CASTORIA
 C A S T O R I A
 C A S T O R I A
 C A S T O R I A
 C C C C
 FOR INFANTS AND CHILDREN.
 CASTORIA PROMOTES DIGESTION, and overcomes Flatulency, Constipation, Sour Stomach, Diarrhoea, and Feverishness. Thus the child is rendered healthy and its sleep natural. Castoria contains no Morphine or other narcotic property.
 "Castoria is so well adapted to children that I recommend it as superior to any prescription known to me."
 H. A. ARCHER, M. D.,
 111 South Oxford St., Brooklyn, N. Y.
 "I used Castoria in my practice, and find it specially adapted to affections of children."
 ALIX ROBERTSON, M. D.,
 1057 23 Ave., New York.
 "From personal knowledge and observation I can say that Castoria is an excellent medicine for children, acting as a laxative and relieving the pent up bowels and general system very much. Many mothers have told me of its excellent effect upon their children."
 Dr. G. C. OSOPO,
 Lowell, Mass.

THE CENTAUR COMPANY,
 77 Murray Street, N. Y.
 38-43-2y

Democratic Watchman.
 Bellefonte, Pa., July 19, 1895.
 Transparent Twaddle.

The Iowa Republicans at their state convention faced the dilemma in which the calamity shriekers of that party now find themselves by putting in the plea that our industries were built up under Republican policy—that they were paralyzed under Democratic policy, and that they have been revived by the assurance of a continuance of Republican tariff policy given by the late elections. As this lame excuse promises to be heard from every Republican convention of the Union this year and next, let us look into it a little for the fun it affords.

What is the record of the building of our industries under Republican policy? The facts are that the whole McKinley period was one of wage reductions, strikes and riots. Wages were reduced in thousands of mills, not once, but twice or three times in many of them. The Reform club of New York made an exhaustive examination of the subject and found that with the one exception of the Fall River cotton mills, which advanced wages less than 10 per cent. there was not in the whole four years of McKinleyism in this broad land a wage advance worth mentioning in any protected industry. And as to the claim of the Republicans that these wage reductions under McKinleyism were caused by the fear of the Cleveland administration and tariff revision, the Reform club, above noted, in 1892 compiled a list of wage reductions in over 2,000 protected mills in 1891 and 1892, before the people had voted to turn the Republicans out.

The Wilson law—that harbinger of calamity and starvation—has been in operation only 10 months, and what is its record? Has it, as the Republicans of Iowa claim, "paralyzed" our industries? Let the facts answer in restored business confidence, busy mills, mines and factories, and wages advanced in all the great departments of industrial activity. "Bradstreet," the leading commercial paper of the Union, and representing the most far-reaching commercial agency, and therefore the best-informed authority on the subject, in its issue of last week, after stating that the increases of wages have outgrown the resources of statistical bureaus that endeavored to keep track of them, says that "the latest advice are that MORE THAN ONE MILLION INDUSTRIAL WORKERS HAVE RECEIVED AN ADVANCE OF WAGES AVERAGING ABOUT TEN PER CENT." There is no politics in this. It is the cool and cautious statement of the foremost commercial authority of the Union.

If, as the Iowa Republicans claim, the prosperous condition of business and wages is due to Republican victories, what becomes of the outcry against the Wilson law by which these elections were carried, with the aid of a world-wide panic? No Democrat in the Union proposes to repeal the Wilson law. No Republican in the Union proposes to re-enact the McKinley law. That fact is a settler of the Republican claim that Democratic tariff policy created the panic and the hope of our salvation. The McKinley tariff is abandoned by its friends. The Wilson tariff is vindicated, and no Republican of prominence in the land proposes to repeal it in favor of the McKinley arbitration.

Republican conventions this year, judging from the specimen we have in Iowa, will engage in the arduous task of teaching the people that white is black and black is white.—Philadelphia Record.

The Wide Tire Law.
 It is a well settled fact that more good roads are spoiled by narrow wagon tires than by any other means, and in many of the cities and towns in the country, ordinances are being passed compelling the use of three and four inch tires on heavy wagons. Where thousands of dollars are annually expended in rebuilding and repairing streets and roads it is only wisdom to prevent their destruction by narrow tired wagons. In this state a law has been passed and approved by the governor, which provides a rebate of five dollars on the taxes of all persons using wide tires on their heavy wagons. This of itself should stimulate the use of wide tires to say nothing of the heavier loads that can be hauled, and the preservation and improvement of the roads. Wide tired wagons with the front axles a little shorter than the rear ones, make effective road rollers and thereby improve the roads instead of cutting them up with deep ruts as is done with narrow tires on axles of equal length.

