Bellefonte, Pa., Dec. 2, 1898.

LIFE'S MIRROR.

There are loyal hearts, there are spirits brave There are souls that are pure and true ! Then give to the world the best you have And the best will come back to you.

Give love and love to your life will flow, A strength in your utmost need; Have faith, and a score of hearts will show

Their faith in your word and deed. Give truth, and your gifts will be paid in kind. And honor will honor meet;

And a smile that is sweet will surely find A smile that is just as sweet !

Give pity and sorrow to those who mourn; You will gather in flowers again The scattered seeds from your thought outborn

Though the sowing seemed but vain. For life is the mirror of king and slave,

'Tis just what we are and do; Then give to the world the best you have And the best will come back to you.

-Madeline S. Bridges, in Demorest's.

The City Hall Clock.

Philadelphia's Big Time-Piece Nearly Ready for Operations.

At midnight on December 31st, when the State House bell is ringing in the new year in Philadelphia the City Hall clock will commence to move, the 600 illuminating incandescent lights behind the dials will be turned on, and if nothing goes wrong the huge iron bars that serve as hands will continue to indicate the time without cessation until the City Hall lapses into its original dust. There will be no bells on this clock. The

problems of wind-pressure, illumination and enormous dials have worried the commissioners enough, without further complicating the matter by introducing gongs to strike the hour. The hands will move silently, resistlessly, and, as far as human ingenuity can devise, perpetually.

The tremendous size of the dials, the heavy braces required to keep them in place and the weight of the enormous hands, situated up in the air 370 feet from the ground, have been subjects for general discussion ever since the clock project was broached; but they form one of those combinations of dimensions and weight most difficult to conceive. One can believe almost anything of an object which can not be seen, but the tower clock dials are in plain sight of everybody, and they look but little larger than ordinary dials on a large building. Still, each of these tower dials is 22 feet in diameter, the glass and iron frame weighs more than five tons, and the hands, which look not much larger than lead pencils, weight 400 pounds. The weight of the dial and frame for each segment of the circle represented by five minutes is 525 pounds.

The distance which the minute hand has to travel is nearly 70 feet around the vast eircumference. Only by the closest inspection can the hands of an ordinary clock be seen to move at all, but the minute hand of this ponderous affair will move $6\frac{1}{2}$ inches with a jerk every half minute. With all their weight these hands are so evenly balanced by steel bars, that they can be twirled around the face with one's fingers. It is expected, however, that when once Thirty is an unusual age for an oyster to started the hands of this clock will never attain, because few are given an oppor-

consists of two clocks, is warranted to vary the oyster would become an octogenarian cot more than 10 seconds per month, and or even a centenarian. Cap't. Cochrane on

John W. Keely Dead. "Did the climate out there benefit your

The Inventor of the Famous "Motor" Passed Away asthma?" asked a man on the boulevard of his next door neighbor, who has just rein Philadelphia turned from a new resort in the North-

John W. Keely, who stirred the scientific world twenty-five years ago with a pro-position to revolutionize mechanics by the 'Say, it makes me short of breath to use of a force called etheric vapor, died unthink about it. I was sitting out in a sort expectedly at his home in Philadelphia, of an arbor the first afternoon after 1 Friday of pneumonia. He had been ill a reached there. I was in the shadow of a week, but the attending physician had no apprehension of a fatal termination until

Thursday. The mysterious motor was first exploited in 1874. Of recent years Keely had at-tracted little public attention. It was his habit to give occasional private exhibitions of the Mechanical power of his alleged etheric force. There has not been one of these exhibitions for at least five years. Keely had been failing in health for

more than a year. He was injured in a runaway accident a year ago and never fully recovered his strength. He leaves a widow. His nearest associate in the work

of his alleged experiments was Charles B. Collier, his attorney, who, it is presumed, will be his executor. Whether any provis-ion was made for the disclosure of his secret at his death is unknown. Attorney Collier, it is said, is writing a book on Keely and his alleged discovery, and perhaps all that will ever be known will come

