

FARM NOTES.

Many common evergreens can be transplanted from the woods with ordinary care...

For sores in calves give two or three tablespoonfuls two or three times a day of powdered charcoal until a cure is effected...

If the weather becomes warm do not be tempted to plant beans, squash, melons or sweet corn until May.

Salt is a constituent of every part of the animal as well as the human body, and enters largely into the composition of the blood.

One of the things that should be known by farmers is that nitrate is very soluble and is easily carried away by heavy rains.

The Southdown sheep has long held a leading place for quality of mutton produced. This breed is well known to American farmers...

Lambs born in the winter months can be raised successfully, provided one has a warm stable, that is, such as can be closed against all currents of air...

Provisions should be made for feeding the ewes indoors, that it may not be necessary to remove them after the lambs are born...

The lambs should have an apartment accessible to themselves only, in which feed must be constantly kept.

Lambs thus fed should, at the age of six weeks, eat one pint of meal or cracked corn per day, and will be gaining at the rate of one pound daily.

Now that spring is here a few words upon turkey raising will not be out of place. In the first place try to have the hens lay their eggs in a pen or poultry house where they can be gathered before they chill.

When the poults are all out and dry remove to a roomy dry house with plenty of sunlight and place the hens with them.

Keep clean water and crushed oyster shells continuously before them. Keep the poults confined three days, then if the day is bright let them out on the grass in a pen made of 12-inch planks set on edge.

FOR AND ABOUT WOMEN.

White pearl buttons that look like mere specks are extensively employed on the thin gowns.

Some of the swiftest of the shirtwaists from Paris are buttoned down the back.

Golf and cycling shirt waists do not vary much from the ordinary shirt waist, says Harper's Bazar...

There are flannel shirt waists, moiré shirt waists, and the wash silks—and these last are the smartest of any this year.

Aphorisms for Children.—Animal food once a day and in small quantities, if the teeth can masticate, is necessary to a rapidly growing child.

Avoid a too nourishing diet in a violent-tempered child.

Avoid seasoned dishes and salt meats, pastry, uncooked vegetables, unripe fruit, wine and rich cake.

Never tempt the appetite when disinclined.

Insist on thorough chewing; a child who eats too fast eats too much.

Vary the food from day to day, but avoid variety at one meal.

Take care that the child's food is well cooked.

Wine, beer and confections should never be given a young child.

Give no food between meals; the stomach requires rest, like any other organ of the body.

Remember that overfeeding and the use of improper food kill more children than anything else.

Give no laudanum, no paregoric, no soothing syrup, no teas.

Remember that the summer complaint comes chiefly from over-feeding, and the use of improper food, but never from teething.

When children vomit and purge give them nothing to eat for three or four hours.

Do not bring a child under three years of age to your table to eat.

To keep the skin clear of freckles requires constant attention and frequent applications, since exposure to freckle-creating sunbeams will cause them to return.

Here is a formula for a freckle lotion: borax, 60 grains; potassium chlorate, 240 grains; alcohol, 1 dram; glycerine, 2 drams; rose water, sufficient to make 3 ounces.

School girls are having attractive frocks made up for the summer in the Russian blouse style, like those of the small children, says Harper's Bazar...

In the choice of furniture, varnished oak is not recommended. The old finish, that the wood may darken with age, is to be preferred.

Milk is the latest and most approved dietetic food. The woman who is fair and with 40 staring her in the face and who is determined not to be fat makes her breakfast and lunch of milk and fresh fruit.

Trimming of Trees and Vines.

A Timely Article by an Expert.

As we are arranging our work for spring there is one thing very important to be considered, and that is the trimming of our trees, vines and shrubs.

We should in the first place study the general disposition of the tree or vine to be trimmed and comply with their nature as near as possible.

The present and the future form of the shape. If it be fruit trees and we desire low heaps we should begin to trim when small in such a manner as to lead and encourage the growth of the tree in that direction.

What would you think of a surgeon who would operate on a patient, who had a broken limb, with an axe or saw, and not stich or bandage the limb after operating on it?

COURT PROCLAMATION.—Whereas the Honorable J. G. Love, President Judge of the Court of Common Pleas of the 4th Judicial District, consisting of the county of Centre having issued his precept, bearing date the 1st day of March, 1901, to me directed, for holding a Court of Oyer and Terminer and for holding a Court of Sessions of the General Jail Delivery and Quarter Sessions of the Peace in Bellefonte, for the county of Centre and for the 22nd day of April, 1901, and to continue two weeks, notice is hereby given to the Coroner, Justices of the Peace, Aldermen and Constables of said county of Centre, that they be then and there in their proper persons, at 10 o'clock in the forenoon of the 22nd with their records, inquisitions, examinations, and their own remembrance, to do those things which to their office appertain to be done, and those who are bound in recognizance to prosecute against the prisoners that are or shall be in the jail of Centre county, be then and there to appear and answer as shall be just.

Given under my hand, at Bellefonte, the 1st day of Mar., in the year of our Lord, 1901, and the one hundred and twenty-fourth year of the independence of the United States. CYRUS BRUNGBART, Sheriff
