## FARM NOTES.

-Crimson clover proved very valuable for late fall pasture and as a cover crop to be turned under in spring. It made a much heavier fall growth than either red clover or mammoth clover, and analysis and weighing on November 2nd showed that while crimson clover had gathered 156 pounds nitrogeh per aere red clover had gathered but 103 pounds and mam-

Consequently, a log set in the ground in the same relation as the trunk the ground to a considerable height, and protect them with some waterproof covering just below the surface of the ground, where they are most exposed to soaking from rains. An experiment was made in France by furnishing alternate posts with a protecting ring, made by slipping on a drain pipe, and filling the space between the inner surface of the pipe and the post with tar and sand. The top of the pipe was just at the level of the ground, and it was found that the posts so protected lasted just five times as long as those which had been set in the ground without protec-tion. The cost of the application was about sixty cents for each post, but it seems probable that a simple wrapping of tarred paper would have answered the purpose, provided no holes had been driven through it and the paper had been sealed with a coating of tar.

## THE CORN HARVEST.

-During the dry seasons, when hay crops were short and forage of all kinds scarce, the true worth of well cured corn considered nothing of the crop valuable except the ears, but a fair trial convinced them that corn stalks, well harvested and except the ears, but a fair trial convinced them that corn stalks, well harvested and taken care of, was almost if not quite equal to timothy hav in feeding value as point of the convince of to timothy hay in feeding value—a point that has long been recognized in the East. The great labor in cutting corn by hand has had much to do with preventing the universal use of the fodder, but with the advent of the many kinds of sled cutters the corn binder and the husker and shredder much of the exhaustive labor is eliminated, says American Agriculturist in con-nection with the following remarks on the new methods: The sled cutters are cheap. The corn

binders mark an era of great advancement in the culture of the corn crop. The corn is cut off by means of draw knives and sickle and bound while still standing upright into bundles, which are discharged in piles for convenience in shocking. Corn of any size is readily taken care of, and Kaffir corn, sorghum, cane, Milo maize, etc., can be harvested satisfactorily. It matters little how badly the corn is lodged -the binder, if skillfully handled, will pick up the stalks, straighten them out and bind them in neat bundles. Even if flat on the ground the points of the gatherers can be run under the stalks and thus raise them. The first binders made by the McCormick harvesting machine company were put on the market in 1890.

ALL HAZARDS. In 1895 over 7,000 were sold. A number of experiment stations in the United States and Canada have tested this machine. There is also manufactured an improved corn shredder and husker to supplement the corn binder. This machine has a pair of 17 inch snapping rolls and a shredder of the same width. It has one pair of horizontal husking rolls, a fan and sieve by which the corn that is accidentally shelled is cleaned, and an elevator by which it is delivered into a sack. A 16 foot fodder carrier and a 14 inch ear carrier complete the equipment. It is to be operated with any power on the farm, from the two horse tread to the eight horse sweep, or an engine, or a gasoline motor. These machines have a large capacity, husking a bushel basket of ears with a two horse tread in fair corn every minute.

The low wagon for hauling ensilage fodder is made by hanging two 6 by 6 inch timbers 14 feet long from the hind axle of an ordinary farm wagon. The forward ends are brought together and fastened to the front wheels by means of a swivel bolt. One man on the ground can easily load all the green fodder one team can draw.

To get the best quality of fodder and at the same time the largest amount of feed cut when the husks begin to glaze or dry up. Put into medium or large shocks and allow to remain in the field until the stalks and blades are thoroughly cured, then run through a shredder or store in a stack or barn. Of course much corn fodder cannot be put under roof because of a lack of storage room, in which case it is best to make the shock large, so that a smaller percentage of the fodder will be bleached. If the ears are not cared for particularly, but the very best forage is desired, cut a little earlier than recommended above, place in small shocks until partially cured, then put several smaller ones together, advise the au-

