

State College.

THE PENN'A. STATE COLLEGE.

Located in one of the most beautiful and healthful spots in the Allegheny Region; Undenominational; Open to Both Sexes; Tuition Free; Board and other Expenses Very Low. New Buildings and Equipments.

LEADING DEPARTMENTS OF STUDY.

1. AGRICULTURE (Two Courses), and AGRICULTURAL CHEMISTRY, with constant illustration on the Farm and in the Laboratory.
2. BOTANY and HORTICULTURE; theoretical and practical. Students taught original study with the microscope.
3. CHEMISTRY with an unusually full and thorough course in the Laboratory.
4. CIVIL ENGINEERING; ELECTRICAL ENGINEERING; MECHANICAL ENGINEERING. These courses are accompanied with very extensive practical exercises in the Field, the Shop and the Laboratory.
5. HISTORY; Ancient and Modern, with original investigation.
6. INDUSTRIAL ART AND DESIGN.
7. LANGUAGE AND LITERATURE; Latin (optional), French, German and English (required), one or more continued through the entire course.
8. MATHEMATICS AND ASTRONOMY; pure and applied.
9. MECHANIC ARTS; combining shop work with study, three years course; new building and equipment.
10. MENTAL, MORAL AND POLITICAL SCIENCE; Constitutional Law and History, Political Economy, &c.
11. MILITARY SCIENCE; instruction theoretical and practical, including each arm of the service.
12. PREPARATORY DEPARTMENT: Two years carefully graded and thorough. Commencement Week, June 14-17, 1906. Fall Term opens Sept. 9, 1906. Examination for admission, June 18th and Sept. 8th. For Catalogue of other information, address:

GEO. W. ATHERTON, LL. D., President.
State College, Centre county, Pa.

Democratic Watchman.

Bellefonte, Pa., Dec. 4, 1896.

Christmas Gifts.

Such as May Be Made for One's Feminine Friends.

A pretty watch stand, says the *Ladies' Home Journal*, may be made by covering one side of two pieces of cardboard, five inches long and three wide, with the material intended for lining. On another piece of material embroider or paint some design, and then apply this to one side of a similar sized piece of board. Cover a fourth board of the same size and shape with material to correspond to that containing the ornamentation. Then glue firmly together the uncovered sides of each of these pairs so that you may have two boards having each side of a contrasting or harmonizing color. Sew these firmly together at the top so that the lining sides shall be cut on the inside, and cover the place where the join is made with a bow of narrow ribbon. Sew into the ornamented board a tiny brass hook and the watch-stand is complete.

A baby-ribbon holder may be made by embroidering two circles of linen with appropriate designs. Then cut two similar circles of blue silk and cover two circles of pasteboard the same size so that the embroidered linen will cover one face and the silk the reverse. Purchase two rolls of baby-ribbon, and place between the two covered pasteboard circles, using the silk face for the interior. With a sharp pair of scissors pierce two slits through the whole, covers, ribbons and all, and then with a bodkin insert blue baby-ribbon. Tie firmly at each side. Sew hangers of the same from each side, uniting with a bow and long ends. An ivory bodkin and a pair of scissors must be attached.

A useful case for holding shoe-buttons, threads, etc., is made by taking two strips of ribbon, seven inches in length by three inches in width. Make an inch and a quarter hem at one end of each strip and in this hem, and in stitching, an inch from the top, run a row of stitching, so as to admit a drawing-string. Midway between the ends sew the strips together, uniting them on each side as far as the casing, thus making a small bag. Half an inch below the foot of the bag make a second row of stitching, closing up one side of this division. Take a piece of stiff pasteboard, a trifle smaller than this opening in width and three inches in length, cover with flannel and then with ribbon, sewing a tiny ribbon loop to one end. In this place several needles of various sizes, suitable both for darning purposes and for sewing on the shoe buttons which the bag end of the case should contain. At the two open ends of the ribbon make hems in which strips of whalebone should be placed so as to secure elasticity and firmness. Then sew the edges together, leaving an opening at the end, to hold the darning cotton.

A pretty gift is a clasp-pin holder, which is made by taking a strip of white flannel 20 inches in length and 2 in width. Pink the edges evenly. Then take a strip of satin ribbon, the same length, but a little wider. Midway between each end of the ribbon and flannel cut a slit large enough to admit the head of a tiny bisque doll. Gather both materials tightly at the waist, and tie a tush of narrow satin ribbon ending in a bow and streamers about the waist. A similar bit of ribbon should then be tied about the neck, and a loop made at the back from which to suspend the holder. Clasp-pins of various sizes should be placed evenly in the flannel.

