

Democratic Watchman

Bellefonte, Pa., Aug., 21 1896.

FARM NOTES.

—Fat, blocky cows are fine looking animals, but the lank and wedge like ones are the best milk machines.

—The farmer who understands his business does not waste time trying to raise crops to which his soil and climate are not adapted.

—The largest sheep ranch in America is said to be situated in Dimmit and Webb counties in Texas. It contains close to 400,000 acres.

—The gain from fall plowing, says the Indian farmer, is that the naked surface is easily made into a mellow seed bed by cultivation, if the winter has proved just right.

—Turnips can be cultivated with but little expense if hand wheel hoes are used close to the plants and using the cultivator between the middle of the rows to keep the soil loose.

—Never let the sun shine in milk. Never put it away without aerating it. Neither let it stand open in the air after it has been aerated. Nothing is so susceptible to evil germs in the air as milk.

—Beets are valuable until the next year and undergo a ripening process after they are fully matured. However, when they are grown mangels for stock find the sugar beet better, though the yield of mangels is larger.

—A heifer that is to be raised for the dairy should be handled and made accustomed to all necessary manipulations from the time she is a calf until maturity. If this is done she will in all cases prove to be the better cow.

—Both rye and crimson clover should be seeded down now, so as to make a fair growth before winter. It is not advisable to wait until the middle of September, as the winter may set in early and the plants not be of sufficient size to endure severe cold.

—Sheep can be made to pay more by producing lambs than in any other manner. It costs more to raise a lamb to be a wether and the wether brings less than the lamb in market, the wool being but a small portion of the profit, compared with that which can be derived from early lambs.

—If the pigs have been in any way skinned in their rations during the summer you cannot put the corn crib into them in the fall with much profit. Better sell them for feeders—if you can find anyone to buy. A pig which has not been always pushed will not profit much in the end.

—In Saxony no one is permitted to shoe horses unless he has passed a public examination, and is properly qualified. A great school at Dresden has students from all parts of the world studying "farriery." This includes not only shoeing horses, but their care and treatment—a provision that saves a great deal of money for farmers and others owning horses.

—Cut the corn while the fodder is green. If the corn is left standing until the leaves begin to turn yellow it will be less nutritious than if cut earlier. When the ears are glazed and well filled out is the time to cut. A day or two in delay will make a great difference in the quality of the fodder, hence the field should be observed daily.

—Cottonseed meal may be fed with profit to cows or it may be brought and applied directly to the soil as a fertilizer with profit. It is always better, however, to pass it through the bodies of the animals, thus deriving a feeding benefit therefrom, and enriching the manure. Bran is also cheap, considering its food value, and may be used as a fertilizer at present prices.

—Eggs can be produced where milk and butter must be omitted. The city lots are utilized by owners of small flocks and fowls can have the run of lawns and orchards. One advantage in producing eggs is that the prices obtained are much greater than for other articles and the hens can be made to do service during nearly every month in the year. Five acres devoted entirely to poultry is considered sufficient to provide an income of \$700 above all expenses.

—The ground for wheat should be plowed now and left until the weeds begin to shoot out when the cultivator should work it fine again. Keep the ground worked and the weeds will be destroyed, as well as giving the seed wheat a fine seed bed. It will also be an advantage to spread the manure after plowing, so as to give the seeds of weeds in the manure a chance to sprout. The frequent working of the soil incorporates the manure, and enables the young wheat to make more rapid growth.

—Dark stables are perhaps cool, but it is better to have plenty of light and protect the windows with wire netting, using a muslin curtain if necessary. During the warm periods when the temperature is very high animals become sunstruck, or die from over heat, the same as do human beings. Fresh water and shade are essential, especially if the animals have been fed largely on grain and are in a fat condition. Apoplexy is a well known cause of loss of poultry, and hogs have perished from lock of shade and from exposure to the direct heat of the sun.

