Bellefonte, Pa., Aug. 30, 1895.

Reason for Raisins.

A raisin-vineyard is in full bearing in three years, but the grape has not reached its perfection until the vine from which it springs is six or seven years old.

The Muscat and Thompson seedless are the best variety of raisin grape cultivated, the latter having only been introduced within the last few years, but the Zinfandell and Sultana have also large claims upon popularity.

Standing before one of these vines, upon which inverted cones of countless perfect spheres are hanging—each cluster weighing several pounds—a vision of the Hebrew spies, with their magnificent grapes of Eshcol, borne "on a staff between the two," rises before us, and involuntarily we exclaim, "Is not this also the Promised Land?"

About the 1st of September the long sunny days, the dewless nights, and the percolated soil have perfected their marvellous work, and the first crop is ready to be gathered. By this time the laterals have run riot, and the vineyardist can scarcely see over the top of his vines.

The process of grape gathering for raisins requires the most delicate handling and cleanliness. Hundreds of shallow wooden trays, about five feet square are distributed among dozens of trained pickers. The bunches are carefully cut from the vine, and as carefully laid upon the base of the tray to avoid bursting them. There they remain untouched for ten days and nights. One half of the grape is by this time cured; but instead of turning them with the hand, an empty tray is placed over them, the lower one is inverted, and the turning and transfer have been made. In twelve more days the curing is completed. The trays and contents are then stacked about twenty trays high, where they remain sweating, when they are ready to be graded and packed in boxes of five, ten, twenty, and fifty pounds for the Eastern market.

Vines six years old yield one and a half tons of raisins per acre, giving a net income of two hundred dollars per acre. While the supply of raisins is as unfailing as the growing demand, there is an æsthetic as well as an economic side. A few women have not only found raisin-vineyards a source of comfortable revenue, but their cultivation a most elegant and healthful pastime.

The approach to some of their homes with the vineyard in the rear of the dwelling-house, is through avenues of palm and magnolia trees, and if they lie, as many do, against the foot-hills of the Sierras, a ride through columnar glories of giant red-woods is a fitting introduction to the beauty and utility which is sure to be beyond.—*Harper's Weekley*

Chicken Fight Before Battle.

Two or three belated veterans were to be seen around the hotels returning from the great reunion out in Houston.

"I recall a chicken fight we boys had just before the fall of Vicksburg," remarked Col. Mahone, of Franklin, Tenn. There was a regiment of Mississippi soldiers and a regiment of Louisiana, each of which had a chicken rooster. The boys while lying around just before the fighting occurred began to arrange for a fight between these two game roosters. There were plenty of betters, and many of them put up rather big stakes, too. I guess in all there was fully ten thousand dollars on the fight by the time we got ready for the fun. The excitement ran high, each regiment betting on its rooster.

"Well, sir, we put the cocks in the pit and they went at it. The second blow from the Louisiana rooster broke the thigh of the Mississippi fellow, and he fell over on one side, still looking pert out of his eyes. Presently the Louisiana came strutting around him and crowing at the top of his voice and pecking at his comb. Of course the Mississippi fellows thought the game was over and were about to fork over their little dough, when all of a sudden the wouuded rooster fluttered up, and by some rare accident the gaff on his other leg pierced through the head of the Louisiana chicken and killed him almost instantly. There was great excitement in the camps, I tell you. But stop, that isn't all."

"No? What next?" somebody asked.

"Why, that chicken with its leg broken away up nearly to its body, was taken up by one of the surgeons, all the feathers were shaved from its thigh and the bone set again. Would you believe it? That chicken lived and was in many more fights for sport of the boys before the campaign closed."—*Atlanta Constitution.*

Freckles.

Women who have suffered year after year from these annoying blemishes, freckles—who have seen them come under the rays of the summer sun and disappear when the yearly reign of King Sol is over—are illogical enough to consider the glowing monarch accountable for our annual crop of freckles. All sorts of reasons have been given for these annoying pigmentary discolorations. One well known dermatologist declares they are the result of too much iron in the blood, and that the sun's rays bring the iron stained spots to the surface, just as they do a bit of cloth which has come in contact with iron and then is put in the sunlight. In other words, that freckles are iron rust.

Professor Hebra of Vienna, who is accounted the greatest authority of his century, insists on the contrary, that the sun does not produce freckles. He says: "It is a fact that lentigo (freckles) neither appears in the newly born nor in children under the age of 6 or 8 years whether they run about the whole day in the open air and exposure to the bronzing influence of the sun or whether they remain confined in the darkest room. It is therefore true that neither light nor air nor warmth produces such spots in children."

