A Fine Specimen of a Walled Town With Moat, Gate and Battlements. San Juan is a perfect specimen of a

Democratic Watchman.

Bellefonte, Pa., Sept. 23. 1898.

Queer Old San Juan.

walled town, with portcullis, moat, gates and battlements. Built over 250 years ago, it is still in good condition and repair. The walls are picturesque, and rep-resent a stupendous work and cost in themselves. Inside the walls the city is laid off in regular squares, six parallel streets run-ing in the direction of the length of the island and seven at right angles. The manure or fertilizer is used during the five houses are closely and compactly built of years of the rotation. The crop of 1898

brick, usually of two stories, stuccoed on the outside, and painted in a variety of colors. The upper floors are occupied by the more respectable people, while the ground floors, almost without exception, are given up to negroes and the poorer of the series, and the varieties under test classes, who crowd upon one another in are compared with the plots of Velvet the most appalling manner. The popula-tion within the walls is estimated at 20,-000, and the most of it lives on the ground floors. In one small room with a flimsy

the most uniform soils. The Velvet Chaff partition a whole family will reside has been selected for the standard because The ground floors of the whole town reek with filth, and conditions are most unsanitary. In a tropical country, where disease readily prevails, the consequences of each herdian manufacture and its straw 28.54 bushels per acre and for the six years 20.27 bushels per acre of such herding may easily be inferred. There is no running water in the town. The entire population depends on rain water caught on the flat roofs of the buildings and conducted to the cistern, which occupies the greater part of the courtyard that is an essential part of Spanish houses the world over, but that here, on account of the crowded conditions, is small. There

vermin, mosquitos and dogs.

The streets are wider than in the older

quently impervious to water and furnishes

a good natural drainage. The trade wind blows strong and fresh, and through the harbor runs a stream of sea water at a

speed of not less than three miles an hour.

Besides the town within the walls, there are small portions just outside, called the

Marian Puerta de Tierra, containing 2,000

or 3,000 inhabitants each. There are als