—From whence come the weeds in early spring? This may be a problem to some but it must be kept in view that there are a great many varieties of weeds and they do not all produce seed at the same time. A field of wheat may appear green, the seed heads being backward the cutting down of the intruders destroying them completely and preventing seeding, but there will be among them some that have produced their seeds and accomplished their mission. The farmer comes in with his plow and turns the seeds under, placing them far beyond the reach of frost and preserves them from harm until he plows them to the surface again in the spring, when they are ready to compete with him for the possession of the field. The weeds, therefore, come from the seeds that the farmer preserves in the fall when he plows his field, and the remedy is to never allow of the growth of a single weed more than to get its head above the surface of the ground. If this rule is strictly followed weeds will soon become extinct, because they cannot be produced except from seed, and if no seed is sown and preserved the farmer's work will be light and every year the destruction of weeds will demand but little care. Keep the cultivator, harrow, mower and plow busy now, destroy every weed and burn all accumulations, in order to cheapen the labor on the farm hereafter. Before seeding down the wheat this fall work the land several times and thus be sure of a clean field.

Look at This.

The Countries That Have the Most Money Are the Most Prosperous—Blaine's Memorable Words.

Look at this and see which nations of the world are the most prosperous—those that have the most or those that have the least money. These figures are computed from the report of the director of the mint:

	Gold	Silver
United States.....	\$ 9,81	\$9,25
Great Britain.....	14,17	2,94
France.....	29,89	13,05
Germany.....	12,51	4,35
Belgium.....	8,83	9,96
Italy.....	3,16	54
Spain.....	2,28	8,86
Austria Hungary.....	8,51	2,13
Russia.....	3,49	33
Turkey.....	1,27	1,12
Australia.....	24,42	1,63
Mexico.....	44	4,38
South America.....	1,31	87
Japan.....	2,01	3,31
India.....	1,80	1,80
China.....	2,92	1,94
Canada.....	2,92	1,94

Let every citizen judge for himself, therefore whether it is good policy to keep on reducing the amount of money in this country by making our money consist of gold alone, or whether we shall make use of our great natural advantages as a silver producing country, thereby increasing the amount of our laboring people with employment and giving the farmer better prices for his products.

You will see by the above table if we go to a gold basis alone our money will be reduced \$9.81 per head, and we must then take rank in the matter of prosperity with such nations as Italy and Spain.

Li Hung Chang's Visit.

The coming visit of Li Hung Chang to the United States is attracting attention, and arrangements are being talked about at Washington for his reception. As the visit is official, the distinguished Chinese statesman bearing a letter from the Emperor to the President, the latter will have to return to the capital to receive him. It is believed this mission is for the purpose of taking steps to bring China and the United States into closer commercial relations. This might be done greatly to the advantage of this country and we hope an effort in this direction will not be wanting.

—"I would not say one word that would lessen the esteem which anyone of you may have for the achievements of the party to which you have belonged, but I say that parties cannot live upon the past. Parties must face the present. Parties must be prepared to meet and solve every issue as it arises, and the party that does not care enough to meet an issue is not great enough to govern the United States. Parties do not make issues. Issues make and unmake parties."—Bryan in Pittsburg

—The best is what you want when you are in need of a medicine. That is why you should insist upon Hood's Sarsaparilla.

Business Notice.

Children Cry for Pitcher's Castoria.

When baby was sick, we gave her Castoria, When she was a Child, she cried for Castoria, When she became a Miss, she clung to Castoria, When she had Children, she gave them Castoria.

Castoria.

C A S T O R I A
C A S T O R I A
C A S T O R I A
C C C A S T O R I A

FOR INFANTS AND CHILDREN.

Castoria promotes Digestion, and overcomes Flatulency, Constipation, Sour Stomach, Diarrhea and Feverishness. Thus the child is rendered healthy and its sleep natural. Castoria contains no Morphine or other narcotic property.

"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me."
H. A. ARCHER, M. D.,
111 South Oxford St., Brooklyn, N. Y.

From personal knowledge and observation I can say that Castoria is an excellent medicine for children, acting as a laxative and relieving the rent up bowels and general system very much. Many mothers have told me of its excellent effect upon their children."
Dr. G. C. OSBORN,
Lowell, Mass.

"For several years I have recommended 'Castoria,' and shall always continue to do so as it has invariably produced beneficial results."
EWIN F. PARSONS, M. D.,
125th Street and 7th Ave., New York City.

