

FARM NOTES.

No other instrument is so well adapted to pulverizing small clods as the plank drag.

Feed up the cornfodder, millet and other cheap forage as closely as may be, and save the timothy hay, which is a cash article, while the others are not.

For the average farm, 50 apple trees make a nice-sized orchard. If the trees are planted about 30 feet apart each way they will occupy about an acre of ground.

Professor Henry, of the Wisconsin Experiment Station, says that cabbages have a good deal of value—more than potatoes or turnips—as swine feed, especially in the first part of the fattening period.

Combine bee keeping with fruit growing, and you can more easily procure two crops from the same land; and this double cropping requires no additional fertilizing, is not exhaustive, demands no extra plowing or cultivation. Few crops ask so little outlay as the honey crop.

From an exceptionally clean dairy in New York milk was sent in bottles across the Atlantic. Some of them were not emptied, and were found to contain milk still sweet when the steamer reached New York. The milk was kept in the ship ice-chest, of course, but even then it shows the great value of cleanliness.

A large number of orchards have never paid and never will. The most common cause is starvation for the average farmer who plants an orchard or buys one goes on treating the land as if such a thing did not exist. He crops the ground, in rotation and starves it, until it is a wonder that his orchard lives at all.

An English gardener says: It may not be generally known that if leaves or litter be footed on the tops of horse-radish plants in the course of the summer, making small white roots the thickness of one's finger, which are as tender as spring radish and much preferred to the tough, stringy, stuff we usually get.

It is seldom that a farmer can accumulate a sufficient amount of wood ashes for a large field, but on farms where wood is used there is a limited supply, which can be put to good use on the garden or on the young clover. Ashes are excellent also on all grass lands and in orchards. They are applied broadcast, in any quantity desired, as many as 100 bushels per acre having been used on certain soils.

Extracting wax from old combs in cold weather can be easily done by using an old bread-pan with one corner of its rim cut out. Dip the combs in water and put them in the pan; when it is full, put it into the oven of a common kitchen stove, with the cut corner of the pan projecting from the stove. Elevate the end of the pan in the oven so that when the wax melts it will run to the cut corner and drop into a vessel set to receive it.

PLANT PROPAGATION.—The necessary requisites for successful vegetable and plant raising from seed, are first of all to buy seeds from a reliable dealer, after which, sow and cover them in properly prepared soil, which requires attention with good judgment and care until they germinate.

transplant at the right stage of growth and take care of them until they are ready to be set in the soil where they are expected to grow. The flower requires not only extraordinary good care; but experience and good judgment as well. From ignorance of these general principles much good seed, doubtless, goes to waste every year, which is nearly always blamed on the dealer, who sells the seed. In addition to this, the failure is in the individual not comprehending the needs of the seeds before he starts to plant for germination. In every perfect seed will be found the embryo or germ, that upon examination will show to be a rudimentary plantlet, with a perfectly formed stem, leaves and bud.

Before this minute plant is forced into development, certain conditions have to be fulfilled; such as a preparation of the ground, as well as the fertility and the furnishing the necessary moisture, air and water, if under cover, in proper amounts. In preparing the ground and fertilizing the same, as a rule, the least judgment is brought into practice.

In preparing for lawns surrounding dwellings, the earth is frequently carted from adjacent mounds or pits, regardless of the amount of weeds that has grown on the same, which is mixed with manure from stables and barn yards, containing large quantities of weed seeds. When the same grows, the owner is astonished and if he happens to have down lawn grass, before the weeds show themselves and the lawn grass and the weeds begin to grow together, he is very sure that the seed sower has imposed upon him and sold him lawn seed thoroughly mixed with weed seeds. To prevent this, the earth should be piled up first, and allow the weed seed to germinate before placing the earth where the lawn grass is to grow and the stable manure should also be piled up a sufficient time to heat and germinate the weed seeds it may contain. After which, the manure should

be repiled and allowed to heat, for the purpose of thoroughly destroying the weed seeds. It is astonishing how many intelligent men, yes, professional men, who feel that they know all about it, fail in this particular, abuse the seedsmen for selling them weed seed, especially plantain; instead of grass seed which they ordered.

This is a subject that demands study from every person, who undertakes to provide a lawn to surround a residence. More especially the highly educated, professional man.

First of all, seed is to absorb enough water to completely saturate and soften it, to cause it to swell. This is why seeds are sometimes soaked before planting, which expedites the first step, before germination—especially, when the seeds are large with thick, strong outer coats, which are slow to be effected by moisture. With this softening and swelling, keep in a temperature of from 70 to 90 degrees, with a thorough circulation of air and it will not be long before the tiny embryo will burst its bounds and become visible on the surface. Seeds will germinate in pure water of the right temperature, not less than 70 degrees or between dampened paper or cotton at the same temperature; but for growth there must be soil.