SHRINKAGE OF CORN IN STORAGE. Corn is the grain that probably shrinks most, though as it grows less in bulk its nutritive value is not lessened. It may be even possible if the cob be still damp that some nutrition goes from cob to the grain while it is in the crib. The moist corncob has some sweetness. That of the dried cob is only woody fiber and potash. We once measured 650 bushels of corn in the ear into a crib. As we had most of it ground in the ear for feed 'we measured out the corn during the winter as it was taken from the mill. The loss in bushels was more than 70 and of weight still more than this. This was less decrease than we had expected. But the corn was put in when thoroughly ripened, and we began to take it to the mill to grind it be-fore it had dried out much. The Dent corn wastes in drying much more than Flint corn does. It is less compact after it is dried and cannot be brought up to the standard weight of Flint corn either when wet or dry.

A FORTUNATE ESCAPE.

A Burlington Young Lady Tells The Story of Her Rescue.

From the Clipper, Burlington, Vt.

A reporter called upon Miss Lilian Warner at her home, 415, St. Paul street, Burlington, Vt.,

imagined

"I never could have stood it once, but I have something now," said Miss Warner enthusiasticlly, "that braces me for my work. Some little time of a growing tree will draw moisture from ago I was utterly unable to attend to my duties, the wood so moistened will decay; while if the log is set with the other end up the action of the capillaries tends to oppose the ascent of the moisture, and the wood respectively. Another means owing to a disarrangement of the nervous syssists decay much longer. Another means freedom from care was, however, merely temporary, and upon my return to work I rapidly lost all that I had gained and more."

"But did you consult a doctor?" several doctors, and even tried many remedies partial paralysis, St. Vitus' dance, sciatica, neurecommended for cases like mine, but the medi- ralgia, rheumatism, nervous headache, the after cines had no lasting effect, and it looked as effect of a la grippe, palpitation of the heart, pale though nervous prostration was to be my my por- and sallow complexions, all forms of weakness

faith in any benefit to be derived from them that I at last made up my mind to try them.

"Hardly had I taken the first box before I experienced a great relief from the weakness and nervous troubles with which I was afflicted, and my eyes grew stronger every day.' "Are you taking the pills now?" was the next

"No; as I told you the first box helped me a great deal, and after I had taken six boxes I felt so well that I left off the medicine entirely and have not taken any now for some weeks. I am can be, while my eyes continue to improve right along. I do not even mind the long walk from my home to the business part of the city.

Miss Warner further said that Dr. Williams Pink Pills for Pale People build up the system, giving a lasting effect and not merely a fictitious strength for the time being.

Dr. Williams' Pink Pills for Pale People contain in a condensed form, all the elements necessary to give new life and richness to the blood and restore shattered nerves. They are an unfailing "O ves, indeed: I put myself under the care of specific for such diseases as locomotor ataxia either in male or female. Pink Pills are sold by "I was about ready to 'throw physic to the all dealers, or will be sent post paid on receipt of dogs' when I first heard of Dr. Williams' Pink | price, 50 cents a box, or six boxes for \$2.50 (they Pills for Pale People, and it was with but small are never sold in bulk or by the 100), by address ing Dr. Williams' Medicine Company, Schenec tady, N. Y.

THERE IS NOTHING SO GOOD.—There is nothing just as good as Dr. King's New Discovery for Consumption, Coughs and Colds, so demand it and do not permit the dealer to sell you some substitute. He will not claim there is anything better, but in order to make more profit he may claim something else to be just as good. You want Dr. King's New Discovery because you know it to be safe and reliable, fodder was discovered by western farmers. and guaranteed to do good or money re-Farmers of the great corn States formerly funded. ## A .LETTER THAT SPEAKS FOR ITSELF!!

PLEASANT GAP, PA., Aug. 14, 1897.

MR. J. EDW. LAWRENCE,

42-19-3m

Manager Union Mutual Life Insurance Co. Bellefonte, Pa.