"The use of 'Castoria' is so universal and its merits so well known that it seems a work of supererogation to endorse it. Few are the intelligent families who do not keep Castoria within easy reach."
CARLOS MARTIN, D. D.,
41-15-2ys
New York City.

Cottolene.

F R Y I T

I N C O T T O L E N E

Fry your food in Cottolene instead of lard and it will be free from that greasiness and "richness" so dyspeptic; the flavor will be delicious instead of rancid, and your food will do your good. Put in a cold pan, heating it with the pan. Cottolene reaches the cooking point much quicker than lard—care should therefore be taken not to overheat it. Follow these instructions—you will never use lard again.

Genuine Cottolene has trade-marks "Cottolene" and steer's head in cotton plant wreath—on every tin.

UNSOLICITED TESTIMONIALS

Had of Hearing for 35 Years, Caused by Catarrh, and cured by Dr. Salm. Rev. J. D. Leister, Swales, Pa.

Replying to your inquiry, as to testimonial with my signature, published by Dr. Salm, I will say, that I was under his treatment for 10 months for my hearing. It was catarrh of the middle ear, and like yourself, could hear better some days than others, could hear better in noise. My hearing was very much improved by the treatment, and have no doubt, but that he can help you. Dr. Salm appears to be an honest man, and he will tell you the truth, whether he can help you or not. If I were you, I would certainly consult him. I was longer afflicted than you. My hearing was bad in one ear for about 35 years, and in the other for about 24 or 25 years. Hoping that your hearing will be entirely restored, I remain, Bedford, Pa., Bedford Co. Isaac Pierson.

Case of Catarrh Cured by Dr. Salm. Rev. J. D. Leister, Swales, Pa.

Yours came to hand to-day. Dr. Salm treated my 13 year old boy for catarrh in the head, and cured him in 6 months. I don't know whether he can cure you or not, but on examination he will tell you the truth. I know a man here, that he examined, and he told him that he could not be cured. I know other people, that he done a great deal of good in other cases. Madisonburg, Centre Co., Pa. Ben Limbert.

Granulated Lids Cured by Dr. Salm.

For the last four years I have been troubled very much with granulated eye lids; it partly blinded me. Doctors here did me no good, it also seemed to affect my general health. Dr. Salm has cured me. I can again see splendidly, and feel better than ever. Bessie Thomas Indiana, Pa., Dec. 6th, 1894.

Thought I Would Lose my Mind, but Dr. Salm Cured Me.

For years I have been suffering with catarrh and ear trouble, and was miserable indeed. I thought sometimes I would lose my mind on account of the fearful noises in my head, and then my hearing was leaving me rapidly, and there was 'ent an organ about me that was out of shape. But to-day, thanks to Dr. Salm, all those fearful noises have left me. Can hear well, no more catarrh, and feel as well as any one of my age could expect. June 12th, '96. Mrs. Emma Brant, Shanksville, Somerset Co., Pa.

Four of the Best Doctors in the County Said She was Incurable, but Dr. Salm Made a Healthy Woman of Her.

For over five years I have been suffering with heart trouble and a bad case of dropsy. We went to four of the best doctors in the county for relief but all of them said a cure was impossible. At times I felt so bad that I was certain I had to die. I fainted away very often, and my friends told me afterwards that every moment would be my last. And I hereby affirm that had it not been for the splendid treatment received from Dr. Salm, who has entirely cured me of that great trouble, I would have been under the sod long ago. Attested by her husband, Henry R. Ross, Leechburg, Armstrong Co., Pa.

Dr. Salm Worked Another Miracle.

For more than 8 years I have been suffering untold agonies, with stomach and general trouble. I became thin and pale, too weak to work, and hardly able to drag myself around. I looked so badly, that my neighbors, friends and relatives thought I had consumption, and wouldn't last much longer. During those 8 years about 10 or 12 of our best doctors treated me, but I became worse and worse, until I went to Dr. Salm, and I can not eat more in a day, than I have heretofore in a week, can attend to my daily labors, look finely, have no more pains, and I actually think I am well. People around here think Dr. Salm worked another miracle, and I am thankful to him, for he has saved me from an early grave. June 12th, '96. Mrs. Hannah Mosholder, Lisky, Somerset Co., Pa.
