

College.

THE PENNSYLVANIA STATE COLLEGE. Located in one of the most beautiful and Healthful Spots in the Allegheny Region; Undenominational; Open to Both Sexes; Tuition Free; Board and other Expenses very low. New Buildings and Equipment.

LEADING DEPARTMENTS OF STUDY.

- 1. AGRICULTURE (Two Courses), and AGRICULTURAL CHEMISTRY; with constant illustrations on the Farm and in the Laboratory. 2. BOTANY AND HORTICULTURE; theoretical and practical. Students taught original study with the microscope. 3. CHEMISTRY; with an unusually full and thorough course in the Laboratory. 4. CIVIL ENGINEERING; ELECTRICAL ENGINEERING; MECHANICAL ENGINEERING. These courses are accompanied with very extensive practical exercises in the Field, the Shop and the Laboratory. 5. HISTORY; Ancient and Modern, with original investigation. 6. INDUSTRIAL ART AND DESIGN. 7. LANGUAGE AND LITERATURE; Latin (optional), French, German and English (required), one or more continued through the entire course. 8. MATHEMATICS AND ASTRONOMY; pure and applied. 9. MECHANIC ARTS; combining shop work with study, three years' course; new outfitting and equipment. 10. MENTAL, MORAL AND POLITICAL SCIENCE; Constitutional Law and History, Political Economy, &c. 11. MILITARY SCIENCE; instruction theoretical and practical, including each arm of the service. 12. PREPARATORY DEPARTMENT; Two years carefully graded and thorough. Commencement Week, June 9-12, 1896. Fall Term opens Sept. 14, 1896. Examination for admission, June 13th and 14th. For Catalogue or other information, address GEO. W. ATHERTON, L.L.D., President, State College, Centre county, Pa.

Coal and Wood.

EDWARD K. RHOADS, Shipping and Commission Merchant. -DEALER IN- ANTHRACITE, BITUMINOUS & WOODLAND. -COAL- SHELLLED CORN, OATS, STRAW AND BALED HAY, BUILDERS' and PLASTERERS' SAND, KINDLING WOOD, by the bunch or cord as may suit purchasers. Respectfully solicits the patronage of his friends and the public, at -HIS COAL YARD- near the Passenger Station. Telephone 1312. 36 18

Medical.

WRIGHT'S -INDIAN VEGETABLE PILLS- For all Bilious and Nervous Diseases. They purify the Blood and give healthy action to the entire system. CURE DYSPEPSIA, HEADACHE, CONSTIPATION AND PIMPLES. 40-40-17

HE NEVER FAILS

DR. G. F. THEEL, 604 N. 6th St. PHILADELPHIA, PA. Challenges the world, from the advertising specialist up to the lecturing Professor, in curing the worst cases of Special Diseases and BLOOD POISON. No matter how lingering, severe and dangerous the trouble may be, Nervous Debility, Stricture, Varicose and Piles, cured without cutting. Dr. THEEL is positively the oldest, the best and most skillful and experienced one, no matter what others may claim. Send five 2 cent stamps for your free book EXPOSING QUACKS and their books and Circulars. Instant relief. Hours: 9 to 5; Evngs., 6 to 9. Wed. and Sat. Evngs., 6 to 10; Sun., 9 to 12; Evngs., 6 to 9. Treatment by Mail. When you write or call mention this paper. Board and lodging if desired 40-41-17

PENNYROYAL PILLS.-Original and Only Genuine. Safe, always reliable. Ladies ask Druggists for Chichester's English Diamond Brand in red and Gold metallic boxes, sealed with blue ribbon. Take no other. Beware of dangerous substitutions and imitations. At Druggists, or send 4c. in stamps for particulars, testimonials and "Relief for Ladies" in letters. Return Mail. 10,000 Testimonials. Name Paper. CHICHESTER CHEMICAL CO., Madison Square, Philadelphia, Pa. Sold by all Local Druggists.

