Democratic Matchman.

Bellefonte, Pa., August 31 1900.

FARM NOTES.

-The summer pruning of bearing grape vines should be limited to pinching a few of the strongest shoots and cutting away enough rank growth and foliage fairly to expose the bunches of fruit to the sun. Many experienced growers are beginning to think that the less the vines are meddled with during the growing season the better, but it seems allowable to remove such surplus growth as may interfere with the development and ripening of the fruit.

-Plow early for fall wheat. This is especially important during a dry season. It is necessary that the ground become com-pacted before the seed is put in. If early plowing is impossible, accomplish the same results by dragging and harrowing until the seed bed is well fined. The soil moisture is then retained much better than when the ground is loose, the roots of the plant become well established and are not

fected two drams of saltpetre and one dram of fluid extract of gentian root in one ounce of whiskey and one ounce of water. Add ten drops of the fluid extract of belladonna leaves if there is a cough accompanying the other symptoms men-tioned

ing: Sulphate of quinine, four drams; tincture of the perchloride of iron, one and a half ounces; water, one pint. The dose is two ounces three times daily until the horse feels entirely well and all dis-charge ceases. The disease is infectious and for this reason affected animals should be kept separate from other horses.

On the same principle, if skirts are folded for packing across instead of lengthwise, they will travel better. They get the long lines found on any vine, plant, shrub, orchard or nursery tree, and providing measures for the eradication of the same," By the provisions of this act township auditors and city councils are required to appoint three freeholders of each township, city or sufficiently in wearing and the cross lines in packing are more satisfactory. three freeholders of each township, city or borough, whose duty shall be, upon or without complaint, to examine trees of fruit supposed to be infected. A distin-guishing mark shall be placed upon dis-eased trees, and the owner notified per-sonally or by written notice, and its dis-position be made according to the pre-More than one woman spends a lot of money on a best black silk which she saves up for grand occasions; then when the time comes around to wear it she spends a lot more money getting it altered position be made according to the provi- up-to-date. sions of the act.

FOR AND ABOUT WOMEN.

It is a wise woman who never asks what she has no right to know and never tells others what they have no right to know.

If you wish to retain your youth to "a

quart a day is desirable. A pint of hot water sipped slowly before eating is very good when a tendency to rheumatic troubles exist.

Always eat slowly; nothing will age you more quickly than an improper assimila-tion of food, and this is one of the faults most of us commit.

Now that cucumbers are cheap, it is an excellent opportunity to make this, says *Home Chat*: Put six ounces of almond oil -Symptoms of pinkeye are in stiff shoulders, one or more legs swell badly, sometimes to the body. The eyes become swollen and matterated, look glassy and the horses become blind or nearly so. The following treatment is recommended. Place the sick horses in a clean, airy, well liquid add one ounce of white wax and one ventilated stable and keep pure water be-fore them all the time. Every four hours, oftener in bad cases, give each animal af-mixed; then take off the fire and beat with an egg-beater till cold, adding gradually

Keep the eyes constantly covered with a soft cloth, kept wet with a solution of forty drops of chloro-napholeum in one quart of water. The patients should be fed anything they fancy, and after the fever subsides and the appetite returns stop the other medicine and substitute the follow-ing : Sulphate of onjing four drams: paid to the bath in hot weather; and to brisk rubbing with a crash towel that fol-lows the bath. Insensible perspiration forms a crust upon the surface that should be removed at least twice a day, if one would here the skin aleas and here the

would keep the skin clear and healthy. horse feels entirely well and all dis-rge ceases. The disease is infections for this reason affected animals should kept separate from other horses. Some breeders, among them Bakewell Western, were thirty years in perfect.

Situation Discussed. American Troops Likely to Remain in China All Win ter.

The reply of the United States to the application of Li Hung Chang for the appointment of peace good, old age" one of the most important things to remember is not to eat too much meat. Meat once a day in small quantities is sufficient. Vegetables and fruit should always be eaten freely and drink plenty of water. It is a curious fact that most people drink too little instead of too much water; at least a out a day is desirable. A pint of how to the context of the appointment of peace commissioners has been completed and a copy of the reply sent to the Chinese minister, Mr. Wu, to be forwarded to Earl Li. The State Department made definite announcement that the reply had been con-veyed to Mr. Wu, but added to its official utterance that the correspondence would not be made public now. A copy

of the reply was sent to other governments represented in China. The American reply is chiefly character-ized by its firm tone and its brevity. Its keynote is the president's attitude as laid down in the American note of July 3rd and there is the attitute of July 3rd and there is the strictest adherence to the points enunciated at that time

The most important development as to the actual conditions in Pekin came when the State Department made public a dispatch from Min-ister Conger, dated at Pekin. It was given out with the following statement :

ster conger, the following statement: "The State Department authorizes the announcement of the receipt at an early hour this (Wednesday) morning, through Mr. Fowler, the consul at Che Foo, of a telegram from Mr. Conger in the depart-ment cipher to the following effect: "When you are tempted to be naughty, Johnny, you must say, 'Get thee behind me Satan.'" "Huh! 'N' let de old feller git right in de push? No 'ndeedy;'d rather have 'im in front, where I c'n keep m' eye on

ment cipher to the following effect: PEKIN, August 19.—Secretary of State, Wash-ingcin: The entire city with the exception of the imperial palace is occupied by Japanese, Russian, British, Americans and French. It is being ap-portioned into districts for police supervisioa. The Chinese army fied. The imperial family and the court have gone westward, probably to Si An Fu in the province of Shen Si. No representatives of the Chinese government are in sight in Pekin and the conditions are chaotic. The palace is ex-pected to be taken immediately. Many mission-aries have started for home, while others remain in charge of the Christian refugees, numbering about 1,000. [Signed] 'CONGER.'' Mr. Conger's message was particularly welcome to officials in showing how com-pletely the entire city is dominated by the allies. Minister Conger makes no mention

