-It has been just a few days over five years since the terrible Ettlinger tragedy at Woodward sent a thrill of horror all over Centre county and directed the attention of a startled public to the lower end of Pennsvalley. That vicinity was the scene of another act in a terrible drama on Monday morning and one of the participants was laid in the grave on Wednesday, while the other hangs between life and death with a bullet from a 32 calibre revolver somewhere in her abdomen.

The usually placed town of Millheim had scarce awakened to the work of the new week Monday ere it was shocked with the dreadful knowledge that a would-be murderer was lying dead-a suicide-by the road side, hardly two hundred yards from the public square.

Jesse A. King had made a murderous asmusic for the Academy reception and tea then, when he saw the officers approaching sault on his bride of only two months and to arrest him, sent a bullet from the same weapon into his own body, just below the heart, causing death a few moments later.

> King was 26 years old, a son of Abram and Diana King, of Millheim, and a brother of Coburn King, who was in court here several years ago for stabbing a man at Millheim. He was always considered an erratic boy, one who was teased by everyone and consequently was subject to frequent displays of violent temper. Feb. 21st, 1901, he was married to Junie Mowery, a daughter of Henry and Mary L. Mowery, of Aaronsburg. Some people say that their marriage should never have been permitted, since neither one of them was physically sound.

King took his bride to a little house he had secured at "Texas," near Millheim, but they soon had trouble because Mrs. King complained that Jesse did not provide enough to eat. Dissension continued until she left and went to live with her sister at Spring Mills. On Saturday she returned to her mother's home at Aaronsburg and learning that she was there Jesse went over and persuaded her to return to Texas with him, next day. While she went she insisted that she would not stay, so in order to keep her Jesse hid her waist and shoes. When she arose Monday morning and was unable to find all of her apparel more trouble followed. Jesse had locked himself in one of the two rooms on the first floor of their house and she broke into where he was; whereupon he pulled out his revolver and shot her, the ball entering her abdomen about the waist line on her and kidney and lodging just under the back-as is indicated by a dark blue spot in that region.

Immediately after the shooting King ran home of his mother, nearby. Evidently he had remorse for what he had done, for he tried to persuade his mother to go back with him and do something for Junie. Up he had done and when he told of his terri- of the heavy sufferers through the great were Goldie Cain, Edna Meyers, Louise ble deed his old father staggered back, say- fire that swept that city last week. There is no telling what he might

have done had he gained an entrance.

We leave the record here for a moment to turn to the girl who was heartlessly shot down by the man who, only two months before, had promised to love and protect her. After he had run out over her prostrate body she struggled to her feet and dragged herself off to Millheim for aid. As it happened the nearest approach to that place brought her out at the office of justice of the peace F. P. Musser. She entered and told her terrible story. A warrant was at once sworn out and constables P. P. Leitzel and W. N. Auman started with a horse and buggy to arrest their man. They met him walking along the pike in front of Frank Kerns' house. Wm. Reifsnyder was with him at the time. The officers at once explained their business to King when, as quick as a flash, he reached in his inside pocket and pulling the revolver placed it to his heart and fired. The bullet entered just below his heart. The officers were horrified but they got him into their buggy and hurried toward Millheim. They only the road near the Neiman home where he

These dates, coming as they do more than a month earlier than the ones on which the fair was held last year guarantees that the next fair will far surpass in grandeur the successful inaugural event of 1900. It will be the week following the Williamsport exhibition and as the latter follows the meets of the famous Erie circuit racing association the gentlemen have decided to hang out purses that will attract all the fast horses from those great contests. In every respect the coming fair will be made superior to anything of the kind ever held in this section. Last year there were more than seventy-five horses here to contest. This fall there will be more still. The acrobatic and amusement features will be far more novel and diversified, because it will be so much earlier in the season that better ones can be pro-

Of course there is little chance of making yourselves rich through premiums at a fair -and no one expects to do it-but a thought about the matter now might result in taking several prizes with some of your closing of any of the other departments products, thus paying your expenses during fair days and giving you a delightful outing after the harvest is over, as well as the pleasurable pride every farmer should take in excelling in some line or other.

There wasn't a person-horseman, exhibitor or patron-who left the fair grounds last fall dissatisfied. It was a record to be proud of for young men, novices, we might say, at the business and it was the sense of all present at the meeting Tuesday night that no effort dare be shirked toward making the second fair far greater than the
