

Democratic Watchman

Bellefonte, Pa., Nov. 8, 1895.

THE FALLEN LEAF.

Down from a trembling branch, like a silent tear of grief,
To the murmuring stream below, floated a falling leaf.
Out on the flowing brook, smooth as a wild bird's song—
Caught by a lily's stem, floating again along.
Down where the catarrh wild dashes its silver spray—
One moment whirled above, then over and away.
Swift where the whirlpool dark, boils like a madman's brain,
Round and about is tossed, then wildly on again.
Out where the river wide spreads like an opening scroll—
Out to the hungry sea, lost is the leaf and soul.
Only the parent stem misses the gentle weight—
Only the hearts of home list for the clicking gate.
Brook, stream and river wide—fair, false and treacherous
Life's ever-changing tide—Death and Eternity—
—Charles E. Banks.

A Wonderful Building.

The Taj Mahal at Agra is at once the Tomb and the Monument of the Empress of Shah Jehan.
The central point of attraction to the stranger at Agra must always be the wonderful building known as the Taj Mahal, at once the tomb and the monument of the Empress of Shah Jehan. It is said that on the spot where the tomb now stands there was once a sort of summer palace, where the great Mogul and his family spent part at least of the year, as it was the favorite residence of his wife, to whom he was devotedly attached. Here, the story goes, she had asked him to build her the most beautiful palace ever yet constructed as a memorial of his affection for her and of their happiness together.
Before anything was done to carry out this design, however, the beloved Empress died, leaving the Emperor inconsolable for his loss. What he could not do for the living wife, he determined still to do for her memory, and the result was the erection of the famous tomb, which remains still the most beautiful example of its class in the world. The building stands on the opposite bank of the Jumna from the palace and city of Agra, and its domes of white marble rising from among the luxuriant vegetation of the surrounding garden form the most dazzling object that can well be conceived as seen from almost any part of the city, but especially from the palace itself.
No estimate has ever been formed of the wealth lavished on the building, but that it must have been enormous no one who examines the almost incredible beauty and elaborateness of the workmanship, and the rare and, in some cases almost priceless character of the material used in its construction, can possibly doubt. The actual execution of the work employed a host of the most skilled laborers obtainable in the Eastern world for 22 years, and when it is remembered that the building is small compared with most of those on which Emperors have lavished their treasures, some idea of the intricacy of the design and the beauty of its execution may be formed.

The gateway by which we entered the enclosure itself prepared us somewhat for the splendor of the building within. Like every part of the building and its surroundings, this gateway is constructed of the purest white marble polished to the highest perfection of which the stone is capable, while the carving and designs embossed on the surface are remarkable for the elegance and grace of their conception as well as for the perfection of their execution. It is no easy matter to accustom the mind of the idea that this work, hardly less perfect to-day than it was two hundred and fifty years ago, can have stood exposed to the weather all those years. Something, no doubt, is due to the climate, and more, perhaps, to the exquisite polish of the surface, which has fitted it to resist the weather to the best advantage.

It is, however, on the interior of the mausoleum that Eastern art, with all its wealth of patient industry, has lavished the best of all it had to offer. The whole interior glazes today exactly as it did when first erected, with the perfect reproduction in polished stone of every leaf and flower with which nature has adorned the Indian peninsula. And not one shade of all the exquisite color is produced by any pigment. If a single flower demanded a score of tints to reproduce its perfect beauty, the effect was obtained by the use of a score of different stones without regard to their rarity or value. Nor is the effect injured by marks of joining. Hardly anything short of a microscope would in most instances disclose the fact that art and not nature had produced the dazzling effect. But it is hopeless to attempt to give any adequate idea of this consummate work of art, which stands, and no doubt will stand, unrivaled as the highest example of unwearied art supported by unbounded resources.

Salaries of Governors.