CATARRH ELY'S CREAM BALM -CURES- CATARRH, COLD IN HEAD, HAY-FEVER, ROSE-COLD, DEAFNESS, HEADACHE. ELY'S CREAM BALM Is quickly absorbed. Cleanses the Nasal Passage, Alleviates Pain and Inflammation, Heals the Sores, Protects the Membrane from Additional Cold. Restores the Senses of Taste and Smell.

IT WILL CURE.

A particle is applied into each nostril and is agreeable. Price 50 cents at Druggists or by mail. ELY BROTHERS, 41 & 111 66 Warren Street, New York.

SCIENTIFIC AMERICAN AGENCY FOR PATENTS

CAVEATS, DESIGN PATENTS, TRADE-MARKS, COPYRIGHTS, Etc. For information and free Handbook write to MUNN & CO., 361 Broadway, New York. Oldest bureau for securing patents in America. Every patent taken out by us is brought before the public by a notice given free of charge in the SCIENTIFIC AMERICAN.

Largest circulation of any scientific paper in the world. Splendidly illustrated. No intelligent man should be without it. Weekly \$3.00 a year; \$1.50 six months. Address MUNN & CO., Publishers, 361 Broadway, New York City.

Democratic Watchman

Bellefonte, Pa., March 27, 1896.

Cuba's Government.

The political ferment aroused in the United States and Spain over the condition of affairs in Cuba naturally draws attention to the island itself, its physical character, and the system of government which Spain has instituted in it. In outline Cuba resembles a hammerhead shark, the head being to the east, looking into the Caribbean sea, and the tail just at the mouth of the Gulf of Mexico, about midway between Yucatan and the Florida Keys. The extreme length of the island is about 760 miles, almost exactly the distance by air line between Chicago and Albany. In width the island varies from 20 to 135 miles. Its area, including the large adjacent island of Pinos on the south and other islands which is almost precisely the area of the State of New York. The coast line is 2,200 miles in length.

Politically Cuba is styled the Captain-Generalcy of Havana and is subject in all things to the authority of the Captain-General, who is the civil as well as military ruler. The island is divided into five civil governorships, La Habana, Matanzas, the Central or Puerto Principe, the Eastern or Santiago de Cuba, and the Western. Over each of these a lieutenant governor has authority subordinate to that of the Captain-General. The island is again divided into three military departments, the Western, Central and Eastern, of which the respective capitals are Havana, on the northwest coast; Puerto Principe, in the middle of the island, and Santiago de Cuba, on the southeast coast. Of the first the Captain-General has command; of the central and eastern the lieutenant governor of Puerto Principe and Santiago de Cuba. In time of war, such as that which now exists, the civil government is deputed. In August last Gen. Lopez was appointed to undertake the civil government of the island, leaving Campos free to carry on the war. Gen. Weyler probably has no civil duties to perform while the rebellion continues. Gen. Lachambre is in command of the forces in the Eastern Department, and Gen. Salcedo of those in the Western Department. Meanwhile their civil duties are performed by lieutenants appointed by the Captain-General. There are still other subordinate military positions in the island, each of which is in command of a Spanish general.

Otherwise the island is divided into fiscal, judicial, revenue, and ecclesiastical districts, their boundaries not being coincident. All the officers, military and civil, fiscal, judicial, and ecclesiastical, are filled by men of Spanish birth. The creoles or native Cubans have absolutely no representation in the government, no redress against tyranny and the plunder of the natives. Not one of them is ever appointed to office. The rebels come from this, the native population of the island—of mixed blood, white and black. Most of them are of the planter class. The ruling class is almost entirely a bureaucracy and lives upon the taxes which the planters pay. It is said that the most outrageous discrimination is practiced against the Cubans in all branches of the government.

Out of the entire population of about 1,500,000 there are nearly 1,000,000 Spaniards and creoles, the latter being by far the most numerous. They are white or mixed white and black blood. The very general negro strain in the creole population no doubt creates a class barrier between it and the Spaniards which make all the more hopeless any ideas of relief through peaceful agitation.

