n short, if you wish to secure a training that will fit you well for any honorable pursuit in life,

THE PENNSYLVANIA

STATE COLLEGE

OFFERS EXCEPTIONAL ADVANTAGES.

TUITION IS FREE IN ALL COURSES.

TAKING EFFECT IN SEPT. 1900, the General Courses have been extensively modified, so as to furnish a much more varied range of electives, after the Freshman year, than heretofore, including History; the English, French, German, Spanish, Latin and Greek Languages and Literatures; Psychology; Ethics, Pedagogies, and Political Science. These courses are especially adapted to the wants of those who seek either the most thorough training for the Profession of Teaching, or a general College Education.

The courses in Chemistry, Civil, Electrical, Mechanical and Mining Engineering are among the very best in the United States. Graduates have no difficulty in securing and holding positions.

YOUNG WOMEN are admitted to all courses on the same terms as Young Men. THE FALL SESSION opens Sepember 12th, 1900.

For specimen examination papers or for catalogue giving full information repsecting courses study, expenses, etc., and showing positions held by graduates, address

An Ohio Bank Looted.

Seven Men Took Part in a Bold Burglary in the Buck

hounds to be Used. Bandits Displayed Coolness.

insured and its business will not be in-

A heavy explosion in the bank building

shortly before 2 a. m. aroused citizens liv-

ing in the vicinity of the bank of Somerset.

John Hayes, whose home is directly op-posite the bank building, raised a window

and quietly observed four men stationed

He saw that the whole front of the two

story brick building in which the institu-

tion was located had been shattered, and,

believing he could frighten away the men

who, it was evident, were much alarmed

by the strength of the explosion, hastily

donned his clothes and sallied forth. When he reached the sidewalk he was challenged,

and, under the influence of four rifles point-

ed at his head, again mounted the stairs

Meanwhile many other persons began to appear in the darkened streets of the vil-

lage. William Lovett opened fire on the bandits with a rifle, but his aim was not of the best, and his shots only served to draw

the fire of the robbers. The shooting soon

became general, as citizens crept toward

the bank from all directions and the robbers

others emerged from the debris of the bank,

bearing several sacks into which they had

hurriedly placed their loot. The robbers

were under good discipline and their leader

Single file they marched under the

shawows of the trees which lined the side-

Citizens took up the chase and at 4 a. m

found the rigs deserted along the roadside. The sheriff of Perry county had been noting

cessfully tracked around town by the hounds.

It was found they had broken open a blacksmith shop to secure tools and then had taken the rigs in which they had

escaped from a livery stable near the bank. So successful were the hounds in their

work that it is hoped that the entire gang

will be bagged.
President Samuel Beam, of the Somerset

bank, said this morning that his institu-tion will not suffer in the least except for

the inconvenience caused by the wrecking of the vault and the blowing out of the front portion of the building. The loss is fully covered, he said, by burglar insurance. The bulk of the bank funds, are on depos-tion of the policy of the robbers.

it in other cities; otherwise the robbers might have been richly rewarded for their

The Liberal Arts.

Notable Exhibits to be Made at the Pan-America Vast Field Covered by the Exhibit and the Methods to Be Followed In Its illustration at the Exposition at Buffalo Next Summer.

The building which is to house the exhibit in manufactures and liberal arts at the Pan-American Exposition at Buffalo will be one of the most imposing in the splendid group surrounding the Court of Fountains. This building is 500 by 350 feet, with a central court and having a dome 70 feet in diameter over the entrance on the south.

Manufactured products and those illustrating the liberal arts are so closely allied that they naturally are classified in the same general group, and at the great expesitions of recent years they have been housed under the same roof. Under the general classification of liberal arts are included such subjects as those of education and social economy, books, periodicals, scientific apparatus, eye State. Took Cash and Valuable Bonds. Many Citizens Pursued Them, Exchanging Shots, But hygiene and sanitation, musical instru-Not Succeeding in Making Any Captures-Bloodments, public works, civil engineering, constructive architecture, photographs and photographic supplies, medical, dental and surgical apparatus and othof er branches of intellectual activity. In-Somerset early to-day, by exploding a deed it is the most progressive and noheavy charge of nitro-glycerine in the vault ble of the tendencies and achievements doors, secured \$5,000 appropriated two livery rigs, held a posse of citizens at bay of this age of enlightenment and civiliand escaped in the face of a heavy fire. zation which are represented in the ex-Bonds and securities to the amount of \$30,-000 and \$5,000 in gold coin were over-looked by the bandits. The bank was fully hibits of this division of a great expo-

The work of collecting and classifying the Liberal Arts exhibit for the Pan-American Exposition is now well under way and is in charge of Dr. Selim H. Peabody, whose successful handling of the same division at the great Columbian Exposition of 1893 marks him as the best qualified man on the American continent for the discharge of such a task.