Yellow Fever's Work.

Cuba's Military Hospitals Filled with Sick Spanish Soldiers.—The Mortality Very Great.—Weyler to Take the Field Again.—One Hundred and Fifty Persons Condemned to Exile for Political Crimes.—American Citizens to be Tried.

The official statistics show that there are now 17,840 sick soldiers in the various military hospitals in Cuba. Of this number 1,408 are suffering with yellow fever. The mortality is said to be 163 per thousand. One hundred and fifty persons who have been condemned for various political crimes and sentenced to exile will be sent to the penal settlements at Fernandepo and the Charaminas.

A train which arrived here Saturday from Artemisa, province of Pinar del Rio, brought seventeen officers and 453 privates who are so sick that it was necessary to bring them here for hospital treatment. The steamer Bolivar brought seven officers and 240 privates, all sick, from the same province.

TAKES THE FIELD AGAIN.

Captain General Weyler left Havana Saturday morning for Mariel on board the transport Legazpi, accompanied by his staff and adjutant. The other members of the general's staff left Havana by train Friday afternoon for Artemisa.

General Weyler returns to the province of Pinar del Rio for the purpose of re-organizing the campaign against the insurgent forces of Maceo in that province, which was begun under his personal command a fortnight ago. It is understood here that it is the intention of the captain general to pursue a policy of unceasing activity against the rebels to the end of completely breaking up Maceo's army before returning to Havana.

Flight of Hoffer's Teller.

His Mind Probably Unbalanced by the Cashier Theft.

George G. Shiffer, teller of the First National Bank, of Lebanon, of which Embree Hoffer was cashier, had a check on another bank for \$162.50 cashed late last Friday night, and has disappeared. It is believed that he fled to Harrisburg. Overwork and the severe nervous strain incident upon the investigation of the bank's affairs are said to have caused aberration of the mind. No charges are pending against Shiffer, and so far he has escaped any suspicion.

B. D. Coleman, the vice president of the bank, believes that Shiffer's mind is temporarily unbalanced, and that he has run away from the scene of his mental troubles. Teller Shiffer has been traced to Harrisburg. His mind is affected, one of the party who followed reporting him crazy.

—The official vote of Ohio is out, showing a total of 1,014,292. The McKinley vote is 525,989 and the Bryan vote on the Democratic ticket 474,890 and on the Populist ticket 2,615, making a total of 477,495, thus giving McKinley a plurality of 48,494 over Bryan. The Prohibitionists polled 5,068, the Nationalists 2,716, the Boatsmen 1,857, and Socialists 1,167, a total for the six parties of 10,806, leaving a majority over all of 37,688 for McKinley. With its magnificent vote for Bryan, Ohio did the best of any of the large States and the result demonstrates that on the issue of Free Silver the legal voters of the State were for Bryan by a large majority.

The Proposed Curtin Monument for Bellefonte.

A Deadly Occupation.

Bringing Out Borax From the Rifts in Death Valley.

The deadliest occupation for men or horses is teaming in the borax fields of Death valley of the great American desert. There the longest teams in the world are employed. Scientists declare that the fierce heat in this narrow rent in the cracked surface of the earth is not equaled elsewhere in the world. Where the thermometer often registers 140 degrees of heat unrelieved by a breath of air, where men sleep at night in hollow ditches filled with water in order to avoid dying from collapse, the necessity for the longest teams of mules and horses ever harnessed to draw the great borax laden wagons is apparent. The desert team is the longest in the world, and the percentage of deaths among the horses is greater than that of domestic animals used in any other calling. Forty to sixty horses are often hitched to one of the lumbering vehicles in which the borax is slowly dragged across the sun baked alkali plains. The average life of even the sturdiest horses used in this work is six months, for in this length of time they either become broken, winded, consumptive from inhaling the deadly dust of the desert or are driven crazy by the frightful heat.

A man there, though protected by the wagon awnings from the sun's rays, cannot go an hour without water without danger of death. When a team breaks down and the water supply becomes depleted, the men ride on at top speed for the nearest source of supply, and often when they return they find that the remaining horses, made mad by thirst, have broken from the harness and dashed off only to find death in the desert.

