Medical.

WRIGHT'S INDIAN VEGETABLE PILLS. For all Bilious and Nervous Disorders. They purify the Blood and give healthy action to the entire system. CURES DYSPEPSIA, HEADACHE, CONSTIPATION AND PIMPLES. HE NEVER FAILS. DR. G. F. THEEL. 604 N. 6th St., PHILADELPHIA, PA. Challenges the world, from the advertising specialist up to the lecturing Professor, in curing the worst cases of Special Diseases and BLOOD POISON. No matter how lingering, severe and dangerous the trouble may be. Nervous debility, stricture, Varicocele and Piles, cured without cutting. Dr. THEEL is positively the oldest, the best and most skillful and experienced one, no matter what others may claim. Send five cent stamps for book "Truth" and be enlightened regarding your disease and how to get cured. The only book EXPOSING QUACKS and their books and credulity. Instant relief. Hours: 9 to 12; 2 to 5; 7 to 9. Wed. and Sat. Evngs. 6 to 9. Sun. 9 to 12; Evngs. 6 to 9. Treatment by Mail. When you write or call mention this paper. Board and lodging if desired. 46-47-13

Coughs and Colds.

ELY'S PINEOLA BALSAM. is a sure Remedy for coughs, colds, sore throat and for asthma. It soothes, quickly abates the cough, and renders expectation easy. CONSUMPTIVES will invariably derive benefit from its use. Many who suppose their cases to be consumption are only suffering from chronic cold or deep seated cough, often aggravated by catarrh. For catarrh use Ely's Cream Balm. Both remedies are pleasant to use. Cream Balm, 25c, per bottle; Pineola Balsam, 25c. Sold by Druggists. ELY BROTHERS, 50 Warren St., New York. 41-8

Prospectus.

SCIENTIFIC AMERICAN AGENCY FOR PATENTS. CAVEATS, DESIGN PATENTS, TRADE MARKS, COPYRIGHTS, Etc. For information and free Handbook write to MUNN & CO., 361 BROADWAY, NEW YORK. Oldest patent law firm in America. Every patent taken out by us is brought before the public by a notice given free of charge in the SCIENTIFIC AMERICAN. Largest circulation of any scientific paper in the world. Splendidly illustrated. No intelligent man should be without it. Weekly \$3.00 a year; \$1.50 six months. Address: MUNN & CO., Publishers, 361 Broadway, New York City. 40-48-17

Democratic Watchman

Belleville, Pa., May 8, 1896.

Visiting the Old Home.

It is a great mistake for a man to neglect whatever opportunities he may have or can make to keep in touch with the home and friends of his childhood. Especially is this the case if he has not left his native health until the years of his early manhood have passed. Much has been said about the sad home coming of the man who has been absent for many years without hearing news from home. He finds everything changed, the old landmarks have disappeared, the people he knew are dead and nothing but strange scenes and strange faces confront him. No wonder his visit is a painful one and that he goes away determined never to repeat it.

But the man who makes it a point to revisit his old home within reasonable periods and meanwhile keeps himself in communication with his old friends there has no such experience. He is, in fact, benefited and refreshed by his visits and comes away feeling better for having made them. If as a wise man, he not only keeps up a correspondence with close personal friends, but takes a weekly home paper the changes which occur will come to him gradually and almost as easily as if he had not moved his habitation. Instead of being confronted all at once after a long series of years with a gruesome list of the dead whom he last knew and heard of in life, with the accompanying shock of the first knowledge of their fate, he will have noted each friend's departure as it occurred, often being prepared in advance for the event. Then the kindly remarks upon them by his letter correspondents and the quaint sympathetic notices of the local paper serve to soothe the feelings of the exile from home and reconcile him to the inevitable taking off of his friends and old time acquaintances.

