

Bellefonte, Pa., June 10, 1898.

FARM NOTES.

—The orchards of this country have received more consideration during the past decade than for a century previous. Crops of apples have been allowed to waste on was a secondary matter, while overbearing the grading necessary for the double tracks. was considered a fortunate occurrence.

It is maintained that the amount of fruit on a tree may be regulated in two ways— by pruning away part of the branches to be overlooked, as the appearance has much to do with the prices obtained.

the trees that had been thinned by hand was nine bushels of first quality fruit, one bushel second quality and nine and a half bushels of windfalls, while on the unthinned trees e yield was only two and a half bushels of first quality fruit, two and a half bushels second quality and ten and a half bushels windfalls. On other varieties the trees that with plums were very similar to those with apples regarding the increased production of fruit. A tree each of Guci and Victoria plums was divided into approximately equal halves, one half being thinned and the other half left as a check. The thinned half of the Guei tree yielded nine quarts of marketable fruit and the unthinned half five and a half quarts. The yield of mark-etable fruit from the thinned and unthinned halves of the Victoria tree was sixteen quarts and nine and a half quarts respectively, the net gain due to thinning being 20 cents and 41 cents respectively. Another remarkable result was that the thinned fruit was much less affected with

The advantages of thinning fruit from the trees are many. Thinning increases the size of the fruit, gives more color and also better flavor. It diminishes the proportion of wind-falls, increases the amount of first quality fruit, and the total yield is larger, while a higher price per bushel is obtained. It lessens the amount of rot, especially in the case of peaches and plums, since the disease can spread less easily where the fruits do not touch each other. Thinning also tends to keep injurious insects in check, as care is taken to remove all infested fruit. Another point is that it weakens the tree more to amount of seeds in the more numerous apples, peaches, plums, etc., tax the trees It is well known that many trees that are overloaded one year seldom bear the next, but by reducing the work required of the trees it is possible to have crops every year. Favorable years, which are marked by great production of fruit, overcrowd the market, low prices ruling, only choice fruit selling at a profit, and with the increase of quality due to thinning follows better prices, a slight increase in the prices being the difference between profit and loss. The proper time to thin is before the fruit becomes so large as to overtax the tree, and the picking of the fruit should be done in a manner so as not to allow the fruit to touch, giving a distance of from four to six inches between each. The advantages of thinning have been clearly shown to be better prices and larger yields, but the greatest obstacle in the way is that of inducing fruit growers to thin the frvit, as many of them look upon the

-Buttermaking has undergone many changes of late years in the line of washing, salting and working, says the Indiana Farmer. Formerly it was churned until it was a solid mass; it was washed once, salted and worked. It was thought best to churn it at a temperature of about 62 degrees, but gradually the temperature has been lowered until now it is not unusual to churn as low as 48 degrees. A low temperature has low temperature has a low temperature has lowered until now it is not unusual to churn as low duced rates. For specific rates and conditions apply to ticket agents. many advantages. The loss in butter fat will be less, the butter will need less wash-ing and have better body than when churned at a higher temperature.

With proper precaution the loss of butter fat in churning need not be more than about 100th part of 1 per cent. The loss depends largely upon the temperature and the evenness of ripening. If the cream has been gathered for several days, unless the oldest has been held at a low temperature. to prevent any partial ripening, or it has been thoroughly stirred each time new cream was added, it will not be evenly ripened, and the loss will be unduly large. Less time will be required to churn at a high temperature, but it will be at the expense of butter fat.

-It is not generally known that our native ferns can be readily raised from the spores-those little dust-like products that are found in great abundance on the under surface of many fronds. A good method is to fill a pot with any ordinary good gar-den soil, three-fourths in depth, the re-maining one-fourth to be filled with brick broken to about the size of peas or beans. This pot can be sunk in a vessel of water to about one-half the depth of the pot. On the broken brick spores can then be sown, and the vessel placed in a comparatively shady spot. The brick will absorb enough water to be continually moist, while at the same time permitting the air to circulate through the vessel. This combination of moisture and damp air is all that is necessary to have the fern spores germinate

freely. -Young chicks should not be fed for 24 hours after hatching, and should not have water for three or four days at least. The food for these should be moistened with milk, which is 85 per cent water, and this is all they need. There is no better feed for them than stale lightbread or bread crumbs moistened with milk. They should not be fed corn in any shape until one week old at least, and then not corn alone. The best form for feeding corn to young chicks is that of good cornbread with enough shortening to make it crumble.

The Pennsylvania Railroad's New Doub le-Track Line to Atlantic City.