The Boy and the Goat.
 A small boy with a fine ear for euphony had a pair of goats presented to him lately whose cognomen grieved him sorely. "Pop said they was a Billy-goat and a Nancy-goat," he exclaimed, to a friend, "but I think those is dreadful disrespectful names, so I calls them William and Nancy." Nancy having survived her honors but a brief space of time, the family were edified on Sunday afternoon to hear the boy addressing the surviving goat as: "Get up there, Judas Iscariot." On being invited to explain the change in William's name, he said: "Oh, that's only for Sunday! Week-day's he's William just the same, but Sunday's he ought to be dressed up, and he ain't got his best clothes, so I give him a best name. I heard it at Sunday school, so I know it's a reg'lar Sunday name."
 —Razzle—Old Sock, despite his habits, appears to be a well preserved man.
 —Dazzle—Yes, you know since he lost his money he has been kept in brandy by his friends.
 —A pinch of soda added to sour fruit will take away much of tartness and make much less sugar necessary for sweetening.

American Overtraining.
 The races at Henley last week proved one thing to the satisfaction of all critics. The English have always asserted that we in America train too fine. The manner of Cornell's defeat, the complaints of malaria, the over-excitement, and the defeat in much slower time than Cornell had made over the course all proved that so far as Cornell is concerned, at any rate, the allegation is correct.

Courtney has always been the most extreme devotee of the American system of training. His aim was to put a crew on river or lake trained to the minute; trained to win one special race, without any care for anything else. The English system contemplates training a crew to work together, so that they may be able to go out and row day after day, if need be, in the same form and with the same speed. It needs no argument to decide which is the sounder and healthier plan.

American trainers are not all so extreme as Courtney, by any means. In general, the worst excesses are committed in college athletics, the system of training for a special race or game being nourished by the rivalry that exists between college men. It is time that this system should be done away with, and that the more common sense system of keeping men in good condition and spirits should prevail.

The test of man's ability is not what he can do under severe and exhausting strain, but what he can do under ordinary conditions free from influences that debilitate his nerves and muscles. Let him sleep and eat well and be free from care; then will his performances be a normal standard.

What Ailed Him.
 A gentleman of Berwyn, Pa., who is employed with an electrical light company, has two boys aged 3 and 5 years respectively. The older one, through frequent conversations with his father, is familiar with electrical terms, appliances and probabilities.

Little 3-year old one cold morning was fumbling with a half frozen wasp that had lodged on the window sill. The wasp thawed out, and recovered much of his usual animation, a fact proved by a succession of yells on the part of the boy.

"What's the matter with Dawson?" cried the father as he rushed from an adjoining room.

"I spect he touched a live wire," replied the brother, with a scarcely perceptible grin.

Trampled to Death.
 LEWISTOWN, Pa., July 14.—Mary Taylor, 8 years old, granddaughter of General John P. Taylor, was trampled to death to-day by a savage bull. Her skull was fractured, her jaw, and thigh broken and her chest crushed. She died in an hour after the accident.

—With twenty-five million gallons of molasses, which they cannot market, stored in tanks on their plantations, the Louisiana planters are naturally in a quandary. The quantity is bound to increase, and they cannot make room for it. They have tried feeding it to stock, but the stock refuses to take it all. The old policy of turning it loose in the swamps had also to be abandoned, because the molasses soured in the open and vitiated the atmosphere. While we of the North are all in pursuit of the sweets of life the Louisiana planters are trying to run from them. And they are not succeeding very well, either.

—The late legislature passed a number of very foolish laws. Among these is one prohibiting the employment on public works in this commonwealth of any one but an American citizen. It is among those which the self-styled patriotic societies succeeded in having adopted and it is as uncalculated for the people as it is unjust and foolish. We don't believe that any other country in the world, with the possible exception of China, would agree to such a law upon its statute books.

—The Pennsylvania Hospital for the Insane reports the number of inmates of the last year as 1,000, of which over 4,000 were cured and some 2,000 relieved. From this it seems that the increase of insanity is alarming. The pressure of the times may have something to do with the matter, but intermarriage of mutes, blind people and those with the taint of insanity should not be encouraged.

—Bunches of sassafras hung in the window will mitigate the fly nuisance. This is worth remembering by the summer boarder, who frequently finds herself not only five miles from a lemon, but an equal distance from window screens.

—"Pity a poor blind man with a large family!" cried a wayside beggar. "And how many children have you, unfortunate man?" asked a lady in great concern. "How can I tell, madam? I can't see."

—Friend—What makes you write all the time?
 Groom-elect—Practis'n how to write Jibson and write on a hotel register without having the clerk ask me if we're newly married.

—Elder Barry—I told joblots hell was like a furnace.
 Dr. Thirdly—Well.
 Elder Barry—Said it would be probably out half the time.

—Daughter—Frank said something to me last night.
 Mother—I hope it was apropos.
 Daughter—It was more mamma. It was a proposal.

—An electric plow has been invented in Germany and is said to work successfully.

—A man must stand erect, not be kept erect by others.