Again, it has been said that there are no friendships and associations quite so dear as those made in the spring time of life, when romance abounds and contact with the cruel world has not made one hard and suspicious and chary of new associates. There is something connected with the atmosphere of the old home that mellows the feelings of the wanderer from it. When he meets in a strange city some one from the old town he is very glad to see him, indeed even though they may have had but a speaking acquaintance or been known only to each other by sight in the old time. The frequent visit to the old home revives the fresh and healthful feelings of youth and lets one come back to business in his new location imbued with kinder sentiments toward all mankind. Don't therefore, admit of any slight or weighty excuse preventing your visiting the old home at least once a year if it is in the timber, and in the meanwhile keeping in touch with the old friends and association therein.

Unexplored America.

Vast Tracts of Northwestern Territory Still Awaiting the Discoverer. Of Ontario's area, estimated at 200,000 square miles, 100,000 square miles are in an unknown region, only the edges of which have been explored. This is the territory known as the Hinterland of Ontario. It lies between Lakes Huron and Superior to the south and the Albany river and James bay to the north. In this vast area the light of civilization has not yet shined, and the Hudson bay flows to Hudson bay from the west, emptying into the St. Lawrence and the lakes. North of the Height is what is called the Hudson bay slope, consisting of about 80 square miles. This slope may be described as unknown land.

The Height of Land is not a ridge of hills, but is a level plateau some 1,200 or 1,300 feet above the sea. "The scenery," says a surveyor's report, "though diversified by hundreds of rivers and streams, thousands of lakes and innumerable crags and hills of rock, is certainly lacking in that nobility and largeness of view which only the presence of lofty mountains can bestow." Of the rivers flowing north from this slope the Albany is the most important, being about 175 miles long and navigable during the season of high water for 250 miles. Of the short slope south of the Height of Land, in which are situated the settlements of North Bay, Sturgeon Falls and Sudbury, there is definite and general knowledge, but the whole territory sloping north remains unexplored.

The Hinterland is Ontario's reserve. Much valuable timber in this region is destroyed by fires that sweep south of the watershed. Pine, spruce, tamarack, poplar and cedar are varieties of wood existing in abundance south of the Hudson bay slope. Here, too, are valuable minerals, but the treasures hidden in the region north of the Height and the resources of the high plane itself await the searching of some intrepid explorer. Meanwhile no adventurous spirit need resign itself to obscure inactivity nor ambitious traveler sigh because there are not new countries to traverse. The Hinterland will reward the eager discoverer, and when he has exhausted that territory return to Newfoundland, the Northeast Territory and regions of the great northwest remain unexplored.—Wanted Free Press.

Spaniards and Cubans.

Two Fierce Engagements Reported as Having Taken Place. HAVANA, May 3.—Intelligence has reached here of a fierce engagement between six columns of Spanish troops under General Suarez Iolan and the insurgent forces under General Maceo, near Casarjiguaras, south of Bahia honda. The rebels were well entrenched and had erected a number of log forts, from behind which they made a stubborn resistance. General Iolan brought his artillery to bear on the enemy, but notwithstanding this, repeated bayonet charges were necessary to entirely dislodge the enemy. The rebel loss is over 200. The loss on the Spanish side was two lieutenants and fourteen soldiers killed and one lieutenant colonel, two captains, one major, two other officers and sixty-one soldiers wounded.

The Spanish troops under Colonel Molina had a desperate encounter with a force of 1,500 rebels under the insurgent leader, Lacrear, near Ceja De Pablo, in the province of Santa Clara. The fighting lasted two hours at the end of which the Spaniards succeeded in capturing the rebel camp. The loss on the Spanish side consisted of one lieutenant and two soldiers killed and four soldiers wounded. The rebels are said to have suffered a severe loss and it is reported the rebel leaders, Lacrear, Nasque, Poncho and Perez were among the number wounded.

There is one billionaire family in the world, the Rothschilds, whose combined wealth is estimated at \$1,000,000,000.

Jealousy and Selfishness.

The Evils Arising from Jealousy Which Imperils Family Peace and Happiness.

People who are given to indulging in this most trying of fancies are very fond of declaring that jealousy is a necessary accompaniment of love. Indeed, certain writers have asserted that true love without jealousy is impossible.