allies. Minister Conger makes no mention of his desire to come home and it is stated officially that this government has made no uggestion that he return to this country. The military situation was of quite as much interest in the developments as was the diplomatic. Admiral Remey reported early in the morning, bringing the story of the Pekin operations up to the 16th and confirming the press report already printed of the death of the gallant Captain Reilly in the first assault on the outer walls of Pekin. Almost as important as the Pe-kin news in this dispatch was the statement that the Boxers are again concentrating around Tien Tsin, and that last Sunday morning the Sixth cavalry, with about 400 English and Japanese troops, had a lively brush with the Boxers eight miles outside of Tien Tsin, where about 100 of the Chinese were killed and five Americans wounded. It was evident from Admiral Beneric and the failed for the thet while Remey's account of this affair that while the Chinese were in force enough around Tien Tsin to make considerable show, they are evidently not in the humor to hotly contest an engagement. The casualty list in this fight seems to indicate a sudden and total rout.

Won His Bet.

ien who are you

In some manner the cheeky man gained admittance to the senior partner's private

"Don't want any brooms, books or soap," said the senior partner, without looking up. "Sir!" exclaimed the cheeky man. "I would inform you that I am no ped-ler."

Wages and Salary.

"Pa." "Well?"

"What's the difference between wages and salary?"

"If a man is working for \$5 a day run-ning a machine of some kind, or laying brick or doing something else that makes a white collar and cuffs uncomfortable, he gets wages. Do you understand what I nean?" "Yes, sir."

"But if he sits at a desk and uses a pen and gets \$11 a week and has soft hands, he receives a salary. Now do you see the difference?"

Struck by a Meteor.

Rev. Mr. Burton, of Madison Va., was struck by a meteoric stone last Sunday afternoon. It fell inside his coat sleeve, burning his arm and a hole in his coat, through which it fell to the ground. It was intensely hot, and it was some time before it could be touched by the hand.

Had His Doubts.

The fire in the famous Summit Hill mine, Carbon county, which has been burning for the past forty-five years, is spreading rapidly toward the east end, and is fast gaining uncontrollable head way. A few days ago the pump at No. 9 colliery which forces the water into the mine broke, and since then the fire has spread rapidly.

GOSHEN, ILL. Genesse Pure Food Co., Le Roy, N. Y. : Dear Sirs :-Some days since a package of your GRAIN-O preparation was left at my office. I took it home and gave it a trial, and I have to say I was very much pleased with it, as a substitute for coffee. We have always used the best Java and Mocha in our family, but I am free to say I like the GRAIN-O as well as the best coffee 1 ever drank. Respectfully yours, 45-96

Sprinklers Etc.

Any owner or lessee who is dissatisfied with the decision of these commissioners, on the ground that his trees or plants are

fowl subject, gives the following simple directions for protecting setting hens against lice and mites, which is their be-setting annoyance: A cheap and easy method of destroying these pests and keep-ing them from the setting hens, it says, is to place one or two of the camphorated balls (such as those displayed in the win-dows of drug stores) in each nest. They cost very little and by putting them in the nest the work is done, a single ball lasting through the entire warm season. through the entire warm season

Every time the hen goes on the nest she imparts heat to it, and a portion of the camphor ordorizes her body and also the material of the nest; lice giving it a wide berth. One of the balls, if placed in a vial of sweet oil, and applied to the heads of the fowls and chicks, on the shanks or under the wings, will also prove serviceable in preventing scaly-legs and destroying the

house and use plenty of carbolic acid in the wash; put it on thick over the roosts, nests, and every board, to kill the insect eggs, lice, mites, and germs of contagious diseases, if there is any, and to purify and keen things healthy

keep things healthy. Chicks will commence to scratch when they are but a day old, no difference wheththey are but a day old, no difference wheth-er they see the old hen scratch or not. If they are hatched in an incubator and rear-ed in a brooder, they will scratch just the same. This proves that scratching comes by intuition and is nature's plan whereby fowls may get their living. It is a sensi-ble thing to believe that fowls should be made to scratch for nearly all they eat. Scratching will tend to make them vigor-ous and prolific. ous and prolific.

Newport introduced the fad for the brown veil, which is still in favor at the on the ground that his trees or plants are not diseased, may appeal, but an owner neglecting to report and destroy or cause to be removed, shall be deemed guilty of a misdemeanor and punished by a fine not exceeding \$100, in the discretion of the court. Provision is made for the payment of commissioners at the rate of \$2 per day. of commissioners at the rate of \$2 per day. —The American Game Keeper, which from the name should be authority on the fowl subject, gives the following simple directions for protecting setting hens against lice and mites, which is their be-setting annoyance: A cheap and easy method of destroying these pests and keep-

der the wings, will also prove serviceable in preventing scaly-legs and destroying the large lice. For chicks only use one or two drops of the mixture, as grease of any kind is in-jurious to chicks. Scarlet golf waists have never been so attractive as now. Flannel has very generally given place to ma-terials of lighter weight, so that the scarlet waist so attractive on the links, is not the basis of the second jurions to chicks. If preferred a mixture may be prepared by using 1 part lard oil, 1 part linseed oil, a few grains of campbior and 2 or 3 drops of oil of sassafras, shaking the mixture well before using. Whitewash the top and sides of the hen house and use plenty of carbolic acid in the wash; put it on thick over the roosts,

those of clinging flannel. There has been this season a decided effort to make the bright green golf coat rival the earlier scarlet favorite, and some women have adopted it for variety's sake or because the green is less trying to a
