

## Bellefonte, Pa., Sept. 8, 1899.

FARM NOTES.

The fall is the best time for applying lime | tuted for peaches if preferred, or if the laton the soil, though some farmers use it early in the spring. It does well when a

use on farms, that from limestone being if it had not already made the Stanislaus preferred, but lime made by burning oyster shells is also excellent, while wood ashes contain a large proportion. The lime from that a woman must be blind not to see its stone being taken direct from a mineral advantages. Contrast any one of the old substance, the shell lime being a product of fashioned women, whose waist was often shell fish, while that in ashes is produced shorter in front than in the back, or even through vegetable sources. In all cases, however, the lime is the same, but in variable quantities, according to the materials slants, for confirmation of this assertionfrom which it is derived, though stone lime gives the most direct results. When limestones or shells are burned there is a liberation of carbonic acid, the substances being changed from carbonate of lime to lime; but as lime has a tendency to revert to carbonate of lime it is disposed to take carbonic acid from the air or any substance con-taining it in the soil. When slacked with water the result is hydrate of lime, and atmosphere, becoming a fine white powder, in which form it is used on land. If the hydrate of lime is not immediately applied being then in the same condition as before being burned. It has really turned to limestone, only it is in the form of a fine powder, and has then lost its power to exert immediate chemical effect. Lime should therefore, be applied as soon as it is sufficiently air slacked to become fine.

## THE VALUE OF LIME.

which are quickly available for plants. While it enters into the composition of all plants, it must consequently exist in all plants; and whether the soil is light or heavy, sterile or fertile, there is some In Paris they are often made in silk. wi per acre on light soils and 40 bushels on heavy land, but even 10 bushels will show some result, as lime fits the soil for the presence of micro-organisms which perform food, an alkaline condition of the soil bedering soluble many inert materials that morning suits. could not be employed as plant food, but which exist in the soil abundantly. While lime is not, therefore, a necessary adjunct to the soil with other fertilizers, and gives but little direct benefit to a crop itself, yet its indirect action unlocks stores of material and supplies the crop with available fertilizer. The action of lime in the soil has

FOR AND ABOUT WOMEN.

If you want a good dessert made of peaches try this one. Peel and pare two ever befall any country would be to have its inhabitants fully agreed upon all quesquarts of peaches; place in a dish with one small cupful of sugar and set in a cool tions. place for two hours; mash fine; add one quart of water and freeze. This makes a delicious dessert. Oranges may be substi-As "competition is the life of trade," so is controversy the guarantee of ultimate righteousness In the seventeen-hundred-and-seventies,

green crop has been plowed under and the lime broadcasted over the surface of the land. Lime is procured in two forms for a substantial fashion their belief that this great and glorious country of ours should be continued as an outlying ward of Great Britain. Others, among them the immortal G. Washington, also an Englishman, obected, and a controversy followed, the result of which we annually celebrate by the of powder. one whose belt knew no deviation as it encircled her, with one whose waist line States. but here comes the usual difficulty with extremists, there is really no necessity for placing the belt half way up the back in order to obtain that slant.

That's what many women do, however. They place their girdle at least two or three inches above the waist line in the back and then draw it down about to the waist proper in front, by dint of which manipulation they manage to obtain a "slant" which when air slacked it takes water from the makes them look more than a trifle deformed.

The slanting waist line on a woman who simple every-day principles. holds herself according to the laws prescribbut remains long exposed to the air, it ed by health and beauty and whose figure unites with the carbonic acid of the atmos-phere and becomes carbonate of lime again, trick about it, and the belt ought to rejority is apt to be always strong as well as quire neither pins, nor hooks, nor screws to sometimes wrong, and this, when the queskeep it in position. The waist itself slants -therefore the girdle must. The latter are often deplorable. should not be worn too tight, if the effect is to be of the best.

Sleeves are being made with a band of and then he at once ceases to be either three tucks around the armhole, so as to keep them quite flat, and yet give a little Nearly all, if not all, war could be stop-Lime is not classed among the fertilizers keep them quite flat, and yet give a little relief to the severe outlines which not every shoulder can do with. A sloping shoulder line is once more the accepted standard of battle all the men, on both sides, who had beauty. For this reason apparently we are publicly recommended war. A certain New soils; but its value depends more upon its tendency to hasten chemical action in the scarfs. The fichus are made in batiste, in or-scarfs. The fichus are made in batiste, in orsoil, rather than upon its use as food for gandy and in net, and often in flowered he for the start of the recent war with mushin, but the scarfs are mostly white. In Paris they are often made in silk, with heavy, sterifie of view when applied to change induced by lime when applied to the land. Its tendency is to work down-ward for which reason it is advantageous to ward for which reason it is advantageous to black finding special favor, and many gauze first application, beginning with 30 bushels scarfs were worn at the beginning of the Cheering words, those, for the mothers and century, with embroidered ends, so, per-Philippine swamps.

haps, we shall come to some of these. We are adopting transparent yokes, collars and collar bands, but the great art is remains beneath the civilized surface of an important function in providing plant to make them as high and no higher than our citizens, it may be necessary to admit they are needed. It is a great mistake to that sometimes war is justifiable. It would ing sometimes necessary. As carbonic acid is largely generated by the decay of vegeta-wear. A novel collar band emanating from wear. A novel collar band emanating from all agreed, but it is important that the jusble matter in the soil the application of Paris is a stitched plain band of ribbon, tice of the cause be made apparent to those lime creates many chemical changes, in which other mineral and organic substances at the throat and finished off in a pointed, lightly referred to as the "rabble." are broken up in their combinations, ren- short tab. soil on which it is used.

LIME AND FERTILITY

that provides the plant food and not the lime. enables the materials added to the soil to or beige, as the case may be. assume the forms most available for plants. When the land is sour and grown up with sorrel (which contains oxalic acid) lime is said then to "sweeten" the soil by removing the sourness, but what it really does is to assist in changing the acids of the soil into carbonate and oxalate of lime through chemical combinations, the sour soil becoming alkaline because the lime has taken up the acids which existed before its presence. With the changes thus made follows others, but they may be rapid or slow according to circumstances, sometimes the the second year; but on soils upon which lime has not been applied for years it never nificance to the bodice that no amount of fails to give excellent results, and in pro-portion to the benefits derived it costs but little, is plentiful and should be used more extensively.

w down wagons, but can be made serfected by frosts in winter, the low wheels as best suits the figure. Hence its name. cannot always be used. If good roads are made, however, the low down wagons will do more to keep the surface of the roads hard and smooth than the road roller, but if narrow wheels are used by some farmers the roads will be cut up. Low down wag-ons, however, are very handy for use on the farm.

-The land that produced potatoes this Cut into squares and bake. year may be infected with disease, and it will be proper to plant potatoes on some other location next year. It will be in order this fall to lime the potato plot, which will greatly aid in destroying the spores of fungi and thus assist in lessening the liability of scab or some other disease in the future. All potatoes taken from the land should be carefully examined before storing them for the winter, as any that are unsound will affect the whole.

-When the vegetables are stored away this winter there will be less risk from cold and made the cape yourself, so that what than from warmth.
