

State College.

THE PENN. STATE COLLEGE. Located in one of the most beautiful and healthful spots in the Allegheny Region; Undenominational; Open to Both Sexes; Tuition Free; Board and other Expenses Very Low. New Buildings and Equipments.

LEADING DEPARTMENTS OF STUDY. 1. AGRICULTURE (Two Courses), and AGRICULTURAL CHEMISTRY, with constant illustration on the Farm and in the Laboratory. 2. BOTANY and HORTICULTURE; theoretical and practical. Students taught original study with the microscope. 3. CHEMISTRY with an unusually full and thorough course in the Laboratory. 4. CIVIL ENGINEERING, ELECTRICAL ENGINEERING, MECHANICAL ENGINEERING. These courses are accompanied with very extensive practical exercises in the Field, the Shop and the Laboratory. 5. HISTORY; Ancient and Modern, with original investigation. 6. INDUSTRIAL ART and DESIGN. 7. LANGUAGE AND LITERATURE; Latin (optional), French, German and English (required), one or more continued through the entire course. 8. MATHEMATICS and ASTRONOMY; pure and applied. 9. MECHANICAL ARTS; combining shop work with study, three years course; new building and equipment. 10. MENTAL, MORAL and POLITICAL SCIENCE; Constitutional Law and History, Political Economy, etc. 11. MILITARY SCIENCE; instruction theoretical and practical, including each arm of the service. 12. PREPARATORY DEPARTMENT; Two years carefully graded and thorough. Commencement Week, June 14-17, 1896. Fall Term opens Sept. 9, 1896. Examination for admission, June 14th and Sept. 8th. For Catalogue of other information, address: GEO. W. ATHERTON, LL. D., President, State College, Centre county, Pa.

Democratic Watchman.

Bellefonte, Pa., Aug. 28, 1896.

Gail Hamilton.

Miss Mary Abigail Dodge, better known to the American public as "Gail Hamilton" died at her home in Hamilton, Mass., on Tuesday, the 15th, after a long illness. She was one of the most distinguished and forcible writers on the continent and through her connection with James G. Blaine was recognized as one of the shrewdest political advisers in the country. She was a cousin of Mrs. Blaine and for years had made her home with the Blaine family. Since Mr. Blaine's death she has been working hard on his life, which has occupied her entire time, except what she gave toward securing the release of Mrs. Maybricks, the American woman imprisoned for life in London for poisoning her husband.

Miss Dodge was not a fine or good looking woman but a wonderfully intelligent one. Her life was one of constant work and worry she began school teaching very young and from '62 to '65 wrote the "Gleanings in Europe," "Country Living and Country Thinking," appeared, and then in rapid succession came "Gala Days," "A New Atmosphere," "Stumbling Blocks," "Skimishes and Sketches," "Red Letter Days in Applethorpe," "Summer Rest," "Wool Gathering," "Women's Wrongs, a Counter Irritant," "Battle of the Books," "Woman's Worth and Worthlessness," "Little Folk Life," "Child World," "Twelve Miles from a Lemon," "Nursery Nothings," "Sermons to the Clergy," "First Love's Best," "What Think Ye of Christ?" "Our Common School System," "Divine Guidance a Memorial of Allen W. Dodge," and "The Insuperable Book."

One of Miss Dodge's most successful books was entitled "Wool Gathering." It was printed twenty-eight years ago. Having been induced to invest some money in a sheep farm, and having lost all her investment through bad management or misrepresentation, or both, she made an investigation of the wool business and wrote a book about it. That book had an enormous circulation and attracted attention all over the country. It was the first evidence of remarkable power, and from that time forward everything from her pen was eagerly read. Miss Dodge's strong characteristics left their impress upon the career of James G. Blaine. It is one of the traditions of Washington that Mr. Blaine always leaned heavily upon her judgments. When in doubt as to political, literary or diplomatic it was with her that he wished to consult before any else. Miss Dodge's skill as a politician and her judgment of men were said to be remarkably keen, and with his wife and Miss Dodge as his advisers, it is believed that a cabinet which a president might envy.

Sir John Millais.