It would be a very good idea for some of these people to look the whole subject carefully over and see what jealousy really is and what form it takes. As a rule jealousy is concentrated selfishness. It is never satisfied to allow any one else any rights, privileges, or pleasures connected with the beloved object. A complete monopoly of the individual, the thoughts, sentiments, and feelings, is the only endurable situation. There are people who are jealous even of the attention that the loved one bestows on an animal, a plant, or a book. One man wrung a canary's neck because his lady love left him to play with it. Other lovers have done equally cruel and foolish things.

Jealousy, carefully analyzed, seems to be the utmost degree of selfishness, united with an arrogant determination to monopolize the body and soul of the object of its devotion. It is cruel, capricious, utterly heartless and full of bitterness and strife. A jealous person may be not very far removed from angelic when everything goes smoothly, but develops a capacity for fiendishness that is scarcely produced by any other sentiment known to humanity. Unselfish and kindly hearted people rarely give way to jealousy. When they do it is a most disastrous outbreak, and seems to curdle the very blood in their veins.

Children should be taught from their earliest years the blighting and deadly effects of jealousy. There is nothing worse in a household, nothing more demoralizing, Misfortune, sorrow, trouble of all kinds may be borne with a tolerable amount of resignation, but when jealousy presents itself in the midst of a family peace, happiness and good-will take unto themselves wings and fly away.

A Boom a La Mode.

"You must have a good deal to worry you just now," said the presidential candidate's friend. "I suppose you are bothered a good deal by interviewers for opinions?" "Oh, no. My press agent attends to that." "But the expense of a campaign is something pretty heavy." "My financial backer attends to the expense." "But you have lots of little details to think about—like getting the brass bands to play 'Hail to the Chief' at just the time in the proceedings and having the American flag hung where you can point to it at an effective juncture." "No the stage manager and property man attend to those things." "Well—excuse me—but would you mind telling me where you come in?" "—Oh, I just do the running for office." —Washington Star.

The Facts in The Case.

The oft repeated declaration that it is far safer to travel on the railroad than to remain in your own house, is regarded by many people as a mere figure of speech, but it is a sober fact nevertheless. The record shows that only one case out of 28,000,000 who ride on the English railroads is killed annually. In France the ratio is one in 19,000,000; in Germany one in 10,000,000. The United States is low down in the list, the average being one out of every 2,000,000. In safety in railroading we fall behind the careful methods of most countries of Europe and still have much to learn.

Chestnut Culture.

Chestnut culture is receiving increased attention in view of chestnuts on seedling improved varieties of chestnuts on seedling natives should be emphasized. It is better to graft the straight seedling chestnut than a sprout from an old stump. The trees grow faster and better, and a large proportion of the grafts thrive. This may be done when the buds are swelling, while some prefer waiting until the leaves are out, says the New England Homestead.

Gave up the Ghost.

The Alabama Telephone Construction company, known as the Harrison Telephone exchange of Selma, has collapsed. The exchange was built just eighteen months ago to compete with the Southern Bell Telephone exchange. It is better wires were sold yesterday at a nominal price, said to be enough to cover the outstanding indebtedness. The original investment proved a total loss.

The school census just completed in Chicago shows a loss of population in that city as compared with that of two years ago of from fifty to seventy-five thousand persons. The decline does not jeopardize Chicago's position as the second city in the Union; but, nevertheless, it will be particularly mortifying to her self-esteem just now because of the strong contrast afforded by Greater New York. The truth is that the population of Chicago is at all times largely nomadic; and it may fairly be doubted whether a count of her permanent bonafide population would place her in advance of Philadelphia.

A father wrote to the editor for information as to how to stop his boy from smoking cigarettes, and got this reply: "We suggest bribery, persuasion, instruction or shutting off allowance. Then, if he remains obdurate use rawhide on rawhide. Welt him until he is ready to hold up his hands and promise not to smoke another. If that does not stop him, drown him, as a drowning boy is better than one who smokes cigarettes."

The enormous circulation of such a magazine as The Ladies Home Journal can, in a sense be understood when it is said that during the last six months of 1895 there were printed, sold and circulated over four million copies—in exact figures 4,038,891. Figures such as these give some idea of the influence which may be exerted by even a single one of the modern magazines.