There is a great difference in the compensation of the Governors. New York and Pennsylvania pays the most \$10,000 a year and house rent free. New Jersey pays its Governors \$10,000 a year, but does not furnish a mansion for him. Ohio and Massachusetts pay \$8,000 a year, Illinois and California pay \$6,000, Colorado, Indiana and Wisconsin pay \$5,000, Maryland pays \$4,500, Eight States pay \$4,000 a year. The remaining 21 States pay miserably small salaries to their executives. In Vermont and Oregon the Governors receive only \$1,600 a year—hardly enough to pay a capable private secretary. In Michigan the salary of the Governor is restricted for many years at \$1,000. This restricted the office to rich men, for no poor man who was competent could afford to take it. The salary in that State now is \$4,000.

Laxol is not a mixture of drugs. It is nothing but Castor Oil made palatable.

The Armenians.

A Gifted People Who Have Played a Considerable Part in History.

The Armenians are a civilized people, a people of great natural gifts, and a people who have played a considerable part in history. Since their ancient monarchy, which had suffered severely in the long and desolating wars between the Roman and Persian empires from the third to the seventh century of our era, was finally destroyed by the Ssjukian Turks, a large part of the race has been forced to migrate from its ancient seats at the headwaters of the Euphrates, Tigris, and Aras. Some of them went southwest to the mountain fastnesses of Cilicia, where another Armenian kingdom grew up in the twelfth century. Others drifted into Persia. Others moved northeastward, and now form a large, industrious, and prosperous population in Russian Transcaucasia where many have entered the military or the civil service of the Czar, and risen, as the Armenians used to rise long ago in the Byzantine empire, to posts of distinction and power. Russia's three best generals in her last Asiatic campaigns against the Turks were Armenians.

Others again have scattered themselves over the cities of Asia Minor and southeastern Europe, where much of the local trade is in their hands. But a large number, roughly estimated at from 1,300,000 to 1,700,000 remain in the old fatherland round the great lake of Van, and on the plateau and elevated valleys which stretch westward from Mount Ararat to Erzerum and Erzinghan. Here they are an agricultural and (to a less extent) a pastoral population, leading a simple primitive life and desiring nothing more than to be permitted to lead it in peace and in fidelity to that ancient church which has been to them the symbol of nationality, as the guide of life, for sixteen centuries.—[Hon. James Bryce, M. P., in the Century of November.]

The Downfall of Bill Nye.

Bill Nye, the humorist, had an experience at Petersop, N. Y., last Tuesday night that he will hardly write up for the Sunday papers. Nye and his lecturing companion, Poole, the lightning harpist, were engaged to give an entertainment in the First Baptist church, for which they were to receive \$250. The church was crowded with the best people in Petersop when Nye and Poole appeared. Poole came on first and gave great satisfaction, but when Nye came on he was so drunk that he could scarcely talk. His behavior and language were so disgusting that many of the audience left at once. After the entertainment was over a number of young men who had been "faked" armed themselves with decayed eggs and fruit and laid for the humorist at the railroad station and "soaked" him well. He was a miserable object when he finally got into his car, and the other occupants of the car cleared out and left him alone in his glory. He was besmeared from head to foot with spoiled eggs, but immediately sunk into a drunken stupor and slept till he reached New York. Mr. Poole has announced that he will cancel all engagements with Nye. Nye cut up the same sort of a caper at Atlantic City a few nights before.

The Increasing Immigration.

There is no longer doubt that the tide of emigration has turned. For two years, notably in 1894, immigration to the United States was held in check; in the year 1895 it has resumed its former volume. The increase is very apparent. During the month of September just past the arrivals of immigrants in this country numbered 36,599, as against 24,904 in September, 1894. The nine months of the current year show an immigration of 249,352, as against 191,455 for the same period last year. But their coming in such largely increased numbers impose upon the United States the necessity of selection more forcibly than ever before. Our present laws assume to keep out the diseased, the criminal, the pauper, and to a great extent they are effective. But they need to be supplemented by laws which shall erect a barrier against ignorance, and shall enable the great American republic to get the best, and only the best, from the peoples of Europe.