1837. His father's parents were German and French, his mother's were English and Swede. His grandfather, Mr. Ernst, was a composer and a leader of an orchestra in Baden-Baden. His father was an iron benefited and began to think life to me was not worker. Keely, early in his life, was a circus performer and a sleight-of-hand per-

former. Some twenty-five years ago Keely an-nounced that he had an engine which went of its own accord. He called it then a "hydro-pneumatic-pulsating-vacuo en-gine." He had a different name for it every year, and he made some 3,000 differ-ent engines of the same kind. Engineers, scientific men and capitalists made frequent pilgrimages to Keely's Philadelphia labora-tory to see the "Keely motor mote." Semetimes it "moted" and comptiment. pilgrimages to Keely's Philadelphia labora-tory to see the "Keely motor mote." Sometimes it "moted" and sometimes it the heirs all the square timber belonging didn't, but Keely always had a great tale to the estate in the Delaware river, at to tell. Keely's chief accomplishment was EARNED NOT BOUGHT.

of other things which didn't mean any-thing, but never told why his motor 'moted," and never took a patent. He was always going to startle the world, but never did. The world got tired waiting. Some prominent New Yorkers took Keely seriously enough to raise \$100,000 and form a company to put his motor on the market. Keely spent \$10,000 of this paying his debts and \$60,000 building a worthless "motor." In 1888 he was committed to jail for contempt of court for refusing to explaining to a committee of experts the working of his machine. Mrs. Bloomfield Moore, who had literary and scientific tastes, had a faith in Keely bordering on fanaticism and spent something like \$100,-000 on hum. She sold her horses and carriages to get money to give to him. Keely's last "invention" was a machine like that

STAYING POWER COUNTS IN A LONG

STERN RACE.

Bellefonte people need not be told how hard it is to earn and maintain a g ood reputation, and how easy it is to lose one. After such a loss it is well nigh impossible to recover the ground and the majority who have slipped by the wayside have been forced to stay there. As with a man's reputation so it is with medical preparations. Some achieve a reputation which stays with them. It is founded on intrinsic mer-it and not sustained by claborate ad-vertising. It facts the public backed up by honesty and works its way quiet-ly but thoroughly. Bellefonte people want no better proof of the reputation earned by Doan's Kidney Pills than the following experience from a citi-zen: Mr. H. C. Yeager, of the Breat

earned by Doan's Kidney Pills than the following experience from a citi-zen: Mr. H. C. Yeager, of the Brant House, says: "I have not changed my mind regarding Doan's Kidney Pills which did me so much over two years ago. What they then did for me was done permanently. At the time they relieved me of a depressing backache and lameness across my kidneys and I can recommend them as ardently now as I did then. I have never had the severe pain in my back since. Doan's kidney pills are all right." Just such convineing proof of the claims made by Doan's Kidney Pills is plentiful in Belfeonte. Drop into F. Potts Green's drug store and ask him what his numerous customers says Doan's Kidney Pills for sale by all dealers. Price 50 cents. Mailed by Foster-Milbura Co., Buffalo, N. Y. Sole agents for the U. S. Remember the name Doan's and take no substitute.

Immense Tract of Pine Sold and Soon to be Mar-John N. Ake and John H. Patchen, executors of the A. W. Patchen estate, Clearfield Co., closed the sale of all the lumber adjoining the Susquehanna river in Clearfield county to the Bowman Foresman Company of Williamsport, for \$165,000. The timber belonging to the estate in Indiana and Cambria counties not included in this sale. They also sold all the logs in the river to Elias Deemer, of Williamsport, for \$10,-Messrs. Ake and Patchen purchased from

when it is cut all the Clearfield pine will have gone to market.

He who wishes may find out the exact age of an oyster, though he has not the tell-tale evidence in teeth. The lines in the groove of the hinge of the shell tell the whole story, each line representing a year. An oyster is of age at four years-that is, he is old enough to vote, take care of a family and go to market. Going to market is a disastrous undertaking, for a four-year-old oyster is particularly palatable. By this it must not be supposed that after an oyster has passed the four-layer period, and has five, six or even 10 wrinkles on his shell, he is a back number. Indeed, there are records of oysters being eaten just after celebrating their 30th birthday, and in most cases they formed a delicious meal.

The master clock, which, by the way, in his own way, it is quite probable that

ped me up in a horse blanket, a big wire nail serving as a shawl pin." "Got through all right, did you?" from that source. "Yes, providentially.