The English painter who died recently of cancer, the result of smoking, was in his 64th year, and was the most distinguished British artist of his day. At the time of his death he was president of the Royal Academy of Arts, having been chosen to that position after the death of Lord Leighton. He had a long career as an artist and an honorable one. One romantic episode in his career is related as follows: John Ruskin, the celebrated art critic, desiring to have a portrait of his young and beautiful wife, employed the young and beautiful artist Millais to paint it. The young people fell desperately in love with each other, whereupon Ruskin, instead of falling into a rage and shooting somebody, did all in his power to aid his wife in procuring a divorce, in order that she might marry Millais. It may be, if the whole truth were known, that Ruskin was not half so generous as some people have imagined. He knew the woman better than Millais did.

Among Millais's most noted works are "The Huguenot Lovers," "Our Saviour," "Ophelia," "The Order of Release," "Peace Concluded," "The Heretic," "The Black Brunswicker," "Charley Is My Darling," "Joan of Arc," "Waking," "Sleeping," "The Gambler's Wife," "A Dream at Dawn," "Yes or No?" "The Jersey Lily," "Chill October," "The Sound of Many Waters," "Forget Me Not," and portraits of Gladstone, Lord Rosebery, "For the Squire" and the famous "Scap Bubbles."

The Apple Season.

In August summer apples will have ripened and everybody ought to know that the best thing he can do is to eat apples just before retiring for the night. Persons uninitiated in the mysteries of the fruit are liable to throw up their hands in horror at the visions of dyspepsia which such a suggestion may summon up, but no harm can come even to a delicate system by the eating of ripe and juicy apples just before going to bed. The apple is an excellent brain food because it has more phosphoric acid in easily digested shapes than other fruits. It excites the action of the liver, promotes sound and healthy sleep and thoroughly disinfects the month. This is not all. The apple helps the kidney secretions and prevents calculi from growing, while it obviates indigestion and is one of the best known preventives of diseases of the throat. One of the best known of the older physicians of Providence has a custom of eating one, two, three and four apples before going to bed, and finds himself much benefited thereby.—Bulletin of Pharmacy.

Don't Care for England.

The Democratic party at Chicago wisely eschewed all Republicanism. It is again the party of Jefferson and Jackson, with no higher ambition than to serve the American people and do their will. The Republican party would have us wait and ask England what she thinks of the free coinage of silver. The Democratic party doesn't care a continental what England thinks about this or any other American question. Had George Washington consulted England this free republic would never have been. We would be the slaves of England today, as the Republican party would have us be her money slaves. It is un-American, unpatriotic, cowardly and contemptible for us to consult any European power about the domestic policy of our government.—Cincinnati Inquirer.

Financial Discussion.

"What do you wear such ill-fitting clothes for?" asked the bright young man in the natty summer suit, of the elderly person in hand-me-downs. "To carry my money in," was the reply of the elderly person, and the young man began to talk in another direction.

In Memoriam.

At Lemont, Pa., Thursday, Aug. 13th, Carrie Etta Mary Mulberger quietly and peacefully passed away at the home of her parents Mr. and Mrs. William Mulberger. Her death was due to a complication of diseases which she patiently endured for about eighteen months. She was nineteen years and twenty-two days old. She was a bright young girl loved and respected by all who knew her, she was a true Christian and a member of the Lutheran Church at Shilloh and the Christian Endeavor society of Lemont.

Carrie leaves to mourn her death, a father and mother, one sister Mrs. John Klinger, of Centre Furnace and two brothers Elmer, of Bellefonte, and Charlie at home.

Interment was made at Shilloh on Sabbath morning, amid beautiful flowers presented by the Endeavor society of Lemont. The pall bearers were Verdie Bathgate, Ethel Dale, Bessie Thompson, Maude Williams, Mollie Glenn, Mary Brislin, Maggie Miller and Myrtle Williams assisted by the following gentlemen Franklin Bathgate, Charles Thompson, D. M. Tate, Robt. Wasson, Linn Botter, S. B. Wasson. Services conducted by Rev. Leshner.

Nansen's Accomplishments.

The brave Norwegian, Dr. Nansen, although he failed to reach the North pole, the goal which he set for his recent expedition, accomplished something during the long time in which he has been fighting his way to the extreme hyperborean regions. No Arctic explorer for many years has done as much as he has. He failed to demonstrate the correctness of his theory of being carried by the currents across the North pole and he was unable to reach that point, but he was able to get nearer to it, with his own companion, with whom he has returned, than any other person.