Rumor is now gabbling about a possible alliance between Russia and Japan. We regard this as the acme of absurdity. During the autumn the Japanese have been fairly boiling over with rage at the insult done to Russia, and the army and navy have been perfectly willing that war should break out. Lafcadio Hearn, who is as keen an observer of things Japanese as any we have any knowledge of, has an article in the current number of the Atlantic Monthly, in which he says that the Japanese government, realizing that its navy is its weak spot, is exerting every effort to cure the defect as speedily as possible, while war with Russia is confidently looked for soon.

The Duke of Marlborough isn't the only Englishman in luck matrimonially from a purely monetary standpoint. On November 12 a British woollen maker Urban H. Broughton will wed Mrs. Cora Rogers Duff, who will receive \$18,000,000 when her father dies. On the same day ex-Secretary Whitney's daughter will be united to A. H. Paquet. She also represents millions. All told the three subjects of Queen Victoria will annex to themselves some forty millions of good American dollars. Cupid is a great gold exporter.

The conviction of Durrant for the murder of Blanche Lamont in the belfry of Emanuel Baptist Church in San Francisco was a foregone conclusion and the public would have been shocked at any other verdict. The trial has been a tedious one, however, and characterized by many sensational features, and there will be an unusual feeling of relief that it is ended. Even murder trials pall upon the public taste when too long drawn out.

The Pure Food Law.

The law now in operation in this state holds the grocer responsible for the sale of any article injurious to health by reason of adulteration, after such adulteration has been reported to them, it having some effect on the retail trade. The state inspectors finding any article of food or drink adulterated being of a trivial character, affecting only the color, but on the report the articles have been withdrawn from sale until the manufacturers satisfy the inspectors that the adulteration discovered by analysis no longer exists, when the ban is removed. The operation of the law in this respect has been salutary.

The law not only holds grocers and other dealers responsible for any adulterations injurious to health in articles of drink, but it also applies to canned goods, where the greatest danger lies in the adulteration of the color, but on the report the articles have been withdrawn from sale until the manufacturers satisfy the inspectors that the adulteration discovered by analysis no longer exists, when the ban is removed. The operation of the law in this respect has been salutary.

A \$3,000,000 Present.

Rockefeller Makes the Largest Single Gift Ever Made to an Institution of Learning.

CHICAGO, Nov. 2.—The largest donation ever made to an educational institution at one time by one man was made to-day to the Chicago University, when F. T. Gates, representing John D. Rockefeller, announced to the trustees of the institution that the capitalist had determined to add \$3,000,000 to his already magnificent donations. The announcement was made at a meeting of the trustees. Mr. Rockefeller's proposition follows: Gentlemen—I will contribute to the University of Chicago \$1,000,000 for endowment, payable January 1, 1896, in cash, or at my option in approved interest-bearing securities at their face market value. I will contribute in addition \$2,000,000 for endowment or otherwise, as I may designate, payable in cash or at my option in approved interest-bearing securities at their face market value, but only in amounts equal to the contributions of others in cash or its equivalent, not hitherto promised, as the same shall be received by the University. This pledge shall be void as to any portion of the sum herein promised which shall prove payable on the above terms on or before January 1, 1900.

There had been no intimation of the intention of Mr. Rockefeller to bestow any such gift on the University, and the trustees were so wholly taken by surprise that it was some moments before the silence which had come upon them when the reading of the letter began, was broken. Then there was general handshaking and words of congratulation. Of this latest gift \$1,000,000 goes to the University unconditionally. To the remaining \$2,000,000, the proviso is attached that the trustees are to raise a sum amounting to its equivalent between this time and the beginning of the year 1900.

"Pennsylvania Day" at Atlanta Exposition.

Use Auni Rachael's Eucampaine and Horebound. It is known that clear white rock candy is the most healing of all substances, and horebound and eucampaine the very best throat remedies; combined we have Horebound, Eucampaine, Grape Juice and Rock Candy, one of the best pulmonary remedies known. Singers and public speakers should carry a bottle in their pocket. For sale by druggists. Price 25 cents.

The goose bone is nearly all white this year, and those that know say the result will be that the snow will be on the ground from early December until late in April. A long cold winter, filled with blustering storms, is ahead. There are other things that confirm this. Corn husks are unusually thick and woodchucks and chipmunks are already fat enough to kill.

