#### THE LAND OF THE LAZY.

The land of the lazy is "Sometime" land ; Its boundaries are "After Awhile." Its citizens were the "Mean-to" brand, And "Going-to" garments are all the style. In the land of the lazy little is done, For the dwellers crowd to the "County Shirk' And they moan like martyrs every one At the very sound of the name of work. In the land of the lazy they want to get Just as much as the toilers do, And then if they don't, they fume and fret, And grumble about "Fate's tayored few '

In the land of the lazy ambition dies, For it cannot live in untended soil, And its bright twin, Progress, straightway flies Away, away to the town of toil

revolver of large caliber, having its six

chambers loaded, and a new, knotted rope,

which had evidently been used as a life line

house referred to.

In the land of the lazy you and I, As a matter of course, have never been But I tell you what, we had best look spry, Or before we know it we'll enter in.

#### Weather Facts and Theories.

#### BY W. T. FOSTER.

ST. JOSEPH, Mo., Oct. 9.-My last bulletin gave forecasts of the storm wave to cross the continent from the 13th to the 17th, and the next will reach the Pacific coast about the 18th, cross the west of Rockies country by close of 19th, great central valleys 20th to 22nd, and eastern States 23rd.

A warm wave will cross the west of Rockies country about 18th, great central valleys 20th, and eastern States 22nd. cool wave will cross the west of Rockies country about 21st, great central valleys 23rd, and eastern States 25th.

Temperature of the week ending 16th will average about normal in the northern States and below in the southern. Rainfall of that week will generally be below normal. Most rain will fall in the New England States and in Texas, least in the lower Missouri and upper Mississippi valleys.

An extended warm period for the southern States is approaching ; its extent and ation of outsiders in her escape. ending will be given in next bulletin. OCTOBER AND NOVEMBER WEATHER.

ment have been arrested. Prof. Bigelow continues the discussion of fall weather as follows :

"It is generally observed by the public that October and November embrace some of the pleasantest weather of the year, which is characterized by cool, dry air, with quite a rapid succession of alternately warm and cool or cold days. The reason for this condition is easily understood. Storms and storm tracks have been dis-cussed and little has been said of the high areas of pressure that accompany them.

"It would be more accurate to say that the lows or storms attend upon the highs and are really subservient to them. At any rate, looked at from a more general point of view, a procession of highs and lows, of cold and warm masses of air, marches across the country from West to East. The lows hang along the borders of the highs in order to accomplish the courses marked out for them.

or guiding rope to enable the escaping "Now, in October and November the prisoner to cross the plank bridge which had been extended by her accomplices from highs originate chiefly in the continental areas north of Montana and Dakota, more the house near the Casa de Recogidas to the roof of that prison. The revolver, the so as the winter comes on, though a number, of course, come in from the Pacific.

knotted rope and the portable bridge as other discoveries made by the police show "At this season the continent has become quite dry, as the surface evaporation, has been going on rapidly since summer, and that the escape of Senorita Cisneros was long and carefully planned. worth something to know that the very best medicine for restoring the tired out nervous system to a healthy vigor is electric bitters. This medicine is purely vegetable, acts by giving tone to the nerve centres in the stomach, gently stimulates the liver and kidneys, and aids these organs in throwing off impurities in the blood. Electric bitters improves the appetite, aids digestion, and is pronounced by those who have tried it as the very best blood purifier and nerve tonic. Try it. Sold for 50c or \$1.00 per bottle at Green's drug store, Bush House.

## Books, Magazines, Etc.

Perhaps the most striking feature in the October Magazine number of the Outlook is the very finely illustrated article on Chicago's new Public Library, written by Mr. Forrest Crissey. The series of articles on The Higher Life in European Cities is brought to an end with one on Berlin by Baron Hermann von Soden, a distinguished professor in the University of Berlin; some charming park scenes and many pictures of prominent architectural features ef Berlin illustrate the article. Quaint and beautiful pictures accompany a paper by Mr. Walter Hyams on Wisby, the picturesque and ancient Hanseatic island town. The Outlook has lately been printing a short series of articles which attempt to show what the century has done for health and comfort ; the last of these articles in the current

through Northern Illinois, Iowa, Nebraska, Kansas, Colorado, (through the heart of the Rockies), Utah, Nevada and California, affording a perfect panoramic view of prairie, mountain and coast cenery. These popular every Saturday California excursions for both first and second class passengers (not foreign emigrants) are "personally conduct-

# TOME SECRETS.

BELLEFONTE MOTHERS KEEP THEM : BUT WITH A LITTLE LIGHT, THERE

NEED BE NONE.