With the new schedule of early summer trains in effect May 28th, the West Jersey and Seashore railroad practically opens to travel its new double-track line from Camden and Broad street station to Atlantic

During the winter and spring the line from Camden to Atlantic City has been actually rebuilt. The old light rails have been replaced by new steel rails weighing the ground, the trees were not protected from insects and the quality of the fruit entirely new road has been constructed by

The grade crossing over the tracks of the Jersey Southern railway at Winslow has been eliminated by the building of an ele-vated roadway high above the intersecting by pruning away part of the branches to prevent the formation of too much fruit, or by picking off the superfluous fruit as soon as possible after it has been formed. With such fruits as grapes, raspberries, blackberries and the like pruning is preferred, as it is more easily done than by picking off the fruit. In the case of currants and gooseberries, which are, as a rule. pruned less severely than grapes, raspberries and blackberries, thinning might be an advantage. With currants the removing of the tips of the stems gave 15 per cent more berries to tides. In order that the elevated tracks the stems gave 15 per cent more berries to the cluster, and the separate berries were 7 per cent heavier on the thinned bushes than on the others. There is also the attractive-trevals to carry the accumulated water beper cent heavier on the trinned pushes that on the others. There is also the attractiveness of the fruit in market, which must not neath the roadway and the exposed sides of the embankment have been thickly the heavy and adhesive soil coated with the heavy and adhesive soil dug from the meadows. The new track is It seems like a sacrifice to deliberately remove the fruit from a tee, yet at the Hatch Station the yield of Gravenstein apples on stand firmly the brunt of any ordinary storm. The new roadway has been coated with an application of oil so as to free it from the dust naturally incident to the

new grading.

Under these improved conditions the West Jersey and Seashore's double-tracked lines to Atlantic City form the finest and was from two to eleven times as much as that from the others, the net gain being that from 85 cents to \$1.85 per tree. The results the high standard maintained by the Penn-

sylvania railroad. The summer traveler to Atlantic City by this popular route will enjoy the finest facilities offered by any railroad in the

Recognized Warner.

While Charles Dudley Warner, as it is while Charles Dudley Warner, as it is related, was a guest at an old-time Southern home near Nashville he expressed a desire to see a real, typical negro. So the most loquacious old "aunty" was brought in. To the surprise of everyone she would not say a word beyond "Yes, sah," or "No, sah." After the departure of the distinguished guest she was asked the reason of guished guest she was asked the reason of her silence. With as much dignity and scorn as a grande dame "Aunty" replied: "Ugh! I wa'n't gwine talk to dat Yankee. I knowed him soon as I seed him. He's de very one dat stole mistiss' silver du'in de wah."

Boy's Jaw Shot Away.

Clarence Mover and Roy Heck, two boys, each about 12 years old, and who reside with their parents at Freeburg, Snyder county, were playing war Wednesday af-ternoon, and were armed with loaded guns. er point is that it weakens the tree more to produce large quantities of inferior fruit than to yield the same quantity of first quality fruit in bushels, as the extra amount of seeds in the more numerous aphilosophic and were aim at while loader guins. Moyer feigned to be the Spanish and Heck the American soldier. They leveled their guns at each other and fired. Moyer had his lower jaw shot away and his arm terribly lacerated. Heck was uninjured. The parents of the Mover boy are among Freeburg's most prominent citizens, and the town is in grief over the sad affair.

Expenditures Exceed Receipts.

The comparative statement of the receipts and expenditures of the government show that during May, 1898, the receipts amounted to \$30,074,818, and the expenditures to \$47,849,900, leaving the deficit for the month \$17,800,000. This deficit is accounted for by the increased expenditure on account of the war. The increase as compared with May 1897, is about \$19,500,-000. For the eleven months the receipts show an increase of 1897 of over \$60,000,-

----Humors, pimples, boils, are very annoying. They quickly disappear when the blood is purified by Hood's Sarsaparilla.

Reading Sesqui-Centennial.

Reduced Rates via Pennsylvania Railroad. For the Reading Pa. sesqui-centennial jubilee, June 5th to 12th, the Pennsylvania railroad company will sell excursion tickets from stations on its lines in the State of

The celebration promises to be one of the greatest events in the city's history. Monday, Wednesday and Thursday, June 6th, 8th and 9th, will be special days. The celebration will close with a grand masked carnival on Saturday night, June 11th.

Democratic Primary Election and Coun

ty Convention. The Democratic voters of Centre county will meet at the regular places for holding the general elections, in their respective election districts, on Saturday, June 11th, 1898, to elect delegates to the

Saturday, June 11th, 1898, to elect delegates to the County convention.