The exhibits of the Liberal Arts division as well as those of other departments will be concentrated and representative rather than vast in extent and exhaustive in scope. Most gratifying progress has been made since the World's Fair at Chicago in methods of education in the public schools, universities and colleges of the United States and other Pan-American countries. The educational exhibit will give special attention to exemplifying this great progress and showing the present state of our educational institutions. It is the intention to have models prepared representing the equipments of schools, colleges and universities. The exhibit made by the United States in the Paris exposition will be removed to Buffalo for the Pan-American and will be sup-

plemented with additional exhibits. Closely related to the educational exhibit will be those in social economy and in hygiene and sanitation. Under the head of social economy will be inwalks, turned the corner, clambered into cluded such subjects as charities and two rigs and drove in a northerly dicorrection, co-operative associations child labor, protection of workingmen country runs, lacrosse, cycling, basin factories and mines, workingmen's ket ball, roque, shooting, Caledonian dwellings, etc. fied by telephone and arrived at daylight with a pack of bloodhounds, which will be used in the chase. The robbers were suc-

ene is one of great practical impor- er sports.

baths by the progressive city of Brookline, Mass.

The exhibit of public works will be closely related to that of hygiene and sanitation, and among its features will be a model of the Chicago drainage canal and a large model also of the city of Boston and its vicinity within a

radius of 12 miles. I have not space now to speak of the exhibits of photographs and photographic supplies, of piano fortes and other musical instruments and of other features of the Liberal Arts exhibit, interesting though these will be. The whole field will be covered in a way to bring out the most attractive and educational side of the subjects illustrat-EDWARD HALE BRUSH.

Poultry Show.

Splendid Exhibit to Be Made at the Pan-American

In planning a great Exposition of the magnitude of the Pan-American, to be held in Buffalo next summer, where all the great industries of the United States will be represented by exhibits which will be of the best quality and character that can be produced, the wisdom of the management is shown in the magnificent preparations that are be-Stock.

In no line of breeding domestic animals has greater strides been made than in the poultry industry, and, while the interest taken in the Live Stock Division of the Exposition by prospective exhibitors is very encouraging, the poultrymen of the United States and Canada are manifesting an interest that is truly phenomenal. The poultrymen in the past few years have seen the industry double many times until today it exceeds in value any single farm crop. The annual sale of eggs, poultry and fancy birds for breeding purposes in the United States and Caninvolved. The time of this show will be most propitious to the fanciers-Oct. 21-31-and the accommodations will be all that are desired. The stables, covering ten acres, will all be devoted to the poultry and pet stock show.

Pan-American Sports. Will Be Held In a Stadium Seating Twelve Thous-

The popular sports of the Americans have been handsomely recognized by the Pan-American Exposition. A Stadium, beautiful in design, with a quarter mile track and ground area ample for the requirements of all the popular events proposed, is provided. It has a seating capacity of 12,000. The nature of the sports planned is varied. Amateur events of all kinds will be particularly encouraged as representing the most desirable of athletic competitions. There will be professional events as well. College sports will be made a feature, and intercollegiate events are being planned. There will be amateur and professional baseball, football, s, apprenticeship and lawn tennis, Marathon race, cross games, gymnastics, military maneu-The division of sanitation and hygi- vers, turning, cricket, bowling and oth-

ELECTRIC TOWER, WITH BALCONY OF COURT OF FOUNTAINS.

