SELL HAY AND MAKE MONEY

One ton of shredded Corn Fodder is equal in value to cattle feed to three-fourths of a ton of hay.

Farmers who have their corn fodder shredded or cut and crushed, find that one half the fodder in feeding their stock can be saved as compared with using the stalks, blades and husks in the old way.

Cows and horses relish corn fodder as much as they do hay, when the 'o'der' is prepared and steamed by the use of hot water during the process.

The best machinery for preparing corn fodder is the

Freedom for Cuba.

Oppressed Worse Than the American Colonies.

To an American who has resided

in Cuba and who is familiar with

the country and its people, the present

struggle going on there for civil and

religious liberty is a question of profound

interest. Business called me to the island

in the autumn of 1893, and I remained

there through the winter, actively en-

gaged in work of a semi-public char-

acter. This relation brought me in

contact with people of all classes and con-

ditions, and with opportunities for ascer-

taining something of the internal work-

ings of the Government in its intercourse

with the people. Taxation was one of

the first questions that interested me. In

the numerous articles that have been pub-

lished on the Cuban insurrection and its

opposition to the protests of the oil pro-

ducers he signed the bill passed by the

iniquitous legislature authorizing the

consolidation of competing pipe lines.
