#### FARM NOTES.

-Young trees should be cut back severely when set out in their locations and the roots should also be carefully trimmed. It is of no advantage to allow bruised or dead roots to remain.

—Farmers cannot afford to experiment except incidentally, on a small scale. The experiment stations were instituted to make a business of experimenting, and they are doing a good work.

Send 10 cents in World's Dispersion of Experimenting, and they are doing a good work.

—As there will be quite an amount of refuse rakings at this season, especially when preparing for the garden, fire should be used to destroy such. By so doing many insects and their eggs will also be consumed.

-Manure lasts longer than fertilizers, but it is because the plants derive the use of but a portion of the manure annually, as it dissolves slowly and only as it decomposes. For immediate results fertilizers are much better than manure.

-One of the best modes of using Paris green in the dry form is with flour, as it sticks better, and is not easily washed off by a light rain. It is best to pick off the beetles that come early, if possible, applying Paris green only when it becomes nec-

—Farmers buy fertilizers for nearly all crops grown on the farm except fruit. It is important to feed the orchard as it is to do so for grain crops. When a tree produces a large crop of fruit it performs a heavy work, and it must also, every year, grow new wood and leaves.

-Now that warm weather has come it is a waste of food to give grain to poultry, as the fowls can secure all the food needed by them. Should the hens become very fat they will not lay, and are then also liable to diseases which usually result from overfeeding during warm weather.

Foot rot in sheep has deterred many farmers from keeping large flocks. It may always be traced to damp ground. Where hillsides are given over to sheep foot rot seldom appears. Lack of shelter is also a source of disease, for when a sheep takes cold it seems to recover very slowly.

-Some dairymen declare that "sunshine has a good deal to do with the full-est flow of milk; also with its quality." One man gives each cow of his herd an extra quart of meal night and morning in cloudy weather in order to satisfy his cus-tomers. This experience is a significant one and ought to be effective against dark

—When the land is plowed to a great depth the air, moisture and warmth enter and the crop is advanced more rapidly than when only the surface soil is loosened. With good drainage to carry off the moisture in excess the soil not only absorbs warmth, but retains it. With too much moisture there is constant evaporation, which causes a loss of warmth.

-Upon the fitting of the collar depends much of the work done by the horse. While a collar may not cause sores, yet it may be very uncomfortable. The collar, and also the harness, should be made to fit the horse perfectly and whenever the day's work is done the animal should be thoroughly examined in order to discover any

-We hope to see the boy who is to be a farmer go to an agricultural school and fit himself for the business, the same as the boy who is to be a doctor goes to a school of medicine. And we believe that farmers would better devote their energies to securing laws that will help make agriculture profitable than to try to make this change in public school methods.

-It does not pay to feed too much corn to sheep. Some of the sheepmen of Michigan are reported to have made this mistake the past winter. Having a large quantity on hand they fed it out freely to sheep, giving them in addition little be-The digestive systems of the sheep were deranged to such an extent that the mortality in the flocks was great.

-All who have made rose bushes a specialty know that they require clean cultivation and rich soil, yet the large majority of those who procure young rose bushes put them on the borders of grass plots, which result in their destruction. Beginners with roses should consult with experienced persons before selecting the varieties, as some kinds will only thrive under special conditions.

-Skim milk for calves is not their natural food. The whole milk, containing the fat, is nature's provision, and when the calf is deprived of the carbonaceous matter in the milk it will not thrive. Linseed meal is used by some with the skim milk, but results show that a gruel composed of linseed meal and oatmeal, added to skim milk, is an excellent substitute for the whole milk.

-This is an excellent time to make the hills for tomato plants. Dig a hole two feet square and a foot deep. Fill it full of manure and cover well with dirt. When ready to put out the plants spade up the whole hill, incorporating manure and dirt intimately. The manure will have de-composed and will be in excellent condition for plants, and a space of four feet square should be spaded with which the manure should be mixed.

-Orchardists should make themselves familiar with the more important common insects. Farmers should be on the alert for new insects in their orchards, and if they do not know them it is an easy matter to send them to the entomologists of the experiment stations for information regarding their habits and injurious proclivities. An ounce of preventive is better than a pound of uncertain cure.

