He was born near Pine Grove Mills, age of 8 years, he entered the employ of furnace as John Dunlap's successors. He began by sifting iron with a hand riddle and later did the weighing about the works. He worked from early morn 'til late at night and thought he was well paid when he received twenty-five cents a day. Two years later his wages were increased to thirty cents a day because he was so faithful and industrious. For years he worked about the furnace or wagoned to Pittsburg with iron 'til he became clerk in the store connected with Valentine's iron works. He was clerk and general manager at Valentine's for sixteen years, and, upon retiring from the iron business he purchased a farm near Pleasant Gap, and was one of the most progressive and successful farmers in the county, 'til age prevented active work. Then he purchased a home here in Bellefonte where he spent his later years peacefully and pleasantly. In 1841 he married Miss Hannah Waddle, a granddaughter of Gen. Philip Benner.

Mr. Hamilton delighted in talking of old times and the days when luxuries and comforts were unknown here in the county. He remembered when there were but four lawyers and two doctors in Bellefonte. when most of its streets were cow-paths through pine forests and before a single church had been erected. Up to within a few weeks of his death his mind was exceptionally clear, and it was a rare treat to place, Tuesday of next week. FOR THE BOYS IN BLUE. -- Between hous cleaning, church affairs, their social duties, and their efforts to do something nice for the boys who have gone to the front, the women of the W. C. T. U. have had a busy week of it. Most of their time, however, has been spent in gathering up money, purchasing material and making what they call a "home-wife," for each member and officer of company "B." Just what a "home-wife" is, we are unable to say, except as to one kind, and we know it's not that kind that the ladies of Bellefonte propose sending to the boys at Chickamauga. We are told that the "army home-wife" is a something made of pockets, and pin cushions, and needle receptacles, and spool it takes money to run a newspaper, and always holders, and lots of convenient corners and flaps in which to roll and stick buttons, and thread, and court plaster, and the like. with a department for a testament, and a bottle, and almost everything else that a man could lug along with him. To collect the money, purchase the material, make, mark and fill, eighty of these handy little contraptions kept almost an army of women, busy from Tuesday morning until Thursday night, when the last one was rolled up, and the whole-lot packed ready for shipment to-day. Their receipt will be a surprise to the boys, and will be a reminder it to say so. Under any conditions, how- who sympathize with the family in their ents at Danville. The wedding enjoyment did not end with the reception and breakfast. For the day was perfect and at the station it was found that the bride's trunk had been covered with bunting and decorated with old shoes, white ribbon and a rag baby.