Absinthe Drinking.

The Dangerous Liquor Is Becoming Very Popular in New York.

Absinthe, which not so long ago was looked upon here as a dangerous drink, that had done much to fill insane asylums of France, has firmly established itself in New York, now, and it is even manufactured here in considerable quantities, says the New York "Sun." One firm has gone into the manufacture of absinthe on a large scale, with machinery imported from France. It is said that it turns out a thousand gallons a month from dried wormwood leaves, and there are cheaper grades of American absinthe made by smaller firms. Every French restaurant in town serves absinthe, and it is on sale at all the Broadway cafes, though it is not drunk to be served over the bar. A French absinthe drinking will sip a glass of it leisurely for an hour. Some men who patronize Broadway bars want quick results, and they drink a glass of absinthe and gum water very much as they would toss off a mug of beer. It is claimed by men who drink absinthe regularly before dinner that it is less harmfully appetizer than a cocktail. They assert that its action is not so violent, and that the time spent in drinking it leisurely is a good preparation for dinner. In the cafe of the best known French restaurant in this town one finds men and women sipping absinthe between the hours of 5 and 7, and very seldom is a cocktail served.

These are the states having Democratic governors: Alabama, Arkansas, California, Delaware, Florida, Georgia, Illinois, Indiana, Louisiana, Mississippi, Minnesota, Nebraska (Democrat-Populist), North Carolina, South Carolina, Tennessee, Texas, Virginia and West Virginia. Prior to the admission of Utah as a state there were 444 votes in the electoral college, and with Utah added there will be 447. The number of electoral votes by states now having Democratic governors is 194. The number of delegates necessary to a choice in the electoral college this year will be 224.

Putting Away Winter Clothing.

In putting away winter clothing, whether it be in the form of personal apparel or household furnishings, such as heavy curtains or bedding, it is necessary for one to exercise the utmost care in order to guard against great loss from the ravages of moths. No trouble, no matter how laborious, should be spared, there being much at stake, and the expense being quite too serious to be trifled with in the very least. Heavy curtains, which are used only in the winter time as a protection, and all superfluous bedding, such as blankets and quilts, should be exposed to the sun and air for a few hours; the curtains being well beaten and freed from all dust and the blankets carefully washed. Then they should be neatly folded, wrapped in large cotton sheets and laid away in the linen press or store room, upon substantial shelves, which are clean and dry, accompanied by a goodly supply of camphor.

All heavy articles of apparel, such as gowns, coats or wraps of any kind, should be taken out of doors and hung upon the line to air; after which they should be thoroughly shaken and brushed until all dust and dirt of any kind have been removed, the smallest atom affording food in which moths thrive and revel. This having been accomplished, the garments should be put away in cotton bags, made expressly for the purpose, large boxes or trunks that are in use, it being quite immaterial so long as all air is entirely excluded.

All woolen underwear should be carefully washed and dried, then rolled up into clean paper sacks, or old cotton pillow cases—care being taken to see that there are no holes in them—with generous quantities of pure camphor or moth camphor, the latter possessing the great advantage over the former of being much less expensive, although the odor is perhaps not quite so agreeable.

Bags of all sizes and descriptions are invaluable at such a time of year for holding articles that are to be put away until the next season has rolled round again. These could be made of any sort of material, and if desired, could be adorned with the owner's initials, which should be embroidered in white or colored Roman floss.

Furs should be packed away in their own boxes, with plenty of moth camphor, after all dust has been beaten out of them. Felt or velvet hats should be carefully cleaned by means of a soft hat brush, then wrapped in tissue paper and put away in their respective hand boxes. Each box, package, bag or trunk, should, for convenience sake, contain a label upon which is legibly written a list of the contents. This will prove a great saving of time and trouble.

Mrs. Adlai Stevenson.

Just Elected President of the Daughters of the Revolution.