Teacher—"Johnny, can you tell me the number of quare?" Johnny—"Plural." Teacher—"Why?" Johnny—"Because it always takes two or more to make one."—Vanity.

When Count Herbert Bismarck telegraphed to his father, Prince Bismarck, that his latest baby was a girl, the Prince telegraphed back: "Have patience! Marie was only a girl." Marie was the Prince's first born, and then came two sons.

Notes from the Pennsylvania Experiment Station.

A NEW CHURN.

There is being introduced into the State a new churn known as the Texas Air Churn. The advantages claimed for this churn are: first, simplicity in construction; second, economy of time; third, cheapness; fourth, the quantity and quality of butter produced.

In construction, the churn consists of an open tub with a flaring top which holds the cream. In this tub, a little below the surface of the cream, a hollow tin disk with two openings into the cream and one large opening at the top revolves rapidly. In revolving, the disk forces more or less air through the cream, and it is claimed by the patentees that the air forced through the cream in this manner, although the friction and agitation caused by the disk must assist more or less, will bring the butter in one or two minutes. The first trials of this churn at the station creamery were made at temperatures ranging from sixty-eight to seventy-six degrees. At these temperatures the butter would come in from one and a half to two and a half minutes. The quality of this butter was very poor, containing as high as 4.88 per cent of curd, besides having a large percentage of fat in the butter milk. As the churning temperature was gradually reduced, it was found that ripened separator or gravity cream could be churned exhaustively at a temperature of forty-seven to fifty-two degrees in from six to nine minutes.

The following table gives the results of seventeen churning with the Texas Air churn, also seventeen consecutive churning made in a combined concussion churn and worker in our dairy school last winter: although not strictly comparable, they will answer the purpose of giving some idea of the merits of the principles of the two churns.

Table with 5 columns: Combined churn and worker Monday churn, 50.40; Churning temp. degrees, 55.0; Time required, minutes, 35.0; Butter milk, per cent of fat in butter milk, 8.0; Butter yield, 0.24.

The mechanical condition of the butter made with the Texas Air churn was uniformly superior to any the writer has yet seen; the granules in each and every case were fine, flaky, and took the salt and color more evenly than the round granules so often obtained in concussion churns, especially from cream poor in butter fat. At an average churning temperature of 52 degrees, the butter was firm and washed easily, often in but one water.

A chemical analysis of the butter made under the above conditions gave the following results: Butter fat, 85.35 per cent. Moisture, 12.21 per cent. Curd, .55 per cent. Sugar and ash, 1.89 per cent. The mechanical construction of the Texas Air churn as yet does not do justice to the principle of it, but it is understood, that in this respect it will be very materially improved before it is placed upon the market. H. HAYWARD.

What we inherit we are not to blame for. We cannot be held responsible for the dispositions and tendencies which we derive from our ancestors, nor are we responsible for the germs of disease which may manifest themselves in our blood as a heritage from former generations. But we are responsible if we allow these germs to develop into serious diseases which will impair our usefulness and destroy our happiness. We are responsible if we transmit to our descendants the disease germs which it is possible for us to eradicate by the use of Hood's Sarsaparilla, the one true blood purifier. This medicine has power to make rich, red blood and establish perfect health in place of disease.

Dr. Perkins Soanover was called into the Chaffin mansion to prescribe for Mrs. Chaffin, who was quite unwell. Madame, said the doctor, will you kindly put out your tongue? "Don't do it, mother, dear, said Johnnie, or he may pound you as papa did me yesterday when I stuck my tongue out at him."

Express Agent James H. Coleman, Sing Sing, N. Y., writes: "For years I have been a sufferer from nasal catarrh and never found any remedy that gave me complete relief until I used SALVA-CEA. By placing a small quantity in each nostril night and morning, my head is kept clear as a bell. I have also suffered much from piles, and SALVA-CEA has cured them completely. I have recommended it to others and always with the same results. Surely you have a most remarkable remedy."

"Do you think, professor," said the musically ambitious youth, "that I can ever do anything with my voice?" "Well," was the cautious reply, "it may come in handy to holler with in case of a fire."