The borax wagons weigh 8,000 pounds and carry 20,000 pounds at a load. Behind each wagon is a tank containing hundreds of gallons of water. The horses are harnessed in pairs, the trained ones in the lead, and the next in intelligence just ahead of the tongue, while the unruly and the youngsters are hitched between. The high leader has a bridle with the strap from the left jaw shorter than the other, and from the bridle runs a braided rope, which the driver, perched on the wagon seat, holds in his right hand. The rope is called the "jerk line" and is a little longer than the team, which stretches out several hundred feet in front of the wagon. During the busy season the borax wagons make an almost continuous train, and the horses alone, if placed in single file, would make a team more than 100 miles long.

Resides a little food and water the poor animals get no care. They carry themselves by rolling in the burning sand. After a few months of the killing labor the poor creatures become unfit for service. A kind rifle ball then ends their agony, and their emaciated carcasses are left alongside the trail to furnish scant picking for the hovering vultures.—California Letter.

Tragedy at a Country Dance.

After Killing His Rival with a Hatchet a Young Man Commits Suicide.

James Stover and William Cappeau, two well known young men of Butler county, were the closest friends. Then they grew bitter towards each other because of a girl, it is thought. Thursday night both met at a dance and the young lady was there. Shortly before midnight Cappeau was seen to leave the dance for a few minutes. When he returned he carried something under his coat. Saying nothing he slipped up behind his rival.

Opening his coat, he brought a shining hatchet into view. Before his arm could be caught he is said to have buried the weapon in Stover's head. Then taking the butt end of the hatchet he beat Stover's head and face in. Then he ran from the room. After the people at the dance recovered from their astonishment they gave Stover some attention. Then some of the men started to hunt down Cappeau. They found him in the woods, with his throat cut. He supposed he had killed Stover and with his penknife he severed his jugular vein. He died in twenty minutes. It was stated that Stover was still alive but cannot recover. Cappeau was the stepson of W. J. Cappeau, a prominent oil operator; Stover is the son of a farmer.

Natural to Him.

"No," said Mrs. Kilduff, in a decided tone to her small son who had asked for a second helping of pie; "no, you have the most unnatural appetite for pie."

"Why, mamma," protested the little fellow, "I think an appetite for pie is the most natural thing in the world."

Hot Water.

Hot water has more medical virtues than many believe or know. Because it is so easily procured thousands think it valueless. The uses of hot water are, however, many. For example, there is nothing that so promptly cuts short congestion of the lungs, sore throat or rheumatism as hot water when applied promptly and thoroughly. Headache almost always yields to the simultaneous applications of hot water to the feet and back of the neck. A towel folded several times and dipped in hot water and quickly wrung out and applied over the painful part in toothache or neuralgia will generally afford prompt relief. A strip of flannel or napkin folded lengthwise and dipped in hot water and wrung out and then applied around the neck of a child that has the croup will sometimes bring relief in ten minutes. Hot water taken freely half an hour before bedtime is helpful in the case of constipation, while it has a most soothing effect upon the stomach and bowels. A goblet of hot water taken just after rising and before breakfast has cured thousands of indigestion, and no simple remedy is more widely recommended by physicians to dyspeptics. Very hot water will stop dangerous bleeding.—New York Ledger.

Down on John Wanamaker.

United Mine Workers of the Anthracite Region Hail the Senatorial Aspirant Over the Coals at Pottsville.

The United Mine Workers of anthracite district No. 1 held a convention and an executive committee was appointed to watch all measures introduced in the next session of the Legislature.

The question of John Wanamaker's candidacy for the United States Senatorship was discussed. His course in the street car strike in Philadelphia last winter was criticised. References were also made to his conviction in the United States District Court in Philadelphia last spring on this charge of importing contract labor to this country in violation of the act of Congress.

Taken at His Word.

Wife—Half past 12, I declare. Rather a late hour for you to be returning home. Don't you think so, John? Where have you been anyway? Husband—I've been setting up with a friend. Wife—I thought as much. How many drinks did you set up, John?

Sticking to the Truth.

"Have you steam heat?" asked the prospective tenant. And the janitor, who had been through a "revival," could only answer: "We have steam pipes."

Inherited Talent.

Deacon Shanghai—Dat boy certainly is full ob music, Mrs. Jackson. Mrs. Jackson—Yes, deakin, hit comes nachel toe dat chile. His pap war run ovah by one o' dem street pianers.

—The employees of the Pullman shops whose wages have just been reduced 15 per cent, the employees of Ketcham & Rothschild, of Chicago, who have had their wages cut 10 per cent, the 7,000 employees of the Yonker's carpet mills, who are to be laid off on account of "over production," and the 800 Cleveland employees of the Brush Electrical works who were thrown idle by the removal of the plant to Lynn, Mass., where labor is cheaper, have their own opinions about the good time promised before the election.—DuBois Express.