Mrs. Adlai E. Stevenson the wife of Vice-President Stevenson who has just been elected president-general of the daughters of the American revolution, is fit to be every woman's example, for that she has been conferred upon her by her patriotic friends. The daughters of the American revolution was organized in Washington in 1890, and has a membership of 10,000 in 42 states. It is one of the most important women's patriotic societies in the country. Its conditions of eligibility to membership are as follows: "Any woman accepted as a member for membership who is of the age of 18 years and who is descended from an ancestor who with unflinching loyalty rendered material aid to the cause of independence as a recognized patriot, as a soldier or sailor, or as a civil officer in one of the colonies or states or of the applicant be otherwise acceptable to the society. Mrs. Stevenson was married to Mr. Stevenson in 1866. She was Miss Letitia Green, of Danville, Ky., the daughter of a Presbyterian minister, who was the president of Center college, in Danville. At that time this was the principal educational institution in the state, and turned out such good men as T. W. Crittenden, John Young Brown and Senator Blackburn. Adlai E. Stevenson, then a young man in McLean county, Ill., decided he would go to Danville for his education, and at a reception in the house of President Green he met his future wife. Two years later Dr. Green died, and Miss Letitia came in to McLean county to live with a sister who had married Matthew T. Scott, and the acquaintance which began in Kentucky was continued in Illinois, and resulted in marriage. Mr. Stevenson had won a prize, for his wife not only brought him great beauty and a sweet disposition, but a head that has helped him consistently through hard work to the very high position he now occupies. Mrs. Stevenson is one of the most popular women in Washington society, and her new honors will add little to the high esteem in which she is already held.

Do Katyids Keep Time?

This question has recently been discussed among naturalists, and Dr. G. M. Gould asserts not only that katyids keep time, but that they produce a kind of music which may be described as orchestral. Both Doctor Gould and another observer have listened to two or three katyids answering one another all night long. Sometimes individual performers were noticed to drop out of time, but upon the whole the stridulation of these insects bands is harmonious and in a regular key. Observers do not agree on the point whether or not there is a difference of pitch between the notes of two orchestras.

The Philadelphia Methodist Conference has declared, by the emphatic vote of 117 to 89 in favor of admitting women as lay delegates to the General Conference. Now if the Methodist women want to be given a chance to help to legislate for the church to which they belong they should get in their persuasive work with the other annual conferences. They do not need to bother with the Philadelphia Conference any more except to parade their Philadelphia victory as an evidence that the tide is setting their way.

Thunder is sometimes one great crash, because the lightning cloud is near the earth, and as all the vibrations of the air (on which the sound depends) reach the ear at the same time. It is stated that of 597 trees struck by lightning in the forest near Moscow 202 were white poplars; and farmers are advised to plant these trees as protectors against lightning. The chameleon's eyes are situated in bony sockets projecting from the head. By this curious contrivance the animal can see in any direction without the slightest motion, save of the eyes. The habit of turning round three or four times before lying down has survived in the domestic dog from his savage ancestry. It then served to break down the tall grass and make a bed.

A Biblical Calendar.

England boasts of a genius who has produced a "Calendar of Scriptural Quotations. He undertook the exacting task of providing a task for each day, but came out of the fire of difficulties unscathed. Here are a few choice bits culled from his masterpiece: -January 17. Samee Twins died. -"In their death they were not divided." -II. Samuel, ii, 23. February 25.-Inconvertible Greenbacks issued by the United States. -"Silver and gold I have none, but such as I have give I unto thee." -Acts, iii, 6. February 29. Leap Year Day. -"On that day seven women shall take hold of one man, saying, we will eat our bread and wear our own apparel; only let us be called by thy name." -Isaiah, ii, 1. May 14. London Museum of Geology Opened. -"Stumble not among the stones." -Eccl., xxii, 20. July 3. Dog Days Begin. -"Deliver my darling from the power of the dog." -Psalms, xxii, 20. December 5. Gladstone's Ministry Assumed Office, 1868. -"When the righteous are in authority the people rejoice." -Proverbs, xxix, 2. This is certainly "Every man according to his works" with a vengeance. -Washington Pathfinder.

