# Democratic Hatchman.

Bellefonte, Pa., Dec. I, 1899.

As To New States.

A convention has just concluded its sessions in Oklahoma which has for its subject the admission of that Territory to Statethe matter before the coming meeting of Congress. This will not be the first attempt to secure the same object. The matter was up before the last Congress, but the Oklahoma Statehood bill, along with simi-lar measures for Arizona and New Mexico Territories, was defeated by the negative action of the committees on Territories of the House of Representatives in January, 3. CHEMISTRY with an unusually far and horough course in the Laboratory.

11. MILITARY SCIENCE; instruction theoretical and practical, including each arm of the serical and practical, including each arm of the serical and practical including each arm of the serical content of the seri vice. 12. PREPARATORY DEPARTMENT; Two District of Columbia and the Indian Terri-years carefully graded and thorough. tory, which two latter will also require special legislation.

> The Territory of Oklahoma was organized in 1890 out of what was then the western portion of Indian Territory. With some additions from the same source it now public land in the Territory was opened to white settlement on May 22, 1889, yet the census taken in June, 1890, showed a population of 61,834. By the auditor's census and no doubt that we need them for our public life, also."
>
> however, in the hands of the Boers. When, in 1887, the Gras rifle became obsolete in the French army through the adoption of the Lebel weapon, the stock was offered public life, also." has area of about 40,000 square miles. The public land in the Territory was opened to of 1894 it was 212,635; the Governor's report gave it as 275,587 in 1896 and 311,-400 in 1898, and it is probably now estimated at about 350,000. The number of Inted at about 350,000. The number of Indians in the Territory in 1898 was 13,033. They have no taste for pie or pudding As a matter of fact, all sorts of weapons The population figures are productly specified, but they are well borne out by the number of votes cast. In 1896 53,705 votes sphere where they are wholly unhappy and unsuccessful? Congress, of which 27,453 were given to the Democratic and Populist candidate, and 26,267 to the Republican one. The same year the Fusionists had 36 of the 39 members of the two houses of the Legislature. The state of things politically, which was repeated in Arizona and New Mexico in 896, probably aided very much in making the decision of the Republican majority of the House Committee on Territories adverse to the applications of all three for Statehood. The people of Oklahoma, however, not discouraged by the action of the committee in January, 1898, showed at the election held the following November that they were willing to learn in matters political. At the election for delegate to Congress held at that time they chose the Repablican candidate, who had been defeated in 1896, his vote being 18,456 out of a total of 48,813. At the same time the Republicans captured 25 out of the 39 members of the Legislature. In 1898 New Mexico also joined the Republican column, but Arizona still remained Democratic and Populist. The total vote of New Mexico in 1896 was 36,030 and last year 35,381. That of Arizona in 1896 was 14,000, and in 1898 15,-596, so that the population of Oklahoma, according to the vote cast, is equal to that of Arizona and New Mexico combined.

Union. Each has more people than Nevadahas today. Delaware has fewer people than either New Mexico or Oklahoma, and the same is true as to Idaho, Montana and Wyoming. Oklahoma exceeds Utah and however, either population or present party that each new State will add two members prevent the admission of some or all of the Territories now anxious for Statehood, by the incoming Congress.

# No Twilight.

Bunset at the Equator—Millions of Shooting Stars. The days and nights are of equal length. The sun knocks off promptly at 6 o'clock in the evening and gets up at 6 in the morn- grained candy and pays in the end. ing with equal regularity the whole year around.