I acknowledge the receipt this day of the Union Mutual Life Insurance Company of Portland, Maine, for two thousand dollars (\$2,000) in payment of the death claim of my brother's life, the late Dr. S. E. Noll. I wish to thank you for the

prompt and business like manner that you and your company have shown in the settlement of this claim My brother was insured in March, 1897, and died the following

July, he had paid but \$48.16 for which I am this day handed \$2,000. Thanking you again for your kindness,

I am, sincerely yours, WM. H. NOLL,

Administrator.

Dr. Salm.

Lived off Bread and Milk for Years. 9 Home Doctors Failed to Cure me. Dr. Salm Succeeded in Curing.

For more than four years I have had a bad case of catarrh, stomach and general trouble. Took cold continually. For one and a half years I could eat only bread and milk. Tried nine different doctors, to get rid of my misery, but got worse and worse. So I went to Dr. Salm for treatment, and to-day I am as strong as ever, can eat anything, and don't take any more cold, and consider myself cured of this terrible disease.

John H. Kauffman, Mattawanna Mifflin Co., Pa. Mattawanna Mifflin Co., Pa.

Catarrh and Eye Trouble Cured by Dr. Salm. For more than five years I have had a very bad case of eye trouble and catarrh. The eyes continually got sore and grew weaker and weaker. I always took cold. Dr. Salm cured me.

CLEVELAND KIMBERLY,
Witnessed by A. J. Kimberly.
MeVeytown, Mifflin Co., Pa.

People Think Dr. Salm Has Done Another Wonderful Piece of Work.

I have had a very bad case of catarrh and sore eyes for more than eight years, and consequently it gave me a world of trouble. I was obliged to see Dr. Salm, under his treatment the change is wonderfully rapid. My friends are astonished, as well, and think with me that Dr. Salm has done another wonderful piece of work.

Louis C. Shannon. Louis C. Shannon, Whitestown, Butler Co., Pa.

A Case of Catarrh and Throat Trouble Cured by Dr. Salm.

For more than three years our two children have been suffering from catarrh and throat trouble, also enlarged tonsils. They were continually taking cold. Could hardly breathe at night. Their constitutions became undermined, After a short course of treatment with Dr. Salm, they have almost entirely recovered from their miserable disease.

J. F. Harrison, Bellefonte, Centre Co., Pa.

Couldn't Walk 15 Yards at a Time, Was no Earthly Use to Any One, Thought I Was Going to Die, but Dr. Salm Cured Me.

For 2 years or more, I have had a fearful trouble, begun to get very weak, my limbs would not carry me any more, couldn't walk a stretch of 15 yards, and my heart would beat a fearful rate, at the least exertion, It seemed my blood was turned to water, I gradually became pale as one dead. I was no earthly use to any one, and all my neighbors and relatives thought I was going to die. Home doctors couldn't help me, so I went to Dr. Salm, and to-day, I am happy to state, that I am stronger than ever, can eat anything, do a full day's work, and enjoy life as much as any one, and my color, any one may be proud of.

Mrs. Sadie Dobss,

Attested by her father, Frank Richardson. Dunlo, Cambria Co., Pa.

Suffered for 15 Years With Nervous, Inward and Ear Trouble, Tried a Half Dozen Doctors, and a Pile of Patent Medicines, but Had to go to Dr. Salm to be Cured

For 15 years I have suffered very much with nervous, inward and ear trouble, and my condition grew worse and worse. I tried a half dozen doctors, and piles of patent medicines, to no avail, I went to Dr. Salm, and, thanks to his knowledge as a physician, I consider myself entirely cured, Those pains, which came every month, and the fearful nervous prostration resulting therefrom, has entirely left me and I feel happy once more.

Mrs. W. M. Jon, New Florence, Westmoreland Co., P.

A Case of Ear Trouble Being Cured by Dr. Salm, Complicated also With Ringing Noises and Deafness.

My treatment is for the ear and throat, I am rapidly improving, and I know I shall be cured, which I think will be soon.