-It is the early potato crop that pays, because prices do not fall very low until estimates of the yields of late crops are made. The growing of potatoes is a mat-ter on which but little new light can be thrown, as farmers have made potatoes a specialty for centuries. But progress in potato growing has been made, however, as in other crops, and it is incumbent on every farmer who must meet competition to endeavor to not only increase his yields but also at the same time keep the soil in fertile condition. There are also varieties coming to the front every year, and the enterprising farmer must endeavor to be thoroughly informed in regard to their merits. Just which of the many varieties can be claimed as the best depends upon the soil and location, being determined only by practical experiment upon each farm. The prolific kinds may be late and the earliest varieties may not yield as profusely as those that are later.

#### Streets Paved With Gold.

Prescott, the capital of Arizona, boasts that it is the nearest approach to the New Jerusalem, as described in the Bible, as its streets are being paved with gold. The granite used for pavements contains \$4 in gold and 20 cents in silver to every ton, so that in time, when less expensive methods of reducing ores are used, it may pay the city to tear up and crush its street pave-

Deafness, Ringing Noises and Cattarrh Cured by Dr. Salm

For a long time-I-noticed that I became gradually harder and harder of hearing. Ringing noises came in the ear after a while, and I became very much alarmed. So I went to Dr. Salm and put myself under his care and to-day I am grateful to state, and for the benefit of those who may suffer in a like manner, that I can hear once again as good as ever, and those infernal noises have disappeared, although I am nearly 60 years old. Dr. Salm said all of it was caused by catarrh:

M. B. Buck.

Spring Mills, Centre Co., Pa.

A Lady 69 Years Old Cured of Catarrh and Deaf-

ness.

Some years ago I contracted catarrh and it went to my ears. Gradually I became worse and my ears began to trouble me very much, my strength began to give out, and I became weaker and weaker so that I was not able to work. P took treatment from several of our doctors in the county, but somehow they couldn't do me apy good; so I went to see Dr. Salm. He promised to cure me, and I dare say, he kept his word, for today I am again stout and healthy as could be expected of any one of my age, 69 years, and I find that I got value received for my money paid to the doctor.

Mrs. Jacob B. Finley.

Brush Valley, Indiana Co., Pa.

Thought His Time Had Come but was Cured by Dr. Solm.

For some years I have been suffering very much with various ailments and broke down at last. I suffered most excrutiating pain from head to foot all the time. My stomach troubled me a good; deal, liver and kidneys as well were out of order; in fact, I thought my time had come. The doctors couldn't do me any good; patent medicines had no effect; so I went at last to Dr. Salm, and after a course of treatment, I am now again as hail and hearty and strong as ever.

Warriors Mark, Huntingdon Co., Pa.

Scrofulous Limb of 8 Years Standing Cured.

For the last 8 years I have had fearfully sore limbs; they would swell and break open and run; giving me a world of trouble, and making me unfit for my daily labor. I have had four doctors trying to cure me, but they couldn't do it. At last I went to Dr. Salm, who made a perfect and complete cure, and I feel as if I could enjoy life once more.

Edith V. Guthrik, Kittaning, Armstrong Co., Pa. Scrofulous Limb of 8 Years Standing Cured.

For 10 years my wife Susanna, had something growing on her eyes, making her almost blind. Dr. Salm performed an operation, and made a perfect success, as she can now again thread the finest needle, and read the finest print, and her eyes do not give her the least trouble. It was a fine piece of work.

Holsopple, Somerset Co., Pa.

Growth Removed from the Eye Ball by Dr. Salm.

Granulated Lids Cured by Dr. Salm. For the last four years I have been troubled very much with granulated eye lids; it partly blinded me. Doctors here did me no good, it also seemed to affect my general health. Dr. Salm has cured me. I can again see splendidly, and feel better than ever.

Indiana, Pa., Dec. 5th, 1894.

After Total Blindness Made to set by Dr. Salm. After Total Blindness Made to see by Dr. Satm.
About one year ago my brother accidentally hit
me in my left eye, with a bow-gun. I began to get
blind rapidly in that eye, and in a short time,
couldn't see anything out of it; total blindness
was caused by the hurt. I heard so much of Dr.
Salm's wonderful success in his eye operations,
that I went to him, and he has once more proven
his wonderful skill on my eye. For to-day, after
having been totally blind, I can see splendidly out
of the same again.
JOSEPH HENRY,
STUITON SOMETER, Co., Pa. of the same again. Stulton, Somerset, Co., Pa. March 28th, 1895.

Case of Stomach and Inward Trouble Cured by Dr.

Salm. For some months I have been feeling miserably, on account of stomach and private trouble. I was always afraid to eat, and the pain in my stomach and chest was terrible, but after a term of treatment, I feel now, once more, as good as ever. I can eat everything again, without trouble, thanks to Dr. Salm's wonderful treatment.