WHAT WILL DO IT?—Medical writers claim that the successful remedy for nasal catarrh must be non-irritating, easy of application, and one that will reach the remote sores and ulcerated surfaces. The history of the efforts to treat catarrh is positive proof that only one remedy has completely met these conditions, and that is Ely's Cream Balm. This safe and pleasant remedy has mastered catarrh as nothing else has ever done, and both physicians and patients freely concede this fact.

No Triflers Wanted.—She—"I don't mind walking with you, but for goodness sake don't say you love me and ask me to wait for you—they all do that. If there's any waiting to be done wait yourself until you're a man, and then come right down to business.—Life.

DAUGHTER'S WIVES AND MOTHERS.—Physicians heartily endorse the use of Speer's celebrated Port Grape Wine for the use of debilitated females. It is not an intoxicant, and is absolutely pure, being made from grapes grown at Mr. Speer's Mount Prospect Vineyards, Passaic, N. J., from vines imported from the port wine districts of Portugal. Druggists sell it.

WARNING TO YOUNG MEN.

How many young men bankrupt their constitutions, squander their vitality and ruin their health by pernicious practices generally contracted through ignorance. Nervous exhaustion, debility, dullness of mental faculties, impaired memory, low spirits, morose or irritable temper, fear of impending calamity, and a thousand and one are the derangements of mind and body which result from such indiscretions. Epilepsy, paralysis, softening of the brain and dread insanity are not infrequently the result of indiscreet and unmanly habits, contracted in youth, through ignorance of their destructive character, and persisted in until the constitution is wrecked! Such unfortunates are surely entitled to the tender sympathy, the noblest efforts and the best skill of the medical profession. To reach, reclaim and, whenever possible to restore such sufferers to health and happiness, is the aim of an association of medical gentlemen, who, having had a vast experience in the treatment of the class of maladies herein hinted at, have prepared a scientific treatise, written in plain but chaste language, on the nature, symptoms and curability of such diseases. The World's Dispensary Medical Association, of 663 Main street, Buffalo, N. Y., will send, on receipt of this notice enclosed with ten cents for postage a copy of this useful work which should be read by not only every young man in the land but also by every parent, guardian and teacher having the care of the young.

The Wilson tariff bill will yield a revenue of about \$165,000,000 this year, or \$34,000,000 more than was received from customs duties during the last year of the McKinley tariff. And yet the Republicans talk of changing the tariff again. Under the Democratic tariff the revenues of the government are sufficient to meet the ordinary expenses of the government, but under the Republican rule of reckless extravagance the people are taxed beyond their power of endurance.

Indigestion is often taken for consumption. The word consumption means wasting away, and dyspeptics often waste away as badly as consumptives.

The reason people waste away is because either they don't get enough to eat, or they don't digest what they do eat. If the latter is your trouble take Shaker Digestive Cordial. This will help you to digest your food and stop your loss of flesh. Shaker Digestive Cordial is made from herbs, barks and the juices of fruit, by the well known Shakers at Mount Lebanon. It possesses great tonic and digestive powers. Shaker Digestive Cordial has cured many supposed consumptives (who were really dyspeptics), by simply helping their stomachs to digest their food, thus giving them nourishment and new strength. Sold by druggists. Trial bottles 10 cents.

Medical.

MERIT TALKS.

Merit in Medicine means the power to cure. Hood's Sarsaparilla possesses actual and unequalled curative power and therefore it possesses merit. When you buy Hood's Sarsaparilla, and take it according to directions, to purify your blood, or cure any of the many blood diseases, you are morally certain to receive benefit. The power to cure is there. You are trying an experiment. Hood's Sarsaparilla has cured so many thousands, that you have every reason to expect it will cure you. It will make your blood pure, rich and nourishing, and thus drive out the germs of disease, strengthen the nerves and build up the whole system. Remember.

HOOD'S SARSAPARILLA. Is the One True Blood Purifier. All druggists, \$1. HOOD'S Pills easy to buy, easy to take, easy to cure. 25c.
