Chinese Torture.
 How Evidence is Obtained From Witnesses in Kw' Cheng.

The "Pall Mall Gazette" recently printed a letter from its Ku Cheng correspondent detailing scenes in the trial of the inquiry into the recent massacres. The correspondent says:
 "When the court is ready the accused man is brought in handcuffed. He is filthy in appearance, has the wild and ghastly look of a starved man, which he really is. The prisoner opens the proceedings by swearing that he was nowhere near the scene of the massacre and then the torture begins. The man is first compelled to kneel with his bare knees upon a coil of chain. His head is dragged back and his pigtail is fastened to a rack high above his head. A pole is then thrust across his legs and two soldiers stand on each end of it, crushing the poor wretch's knees into the coil of chain.
 "The British consul could not stand this method of extracting testimony, and insisted that it be stopped. This was done as far as the proceedings in the court room were concerned, but for an hour afterward the shrieks of tormented prisoners could be heard coming from an adjacent room where the torture was continued. When the magistrates wanted to hear the confession of a tortured man, the prisoner was brought back into the court room. If he held back his confession he was threatened with resumption of his torture. This was usually sufficient to cause the prisoner to tell all he knew rather than return to the torture chamber.
 "Besides the torture described, the prisoners were beaten with bamboo sticks until their yells were most horrible to hear. One prisoner appeared in the court room unable to walk from the beating he had received, and another was unable to kneel because his knees had been broken by the chain links and his thighs had been lacerated by the strokes of the bamboo rods. In the midst of such misery, cakes, fruits, tea and wine were served and partaken of by the native officials, who could not understand why the foreigners present pushed these delicacies aside, refusing to touch them.
 "The correspondent declares that the prisoners ought to demand justice without torture, reaching the mandarin as promptly as the man who works in the field. The whole business, he says, lies at the door of corrupt officials."
 A dispatch from Shanghai says that Admiral Buller, commanding the British fleet, will return to Foo Chow, on board the dispatch boat Albatross, the voyage having assumed an attitude of defence.

Miner's Wages.
 The Reason the Semi-Monthly Pay Law Is Knocked Out.
 The Philadelphia & Reading Coal & Iron Company have for years paid their 25,000 employees every two weeks, and not a company store attached to a single one of the 73 coal operations in the anthracite coal region. They have never charged a single cent over the market price for mining supplies, such as powder, high explosives, oils or picks and shovels. The General Superintendent of this company in an interview with a newspaper man not many weeks ago said: "It costs us at least three times as much to pay our men semi-monthly as it did when we paid them only once a month. They get their money in solid cash twice a month, and they spend it where they please. We are willing to stand the extra expense of making up the semi-monthly pay rolls that we do not have to bother with store orders and bills of employees."
 Out in Clearfield County a Judge has just decided against the semi-monthly pay law. His decision is valuable, inasmuch as it shows how a man can display his legal intelligence and at the same time bury the common sense part of the argument. If the Reading Coal & Iron Company, which has been in and out of the hands of receivers for the last dozen years, finds it cheaper and more satisfactory to themselves and their employes to pay in cash every two weeks and discontinue company or pluck-me stores, surely every little corporation, or big one either, should do the same. The semi-monthly pay law, as first introduced in the Legislature, was thoroughly constitutional, just and equitable to all parties concerned; but the corporation-ridden Republican party saw in it something to be feared, and it was so twisted and contorted in committee that when it came up for passage it was difficult to recognize it. That is the reason why most of the corporations of the State, at the advice of their learned and able attorneys, refused to observe the law and are still paying their men anywhere from ten days to three weeks after they have earned their month's wages. And that is also the reason for the existence of so many pluck-me stores throughout the anthracite and bituminous regions at the present time. Judge Gordon, of Clearfield, is a Republican. It is fitting that the adverse opinion to the semi-monthly pay law should come from a Republican Judge. The coal miners of Pennsylvania should remember this when they go to the polls on November 5.
 Horseshoes Made From an Aerolite.
 The only man, perhaps that ever drove a horse wearing shoes made from metal which but a few weeks before had been on the moon, is Frank Morris of Worthington, W. Va. A few years ago a small aerolite composed of iron fell near Mr. Morris' homestead. He obtained possession of it and had a portion of it made into shoes for his favorite horses. These moonstones are usually highly prized, and seldom used for such base purposes.
 Pensions Touch High Tide.
 From the Baltimore Herald.
 Thirty-nine per cent. of all moneys paid to the government goes to pay pensions to ex-Union soldiers. This is the high water mark, though the war ended thirty years ago.

Something for the Farmer.
 This year \$95,000 will be expended on the State Department of Agriculture, and it will be for the farmer to judge whether he is getting such an adequate return for such an enormous draught on the public funds. He will certainly acknowledge that his taxes are no lighter. What does he say to a salary of \$7000 for the secretary, and \$6000 for the deputy secretary? The economic zoologist is certainly a very expensive official at \$5000 a year. The Commissioner of Forestry, the Dairy and Food commissioner and the State veterinarian don't have to worry about crops and rain and blight and interest on mortgages with \$5000 salary each per year. The chief clerkship is an enviable job at \$3200, while the clerks to the economic zoologist and the commissioner of Forestry live high at \$3000 each a year. The officials of the Agricultural department travel in state and luxury at a cost of \$10,000 a year, while the expenses of the dairy and food commissioners are expected to foot up \$25,000. They have a stenographer in this department and he gets \$1600 a year, while the messenger worries along at \$1200. Of all this big expenditure, the farmer only catches a glimpse at the result of the appropriation of \$15,000 for farmers' institutes. Farmers are going to continue to keep such an expensive party in power?