How carefully Mother guards the Se-crets of her Boys and Girls. At night as she carefully tucks the bed clothes round them she chides and warns them that Mother will be angry if they repeat last night's offense, softly saying to herself it's only a babit, buit I must break them of it. This is Moth-er's mistake. The children cannot help it, and sweet, clean, dry beds can be the resting place of every child when it is understood that the cause is not a habit, but a weakness that can be cured. Active life of the little ones tends to weakening the Kidneys and weak Kidneys means inability to retain urine. This is a condition, not a habit, and should have the same prompt attention you would give to the marked symptoms of any disease. One of Doan's Kidney Pills taken twice a day and at bed time will strengthen the kidneys of a child, and in a short time there will be no cause to scold, for the so-called habit will disappear prompty.

disappear promptly. Here's a grateful Mother that adds her indorsement to our words. Mrs. W. E. Bryerton, 101 Fourth St. says :---''My daughter s years old had at the age of four, a severe attrick of measles. When she recovered she was left with weak kidneys and the trouble developed into a urinary diffi-culty. We doctored for it, but made little or no headway. Last fall, she with other children, had the typhoid fever. It aggravated it and she com-plained of her back aching and contin-ually feeling tired. She had little or no control of the urine while sleeping, in spite of all the doctors and I could do. It struck me if Doan's Kidney Pills were good for this distressing complaint in adults, they should be for children, and I procured a box. They improved her condition from the start and finally did more for her than all I ever did as well as the doc-tor. The trouble is gone. Before us-ing the old Quaker Remedy, she could not go to Sabbath school. Now I am thankful to say she can go any-where.'' an's Kidney Pills are for sale by all deal lisappear promptly. Here's a grateful Mother that adds

Shoes for One-Legged Men. Buy as Other People, but Pay More Than Half. The one-legged man buys his shoes precisely like the two-legged man. At the big stores they break a pair to sell the single shoes that the one-legged man requires, without the slightest hesitation; and he can get any kind of shoe he wants. The single shoe remaining is sent back to the factory to be mated up, and this is done with perfect accuracy. Every pair of shoes is numbered, and it could easily, if it were desired, be traced back to the stock room from which it is made. There is no guesswork about it. The shoe required to mate the shoe remaining may not be made on the identical last upon which the original shoe was made, but it is made upon a last

The one-legged man who buys in this way pays slightly more than half the price of a pair. One-legged men are in the very largest shoe stores among the regular customers ; and they are not so unusual as to be remarkable

One-legged men, however, are not the only men who buy single shoes. There are two-legged men who sometimes buy only one shoe. For example, a man with the gout. He can if he wishes, and he sometimes does, buy a single shoe. The remaining shoe is mated up in just the same manner as the remaining shoe from the pair broken for the one-legged man. There are two-legged men who wear shoes of different sizes, their feet not being mates. This may be due to nature, or if may be that an accident has befallen one foot. For such a customer two pairs of shoes are broken and he takes one of each. -New York Sun.

strata upon the continent, and to blow thence outward upon the ocean.

"In other months, when the land is from the ocean to the land, and this brings full of water near the surface.

"The dry highs are like sponges, ready to soak up by elevation all surface water, but when this supply fails then the original dryness of the air is maintained as the winds blow over the country. "Furthermore, the general lowering of

the temperature of the atmosphere at this rez, who became infatuated with her. She season, owing to the withdrawal of the rejected his advances, and her father laid a sun to the southern hemisphere, is un-favorable for the air in the lower strata to He called upon Senorita Evangelina, but

retain much aqueous vapor in suspension. "If the temperature of the air is 86 degrees F., with barometer near 30 inches, it his Cuban confederates, rushed into the can hold about 25 grams of water per cubic meter before saturation takes place, but if the temperature falls to 50 degrees it can contain only seven grams, and if to 14 degrees only two grams.

Now, on inspecting the maps it is seen that in the morning we are dealing with temperatures of 30 degrees to 50 degrees F., and therefore dry air can take up only three to seven grams of water in the cubic meter.

"The consequence of these two causes is to produce dry weather, and this will conto produce dry weather, and this will con-tinue as long as the continental cooling authorities to relieve her desperate conkeeps the air, on the whole blowing toward the oceans, or as great, high areas of RESCUED BY AMERICAN NEWSPAPER dry air fill our central regions.

dition.

'The statistics show that the middle and south and middle Atlantic States, the gulf States, the Ohio and Mississippi valleys are very dry. On the other hand, the lake regions and New Englard have a large number of rainy days, the precipitation, however, being very light for the most part.

"Further inspection of the maps of the weather bureau discloses the fact that dur-weather bureau discloses the fact that during these two months the storms that pass over the main tract, along the lakes and strongly developed, as the high winds on Mr. Sewall Says That Will Be the Result if the lakes and the New England coast testify. Yet they often pass over their entire course of three days' duration almost perfectly dry.

"There may be a little rainfall or snow in the lake region near the center of the storm, or even in the rear of it, but no storm, or even in the rear of it, but no general precipitation occurs, such as the formation of isobars and the directions of the wind suggest and would certainly produce at other seasons of the year. "The dryness has been explained, but one deduction must not be omitted. The