——Mrs. John G. Carlisle, wife of the Cabinet Minister, believes that bicycling should be a part of the education of the fin de siecle woman.

The Evolution of the Cow-Puncher.

BY OWEN WISTAR.

THE BRONCHO.

A few words about this horse—the horse of the plains. Whether or no his forefathers looked on when Montezuma fell, they certainly hailed from Spain. And whether it was missionaries or thieves who carried them northward from Mexico, until the Sioux heard of the new animal, certain it also is, that this pony ran wild for a century or two, either alone or with various red-skinned owners; and as he gathered the sundry experiences of war and peace, of being stolen, and of being abandoned in the snow at inconvenient distances from home, of being ridden by two women and a baby at once, and of being eaten by a bear, his wide range of contre-temps brought him a wit sharper than the street Arab's, and attitude towards life more blase than in the united capitals of Europe. I have frequently caught him watching me with an eye of such sardonic depreciation that I felt it quite vain to attempt any hiding from him of my incompetence; and as for surprising him, a locomotive cannot do it, for I have tried this. He relishes putting a man in absurd positions, and will wait many days in patience to compass this uncharitable thing; and when he cannot bring a man to derision he contents himself with a steer or a buffalo, helping the man to rope and throw these animals with an ingenuity surpassing any circus, to my thinking. A number of delighted passengers on the Kansas Pacific Railway passed by a Mexican vaquero, who had been sent out from Kansas City to rope a buffalo as an advertisement for the stock yards. The train stopped to take a look at the solitary horseman fast to a buffalo in the midst of the plains. Jose, who had his bull safely roped, shouted to ask if they had water on the train. "We'll bring you some," said they. "Oh, I come get," said he; and jumping off, he left his accomplished pony in charge of the buffalo. Whenever the huge beast struggled for freedom, the clever pony stiffened his legs and leaned back as in a tug of war, by jumps and dodges so anticipating each move of the enemy that escape was entirely hopeless. The boy got his drink, and his employer sent out a car for the buffalo, which was taken in triumph into Kansas City behind the passenger train. The Mexican narrated the exploit to his employer thus: "Oh, Shirley, when the train starts they all give three great big cheers for me, and then they give three mucha bigger cheers for the little gray hoss!"—*Harper's Magazine* for September.

It Went Off.

A story is told of a certain showman who combined with the ordinary circus performance a display of fireworks. At one town he advertised the "Battle of Trafalgar," with burning ships, blazing oceans and other magnificient effects. He drew such a vivid picture of that great naval encounter that the people from the entire countryside were attracted to see it. When the time arrived, the showman brought his guiding hand to bear on the set piece, applied the match in the usual manner and retired to await results. Several minutes passed but no battle ensued. The showman then stepped forward and addressed the crowd.

"It has not went off," he remarked and proceeded to investigate.

Again the same result followed and again.

"It has not went off, ladies and gentlemen," continued the showman. "I will now show you the great earthquake of Lisbon." He gathered the fireworks together and filled a barrel with them. He poured turpentine over them and springled the lot freely with gunpowder. Once more he applied the torch, with astonishing results. There was an explosion, and when all was over he gave a parting address.

"It has went off, ladies and gentlemen, and so has three fingers of my hand. Good evening and many thanks. The earthquake will not be repeated."—*Pittsburg Dispatch.*

A Wise Act.

Vokes—"We have at last secured a cook who will stay with us."

Carson—"Nonsense!"

Vokes—"Not at all. I took her on the recommendation of the policeman on the beat."

Drink Habit In Belgium.

Belguim's revenue from the drink habit has grown in 40 years from 4,000,000 to 33,000,000 francs, crime increasing 200 per cent at the same time and insanity 128 per cent.

—New varieties of fruits are offered every year, but many of them are old kinds with new names. In testing a new variety procure only a few and if it does not show marked superiority do not discard the older kinds to give it a place.

——The new resorvoir being built at Kittanning Point to supply water to the city Altoona will cover thirty-two acres of ground and will have an average depth of twenty-feet and will hold 350,000,000 gallons of water.

——Out of 274,000 Indians in the country, 189,000 are self-supporting. There are only 58,000 who are out of Very few of the latter number, however, care to wander from their own fireside, like the tramp.

——George Westinghouse, patentee of the brake which bears his name, has made over $20,000,000 from his invention.

——Hinks—"Did they lower a boat when he fell overboard?" Francis—"No; they were busy lowering the record.

——Courtesy doesn't cost anything, save a little patience and time.

Mamma Is Here Now.