tance, and great progress has been made within a decade along this line. Indeed it may perhaps be said that the subject has become almost a science in itself, and certainly in its relations to the daily life of the people its importance cannot be too much emphasized. The exhibit at the Pan-American Exposition, which is under the immediate supervision of Dr. Jacob S. Otto, an authority in this branch of science, will comprise such subjects as physical culture, and the apparatus used in various institutions for this purpose-hospitals and dispensaries, boards of health-and their functions, foods, their chemistry, preservation and adulteration; mechanical methods of sanitation and sanitary architecture. The improved methods introduced into municipal departments in recent years will be shown as graphically as possible. In many cases models will be used for this purpose. Maps and models showing the disposition of the dead will be features of the exhibit in this division. Sewer drainage will also form an important part of the exhibit. Especially timely, in view of the tenement house investigation recently conducted by a state comsion appointed for that purpose, will be the exhibit to be made by the Charhomes in tenement districts of great cities. Of interest in the same connec-

Magnet for Farmers. Great Display In the Division of Agriculture at

Exposition. The prominent display in the Division of Agriculture at the Pan-American Exposition will be the magnet that will attract progressive farmers. Here they can learn what their brother farmers are doing to lighten labor and improve the products of the fields. The exhibit will embrace all phases of agricultural work, showing the advantages of different processes and methods of work and the products of the garden and field in their great variety under all sorts of conditions. Under their proper classifications will be shown methods of fertilization, farm management and processes, experiments with various crops in different soils, climate, etc.; reports from different states and provinces showing the aggregate of crops and products of garbage in cities and the cremation of all kinds; exhibits of all products of the farm and garden. This will be a splendid school of instruction for the farmer.

National Museum.

The exhibit of the national museum, under the auspices of the Smithsonian Institution, at the Pan-American Exposition will be of absorbing interest. It will display the resources of North, South and Central America, the West Indies and the new possessions of the United States. Representatives of the tion will be the exhibit showing what | institution are now gathering an abunis being done in the way of public dance of new specimens.

Manila's Big Sensation.

rauds Said to be Unearthed. A Quartermaster, A Contractor, Several Clerks and Others Are Under

Interest in the capture and fate of Aguinaldo is well nigh overshadowed in Manila by sensational developments, present and prospective, of frauds in the commissary department. How long this delay will continue has not been ascertained but enough is already known to justify the belief that they are far-reaching.

Captain Frederick J. Barrows, of the Thirtieth volunteer infantry, quartermaster of the department of Southern Luzon, together with such commissary sergeants, several civilian clerks, a prominent government contractor, the assistant manager of the Hotel Oriente, the proprietors of three of the largest bakeries in Manila, a number of store keepers and other persons

have been arrested. The investigation has scarcely begun, but thousands of sacks of flour, a quantity of bacon and wagon loads of other goods, all bearing government marks, have been found in the possession of unauthorized

It is alleged that the contractor in ques-tion, who has been doing a business approximating \$100,000 per month, has spent huge sums in entertaining officers. prominent commissary officer is accused of leading a scandalously immoral life.

New scandals are developing daily. Illicit

transactions have been traced back to ing made for the Division of Live June, 1900, and it is possible that there are others of earlier date. The exorbitant taxes on provisions,

makes the surreptitious sale of commissary supplies immensely profitable. It is understood that other United States

officers may be arrested. Lieutenant Philip K. Sweet, of the Forty-sixth volunteer infantry, is prosecuting the investigation, under the direc-

tion of Colonel Wilder, chief of police. It was said at both the White house and war department that absolutely nothing had been received by the government regarding the alleged unearthing of crooked work on the part of the army quartermaster and others in Luzon and the arrest of a number of persons in and out of the army, for stealing property of the government or reada exceeds \$1,000,000,000. The proposed show at the Pan-American will be fully adequate to the great interests that such developments might be expected. He said he was inclined for this reason to think the frauds against the government could hardly be so serious as reported, though admitting this opinion was based wholly on the lack of advices from the government. Captain Barrows, he said, not the regular quartermaster for southern Luzon and must have been acting quartermaster at the time of the arrest.

Good Time Coming, Girls.

"The girls that are growing up now will have an advantage over the young married women of to-day "What's that?"

Medical.

TMPORTANT ADVICE.

It is surprising how many people wake up in the morning nearly as tired as when they went to bed, a disagreeable taste in their mouth, the lips sticky, and the breath offensive, with a coated tongue. These are nature's first warnings of Dyspepsia and Liver Disorders, but if the U.S. Army and Navy Tablets are resorted to at this stage they will restore the system to a healthy condition. A few doses will do more for a weak or sour stomach and constipation than a prolonged course of any other medicine 10c, 55c. and \$1.00 a package. U. S.