If a small bottle of Shaker Digestive Cordial does you no good, don't buy a large one. "Prove all things; hold fast that which is good." It's not good for everybody, only for the thin, pale, sick, weak and weary. For those who are starving for want of digested food. For those who cannot get fat or strong, because their stomachs do not work as they ought to. These are the people, millions of them, whom Shaker Digestive Cordial will cure. Food makes strength, muscle, brain, blood, energy—after it is digested. If not digested it will do you no good at all. Shaker Digestive Cordial helps your stomach to digest your food and cures indigestion permanently. When you have tried a small bottle you can tell. Sold by all druggists. Trial bottle 10 cents.

Having rented all the hotels, boarding houses, lodges and brickyards in St. Louis, and all within a radius of 200 miles around St. Louis, for the accommodation of his delegates and friends, we are prepared to hear next that Major McKinley has begun to build. The news from Columbus, O., is that the major has been chosen, and will have all that ever will be chosen, world without end. Architects should send their plans and specifications immediately to the Hon. Mark Hanna, superintendent of construction. -Er.

MARY AND HER LITTLE PAIN. -Mary has a little pain; it fits her from head to toe; it follows her where'er she goes. -Spite of all they give her. Like Mary's lamb, we'll turn it out, giving quick recovery, by giving Dr. Pierce's Golden Medical Discovery! Sure cure for biliousness, torpid liver, constipation, dyspepsia, scrofula, and all blood, skin and scalp affections. Only medicine so sure in curative action that it can be guaranteed. See guarantee around each bottle.

An inch of rain falling upon an area of one square mile is equivalent to nearly 17,500,000 gallons, weighing 145,250,000 pounds, or 64,844 tons. -The usual treatment of catarrh is very unsatisfactory, as thousands can testify. Proper local treatment is necessary to success, but many, if not most, of the remedies in general use afford but temporary relief. A cure certainly cannot be expected from snuffs, powders, douches and washes. Ely's Cream Balm, which is so highly commended, is a remedy that combines the important requisites of quick action, specific curative power, with perfect safety and pleasantness to the patient.

The tail of lizards is said to be easily broken, and the reptile does not seem to mind any ordinary accident that happens to his hind quarters. POETS TO BE PITIED. -Pity the poets who get stuck in their efforts to make words rhyme. Fancy a man hunting for a rhyme for the word "Pellet." If he might praise the "Pellet" and bid you smell it, tell it, yell it, sell it and what not. But "Pellets" are matchless as a cure for bilious attacks, indigestion, constipation and sick headaches. They are preventative as well as curative. Hardly larger than mustard seeds. They work wonders.

Two Sicilian scientists, Grassi and Rovelli, have recently discovered that the housefly is the intermediate host of a species of tape worm which does much harm among chickens. The chickens eat flies whose bodies contain the larvae of the tape worm. Thunder is sometimes one great crash, because the lightning cloud is near the earth, and as all the vibrations of the air (on which the sound depends) reach the ear at the same time. It is stated that of 597 trees struck by lightning in the forest near Moscow 202 were white poplars; and farmers are advised to plant these trees as protectors against lightning. The chameleon's eyes are situated in bony sockets projecting from the head. By this curious contrivance the animal can see in any direction without the slightest motion, save of the eyes. The habit of turning round three or four times before lying down has survived in the domestic dog from his savage ancestry. It then served to break down the tall grass and make a bed.

MOTHER'S INFLUENCE.

Who can overestimate it? For good or evil it is far-reaching. Her name, the first that falls from the lips of the prattling babe, is often the last whisper of the dying sage. God bless our mothers! How important that they be shielded from those weakening diseases which too often wreck their constitutions and render them worried, frolicful invalids, prematurely aged and ambitionless. Dr. Pierce's Favorite Prescription has done much to emancipate women from this bondage and may be taken by the most delicate with absolute certainty of benefit. For nursing mothers and all debilitated, or "run-down" women, it is the most effective restorative tonic to build them up. To those about to become mothers it is a priceless boon. It lessens the pains and perils of childbirth, shortens labor, promotes the secretion of an abundance of nourishment for the child and shortens the period of confinement. -He-"My bicycle is just like money." She-"In what way?" He-"It goes so easily."