It was in the Pennsylvania station one morning last week. In one of the waiting room seats there sat, a tired worn-looking man with a boy of perhaps three in his arms. The little fellow's shoes were only half buttoned, his hair was awkwardly combed and his stockings were awry. At the man's side sat two little girls of perhaps five and seven. Their frocks were buttoned crooked, but the younger had her hair combed in a pitiful attempt at curls. The man kept glancing at the clock. By and by the elder little girl spoke.

"Is mamma here yet?" she asked.

"Let us see," the man said.

The forlorn looking quartette rose and straggled out to the platform. There some men were just lifting a long pine box from a wagon. The man looked at it a moment.

"Come," he said, "let's go back; mamma is here now."—*Washington Post.*

THE YOUNG.—Are made prematurely aged by diseases (alas, how prevalent) which make them pale, listless, low spirited, morose or irritable in temper, easily tired, forgetful and incapable; fill mad houses and swell the lists of suicides; separate husbands and wives; bring untold suffering to millions, even to the third and fourth generation. A complete and scientific treatise on these ailments, their symptoms, nature and proper management, prepared by those who have had a vast and successful experience in their treatment and cure, will be mailed secure from observation, in a plain sealed envelop, to any one sending, enclosed with this notice, ten cents, (for postage,) to World's Dispensary Medical Association, 663 Main St., Buffalo, N. Y.

——In 1850 the total wealth of this country was $7,136,000,000 about $308 per capita; in 1860 it had risen to $16,160,000,000, or about $514 per head; in 1870 it was $30,069,000,000, or about $780 per head; in 1880 it had risen to $43,642,000,000, or $870 per head; and in 1890 to $62,600,000,000, or $1,000 per head.

——The Shakers have made a great hit. Their Digestive Cordial is said to be the most successful remedy for stomach troubles ever introduced. It immediately relieves all pain and distress after eating, builds up the feeble system and makes the weak strong.

The fact is, foods properly digested are better than so-called tonics. The Cordial not only contains food already digested, but is a digester of other foods. Food that is not digested does more harm than good. People who use the Cordial insure the digestion of what food they eat and in this way get the benefit of it and grow strong.

The little pamphlets which the Shakers have sent druggists for free distribution, contain much interesting information on the subject of dyspepsia.

Laxol is not a mixture of drugs. It is nothing but Castor Oil palatable.

——She Knew Her State.—"What state are you from, little girl? said a lady at a summer resort. Mischief, was the reply. Mischief? repeated the questioner. Yes'm. When I'm at home papa says I'm always in a state of mischief.

A GOOD APPETITE.—Always accompanies good health, and an absence of appetite is an indication of something wrong. The universal testimony given by those who have used Hood's Sarsaparilla, as to its merits in restoring the appetite, and as a purifier of the blood, constitutes the strongest recommendation that can be urged for any medicine.

Hood's pills cure all liver ills, biliousness, jaundice, indigestion, sick head, ache. 25c.

——Aunt Maria—"I declare, but isn't it too bad? The bill says this is a spectacular play, and here we have every one of us left our spectacles at home."

——Are you annoyed by a buzzing or roaring sound in your head? Have you difficulty in hearing distinctly? Are you troubled with a continual dropping of mucus, irritating the throat and causing you to cough? Is your breath unpleasantly affected and accompanied with bad taste? Is your hearing less acute? If so, you have catarrh and should at once procure a bottle of Ely's Cream Balm the best known remedy. The Balm will give instant relief.

——There are some friends who can't be good to you unless you will let them own you.

——The greatest sufferers in the world are women; their delicate organizations being particularly susceptable to derangement and disease. Dr. David Kennedy's Favorite Remedy, of Rondout, N. Y., purifies the blood and cures all the sicknesses peculiar to the sex; it fortifies the system against the diseases incident to old age. It is the best medicine in the world for women.

——Do you read the WATCHMAN.

Medical.

WHAT You want of a medicine is that it shall do you good—purify and enrich your blood, throw off that tired feeling, and give you health, strength, courage and ambition.

HOOD'S

Sarsaparilla is the only true blood purifier prominently in the public eye to-day, and it meets these requiremsnts perfectly. This is proved by the testimony of thousands of people. Hood's

SARSAPARILLA

Builds up the nerves by feeding them on pure blood, creates an appetite by toning the digestive organs, overcomes That Tired Feeling by giving vitality to the blood, and gives sweet refreshing sleep. You may realize that Hood's Sarsaparilla

DOES

this by giving it a fair trial. Insist upon Hood's and only Hood's. $1; six for $5.

HOOD'S PILLS act harmoniously with Hood's Sarsaparilla. 25c.
