A College Twp. Republican Farmer Gives His Views on the Money Issue. Against a Single Standard, and a Reduction in Farm Values. Will Leave the Republican Party.

EDITOR WATCHMAN.

Dear Sir:—Allow me to congratulate you on the position the WATCHMAN has taken on the money question. While you have said but little upon the subject as yet, we know from the little that has been said, that the WATCHMAN has not been subsidized nor is it afraid to espouse the cause of the people as against the corporate and money powers of the country.

It is possible that you are not aware of the feeling that exists among the farmers and working people, upon this subject. Party conventions and platform makers may proclaim themselves for a continuance of the single gold standard, but the people want a change. They have tried this single standard since 1873, and they have experienced harder times, received lower prices for their products and labor and been less prosperous than during any period since the formation of this government.

We have seen our farms depreciate in value over fifty per cent. We have had a shrinkage in the prices of everything produced, to an extent that leaves no profit for the tiller of the soil. To-day, under the single standard, or gold basis, I can point you to farms in this county, that prior to 1873 could not have been purchased for \$100 an acre, that are begging now for purchasers at \$35. It is so with everything we raise—with every species of property.

It is not that property is less valuable but the measures of value have been changed so that the man who has a horse, a cow, an acre of land, a house, lot or any property that he wishes to exchange for money, he must give twice and in some instances three times the amount to get as much money as he would have gotten under the system that was in force up to 1873.

Under the present system no one but the money lender has been benefited. His wealth has been doubled in value. He can get to-day two acres of land, two horses, two cows, two bushels of wheat, or if he has two days labor to perform, for the same amount of money that he paid for one, under the old system.

Can any gold standard man, show where there is any justice in a system of finance that brings about this state of affairs?

I am no politician, I have voted the Republican ticket generally but the action of the St. Louis convention, in pledging that party to the continuation of a financial policy that is every day decreasing the value of my property and enhancing the value of that of the money lender, determines my course for the future. I shall not vote that ticket. There are scores of others like me.