Dr. Nansen attempted with his ship, the Fram, to follow out his program of drifting across the pole, but he found that the currents would not carry him to his objective point. He, therefore, left his vessel about seven degrees from the pole, and with a companion and a team of dogs, struck northwards over the ice. When he left the Fram the crew was in good health and spirits, and the ship, locked in floating ice, was drifting towards land. Over the icy fields floating on the Arctic ocean Nansen journeyed towards the pole, and made considerable progress, considering the conditions under which he traveled. But obstacles, which he could not surmount, stopped his journey northwards. The ice on which he traveled was floating away from the pole faster than he advanced towards it. His train of dogs was exhausted and there was nothing else for him to do but give up his attempt. But he lowered all previous records, and not to a slight extent either. He and his companion went farther north by almost 200 miles than Lieutenant Lockwood, of the ill-fated Greely expedition, who held the record previously. Nansen went within 250 miles of the pole. Had he a fresh train of dogs, he would probably have been able to reach the pole and return in safety.

A railroad 700 miles in length is to be constructed from the coast of Africa into the interior, extending as far as Lake Victoria Nyanza, if the bill recently introduced into the House of Commons passes. "The tremendous importance of this step to what has been known for decades past as the Dark Continent," adds the "Troy Press," "cannot be over-estimated. Half a century ago nothing was known to Africa's interior. Not a white man had penetrated its vast wildernesses, and even the coast outlines were more or less vague. A score of years ago maps in geographies outlined the continent and showed large tracts of land the possession of which was claimed by several European countries. To-day the maps of Africa are almost as definite as those of this country half a century ago."

"When you make up your mind that the gold standard is a bad thing, then the only question you have to consider is how you can get rid of it. They can raise objections to the plan which we propose, saying that if coinage makes a silver dollar equal to a gold dollar, then it will be just as hard to get a silver dollar as it is to get a gold dollar. Do you know what they overlook? They overlook the fact that we bring silver into competition with gold to increase the supply of the standard money; that while the silver dollar will be worth as much as the gold dollar, it will be easier to obtain with the products of toil a silver dollar or a gold dollar than it is today."—William J. Bryan's Saturday speech.

The entire population of Cuba is only 1,700,000. Spain will try to send 20,000 more soldiers to the island this fall, which will make altogether 200,000 sent since the war began. The wretched folk, the poor, imbecile old government of Spain is making in Cuba is plainly to be discerned from this fact alone. Half that many soldiers ought to have quelled the insurrection long ago if they had been real soldiers with real generals. But it happens that the real soldiers and real generals are all on the side of free Cuba.

Unpleasant Proof—Young Softleigh (who is going to take his best girl out for a ride, with the intention of proposing on the road, and will want the free use of both arms)—"I suppose the horse is gentle—one of those horses you can drive with—er—your—er—feet, if necessary?" Stablekeeper—"You can do anything with him. Just ask your lady—she has been out behind him with half the young men in the town."

Pryer—Do you belong to the Grand Army? Fakir—Oh, yes. Pryer—But you were not in the war? Fakir—No, I had a substitute represent me in the war, and now I'm representing him in the Grand Army.

Lady—I wish to get a birthday present for my husband, Shopman—How long married? Lady—Ten years Shopman—All the bargains are on the right, madam.

Midsummer Rage. "This hot weather makes me blood-thirsty, I want to commit some blood deed." "What do you contemplate?" "Well, I believe I'll go out and smash a couple of mosquitoes."—Chicago Record.

Looked Like It. First Dentist—Are you going to make any money this year. Second Dentist—I guess so. I seem to be pulling out right.

Nansen's Ship has Returned.

The Fram Returns to Svalbard, Polar Sea.—Went Above Hansa's Record—The Sturdy Little Vessel Drifted to 86.15 North, One Minute Above Nansen.—Called on Professor Andree.—The Aeronaut was Still Waiting on August 14th for a Favorable Wind. Important Result of the Fram's Trip Without Nansen.

Christiania, Aug. 20.—Dr. Nansen's Arctic exploring ship Fram, which he left in bedded in the ice early in January, 1895, in latitude 83 degrees north, in order to explore the sea north of the route he proposed to follow, arrived at Skjerve, Province of Troms, last evening. The boat reached 86.15 north, one minute above the highest record made by Nansen.