—The largest cities in the world and their respective populations are: London, 4,231,000; Paris, 2,447,000; New York, 1,801,000; Canton, 1,600,000; Berlin, 1,579,000; Tokio, 1,389,000; Vienna, 1,364,000; Philadelphia, 1,142,000; Chicago, 1,099,000 and St. Petersburg, 1,035,000.

—The Baldwin Locomotive Works of Philadelphia have reduced wages from 12 to 20 per cent. Such announcements are getting to be quite common, and they certainly are not pleasant news for workingmen right after McKinley's election. Yet, such announcements are like to go on.—Delaware county Democrat.

—In the gubernatorial contest last year Cleveland, the home of Hanna, gave the Republican candidate a plurality of 10,000. This year Cleveland gave McKinley a plurality of only 3,500. What's the matter with Hanna?

A Ministerial Way.

"Mamma," said Willie, leaning toward his mother and speaking in a loud whisper, "the preacher said a little while ago, 'one word more and I have done,' and he's talked 563 words since he said it. I've been countin' 'em on him!"—Chicago Tribune.

—Few people know that all plants contain digestive principles. They cannot absorb their food until it is digested any more than animals can. The Mount Lebanon Shakers have learned the art of extracting and utilizing these digestive principles, and it is for this reason that their Shaker Digestive Cordial is meeting with such phenomenal success in the treatment of dyspepsia. The Shaker Digestive Cordial not only contains food already digested but it also contains digestive principles which aid the digestion of other foods that may be eaten with it. A single 10 cent sample bottle will be sufficient to demonstrate its value, and we suggest that every suffering dyspeptic make a trial of it. Any druggist can supply it.

Laxol is the best medicine for children. Doctors recommended it in place of Castor Oil.

—McKinley is elected; the gold standard is secure; "anarchy is dead;" prosperity is abroad in the land; and yet here are 5,000 Ohio miners, right under the major's nose, idle because they decline to accept a 15-cent cut in wages. Mr. Hanna will have to see about this.—Cambria Freeman.

IT GOES WITHOUT SAYING.—That when you are suffering from catarrh, you want relief right away. What is the use then of experimenting with blood "cures" upon a climatic disease? Use a local remedy. Use Ely's Cream Balm, which relieves at once the attacks of catarrh and cures chronic cases. This remedy can be used by all without injurious results. It contains no mercury nor injurious drug of any kind.

—The newspaper men of Philadelphia will give a complimentary dinner to Col. A. K. McClure, of the Philadelphia Times, on December 9, in commemoration of his 50 years' service in journalism. On December 9, 1846, Col. McClure, then a lad of 19 years issued the first number of the Junata Sentinel, of Millintown, Pa.

TIRED, WEAK AND NO APPETITE.—"I felt tired and weak and had no appetite. A friend suggested that I try Hood's Sarsaparilla and I did so. This medicine made me feel strong, gave me an appetite, and after taking it for a while I increased in weight." Myron A. Meyer, Freeburg, Pa. Hood's Pills became the favorite cathartic with every one who tries them.

—National flowers have been adopted in various countries, as follows: Greece, violet; Canada, sugar-maple; Egypt, lotus; England, rose; France, fleur-de-lis; Germany, corn-flower; Ireland, shamrock; Italy, lily; Prussia, linden; Saxony, mignonette; Scotland, thistle; Spain, pomegranate; Wales, leek.

Medical.

CHRONIC CATARRH

Cannot be cured by local applications. It is a constitutional disease, and requires a constitutional remedy like Hood's Sarsaparilla, which, working through the blood, eradicates the impurity which causes and promotes the disease, and soon effects a permanent cure. At the same time Hood's Sarsaparilla builds up the whole system.

CATARRH AND ECZEMA.

"I was troubled with catarrh for several years. I began taking Hood's Sarsaparilla and by its use I have been cured. I recommend it to any one who is troubled with catarrh or eczema, and I think a fair trial will convince any one of its merits." HARRY M. GROVES, Carlinville, Illinois.

CATARRH AND DYSPEPSIA.

"We have used Hood's Sarsaparilla in our family for years, and are never without it. My sister has been cured of catarrh and dyspepsia by taking Hood's Sarsaparilla, and we have found it very valuable as a family medicine." W. E. GOSLINE, 30 Orient St., Brooklyn, N. Y.
