FRANCISCUS THE MAGICIAN. -Garman's opera house held a fine audience Tuesday evening when the curtain was rung up for the first appearance of Franciscus, the magician, in this place. It was a curious audience, as well, for it was there to be en- ling at his belt. Pool is about the only diversion tertained by a man of whose art it knew little. He came unheralded in necromancy but departed with the distinction of having given as pleasing a performance of its kind as has ever been seen at Garman's.

In his stage settings, paraphernalia, cos tumes and mechanical effects Franciscus has evidently spent years of study, for one scheme prevails throughout the entire entertainment and his conception of it is carlegerdemain are almost as adroit and skillful as those of the world's greatest magicians and the execution of those in his program is about as near perfect as it is possible to get them.

His best hand work here was the passing of the coins from one hand to another. His little mechanical tricks were all pleasing and full of surprises for his audience; the best ones being his series of bird tricks, some of which were little short of miraculous. In the more pretentious mechanical They were both drunk and were jailed for illusions his Egyptian sarcophagus brought rounds of applause. The spectacular dances of "Solaris" were

His visit to Bellefonte was a very welcome one, since he had not been here for some time. His long absence is explained by the fact that he has given up the life of a pedagogue and gone to Johnson burg, where he is permanently employed at a nice salary and has nothing to do but scale lumber all day long. He likes the business and from all ap pearances it likes him. He tells a very funny tory as to why he has to wear his close cropped so that he can keep his tally sheet properly.