Captain Sverdrup reported all well on board. Shortly after his arrival he sent this telegram to Dr. Nansen:—"Fram arrived safely. All well on board. Leaves at once for Tromsø, Welcome home."

Dr. Nansen replied to this message:—"A thousand times welcome to you and all. Hurrah for the Fram." After Dr. Nansen left the Fram she drifted to a point 86.15 degrees north. The greatest sea depth obtained by sounding was 2185 fathoms. The lowest temperature noted was 52 degrees below zero.

Called on Andree. The Fram called at Dane's Island August 11th, and saw Professor Andree, who was still waiting for a favorable wind in order to enable him to attempt his balloon trip across the Arctic regions.

The Fram left Skjerve this morning on her way to Tromsø, where Dr. Nansen will meet her. Additional reports concerning the expedition say that F. H. Johansen, the stoker, had a narrow escape from a terrible death. He was attacked by a polar bear, but was rescued by Dr. Nansen, who shot the animal.

Dr. Nansen gained 22 pounds in weight on his journey to Vardo after leaving the Fram.

Nearly Reached the Pole. A despatch to the "Aftenposten" from Skjerve says that the Fram reached open water August 13th. A member of the expedition expresses the opinion that the Fram would have penetrated much further into the Arctic regions and that perhaps the North Pole would have been reached if the Fram had been frozen in east of the New Siberian Islands.

In the highest latitude reached 86.15 north, the members of the exploring parties saw guillemots, fulmars and narwhals, but no other signs of organic life were apparent.

Fram's Remarkable Record. The return of the Fram unharmed from the Arctic regions is the most remarkable feature of Nansen's remarkable journey to the North Pole. No other vessel has ever visited the far polar seas and returned.

It is also a strange incident that Dr. Nansen and the Fram's crew, who parted in the seas of Spitzbergen, 33 degrees 59 minutes north and 192 degrees 27 minutes east, over nineteen months ago should have reached civilization within a week of each other.

The report that the Fram drifted north to 86 degrees and 15 minutes is highly interesting. This is just one minute, or over a mile above, the furthest northern record of Dr. Nansen himself. The fact that she drifted so far toward the pole may disclose more valuable results respecting the polar currents than even Dr. Nansen is able to do. It would be a curious feature of the whole trip if the vessel, which the expedition's leader left, should have demonstrated by its own course in the clasp of icy fields the best way to reach the pole.

When Dr. Nansen left the Fram she was drifting with the ice toward Spitzbergen. On the ship were Otto Sverdrup, master; Henrik Blessing, surgeon and botanist; Theodore C. Jacobsen, mate; Peder Hendriksen, harpooner; Anton Amundsen, chief engineer; Lar Petersen, second engineer; Hjalmar Johannsen, officer in the Norwegian army; fireman; Bernard Nordahl, electrician; Ivan Mogstad, carpenter, and Adolph Juell, steward.

Storms in the West.

A Cyclone Causes Considerable Damage at Effingham, Ill.—Losses up in the Thousands—Property Destroyed and There was Some Loss of Life in Different Parts of Indiana and Ohio During the Night—Seven Deaths from Lightning.

EFFINGHAM, Ill., August 23.—The intense heat yesterday ended with a cyclone at 5:30 o'clock Sunday. The storm came up with unprecedented rapidity, as at 5 o'clock there being no appearance of a storm. The path of the cyclone was in the southern part of the city and was only a few hundred feet in width, but where it dipped down it scattered desolation and ruin.

The new Methodist church, the power house of the electric light plant, Austin college, a furniture factory and a cannery factory were in the way. The tower of the church was demolished, the damage to the building being large. The roofs and tops of the electric light house, the college and the two factories were carried away.

Streets were blockaded with shade trees and electric light and telephone poles that were torn up and scattered. The damage will cost up \$15,000 to \$20,000.

Drank Whisky on a Wager.

One of the Four Young Men Died from the Effects. HOLLIDAYSBURG, Pa., Aug. 23.—Four young men of Duncanville, this county, drank whisky on a wager in an abandoned stone quarry two miles west of this place last night. Samuel Hogley, a 19-year-old boy, was their number. He died from the effects, and was found by friends lying on the roadside this morning. Coroner McCarthey, of Altoona, came here this morning and empaneled a jury. The verdict was that the boy had died of alcoholism.

