

FARM NOTES.

Dandelions are grown for market, being used as greens, and they are highly esteemed by some purchasers.

There is but little liability of harm to plants having a garden too rich, if the soil is well cultivated.

The hoofs of sheep that are pastured on soft ground should be occasionally examined, and, if necessary, the hoofs should be pared.

In dehorning calves different methods are employed. When the stick potash is used the age generally recommended is four days.

Oats contain the elements of the tissues of young animals most perfectly balanced, and, with milk, promote healthy growth.

If you have any fears that the potatoes intended to plant are affected with scab, soak them in a solution of corrosive sublimate (two ounces dissolved in hot water) in 15 gallons of water.

When a pasture has so deteriorated that it will not be profitable to use it for cows it will serve for sheep, if the sheep are allowed grain also.

The best of all crops, and one which will bring high prices for years, is a grove of black walnut trees.

Creamery butter demands the higher price because the methods of making are superior to those in vogue in the average dairy.

The roots of transplanted plants need careful attention. Too much moisture and too much dryness must be equally avoided.

LABOR AS PROFIT.

The real cost of crops on nearly all farms is that of labor, but labor is profitable according to the uses to which it is applied.

Water is a staple article on farms, and is sold more extensively than anything else. Milk contains about 87 per cent. of water.

SELLING WATER.

Water is a staple article on farms, and is sold more extensively than anything else. Milk contains about 87 per cent. of water.

Any crop that leaves the soil in good condition will cost less than one which apparently pays better but which largely draws upon the soil for plant food.

Cyclone Swept.

A Terrible Wind Storm Swoops Down on a Kansas Town. Many Houses Were Destroyed. Two Churches are Total Wrecks and Fully 200 People Are Homeless.

FRANKFORD, Kan., May 17.—The most destructive cyclone that ever visited this portion of the state struck this city about 5 o'clock this afternoon.

The Methodist and Christian churches were totally destroyed in this city. Many of them were the finest in the city.

When the first blast of the cyclone was felt in Justin county, more than a hundred men from Sherman, men, women and children were wholly unprepared for it.

From there the cyclone swept northeast through Gerald, Denton, thence to Mingo, to Gribble Springs and on to Mustang.

A hundred miles was traveled in an hour. Small settlements along the line of the Missouri, Kansas and Texas Road north of Denton also suffered.

The southeast end of Sherman received the full force of the storm, which, while sweeping over Denton county and a part of Grayson, seemed to have gathered new fury on this city.

Houses, once the pride of the city, are in some instances entirely gone, and in others only a pile of rubbish marks the place where they stood.

Mayor Tone, of Dennison, who was in Sherman during the storm, gives the following account of the cyclone: "I was on the court house square about 5 o'clock and heard a roaring wind coming from the south.

The people of Sherman have buried their dead and are taking care of the wounded, but fully 700 people in the city and county are left destitute.

The news was brought in by members of the committee who returned for additional aid. The loss is so much greater than was anticipated that floats have been pressed into service to supply the stricken districts with bandages, medicines and food.

BENTON, Ky., May 17.—A cyclone passed over the southwestern part of Marshall county about 1 o'clock this morning.

It demolished one house at Elva and killed the five occupants, John Anderson, aged 80; his wife, aged 55; son, aged 17, and two daughters, aged 12 and 10.

At Simonsia, two stores, two churches, a school house, several farm houses and barns were destroyed, but no loss of life is reported there.

CHICAGO, May 17th.—Dispatches received to-night from interior points in Illinois report much damage done by a heavy wind and rain storm last night.

Water is a staple article on farms, and is sold more extensively than anything else. Milk contains about 87 per cent. of water.

Cottolene.

REMEMBER THESE DIRECTIONS FOR USING COTTOLENE.

For shortening never use more than two-thirds as much Cottolene as you would of lard. When frying with Cottolene always put it in a cold pan, heating it with the pan.