Birch for Furniture.
 Western Manufacturers Are Utilizing Curled Birch For Beautiful Creations.

The popularity that birch is achieving of late as a furniture wood is remarkable to say the least and there is undoubtedly a promising future for this wood, which is so common in the Northwest. Furniture manufacturers who were lucky enough to get out a line of goods in curly yellow birch have found that the retailers have readily bought these goods and that it is hard work to keep a sufficient supply on hand to fill the demand for goods made up of this wood. Both curly birch and the selected red birch are reported to be greatly in favor, with the curly variety slightly in the lead, as it finishes so nicely and looks so soft and silky when made up into furniture. Fine grade chairs are being made largely of birch by the Sheboygan factories, and all over the Northwest furniture manufacturers are experimenting with the wood and finding it very satisfactory. The beautiful grain and the lustrous softness of curly birch makes it a general favorite, not only for furniture, but it is also coming into popular use for interior finish. It has generally for years been considered an inferior wood, and it is only within the last year or two that its value has been appreciated. The light color and beautiful softness of tone of curly birch is making it a favorite for bed room furniture, and my lady who wishes to have her boudoir in light colors and to use a furniture wood that tends to make everything look cheerful and bright puts birch furniture in her room. The best grades of red birch are being used for bank furniture and office fittings with great success. When our hardwood men succeed in bringing birch into favor as a flooring wood then will birch be decidedly "in it" with any other hard wood, and it will be in a position where it won't be looked down upon, either, like it has been in the past.

WARNING TO YOUNG MEN.—How many young men bankrupt their constitutions, squander their vitality and ruin their health by pernicious practices generally contracted through ignorance. Nervous exhaustion, debility, dullness of mental faculties, impaired memory, low spirits, morose or irritable temper, fear of impending calamity, and a thousand and one are the derangements of mind and body which result from such indiscretions, Epilepsy, paralysis, softening of the brain and dread insanity are not unfrequently the result of unnatural habits contracted in youth through ignorance of their destructive character, and persisted in until the constitution is wrecked. Such unfortunates are surely entitled to the tender sympathy, the noblest efforts and the best skill of the medical profession. To reach, re-claim and restore such unfortunates to health and happiness, is the aim of an association of medical gentlemen, who, having had a vast experience in the cure of the class of maladies herein hinted at, have prepared a comprehensive, scientific treatise, written in plain but chaste language on the nature of the symptoms and curability, by home treatment, of such diseases. The World's Dispensary Medical Association of 663 Main Street, Buffalo, N. Y., will on receipt of this notice enclosed with ten cents (for postage), mail secure from observation, in plain, sealed envelope, a copy of this useful work, which should be read by not only every young man in the land, but also by every parent, guardian and teacher having care of the young.

—The pleasant little city of Allentown, in this state, has been greatly troubled with tramps this summer. Confinement in jail, with reasonable quarters, idleness and something to eat, did not abate the evil. The warden of the prison has hit on a measure of happy relief which shows he has the genius of a reformer. He has bought a few tons of pig iron, and any tramp coming to the jail, and the police have orders to bring them in, will be set to work carrying the billets of iron from one end to the other for five hours a day. A strict and stern guard will be put over them, with orders there shall be no let-up in the useless industry. The tramps will give Allentown a wide berth.

USE IT IN TIME.—Catarrh starts in the nasal passages, affecting eyes, ears and throat, and is in fact, the great enemy of the mucous membrane. Neglected colds in the head almost invariably precede catarrh, causing an excessive flow of mucus, and if the mucous discharge becomes interrupted the disagreeable results of catarrh will follow, as bad breath, severe pain across forehead and about the eyes, a roaring and buzzing sound in the ears and oftentimes a very offensive discharge. Ely's Cream Balm is the acknowledged cure for these troubles.

—First Little Girl—"And isn't your cat afraid of mice?"
 Second Little Girl—"Oh, no; not a single bit."
 First Little Girl—"That's queer. And she's a lady cat, too, isn't she?"

—The people quickly recognize merit, and this is the reason the sales of Hood's Sarsaparilla are continually increasing. Hood's is "on top."

—About the first thing lost at sea is the sight of land.

Medical.
WEAK.
 And nervous describes the condition of those who are suffering from this. They have no appetite, cannot sleep, and complain of the prostrating effect of the weather. But it is the impure blood that makes them weak. It is because the blood lacks vitality that they are

NERVOUS.
 This condition may be quickly remedied by a few bottles of Hood's Sarsaparilla, which overcomes weakness, because it creates an appetite and tones up all the organs; cures nervousness because it gives vitality to the blood, and feeds the nerves upon pure nourishment. Remember,
HOOD'S SARSAPARILLA
 Is the only True Blood Purifier prominently in the public eye. \$1.50 per bottle.

HOOD'S PILLS are tasteless, mild, effective. All druggists. 25c.
