Thursday, Aug. 10th, she passed calmly away with the members of the family by her bedside.

The deceased was born in Half Moon valley 82 years ago. Her maiden name was Leah Stine. In the faith of the Methodist church she has taken her departure but her Christian influence and godly life she has left behind so that those who follow in her footsteps will become jewels in the home and in the church. She leaves to mourn her loss six children, 62 grand-children. 30 great grand-children, one great great grand-child, one sister and two brothers, John, Philipsburg; Wm. and Mrs. Joseph Lowery, Coleville; Mrs. Nelson Lucas, Washington, D. C.; Mrs. Daniel Powers, Kansas; Mrs. John McDivit, Pittsburg; Mrs. Ellis Way, near Unionville. Her husband preceded her to the grave twelve years ago. The services were held at the house and conducted by Rev. King, who based his remarks on the first verse of the 14th chapter of John.

DIED WITH CONGESTION OF THE LUNGS. -Miss Anna R. Greene, daughter of F. Peebles Greene, died at the family home on South Water street early Sunday morning, after a short illness with congestion of the lungs brought on by an affected heart. She had been in delicate health for several years previous, but it was not thought that her death was so near at hand.

Miss Greene was born Oct. 16th, 1863, at Manor Hill, Huntingdon county, where the early part of her life was spent until her parents came to make their home in this place. She was distinctively a home girl and before the failure of her health was a great comfort to her parents. Having joined the Methodist church early in life she was active in all departments of the church work so long as she was able and no task for the Master's cause was too great for her to undertake in the zealous sincerety of her

COUNCILMEN IN TROUBLE.—The mem bers of the Tyrone council and the owners of the water works from which that town is supplied with part of the liquid it drinks have had a fight over the question of water rents. The result of the difficulty has been to cause the water company to shut off the supply of water to the fire plugs in the town. Of course this left Tyrone entirely helpless in the event of fire and four of her councilmen: Walter Burley, John K. Ray, W. Fisk Conrad and Emory Piper, started and turned the water back into the plugs. They had succeeded in re-establishing six when they were arrested at the instance of the water company.

They were given a hearing before a magistrate in Altoona on Saturday afternoon and each fined \$60. The councilmen will appeal their case to court.

Being out on the northern end of the firing line now we have a splendid camp, although it is a little dangerous on out post duty with the Filipinos scarcely three miles away from when we were wading through rice fields and in water up to our waists while chasing the "\$2 niggers" from our lines. None of the boys were hurt, however, and as we have a splendid captain who handles us always to the best we came out of the brush feeling quite like you would after a good afternoon's sport at Hecla park. In the June number of Scribner's magazine is published a very fair picture of the block house at which we are encamped. It is called Caloocan.

I would like to get a couple of Filipinos before any of them get me, if that is to be my fate. It is so easy fighting them and we have over a thousand prisoners. Don't expect me to write often as paper and envelopes are both hard to procure out here on the firing line and there is no telling here on the firing line and there is no telling when there will be an end of it, as it seems to be the policy to keep up a desultory conflict in winning and then abandoning territory, instead of making a concerted, aggressive campaign that would at least allay the Filipino suspicion that we are cowards. * * * Tell the boys that monkeys are worth only \$1 here and parrots are \$2 per pair.

While here he stopped at J. B. Mitchells.

Last Saturday our school board met to pass judgment on the new school house Joe Meyers built on the Kepler district. It is now fully completed ready for the furnishings. The building is painted white with brown trimmings and is a credit not only to the builder but to the board and township. Mr. Meyers is an excellent mechanic and a hustler but 'tis a pity that he is a Republi-can. He was recently awarded the contract for eight houses at Logan. The old school house was sold to Levi Krebs for \$32,50.

There is, however, just a bit of suspicion that the present brood of hoppers will lay sufficient eggs to yield a crop that will next year do great damage. Several laborers were at work this week in

the cemetery. The graves in what is known as the old section of the cemetery were leveled off and an effort will be made to eradicate a poisonous vine and other obnoxious weeds The cemetery association is in such a financial condition that it could and ought to spend more money to improve the ground s. The part of the burying ground referred to is crowded with graves and many have entirely been obliterated on account of not having head and foot stones. By the expenditure of a little money and labor frequently a great improvement could be made. The trustees, no doubt have in mind to clean up this badly neglected section of the cemetery and their efforts will be appreciated by those who pay personal attention to the graves of friends and relatives. Don't stop the good work until it is thoroughly done.

The citizens of the writer was the guest of the Peters and From town, except the members of the old water company and a few allies, are satisfied with the condition of affairs regarding the borough water plant, they are not complaining. B. H. Arney is a man who figures pretty carefully and can be trusted as to truth. He estimates that on Monday two thousand barrels of water were consumed. On Tuesday evening there were more than three feet of water in the reservoir, which, by the way, is more than the largest reservoir of the old company holds. At this writing the surplus in the reservoir is gradually gaining, and there is a full supply for "domestic and mechanical purposes." It may be said to the new plants credit that at no time since its operation have the fires in engines been drawn for want of water, which was the case frequently heretofore. If the present supply is not sufficient there are other neverfailing springs that can be utilized.