In planting seeds in soil great care must be taken as to the depth in the soil. Some seeds require more depth than others and the dirt should be carefully firmed on all seeds, in which good judgment must be used. The use of a spade in patting down the earth after planting is indispensable, as it is an impossibility for vegetables and flower seeds to germinate, unless the earth surrounding them is sufficiently firmed to draw and hold the moisture.

Pansy seed should be covered with boards or old carpet, until they have germinated, after which the plant should be shaded until sufficiently strong to stand the rays of the sun.

In making hot-beds many mistakes are made. The horse stable manure should be placed in the hot bed two feet deep, well tramped in, after which put on the glass and allow the temperature to rise, which should be indicated by a thermometer inside and when the same recedes to 90 degrees, put on the earth and the glass, allowing sufficient space between the top of the earth and the glass for the plant to grow. Now, plant the seed and give ventilation, as the temperature of the weather requires and the plants will grow.

Many people fail in a hot-bed by planting the seed too soon, as soon as the bed shall have been made. The heat rises so high that it destroys the seeds if they are planted immediately after the manure is placed in the bed.

These are a few facts, that will be beneficial to many persons if they are carefully read and remembered.

Got Drunk on Bible's Advice.

"What have you to say, John McNulty?" This policeman says he found you drunk in a hall on Christopher street last night," said Magistrate Crane, in the Jefferson Market Court in New York one day to one of a line of prisoners.

"I but obeyed the teachings of the Bible," said the prisoner.

"I don't think you did," replied the Magistrate, "for you were drunk."

"Please hand me the Bible, officer," said McNulty, and with great rapidity he turned to Proverbs and read the sixth and seventh verses of the thirty-first chapter: "Give strong drink unto him that is ready to perish, and wine unto those that have a heavy of heart."

"Let him drink and forget his poverty and remember his misery no more." The prisoner laid down the book with an air of triumph on finishing.

"Discharged," was the brief comment of the court.

Had Him There.

"They say your father used to drive a mule."

"Who told you?"

"One of my ancestors."

"Just what I expected. I always told father that mule was smart enough to talk."—Cleveland Plain Dealer.

Tour to California via Pennsylvania Railroad.

In Southern California is found the realization of a dream of the ancients. Here are the "Golden Apples of the Hesperides," ripening beneath a sky more beautiful than that of Rome, and in a climate more perfect than that of Athens. Never in the wildest flights of his imagination did either Homer or Hesiod ever conceive of a garden richer in verdant beauty, more productive of luscious fruit, or set among more picturesque and lovely surroundings. Here the rose entwines the orange, and the snow mantled peaks of the Sierras reflect the golden glow of the evening twilight.

The last of the Pennsylvania railroad tours to California will leave New York and Philadelphia March 27th, stopping at Chicago, Omaha, Denver, Colorado Springs and the "Garden of the Gods," and Salt Lake City. Tourists will travel by special train of Pullman palace cars, going and returning via any route within nine months.

Regular one-way or round trip tickets will be issued by this tour in connection with a special ticket covering Pullman accommodations, meals and other tour features going. The latter ticket will be sold at the following rates: From New York, Philadelphia, Harrisburg or Altoona, \$60.00; Pittsburg, \$58.00.

Apply to ticket agents, tourist agent, 1106 Broadway, New York, or Geo. W. Boyd, assistant general passenger agent, Broad street station, Philadelphia, stating return route desired. 42-9-4t.

One of Two Ways.

The bladder was created for one purpose namely, a receptacle for the urine, and as such it is not liable to any form of disease except by one of two ways. The first way is from imperfect action of the kidneys. The second way is from careless local treatment of other diseases.

CHIEF CAUSE.

Unhealthy urine from unhealthy kidneys is the chief cause of bladder troubles and suffering so painful to many that life is made miserable. The womb like the bladder was created for one purpose, and if left alone it is not liable to become diseased, except in rare cases. When in position the womb is situated back of and very close to the bladder, and for that reason any distress, disease or inconvenience manifested in the kidneys, back, bladder or urinary passage is often by mistake, attributed to female weakness or womb trouble of some sort. The error is easily made and may be as easily avoided by paying a little attention to the condition of the urine (see pamphlet). The mild and the extraordinary effect of Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder remedy is soon realized. It stands the highest for its wonderful cures. If you need a medicine you should have the best. At druggists fifty cents and one dollar. You may have a sample bottle and pamphlet, both sent free by mail. Mention THE DEMOCRATIC WATCHMAN and send your address to Dr. Kilmer & Co., Binghamton, N. Y. The proprietors of this paper guarantee the genuineness of this offer.