Under the rules of the party the election will be opened at 3 p. m. and closed at 7 p. m. The delegates chosen at the above stated time will meet in the Court House, in Bellefonte, on Tuesday, June 14th, 1898, at 12 o'clock noon, to nominate: Two candidates for Assembly, one candidate for Prothonotary and one candidate for District Atorney; elect five delegates to the State convention, to be held at Altoona, June 29th 1898; elect three conferes to the next congressional caucus tion, to be held at Altoona, June 29th 1898; elect three conferees to the next congressional caucus or conference of the 28th congressional district of which Centre county forms a part; elect three conferees to the next conference of the 34th senatorial district, to help select a State Senatorial candidate; elect a chairman of the County Committee, to serve from January 1st, 1899, to January 1st 1900; and to transact such other business as may come before the convention in the interest of the party.

The regular rules of the Democratic party will govern the conduct of both primaries and convention and for the benefit of our voters we herewith append them:

1. The Democratic County Convention of Centre county shall be composed of one delegate for every fifty Democratic votes polled at the presidential or gubernatorial election next preceding the convention. The allotment of delegates to the several election districts in the county shall be made by the standing committee of the county at its first meeting in every alternate year succeeding the presidential or gubernatorial elections and shall be in proportion to the Democratic votes cast in each district at such election.

2. The election for delegates to represent the 2. The election for delegates to represent the different districts in the annual Democratic county convention shall be held at the usual place of holding the general election for each dis-

trict on the Saturday preceding the second Tuesday of June in each and every year, beginning at three o'clock p. m. The delegates so elected shall meet in County Convention in the court house, at Bellefonte, on the Tuesday following at twelve o'clock p. m.

3. The said delegate election shall be held by an election board, to consist of the member of county committee for each district and two other Democratic voters thereof who shall be appointed or designated by the county committee. In case any of the persons so constituting the board shall Democratic voters thereof who shall be appointed or designated by the county committee. In case any of the persons so constituting the board shall be absent from the place of holding the election for a quarter of an hour after the time appointed by Rule Second for the opening of the same, his or their place or places shall be filled by an election, to be conducted viva voca, by the Democratic voters present at that time.

4. Every qualified voter of the district, who at the late general election voted the Democratic ticket, shall be entitled to a vote at the delegate election; any qualified elector of the district who will piedge his word of honor to support the Democratic ticket at the next general election shall be permitted to vote at the delegate elections.

5. The voting at all delegate elections shall be by ballot; upon which ballotts shall be written or printed the name or names of the delegates voted for together with any instructions which the voter may desire to give the delegates. Each ballot shall be received from the person voting the same by a member of the election board, and by him deposited in a box or other receptacle provided for that purpose, to which no persons but members of the board shall have access.

6. No instructions shall have received or recognitions.

bers of the board shall have access.

6. No instructions shall be received or recognized unless the same be voted upon the ballot as provided in Rule Fourth, nor shall such instructions if voted upon the ballot be binding upon the delegates unless one-half or more of the ballots shall contain instructions concerning any office, the delegates elected at such election shall be held to be instructed to support the candidates having the highest number of votes for such office.

omee.

7. Each election board shall keep an accurate list of names of all persons voting at such elections, when the list of voters together with a full and complete return of such election, containing an accurate statement of the persons elected delegates and all instruction voted, shall be certified by said board to the geunty convention upon printed blanks to be furnished by the county convention.

printed blanks to be furfished by the county convention.

8. Whenever from any district qualified Democratic voters, in numbers equal to five times the delegates which such district has in the county convention, shall complain in writing of an undue election, of false returns of delegates or of instruction, in which complaint the alleged facts shall be specifically set forth and verified by the affidavit of one or more persons, such complaints shall have the right to contest the seat of such delegates or the validity of such instructions. Such complaint shall be heard by a committee of five delegates to be appointed by the president of the convention; which said committee shall proceed to hear the parties, their proofs and allegations, and as soon as may be report to the convention what delegates are entitled to seats therein, and what instructions are binding upon such delegates. Whereupon the convention shall proceed immediately on the call of the yeas and nays to adopt or reject the report of the contesting parties; in which call of the yeas and nays the hames of the delegates whose seats are contested or whose instructions are disputed shall be omitted.

9. All delegates must reside in the district that were are inshall in the contestion of the processory of the processory of the contestion of the processory of the pro

the district.

10. Delegates must obey the instructions given them by their respective districts and if violated, it shall be the duty of the president of the convention to cast the vote of such delegate or delegates in accordance with the instructions, and the delegate or delegates so offending shall be forth-with expelled from the convention, and shall not be eligible to any office or place of trust in the party for a period of two years.

11. In the convention a majority of all voters shall be necessary to a nomination, and no person's name shall be excluded from the list of candidates until after the third ballot or vote when the person receiving the least number of votes, shall be omitted and struck from the roll, and so on at each successive vote until a nomination be made.
