cream Balm has completely cured me of catarrh when everything else failed. Many acquaintances have used it with excellent results.—Alfred W. Stevens, Caldwell, Ohio.
Price of Cream Balm is fifty cents.

—Miss Ida Buxton Cole, prominent among suffrage speakers, says: "We read in the Bible that after the Israelites were all worn out with wrangling and dissensions, God gave them a woman—Deborah—to judge them; she ruled over them for forty years, and we read that 'then they had a rest.'"
A GRAND FEATURE—Of Hood's Sarsaparilla is that while it purifies the blood, it sends it coursing through the veins full of richness and health; it also imparts new life and vigor to every function of the body. Hence the expression so often heard: "Hood's Sarsaparilla made a new person of me." It overcomes that tired feeling so common now.
—If the throat is husky from dust or weariness a gargle made from a teaspoonful of spirits of camphor in a glass of water gives a delicious tone and vigor to the larynx; palate, bronchial tubes and all those other sensitive organs that exist in that region.
—"Many of the citizens of Rainsville, Indiana, are never without a bottle of Chamberlain's Cough Remedy in the house," says Jacob Brown, the leading merchant of the place. This Remedy has proven of so much value for colds, croup and whooping cough in children that few mothers who know its worth are willing to be without it. For sale by F. P. Green.

—Old woollens serve to harbor moths, and old things of all sorts are dust collecting, germ breeding nuisances. The truly economical woman is not she who saves everything, but she who is discriminating in her thrift.

Medical.
NERVOUSNESS
Cannot be permanently cured by the use of opiates and sedative compounds. It is too deeply seated. It is caused by an impoverished condition of the blood, upon which the nerves depend for sustenance. This is the true and only natural explanation of nervousness. Purify, enrich and vitalize the blood with
HOOD'S SARSAPARILLA
and nervousness will disappear. Hood's Sarsaparilla will give vitality to the blood and send it coursing through the veins and arteries charged with the life-giving, strength building qualities which make strong nerves. If you are nervous, try Hood's Sarsaparilla and find the same relief of which hundreds of people are telling in their published testimonials. Get
HOOD'S