A Lie Run to Earth.

Mr. B. Asso—See here, Mr. Rapley, I understand 'dat up at de church choir you called me er "black bass." Mr. Rapley—No, I didn't nuffin. I said you was a cullud bass, an' a fine one at 'dat.

Mr. B. Asso—Well, hit's strange how de troot gifts disscull in dis community.

What is a "Scorcher?" The scorcher is a straight-haired, thin jawed, wild-eyed idiot, with his back humped like a mad tomato's tail, who tears down the street with no regard for the safety of others. He is nearly always long in the legs and thin. They are a nuisance and a source of danger to themselves and everybody else.

At the funeral of Elizabeth Cummings in Berks county the pall bearers were women.

The late Professor Nicholls Crouch was the hero of one song. His death recalls many of that peculiar coterie of fame, the world celebrated composers of one poem or one song. All that the world cares to know of Wolfe is that he wrote "The Burial of Sir John Moore." Gray bids fair yet to be remembered for his "Elegy" alone. America has produced several of the type, such as the authors of "You'd scarce expect one of my age" and " 'Twas the Night before Christmas." "Casabianca," with its famous opening stanzas, is almost of the same order. Pennsylvania can show George Morris with his "Woolman, Spare that Tree." Woodworth's "Old Oaken Bucket," Hopkins's "Hail Columbia," Key's "Star Spangled Banner," Dr. Smith's "America," and Dr. Dunn English's "Ben Bolt" are notable examples. The composer of "Kathleen Mavourneen" struck, like these, one popular chord on the harp of fame.

The death of "Mark Twain's" courageous sister, Miss Olivia Susan Clemens, is the climax of the sorrows of that lovable author. It adds the deepest pity to the former sympathy of the vast English reading public of the world in the trials of his old age. "Mark Twain's" career has been a notably courageous and persevering one. He early won world-wide fame as a humorist, but he was not content to rest on those laurels even in his most fortunate days. His novel of "The Prince and the Pauper" has deserved more serious attention than it has received, and his latest romance of "Joan of Arc" has been a noble inspiration and leads to a splendid eulogy of this saint of liberty. Furthermore, throughout his career Mr. Clemens has been an earnest American of Americans.

DID YOU EVER THINK—That you cannot be well unless you have pure, rich blood? If you are weak, tired, languid and all run down, it is because your blood is impoverished and lacks vitality. These troubles may be overcome by Hood's Sarsaparilla because Hood's Sarsaparilla makes pure, rich blood. It is, in truth, the great blood purifier.

Hood's Pills cure liver ills, constipation, biliousness, jaundice, sick headache, indigestion.

Onions are almost the best nerve known," remarks the Medical Times. "No medicine is so useful in cases of nervous prostration, and there is nothing else that will so quickly relieve and tone up a worn out system. Onions are useful in all cases of coughs, colds and influenza, in consumption, kidney and liver complaints. Eat one every other day they should have a clearing and whitening effect upon the complexion."

For the relief and cure of a cold in the head there is more potency in Ely's Cream Balm than in anything else it is possible to prescribe. This preparation has for years past been making a brilliant success as a remedy for cold in the head, catarrh and hay fever. Used in the initial stages of these complaints Cream Balm prevents any serious development of the symptoms, while almost numberless cases are on record of radical cures of chronic catarrh and hay fever after all other treatments have proved of no avail.

A chewing gum manufacturer has been sued for big damages for toying with the affections of a young woman, and if he is mulcted many will think a righteous fate has overtaken him for twisting so many pretty mouths out of shape with the stuff he sells.

Medical.

STRONG Nerves just as surely come from the use of Hood's Sarsaparilla as does the cure of scrofula, salt rheum, or other so-called blood diseases. This is simply because the blood affects the condition of all the

NERVES bones, muscles and tissues. If it is impaired it cannot properly sustain these parts. If made pure, rich, red and vitalized by Hood's sarsaparilla, it carries health instead of disease, and repairs the worn, nervous system as nothing else can do. This nervous prostration, hysteria, neuralgia, heart palpitation, are cured by

HOOD'S SARSAPARILLA Because it is the One True Blood Purifier.

HOOD'S PILLS are the best after-dinner pills, aid digestion. 25c. 41-32