Castoria.

FOR INFANTS AND CHILDREN.

Castoria promotes Digestion, and overcomes Flatulency, Constipation, Sour Stomach, Diarrhoea and Feverishness. Thus the child is rendered healthy and its sleep natural. Castoria contains no Morphine or other narcotic property.

"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me." H. A. Archer, M. D., 111 South Oxford St., Brooklyn, N. Y.

From personal knowledge and observation I can say that Castoria is an excellent medicine for children, acting as a laxative and relieving the bowels and general system very much. Many mothers have told me of its excellent effect upon their children." Dr. G. C. Osgood, Lowell, Mass.

"For several years I have recommended 'Castoria,' and shall always continue to do so as it has invariably produced beneficial results." Edwin F. Paroz, M. D., 12th Street and 7th Ave., New York City.

"The use of 'Castoria' is so universal and its merits so well known that it seems a work of supererogation to endorse it. Few are the intelligent families who do not keep Castoria within easy reach." CARLOS MARTIN, D. D., New York City.

—Corduroy is used almost exclusively for workmen's clothing and for cheap caps. The Wilson duty on the cheapest varieties is 47 per cent, while that proposed by the Dingley bill is 137 per cent, on the cheapest corduroy, costing 14 cents a yard, decreasing as the cloth grows more expensive until on corduroy worth 30 cents a yard the tax is 80 per cent. Thus on the cheap corduroy the Dingley tax increases the price from 14 cents a yard to over 33 cents. Is that pretty steep? But it is a characteristic of the Dingley bill. The heaviest taxes are laid on the cheaper articles.—Post.

DISORDERED LIVER AND INFLAMMATORY RHEUMATISM IN A YOUNG BOY.

Mr. and Mrs. Howse Despaired of Their Boy's Life—He Was Compelled to Give Up His Studies.

From the Leader, Cleveland, Ohio.

Few boys withstand an illness of so serious a nature as that with which Fred L. Howse was a year ago afflicted. Fred is now fifteen years of age, and attends the public schools. His home is No. 30 Plymouth Place, Cleveland, Ohio, and he is now a picture of puerile health and vigor. In the fall of 1895, however, his parents, Mr. and Mrs. Richard Howse, the former a well known business man, whose office is in the Arcade, had almost despaired of saving his life. The lad became afflicted with inflammatory rheumatism which affected his whole body and accompanying ailments were several other very serious disorders. When she was asked to describe her son's sickness and his recovery, Mrs. Howse said:

"It was in September, 1895, that Fred, who was up to that time in delicate health, was attacked by inflammatory rheumatism. It was a very acute case for he was confined to his bed, and was unable to move even his arms or legs without bringing on excruciating pain.

"Aside from the rheumatism Fred's liver was in serious disorder, and he used to vomit frequently. He was also subject to fainting spells, and altogether had a very serious sickness.

"We knew, of course, that though the rheumatism was exceedingly painful, it was not necessarily dangerous; the fainting spells and vomiting however alarmed us. Often when Fred faints he would lay like one dead. His face would become ashen pale and it was difficult at such times to detect his heart beats. The spells caused

Mr. Howse and myself much uneasiness about our boy's condition. We called in a doctor and he prescribed for Fred, but the lad did not seem to improve, so I purchased a box of Dr. Williams' Pink Pills for Pale People in one of the downtown stores. Then for four months steadily Fred took them instead of the medicine prescribed by the doctor, and at the end of that period—it was about New Year's then—Fred was sufficiently improved to go out.

"The improvement was slow at first, but it was sure. I had unbounded faith in the pills as evidenced by our continued use of them. It was necessary for us to take Fred out of school on account of his illness, but now he has returned and can join in all the sports with his schoolmates, and his health is as good as we could wish. He has never been ill since, and it is pretty safe to predict that he will not be sick again for some time.

"Yes I have recommended Dr. Williams' Pink Pills to my friends," said Mrs. Howse in reply to a question, "and many of them have used them since. I first read of the pills in the newspapers."

Dr. Williams' Pink Pills for Pale People are now given to the public as an unfailing blood builder and nerve restorer, curing all forms of weakness arising from a watery condition of the blood or shattered nerves. The pills are sold by all dealers, or will be sent post paid on receipt of price, 50 cents a box, or six boxes for \$2.50 (they are never sold in bulk or by the 100), by addressing Dr. Williams' Medicine Co., Schenectady, N. Y.

