SPRING.

Before the strongest cherry bloom Has burst its silver coat of mail, From sky to earth is spread a loom To weave the springtime's bridal veil.

The loom is hung from star to star: The threads are silver wires of rain; And tender winds the handmaids are, Who, sighing, weave, then pause again.

I hear their shuttles in the trees; The sunshine lends them strands of gold; While light and high above their knees Rise bridal garments, fold on fold.

And now among the misty bowers The loom has stopped—the cuckoos sing On airy paths of cherry flowers Comes viewless—yet so sure—the spring!

The Richest Farmer.

William Scully, an Irishman, Who Prefers to Be An

William Scully owns a greater number of farms than any man in the United States. Their aggregate area is 200,000 acres. They are worth \$10,000,000. They are located in Central Illinois, Western Missouri and Kansas. They represent the accumulation of 50 years of the life of their

He is the richest farmer in the richest agricultural section in the world. His wealth is said to be \$25,000,000. William Scully came to this country shortly after the Mexican war for the purpose of invest-ing his money. He choose to put it into farming lands.

At that time he was William Scully, gentleman of Ballecohey, Ireland. Now he is William Scully. American citizen, owner of the John A. Logan residence in Washington and multi-millionaire. Ever since he came to America he has been either Lord or Viscount Scully, although he never gave anybody reason to believe that he held a title. He is not a lord. Neither is he a viscount. In 1897 the Illinois Legislature modified the alien land owner law. This viscount. In 1897 the Illinois Legislature modified the alien land owner law. Nobody ever heard of a sale of Scully land except a farm purchased in Sangamon county. Illinois, by former Governor Richard J. Oglesby. Nobody ever heard of a mortgage on a Scully farm. At Butler, in Bates county, Missouri, there are 125 Scully tenants, and they lease their lands for cash, paying from \$1.25 to \$2 an acre, and make their own improvements.

The Scully agents are particular about leases. The farmer who applies for one of them must be a practical farmer. His stock must look well fed. His machinery must show good care. He must have a good reputation, be temperate and pay his debts. He must not quarrel with his

Frank Cranmer, injured. O'Conner and his wife were entertaining the Cranmer couple, whose home is in Bradford county. During the evening they visited relatives in Wilkesbarre and at 1:30 sunday morning, started to return to the home of the O'Connell's. When they reached the crossing at South Wilkesbarre, a freight train was blocking it. As soon as the freight train moved out, the party started to cross the tracks but did not notice the approach of the passenger train from an opposite direction. The engineer of the express failed to see the people on the track until the locomotive had plowed into them. The two women were hurled a great distance in the air and when picked up were dead. Both bodies were badly mangled. Mr. O'Connell had both legs and one arm broken. He was taken to a hospital where he died in a short time.

The Czar and His Foes.

Nicholas II the Victim of Harsh Circumstances He

By one of the ironies of politics the most humane and progressive monarch who has been on the Russian throne in many years is being beset by a more formidable combination of enemies at home and abroad than has ever menaced a member of his house in the past half century. The Manchurian issue has aroused the enmity not only of China, but of Japan and England, and has excited the distrust of Germany, and to some extent, of the United States. At the present moment the outlook as regards Russia's relations to Japan is warlike. Japan is the one power of the world which would be most formidabte as an enemy of Russia. Japan has been jealous of Russia for many years. It was Russia that stepped in at the close of the war between Japan and China in 1894 and deprived Japan of the fruits of her victory. Some of the other nations, especially France, were with Russia in that episode, but Russia was the directing spirit in the demonstration. But the enemies which he has at home

are the real foes which the czar has to fear. That demonstration of the students has aroused sympathy among other classes of the Russian population, and has revealed a weakness in the Russian political system which has been kept concealed from the people of the outside world. A revolutionary agitation is under way throughout Poland which may prove a disturbing factor in Russian politics should the situation in Manchuria increase in gravity. A war with Japan would undoubtedly have the effect of inciting risings in Finland, for the abolition of Finland's autonomy in the past year by the czar has aroused the hostility of that province, and has sent tens of the words of its vince, and has sent tens of thousands of its people to the United States, Canada and other parts of the world. Stories of plots against the czar's life comes from St. Peagainst the czar's life comes from St. Petersburg with startling frequency and circumstantiality these days. The precautions which are being taken against assassins remind the world of the days when Alexander III, the present ruler's father

and predecessor, was hunted and hounded like an ordinary malefactor.

Alexander II, the emancipator of the 24,000,000 serfs, and the most liberal monarch at one time or in one reign, bring the sweeping transformation in the politics of Russia which the agitators want, and which will have to come, though the movement will be gradual, before there can be eternal peace in Russia. The aristocrats are against any change which would give political power to the lower or middle classes. This upper caste, and not the monarch himself, is probably the real enemy of the men who are demanding a constitution, and who compose the class who menace the czar. Thus Nicholas II, providing he is humane and progressive as the world supposes him to be, is a victim of circumstances which he, though technically an autocrat, cannot control, and may at any moment feel the doom which his reactionary father escaped, but which was met by his benevolent and enlightened grandfather, the