GRAPE FOR WEAKLY AND SICKLY PERSONS. -Many persons who are weak and sickly are at a loss to know what will restore their health. Spear's Port Wine and unfermented grape juice are the best restoratives known. They are recommended for their purity, exquisite flavor and health-giving properties. Medical men certify to their valuable medicinal powers and blood-making property. Mr. Spear has been for years engaged in preparing and perfecting this wine, and it requires a four years' process before it is fit for market. -N. Y. Baptist. Sold by all druggists.

Fifty-two new islands have appeared (by act of volcanic action) during the present century, and nineteen islands have disappeared—have been submerged. This makes a net gain to the earth of thirty-three islands. ARE YOU ONE. -One of those unhappy people who are suffering with weak nerves, starting at every slight disturbance, unable to endure any unusual sleep? Avoid opiate and nerve compounds. Feed the nerves upon blood made pure and nourishing by the great blood purifier and true nerve tonic, Hood's Sarsaparilla.

Victories, brave deeds, grand inventions, command universal praise. One such event may make a man famous and win our admiration in a day. The greater proof of his greatness is that he has never heard of Hood's Sarsaparilla until you read the following statement you would say: "That one cure proves Hood's Sarsaparilla one of the greatest discoveries of the age; it is a wonderful blood purifier." But "there are others," equally as wonderful. Yes, literally thousands of marvelous cures by Hood's Sarsaparilla. If you need a good medicine to purify your blood you are doing just right in deciding upon Hood's Sarsaparilla, the one true blood purifier. Read this: "I want to say, by God's blessing, Hood's Sarsaparilla has done for me what no physician or medicine could, after 20 years of suffering. After the birth of my last child, in 1874, I had a milk leg; dreadful BURNING

soon broke out on my left limb. It was thought I could not live. What I suffered no tongue can tell, and until June, 1892, my life was continual misery, so severe that the pain of combined afflictions would cause me to have fainting fits and spells like lockjaw. Five different times gangrene got into my system, and I despaired of ever getting better. The flesh on my ankle became badly eaten, and the bone was visible in places. My fingers and toes came off and my hair came out profusely. For years I did not know what a night's sleep was without opiate to deaden the pain. I lived in torment, fearing death, yet dreading life more. But I decided to try Hood's Sarsaparilla. There was no marked change while taking the first bottle, but when taking the fourth I positively knew I was being helped. Gradually the sores on both legs healed, the discharge ceased and new flesh began to form. New nails came on my fingers and toes, new hair came on my head and I continued with Hood's Sarsaparilla my limbs in CURED

time became completely cured. I have taken about 20 bottles, and I know that I owe my recovery entirely to Hood's Sarsaparilla. I have never had any pain or lost an hour's sleep on account of the trouble I have men- tioned, since Oct., 1892, when the sores were all perfectly healed, the blessing of which I ascribe to Hood's Sarsaparilla. I found Hood's Olive Ointment gave the most soothing relief to the inflamed flesh of any ointment or lotion applied. I hope every sufferer whose complaint is in any way affected by impure blood will give Hood's Sarsaparilla a fair trial." Mrs. CRYSTAL A. EDWARDS, 1127 Cleveland Ave., Suspension Bridge, N. Y. DRUGGIST W. J. HUNLEY says: "Mrs. Edwards is well known. For years she took different medicines for her troubles, but it remained for Hood's Sarsaparilla to cure her and place her where she is to-day." These and many similar cures prove that HOOD'S SARSAPARILLA Is the One True Blood Purifier. All druggists, \$1. Prepared only by C. I. HOOD & Co., Lowell, Mass.