Tumors, Fibroid, Ovarian and other tumors cured by electrolysis and other means without the knife, which is rarely necessary. For pamphlet and references, address with 10 cents in stamps, World's Dispensary Medical Association, 663 Main Street, Buffalo, N. Y.

Joseph Nesbitt, once a mining king worth \$1,000,000, died the other day in a Chicago lodging house. His ruin was due to gambling and morphine.

Catarrh can be successfully treated only by purifying the blood, and the one true blood purifier is Hood's Sarsaparilla.

In Norway the law provides that no person shall be permitted to cut down a tree unless he plants two saplings in its place.

Czar's Coronation. Preparations in Russia.

The imperial coronation shortly to take place in Moscow will doubtless be one of the grandest state displays ever witnessed in Europe. Russian coronations are not numerous; and an occasion of this kind comes but once in a lifetime, and the policy of the Russian imperial family has always been to dazzle the eyes of their subjects by magnificent court dramas, in which the Czar really a Czar. To this end Russian coronations have been made as splendid as the resources of the empire could permit. The coronation of the late Emperor cost \$4,000,000; that of his predecessor considerably over \$5,000,000, and in each case a show was provided for the people of Russia that was vividly remembered until supplanted in the popular mind by the splendors of the next. The coronation is regarded as much more than the simple act of placing a diadem on the head of the first man in the state; it is a series of gorgeous ceremonies and the people of every nation that forms a part of the greatest nation on earth are required through their representatives, to assist, while the spectacle is made still more brilliant by the presence of ambassadors of every power on the globe, and of many of the princes of the reigning houses. The preparations for a Russian coronation are very elaborate, and comprise, among other things, the laying up of great stores of provisions in Moscow, for the houses of that venerable city are compelled on coronation occasions to entertain from 500,000 to 600,000 strangers who journey to witness the ceremonies. Every province in the empire sends a deputation: every tribe in the far-away districts of Siberia, on the steppes of Central Asia, from the Khivans to the Esquimaux along the shores of Bering strait, sends one or more representatives to present the homage of the tribe to the Great White Czar. Poles, Finlanders, Laplanders, Cossacks, Russian of a dozen names, Circassians, Georgians, Bashkirs, Turks—for the Russian empire contains millions of Mohammedans—Tcherkesses, Abassians, Calmucks, Tartars, Karapaks, Daghestanis, Armenians, Kurds, Chinese from the districts conquered by Russia from China, Mongols, deputies from dozens of wandering tribes in the heart of Asia; for over 50 languages and double that number of dialects are spoken in the Russian dominions, and the people of every language must present their homage to the Czar in their own tongue. The imperial coronations take place in the Cathedral of the Assumption, one of the many in Kremlin.

Hydraulic Motors. What Water Can Do.

The effect of the hydraulic motor, which is now used for the purpose of moving masses of earth, well nigh passes belief. A stream of water issuing from a pipe six inches in diameter, with fall behind it of 375 feet, will carry away a solid rock weighing a ton or more to a distance of 50 or 100 feet. The velocity of the stream is terrific, and the column of water projected is so solid that if a crowbar or other heavy object be thrust against it, the impinging object will be hurled a considerable distance. By this stream of water a man would be instantly killed if he came into contact with it, even at a distance of 200 feet. At 200 feet from the nozzle a six inch stream, with 375 feet fall, projected momentarily against the trunk of a tree, will in a second denude it of the heaviest bark as cleanly as if it had been cut with an axe. Whenever such a stream is turned against a bank, it cuts and burrows it in every direction, hollowing great caves and causing tons of earth to melt and fall and be washed away in the sluices.

Women who do not want to vote should not undertake to cripple the aspirations of more ambitious members of their sex. We notice that Molly Elliott Seawell, who brought a storm about her ears a few years ago by printing an article in the Critic in which she held that the world has never produced a woman of genius, is out in a blast against woman suffrage. That is just what might be expected from such a woman. But the world moves on and the day is coming when no one will be disfranchised on account of sex.