That Blamed Car Window.
 "Excuse me, sir," said the thin passenger with the sandy side whiskers, "but I judge from your conversation that you are Sandow, the human Hercules?"
 "Yes, sir; that's who I am," said the strong man proudly.
 "You can lift ten tons in harness?"
 "Yes, sir; that my record."
 "You can hold five hundred weight at arm's length?"
 "Yes, sir."
 "And eighteen hundred weight with two?"
 "Yes, sir."
 "Well, then, would you kindly raise this car window for me? It's stuck a little."
 "You'll excuse me, sir," said the strong man stiffly, "but my manager makes all arrangements for my tests of strength and endurance; and besides," and it was noticed that the modern Samsom was ill at ease, "I'm not in training."—Puck.

The Intruding Camel.
 As several Arabs were sitting in their tents upon a raw autumnal day, a camel, who had left his umbrella at home, humbly craved permission to shelter his nose in the interior. The children of the desert, moved with compassion, would have admitted the thin end of the camel, had not one of their number (whose motto was ever "Up and Bedouin") with the cry, "I know what a mother-in-law is myself!" remonstrated with the dromedary through the medium of a tent-peg, and compelled it to seek shelter elsewhere.
 Moral—Ce n'est que la premiere ma oute (Resist the mother-in-law, and she will fly from you).

The Question of Salaries.
 The Berks county teacher's institute has been discussing the question of salaries and some interesting points have been brought forward showing the disparity between the value placed upon education in the professional sense and upon labor in certain lines. Dr. Shaffer, the State Superintendent of Public Instruction, a Berks county teacher in years gone by drew the contrast. He said that girls of sixteen in the Reading silk mills made \$30 a month, and that after only five days' instruction at the machines, while women teachers, who spent years in preparation, were paid an average salary of \$33.21 per month and male teachers \$35. The county institute generally are taking up this question of betterment in salaries, especially since the State appropriation was intended to meet that very issue.

MALARIAL BITTERS.—We consider that we have not only saved our lives but also our home and home by the use of Aunt Rachel's Peruvian Malarial Bitters. We have been sick with malarial fever the past two years and not able to work sufficient to pay the interest and taxes on our home and keep our family. We have used Aunt Rachel's Peruvian Malarial Bitters two months and we rejoice to say that our health has been restored and we are free from malarial fever and chills, W. J.  —"The Common People," as Abraham Lincoln called them, do not care to argue about their ailments. What they want is a medicine that will cure them. The simple, honest, statement, "I know that Hood's Sarsaparilla cured me. It is the best argument in favor of this medicine, and this is what many thousands voluntarily say."

CASTLES IN THE AIR.
 "Amid the myriad troubles that meet day by day Who would not from the conflict a moment turn away And in a far off fairyland, where man no burdens bear, Forget a while our tears and toil, in 'Castles in the air.'"
 So writes Jacob Gough, and he goes on to suggest that this sort of castle building is a proper relief for weary folks. How many a man is sick and miserable who dreams of health and happiness. In this matter he had better be doing than dreaming. "What shall he do," you ask. Why, take Dr. Pierce's Golden Discovery to be sure. It cures affections of throat and lungs, incipient consumption, disordered liver, sore throat, bronchitis, asthma, catarrh, ulcers, scrofulous tumors and swellings, bad blood, fever and ague, and dropsy. Pierce guarantees a cure.

The "World" in the Soup.
 NEW YORK, October 9.—Promptly at midnight the entire force of compositors, pressmen, stereotypers and other attaches of the mechanical department of the New York World went on a strike, causing consternation to the management, and at 12.45 work in the building was at a standstill.

TREATMENT OF ECZEMA AND SALT RHUM.—These two complaints are so tenacious that the readers of the WATCHMAN should know of the success obtained by using Dr. David Kennedy's Favorite Remedy. Where all other treatments have failed, it has made a complete cure.
 Perhaps no more horrible case of Salt Rheum was ever reported than that of Wilbur L. Hale, quartermaster, Pratt Post, G. A. R., Rondout, N. Y. Several physicians utterly failed to render him any relief; finally one of the physicians suggested that Dr. Kennedy's Favorite Remedy be tried and steady improvement followed its use, and a permanent cure resulted.
 It is used with similar success in cases of scrofula, nervousness, kidney and liver complaints, and in all diseases brought about by bad blood and shattered nerves.

A New Experience.
 Friend—How do you like the new treatment?
 Stout Party—It's fine. I weigh only 220.
 Friend—But that's what you weighed six weeks ago when you began.
 Stout Party—Haven't gained a pound in six weeks—just think of it!—Puck.

—"Going into a decline." How often do we hear this expression. What does it mean? It means that people are losing, growing thin, wasting. The way to correct this condition is to improve the digestion. The condition arises from an inability to eat and digest food. In fact food does more harm than good because it ferments and putrefies in the stomach, developing poisonous substances which when absorbed cause various disorders.
 What is required is that the stomach be made to perform its duties. The Shaker Digestive Cordial is a food already digested and a digester of foods as well. It will make the stomach healthy. Get a book from the druggist and read about it.
 A California chemist has robbed Castor Oil of its bad taste. Laxol is its name.

 "You ought to be very proud of your wife. She is a brilliant talker."
 "You're right there."
 "Why, I could listen to her all night."

IMPORTANT FACTS.—If you have dull and heavy pain across forehead and about the eyes; if the nostrils are frosted and stopped up and followed by a disagreeable discharge; if soreness in the nose and bleeding from the nostrils is often experienced; if you are very sensitive to cold in the head accompanied with headache; then you should (immediately) resort to Ely's Cream Balm for a cure. The remedy will give instant relief.
