"Three classes of phosphatic materials typical specimens from 29 to 54 per cent of bone phosphate. The second consists of red modules, similar in appearance to

the so-called "clay iron-stones," but containing from 45 to 52 per cent. of bone phosphate, and alumina. The third class of material consists of blocks of what appears to be a dense blue limestone, but which proves, on analysis, to contain in the neighborhood of 40 per

cent. of bone phosphate of lime." These deposits might prove very valuable to the communities in which they are located, as they can be readily converted into the phosphate of commerce at the mills in Philadelphia and other eastern cities.

"SIDE-TRACKED" AT THE STANDARD. -To a large and appreciative audience last night the management of the Standard theatre offered the popular melodrama "Side Tracked." The play has been much improved since its early performance here, and as produced last night it provides an excellent entertainment. The principal figure in the piece is a tramp, through whose persistent efforts a mysterious crime is finally cleared up. This part was assumed by Mr Harry Tansey, a capital dialect character actor, who kept the audience constantly "on the laugh." In support are Daisy Chapman, a pert and vivacious soubrette ; Mike Callahan, in an Irish part,