42-13-1t.

No one can gainsay the fact that in all his appointments thus far President McKinley has strictly taken care of his own. In the hatch of nominations sent to the Senate on Thursday last there was not one who was not among Mr. McKinley's original supporters for the Presidency. The claims of Powell Clayton, of Arkansas, upon the gratitude of Mr. McKinley for the appointment as minister to Mexico, and the same is true of Joseph H. Bingham, of Ohio, who was named as assistant secretary of agriculture, and of John K. Gowdy, of Indiana, who was appointed Consul General at Paris. These gentlemen were among the loudest shouters for Mr. McKinley's nomination at the St. Louis convention, and the President has lost no time in discharging his obligations to them.—Pittsburg Post.

UNSOLICITED TESTIMONIALS

Cataract and Eye Trouble Cured by Dr. Salm.

For several years, my daughter Dilla, has had a bad case of Cataract accompanied by all the usual symptoms attending the disease. Catching cold continually. At last the eyes became afflicted, they became weaker and weaker from inflammation, then we became alarmed and brought her to Dr. Salm. After a course of treatment, she is now, thanks to his skill, entirely cured. JACOB B. MATHER, Globe Mills, Snyder Co., Pa.

A Fearful Case of Rheumatism Cured by Dr. Salm.

I have had a fearful case of rheumatism for over 3 years, so bad that I could not lift my arms to my head, and at every change of the weather the pains were most excruciating. Any one having suffered with rheumatism, can only appreciate what I mean. I have only had 3 months' treatment from Dr. Salm, you might almost say, I am cured, and I am happy once more. I was 71 years old at my last birthday. J. D. GARDNER, Howard, Centre Co., Pa.

After Having Tried 8 of the Best Doctors in the Country, Without Avail, Dr. Salm Cured Her.

For more than 10 years I have been leading a miserable existence, on account of illness. I had tried at least 10 doctors in Buffalo, Pittsburg, Greensburg and surrounding towns. My suffering grew worse and worse. I became thin, too weak to work, and passed many sleepless nights. Couldn't eat, my stomach was out of order, and my nerves seemed all unstrung. I don't want to live through another such a time, for anything in the wide-world world, and often I have prayed to God. After I had given up all hope of enjoying health again, I decided to consult Dr. Salm and, thank the good Lord, that I did so. After a course of treatment, I once more enjoy fine health, eat, sleep and work once more, as heretofore. I am truly grateful to Dr. Salm. He certainly is a man who stands his business, as my case is a wonderful cure he has performed in this country. Mrs. S. E. McCREARY, Tunnelton, Indiana Co., Pa.

After Having Tried 8 of the Best Doctors in the Country, Without Avail, Dr. Salm Cured Her.

For more than 12 years I have suffered a good deal of pain, in fact, I was at times almost unable to get up, particularly on sitting down. The misery was in my left side, in the region of my heart. It was very seldom that I could get up to my labors. I tried 8 different doctors, so said, the best in our country, but I got worse instead of better, at last I went to Dr. Salm, who makes regular visits to Sunbury, and thanks to his skillful treatment, I am now entirely cured. Mrs. L. B. MURRELL, Dewart, Northumberland Co., Pa.

Every Body Ought to Know What Dr. Salm did for Me. He Cured Me of a Fearful Skin Disease.

For more than 4 years I have had a most terrible skin trouble. I seemed to be covered, like a fish with scales all over my body, even to my face not excepting my eyes. The pain was almost unendurable, and I walked the floor many a night, on account of my agony. To work, was out of the question, nor could I wash myself, as I could not see. I tried 5 of the best doctors, spent money on patent medicine, such as Cuticura, Golden Medical Discoveries, etc., got treatment from Pierce Medical Institute, Buffalo, but it went from worse to worse. Then I heard of Dr. Salm's wonderful cures in this neighborhood, and took his treatment, and to-day, I am a new man. No more skin trouble. I am working again, and as well as ever. Every body ought to know this. FRANK RICHARDSON, Dunlo, Cambria Co., Pa.

Bad Case of Sore Eyes Cured by Dr. Salm.

Ever since I was a babe, I have suffered with sore eyes. They became very painful, and with every cold I took, and that was often enough, they became worse and worse. Little scales had to be removed from the lashes every morning, and the margin of the lids began to look like raw beef; of course all this didn't enhance my eye-sight, nor improve my appearance. I went to Dr. Salm, and he has done a wonderful work. No more sore eyes, no scales forming, soreness has almost entirely left, and my eye-sight is better. I know I will be cured in a short time. GERTRUDE MARTIN, Grisimore, Indiana Co., Pa.
